HIDES AND SKINS.—There is some little excitement in the local market, the result of an advance of ½c. per lb. in the price of green hides. Merchants are now paying 9½c. for green cow hides and 10c. for steers. As cured cow hides are quoted at 9¾c. it will be seen that there is a very small margin in the trade for dealers. The advanced prices are due to local competition, although there is pronounced strength in the hide situation in both Canada and the United States. No one would grumble about the excessive values of hides, however, if tanners could only secure prices for leather more in keeping with the cost of raw material. Advices from Chicago, Jan 25, say the market is very firm. Offerings of hides are limited, particularly of native steers, and prices remain unchanged and firm. The close was at 11¼c. for native steers; 9½ to 9¾c. for light Texas; 10 to 10¼c. for heavy ditto; 10 to 10¼c. for butt brands; 9 to 9¼c. for Colorados; 9½c. for branded cows; 10½c. for heavy native cows, and 11c. for light ditto.

LEATHER.—Trade conditions show no special change. The movement in general lines of black leather is not active, but an improved trade is confidently looked for in February. Several sales of sole leather are reported during the week, which aggregate a considerable amount. There is a good market in the United Kingdom for sole at the present time, and although the trade is not done on the basis of immense profits, we believe prices of sole afford a moderate margin for the tanner.

PROVISIONS.—The dressed hog market is firmer this week, and dealers quote advanced prices as follows: Light weights, $6.30 to 6.40 per cwt., and heavy weights, $6 to 6.10 per cwt. The receipts are fairly good. There is no activity in products, but the demand at this season of the year is not usually very active. The strength in the market is in part due to the position of the Chicago market. An authority says of the situation there: "The continued smaller run of smaller hogs has had the effect to modify the views of packers, who have been taking a bigger supply of hogs this year than last; and it now looks as if there will be no continued heavy receipts the balance of this season, which is now nearly within one month of its close, notwithstanding bad country roads, have no doubt kept back some hogs this week. But the continued falling off in weight at Chicago nearly since the season began seems to contradict the theory of an excessive hog supply. As a result, stocks have not increased as usual at the height of the season, and we shall go into the summer packing with comparatively small stocks, measured by the large accumulations of average years.

SEEDS.—A quiet and unchanged market is reported in the seed trade. Deliveries have not been at all free, although offerings of red clover show a slight improvement over those of last week. Alsike is coming forward very slowly, while timothy is moving in the same way. We quote: Red clover, $2 to $4; alsike, $2.50 to $4; and timothy, $1 to $2, according to quality.

WOOL.—The local market is quiet and without change. Canadian mills, as we elsewhere note, are active, and wool is, as a consequence, in better demand. At the series of London wool sales, the first for the year, now in progress, Australian merinos were firm and hardening. Queensland and New South Wales greasies sold at extreme figures, largely to the home trade. Under the influence of combined competition between home buyers and American operators crossbreds sold well at improved rates. German purchasers were most anxious regarding scoureds and secured the bulk of the offerings of this sort at full rates, Russia, however, taking a few suitable parcels. Cape of Good Hope and Natals were in small supply and the advance was maintained. Among the offering were several lots of Spanish wool, but there was little enquiry and most of it was withdrawn.

MONTREAL MARKETS.

MONTREAL, 26th Jan., 1898.

The old-time snowstorm of last Sunday, reminding Montreal people of the storms of their boyhood's days, has interfered somewhat with communication and business with interior points in this Province and the Ottawa Valley. The effect upon locomotion, driving or hauling in the city was to hamper all three for a time, since 17 inches of snow in our narrow streets is an incumbrance. But, gradually, the principal business streets were made passable.

ASHES.—The receipts last week were under 10 brls., and the present stock in store would not exceed 30 brls. Under ordinary circumstances such a state of affairs would create a sharp advance, but there is practically no demand for ashes, and letters from England are to the effect that the cheaper German mineral substitutes are steadily displacing Canadian ashes. Quotations are wholly nominal, at about $3.40 to $3.45 for first pots, seconds $3.15, pearls $4 80 per cental.

CEMENTS AND FIREBRICKS.—Trading is dull, as is natural to the season. Lent prices are very steady at $2 10 to $2.20 for British brands of cement, and $1.95 to $2,05 for Belgian; bricks $17.00 to $22 00.

DAIRY PRODUCTS.—The cheese market has again assumed a very dull phase, with cable quotations sixpence lower than a week ago, and quotations for finest grades do not exceed 8¼ to 8½c. per lb. at the outside. In butter also but a small jobbing demand is reported, and quotations are for finest creamery 18½ to 19c., fine dairy 15 to 16½c., medium grades 12 to 14c, rolls 14 to 14½c. A good demand exists for eggs, 25c. being realized for strictly new laid, limed 13½ to 15c., and No. 1 candled 15 to 16c. per doz.

DRY GOODS.—Trade in this line may be called good. Freer buying on the part of country retailers is the rule, and some of the larger houses report the receipt of particularly good orders. Quite a few remittances against payments due the 4th prox., which is a pretty heavy day, are already being received. The expected advance in prices of underwear, has taken the shape of a curtailment of the credit terms upon such goods.

FISH.—The demand in this line is not very brisk at the moment, and supplies are fair, excepting bloaters and smoked herrings, which are scarce. We quote:—Green cod, No. 1, $3.50 to 3 75; No. 1, large, $4.25; dry cod, $3.50 to 3.75; No. 1 herrings, $4.25 to 4.75; N. S. salmon, $12 to 13.00; B. C. ditto, $10 50 to 11.00; sea trout, $6.50 to 7.50; haddies, 6 to 7c.; bloaters, $1 to 1.25 per box; boneless cod, 4½ to 5c. per lb.; whitefish, $4.75 to 5.00 per barrel.

FURS.—Cable reports regarding the London sales now in progress show a general advance on the prices of last spring, but some dealers say that in certain lines the advance is not up to expectations, and the improvement in values has been fully covered by the prices that are being paid for the season's catch, on spot, so that higher quotations here are hardly to be expected, except, perhaps, in some odd lines. Western and southern coon, sold 10 per cent. to 25 per cent. higher than last March; northern as last March; mink, 20 per cent. higher than March; skunk, 12½ per cent. higher; red fox, 12½ per cent. higher; otter, 10 per cent. higher; marten, 10 per cent. higher; black bear, 25 per cent. higher; brown bear, 5 per cent. lower; possum, same as March; also lynx; wild cat, 40 per cent. higher; badger, 40 per cent. higher; wolf, 70 per cent. higher; beaver, same as last January; spring rats, 20 per cent. lower than January, 1897; fall rats, 20 per cent. higher, and winter ditto, same as last January. There is general remark that the receipts of raw furs this season, in Montreal, are smaller than usual. We quote:—Mink, large dark, $1.50; small, do., $1.00 to 1.25; marten, $1.75 to 2.25; fisher, $4.50 to 7.00; lynx, $1.00 to 2.00; otter, $1.00 to 12.00 for dark; pale, $5.00 to 7.00; red fox, large, $1.30 to 1.50; small, $1.00; cross fox, $3.00 to 6.00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large, $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7c. to 10c. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

GROCERIES.—The snow storm of 23rd and 24th has interrupted business with interior points in Quebec and the Ottawa valley, but the distribution going on may be called a fair one. There is somewhat of a lull in the speculative buying of canned goods, probably due to the fact that jobbers are not disposed to sell except to their own customers, and prices are quite as firm as last noted, $1.25 being got for tomatoes; corn, 85 to 90c.; gallon apples, $2.50 to 2.75. In canned fish, lobsters are scarce and dear, at $9.50 for talls, and $10 50 for flats; good salmon can be bought at $4.50, and $4.80 for "Clover Leaf." Currants are really scarce,

Gold Medals, Paris, 1878 : 1889.

JOSEPH GILLOTT'S PENS

Of Highest Quality, and Having Greatest Durability are Therefore CHEAPEST.

METALLIC CEILINGS

One of our Designs

These ceilings are made in a great variety of designs, suitable for every description of buildings, including Hospitals, Churches, Schools, Asylums, Convents, Opera Houses, Offices, Stores, Residences, etc.

The many advantages of their use as a modern substitute for wood and plaster lie in the fact that they are light in weight, will not crack nor drop off, consequently no danger of falling plaster; are unquestionably durable, have air-tight joints, are easily applied, are practically fire-proof, are highly artistic, **do not harbor vermin** or **the germs of disease,** and possess splendid acoustic properties, in addition to many other points of excellence over any other form of interior decoration.

and good Provincials are quoted at 6 to 6½c., while for Vostizzas 7½ to 8c. would be asked. For dried apricots, peaches and prunes there is good demand at steady prices. Dried apples are quoted at 5½c. and evaporated ditto 9½ to 10c. In the tea market there is still a lack of activity, but all values are steady, and the New York market for low and medium grades is particularly firm. A representative of a large Japan house is here this week, already soliciting orders for new crop. The demand for sugars has not revived as yet, and the factories are idle. In New York granulated went off an eghth on Monday, but local quotations are the same as given last week.

Hides —No new feature markes the situation. Dealers continue to buy beef hides on the basis of 9 to 9½c. for No. 1 green, but find it difficult to get beyond 9½ to 10c. for cured from tanners, who are fair buyers at those figures. Few calfskins are yet coming in, 8c. and 6c. per lb. is being paid for Nos. 1 and 2 respectively. Lambskins bring 90c. to $1 each.

Hops.—Some moderate sales of choice hops are reported at 16c., and of good at 13 to 14c., but brewers are not very liberal buyers. Yearlings are hard to move, and are quoted nominally at 6 to 7c.

Leather —In the local demand there is no special activity, though deliveries on contracts made in the fall are going on steadily. The English demand is better, and we hear of some moderate lots of splits being shipped in answer to requests for consignments, for which good prices are predicted. The export of sole is steadily maintained. Some Quebec tanners are said to be asking 20 to 21c. for best splits. We quote: — Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 18 to 21c.; juniors, 15 to 17c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.: Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 12½ to 13c.: polished buff, 11 to 13c.; glove grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

Metals and Hardware.—Little new is to be noted in these lines, except that domestic bar iron is firmer, $1.40 now being asked for car lots, and $1.50 in small parcels. In pig iron there is no volume of business doing; some car lots of Hamilton iron have been placed at $16, but in Scotch brands little business is reported. We qnote:— Summerlee pig iron, $18.00 to 18.50; Carron, No. 1, $18.00; No. 3, $17.25; Ayrsome, No. 1, $17.00; No. 3, $16.50; Shotts, $17.25 to 17.50; Carnbroe, $17.00, ex-store; Siemens pig No. 1, none; No. 2 Siemens, none; Ferrona, No. 1, $15.00 to 16.00; Hamilton No. 1, $16.00 to 16.50; No. 2, ditto, $15.50 to 16.00; machinery scrap, $1400 to 15.00; common ditto. $12.00 to 13.00; bar iron, Canadian, $1.35 to 1.45; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, No. $2.15; 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates —Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do, I.X., $3.90 to 4.00; P. D. Crown, I. C., $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2 90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, etc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1.50; three-sixteenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.60 sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 15¾ to 16c. for L. & F.; Straits, 15¼ to 15½c.; bar tin, 16½ to 17c.; ingot copper, 11¾ to 12½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.50 to 4.75; American spelter, $4.50; antimony, 8 to 9c.

Oils, Paints and Glass.—Orders for spring shipment continue to come in quite freely, and several houses consulted express satisfaction with the amount of business doing in this respect. With regard to values no recent changes have developed. The linseed oil market is reported to be in much more satisfactory shape than for some time past, and the late advance is expected to be steadily held: Turpentine, too, is firmer at the advance of a fortnight ago. We quote: — Turpentine one to four barrels, 51c.; five to nine barrels., 50c., net thirty days. Linseed oil, raw, one to four barrels., 45c.; five to nine barrels, 44c.; boiled, one to four barrels, 48c.; five to nine brls., 47c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 1.55 to $1.60 in bulk, $1.70 to 1.75 in bladders, $2 to 2.10 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00. Paris green, 50 and 100 lb. drums 15c.; 25 lb. drums, 15½c.; 1 lb. cartons, 16c.; pound tins, 16½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

Wool.—The mills continue busy, and importers of raw wool report more business doing at this time than for several years past. Fair sales of fine B A's are reported at 30c. to 34c., and of cross breds at 27c. to 30c.; Cape sells at 14½c. to 16½c. as to grade, and Natals at 16c. to 17c. Few Australians on spot, except a few cross breds at 24c. to 30c. There is no stock of domestic here. Some 500 bales of Capes are due here in about ten days, besides a full cargo already reported by us several weeks ago as having left the Cape. The London sales now in progress have developed an advance of 5 to 10 per cent.

Queen City Chambers, Church St., Toronto.
DIRECTORS:
AS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

Extended Insurance

Is granted by the Unconditional Accumulative Policy of the Confederation Life Ass'n. Under this provision the full amount of the policy is, in the event of the non-payment of the third or any subsequent premium, extended as a term insurance, and the policyholder is held fully covered for the full face value of the policy for a term of years definitely stated therein.

Paid-up and Cash Values are also guaranteed.

Rates and full information sent on application to the Head Office, Toronto, or to any of the Association's Agents.

METAL AND MINERAL PRODUCTION IN 1897.

The value of the total mineral and metal production of the United States for the year 1897 amounted to $762,061,106, of which $257,451,172 was for metals and $504,609,934 for nonmetals. These figures show a total increase of $18,290,228 over 1896. The most prominent item in value was coal, the total being 194,500,000 short tons, or 8,000,000 tons more than 1896, with a value of $205,000,000. The copper production was 475,338,340 pounds, an increase of 7,715,367 pounds over 1896. The gold production reached $55,000,000, an increase of about $2,600,000. The United States slightly exceeds the Transvaal and still holds the first place. The silver output was 56,117,000 ounces, a decline of about 2,250,000 ounces. The quantities of all the important metals, such as lead and zinc, show large increases. The total gold production of the world in 1897 is estimated at $241,391,639, showing an increase of $29,249,418 over that of 1896.

Commenting on these figures, the *Engineering and Mining Journal* says: "The United States has not only been the heaviest producer of gold, iron, steel, copper, lead and zinc, but has also been a large exporter, sending abroad 128,300 tons of copper, $55,000,000 worth of silver, nearly 200,000 tons of pig iron, and a large quantity of steel and manufactured iron products. This country's pig-iron product in 1897 was 9,491,976 long tons, the largest production on record in any country; value, $91,123,000, or $9.50 per ton, against $10 50 in 1896. The year's lead product of the United States increased 20,000 tons. Of the coal production, 145,000,000 tons, value $118,700,000 was bituminous. The United States nearly equals Great Britain as a producer and exceeds it as a consumer of coal. Coke production was 11,774,000 short tons, value $21,446,000, a large increase. Petroleum, $52,734,000; salt, $6,386,000; soda, $4.000,000. Nearly everything increased largely in quantity, but was cheaper than in 1896.

THE BANK OF FRANCE.

Comparatively few persons in this country outside of financial circles have any knowledge of the enormous operations of the Bank of France, an institution more powerful in some respects than the Bank of England. Think of a bank having a note circulation of eight hundred million dollars (4,000,000,000 francs), and having almost one hundred branches in the different provinces, then one can form a faint idea of this remarkable institution, whose powers and privileges are to be still further enlarged under the new charter which has passed both the Senate and the Chamber of Deputies.

Regarding this new charter, Bradstreet's says:

It renews the privileges of the bank for 23 years; but they may be terminated at the end of 15 years. A permanent advance of 180,000,000 francs, or $36,000,000, is to be made to the Treasury without interest, but this sum is to include the 140,000,000 francs, or $28,000,000, thus advanced at present. There is to be an increase in the number of branches in the various provincial cities and towns from 94 to 112, independently of auxiliary bureaus in places where branches already exist, and the creation of 30 new branches within two years and at least one new one each year after 1900 up to a minimum limit of fifteen. The note circulation is also to be greatly expanded, the new charter fixing the maximum amount at five milliards (5,000,000,000 francs, or $1,000,000,000), in place of the present four milliards (4,000,000,000 francs, or $800,000,000). Another provision indicative of the manner in which the French Government proposes to share in any profits of the Bank of France is that relating to the rate of discount. The new charter provides that should the rate rise above 5 per cent., one-fourth of the surplus profit arising therefrom is to be added to the reserves of the bank and three-fourths surrendered to the State. It is also provided that there shall be annually paid to the State a sum calculated at one-eighth of the rate of discount in the bank's productive note circulation, but with a minimum for this account of 2,000,000 francs.

While the bank has enormous privileges, and little or no competition, it is compelled to pay well for its whistle. In plain words, it is "bled" by the Government, and is compelled to shoulder a large share of the financial burdens entailed by the great national debt. The relations between the bank and the Government are peculiar. In fact the Bank of France is an altogether unique institution, well worthy of the careful study of students of economics.

ODE TO THE OWING.

You may talk about the tariff, and protection, and free trade,
And party panaceas for suppressing human ills,
And "improving trade conditions." and the boom that wheat has made,
But the way to stir up business is to pay your little bills.

If you owe the grocer twenty, and he owes the butcher ten,
And five more to the coal man, and to the ice man five,
Your payment of the twenty helps along three business men,
And the payments they can make in turn make other people thrive.

AN EFFECT OF "CULTURE."

Steamboat men, lumbermen, and miners are generally held up to view as being particularly free-and-easy in manners and speech. And all three of these classes have each a lingo of their own, which is peculiar. Commercial terms or abbreviations there are, in all businesses, which are puzzling to all uninstructed persons, but they are as necessary in the way of business as they are arbitrary and odd. The American *Lumber World* tells a story of a very refined and cultured young lady stenographer who recently "accepted a position" in a western lumberman's office. The first letter dictated to her in that establishment contained references to "bill stuff," "commons," "uppers," "plain," and similar stocks, and when she transcribed her stenographic characters, she permitted her refined and cultured nature to have full sway, and metamorphosed "bill stuff" into "William Material," "commons" into "plebeians," "uppers" into "fashionables," and "plain" into "unornamented." The old man of the lumber house was simply hysterical when he saw the effects of "culture" and "refinement" on the homely and vigorous vernacular of the lumber yard, and he was sorry he had not hired the freckled and red-headed young demoiselle who was the first applicant for the position. Some of his customers, on reading his communications, tumbled to the truth, but other unregenerated and unimaginative fellows simply made up their minds that the old man had been salvationarmyized.

FRENCH RAILROADING.

An amusing incident took place lately at the railway station at Havre which beautifully illustrates the value of the French regulation of locking up travelers in the waiting rooms up to the moment of their departure. A train was to start at a certain time for Montevillers, a small town about a half an hour's journey by rail from Havre. Away went the train, and in due course of time it reached its destination. The guard hastened to open the doors of the carriages, and was surprised to find them all empty. All the persons who had taken tickets for that train had been left safely locked up in the waiting-rooms at Havre, the official who ought to have unfastened the doors and announced the moment of the train's departure having forgotten to fulfill his duty. A special train was prepared as quickly as possible, and the travelers were finally despatched to their destination after a long and vexatious delay.—*Paris Letter.*

A GOOD ONE ON W. K. VANDERBILT.

A pretty good story is told of Engineer Simpson, one of the veterans of the Maine Central service. One summer when Wm. K. Vanderbilt's car was at Mount Desert ferry, the general manager of the Maine Central sent a locomotive down there to take the car to Portland, whither the millionaire desired to go. Simpson was the engineer, and he pulled the car along towards Portland at a surprising rate of speed. At Brunswick a stop was made for water, and here Mr. Vanderbilt got out and requested the old engineer not to drive so fast. Simpson eyed the nabob a quarter of a minute, and then replied: "I am running this under orders from Payson Tucker to be in Portland at 1.07. If you want to stop here, all right: if you want to go to Portland, get in." Mr. Vanderbilt got in.—N.Y. *Sun.*

WELLAND VALE WHEELS.

The increased demand for these popular bicycles has necessitated the leasing of the ground floor of the Masonic Temple building, on Ontario street, as a storage warehouse, and yesterday nearly a thousand wheels, boxed and addressed, were placed there ready for shipment. The demand for the '98 Welland Vale wheel is phenomenal. This season's business is going to be a record breaker, and those who do not have a Welland Vale mount will simply not be in it.

Aside from the up-to-date improvements in the wheel itself, some trifling novelties will be introduced. A handsome design for a lady's pin is under consideration, and patrons of the Welland Vale wheel will be able to procure trouser guards which serve as safety locks. On alighting at any spot the one guard can be attached so that the wheel cannot be released without the use of the other. This is a novelty, and saves any chain or padlock attachment, while the price of the guards is merely nominal. Another new feature is the wheel envelope. Each wheel is placed in a big paper envelope and securely tied up, so that when it reaches its destination it comes out as bright as a new dollar.—*St. Catharines Star.*

—A notable addition to the already extensive electrical plant of the Niagara Falls Hydraulic Power and Manufacturing Company in the power-house at the foot of the cliff, at Niagara Falls, N.Y., will shortly be made in the form of an electrolytic generator which will be the largest of its kind ever constructed. It will be both liberally and carefully designed to enable it to cope with the severe service of electrolytic work, i.e., for practically continuous operation. This machine will have fourteen poles, and will run at 257 revolutions, giving an output of 5,000 amperes at 175 volts, or a capacity of 875 kilowatts. It is to be of the latest type, and will be directly connected to the water wheel shaft. It will be provided with a special panel switchboard with full form K. equipment of instruments necessary to handle a current of 5,000 amperes.

—A business man of Portland, Oregon, has invented a portable house that will undoubtedly find a ready market for camping expeditions, etc., as it weighs complete but 400 lbs., and is 9 by 12 feet in size. The material of which it is built is spruce, covered by heavy building paper. It goes together in sections or panels, each being tongued and grooved so that, when put up, each part fits so closely as to be absolutely air-tight and rain-proof.

50 YEARS The Year 1897 was the SEMI-CENTENNIAL

OF THE

Canada Life Assurance Company

ESTABLISHED 1847

How about your Catalogue?

We Print Catalogues

WE DELIVER ORDERS WHEN PROMISED

That is one of our strong points. No doubt you have been fooled some time or other by an enthusiastic printer who promised faithfully to have your work finished by a certain date and failed to do so.

♣

WE WON'T FOOL YOU!

We will work overtime rather than disappoint a customer.

♣

BUT REMEMBER

You must do your part. You must deliver copy when you say you will.

Money in Insurance WHEN SECURED
ON THE COMPOUND INVESTMENT PLAN OF THE
NORTH AMERICAN LIFE ASSURANCE COMPANY

The special provisions of this advantageous plan of Insurance are:

(1) The return as a mortuary dividend of all premiums paid beyond the 10th year, together with the face of the policy should death occur within the investment period selected.

(2) The loan to the Insured if desired of all premiums beyond the 10th year, and should death occur after that and within the investment period selected, the full face value of the policy is payable, premium loans, if any, being cancelled.

The North American has a larger ratio of assets to liabilities and net surplus to liabilities than any other Canadian Company.

Pamphlets explanatory of the Compound Investment and other attractive plans of insurance furnished on application to

WM. McCABE,

DECISIONS IN COMMERCIAL LAW.

CALDWELL V. FRASER.—It will be remembered that this interesting action was brought by John F. Caldwell, of Winnipeg, against Angus W. Fraser and the Barley Gold Mining Company. It was held that, (1) the Dominion had no power to sell or grant the Indian lands, whether surrendered or unsurrendered; (2) that, even assuming the right to sell unsurrendered lands, it had no right to sell or dispose of precious metals, and, therefore, its patent to plaintiff was void; (3) Sultana Island having been surrendered, the Province had the right to sell or grant such lands, and, therefore, the letters patent from the Province of x 42 and x 43 to the plaintiff are good and valid, but they conveyed nothing beyond the land surrendered; (4) that if the land covered by water in front of Sultana Island was part of the reserve and unsurrendered, the Province had no right to grant the same; (5) that if the lands in question are part of 38 B and unsurrendered, the grants from the Province are, if valid at all, only valid to the extent of conveying the right of the Province to such lands, subject to the Indian title, and the right to take the precious metals from under such lands, in as far as they might be done without affecting surface rights; (6) that plaintiff had no right to complain of the issue of the letters patent of D. 193 A., assuming such issue to have been valid, because he had no contract with the Crown at the time of the grant, and no right which was enforceable against the Crown; nor did such letters patent issue by error or improvidence, or in disregard of the rights of plaintiff as riparian owner or otherwise; (7) that plaintiff had no right to claim the interference of the court because of the erection of the crib; (8) that the complaint as to overlapping of the descriptions is not sustained.

In Re DOWLER V. DUFFY.—The County Court Judge presiding in a Division Court, has no power to commit a garnishee for default in making payments pursuant to an order after judgment. His powers have not been extended in this direction by sec. 18 of 57 Vic., c. 23.

BENEDICT V. ARNOUX.—The relations of principal and agent were determined by the Court of Appeal of New York. Held, that when an agent forms the purpose of dealing with his principal's property for his own advantage, or for that of a third party, he ceases to be an agent, and his action is deemed to be in fraud of the rights of his principal. The presumption that all the facts have been disclosed to the principal no longer exists. A general rule of the same court was cited to the effect that the presumption that notice to the agent while acting within the scope of his authority is notice to the principal, is subject to several exceptions. Thus, when the agent has no legal right to disclose a fact to his principal, or he is engaged in a scheme to defraud his principal, the presumption does not prevail, because he cannot in reason be presumed to have disclosed that which it was his duty to keep secret, or that which would expose and defeat his fraudulent purpose.

—At a New England society dinner some years ago, Mark Twain had just finished a piquant address, when Mr. Evarts arose, shoved both his hands into his trousers pocket, as was his habit, and laughingly remarked: "Doesn't it strike this company as a little unusual that a professional humorist should be funny?" Mark Twain waited until the laughter excited by this sally had subsided, and then drawled out: "Doesn't it strike this company as a little unusual that a lawyer should have his hands in his own pockets?"—*Argonaut.*

Mercantile Summary.

Hamilton Customs receipts for January were $44,753, which is some $1,700 ahead of the previous January.

Iron ore is being brought from the Calabogie mines to Kingston, and sent to the Hamilton Smelting Works. The mining will be vigorously prosecuted.

A dividend of four per cent. has been declared on the Merchants Cotton Company paid-up (old) capital stock for the half-year ending December 31st last.

On Sunday last, the steamer "Warrimoo" arrived at Victoria from Australia and Hawaii. She brought 180 miners from Australia on their way to the Klondyke.

Last year the Galt, Preston and Hespeler Railway carried 221,674 passengers, an increase of 2,027. The total freight carried was 12,973 tons, an increase of 4,663 tons. The increased earnings were $1,900 odd.

All the hotels owned by the Canadian Pacific Railway along its line from Winnipeg to the Pacific Coast are to be enlarged to accommodate the expected rush of traffic towards the Klondyke next April and May.

It is intended, so a Montreal letter informs us, that the shareholders of the Montreal Cotton Co. shall be asked, at the annual meeting on the 8th February, to authorize the issue by the directors of coupon bonds or debentures to the extent of $300,000 secured upon real estate of the company.

A Winnipeg despatch states that Messrs. Gordon & Ironsides will, before long, establish a huge abattoir and cold storage building here. The Eastern Canadian trade will be cultivated at the outset, but in the near future shipments of dead meat will be made to Great Britain or elsewhere.

In a summary paragraph on page 947 of the issue of 21st ult., the name of the Union Bank of Halifax, was reported in connection with the failure of a manufacturing company, at Lequille, N.S. This was an error. The assignment was made to the Halifax Banking Company, at Halifax, and the Union Bank had nothing whatever to do, we are assured, with the concern in question.

We learn from Winnipeg that Mr. Melville Parr has been appointed general agent for the Confederation Life Association at Nelson, British Columbia. His territory, we understand, is the whole of British Columbia, with the exception of the coast. Mr. Parr has had experience the past three years with the Winnipeg branch of the Confederation Life.

A New York publisher, Mr. Frank Graves, discovers a generally unperceived barometer of the state of commercial activity or confidence in the way people buy novels. Business in fiction, he says, has steadily increased for months past. "When the people began to buy fiction matters freely, you can feel certain that the good times are here, and will remain indefinitely. The new year is one of much promise."

Mr. Robert Kerr, western superintendent of the Canadian Pacific Railway, made the statement in an interview at Vancouver last week that by September next passengers could be landed in one week at Dawson City over the all-Canadian route from Vancouver. Four large steamers a week will run from Vancouver besides several smaller ones. Passengers at Wrangel will take steamers there to Telegraph Creek. Mackenzie and Mann's railway will bring the travelers to Teslin Lake, where steamers will again be taken to Dawson.

The failure is rather unexpectedly announced of P. Rochon, dry goods merchant, in Ottawa. He not long ago claimed quite a large surplus in his business, stated at some $40,000, though in widespread and unrealizable shape. He has been an active, pushing business man, but has always shown evidence of strongly speculative tendencies.——A small jeweler of the same city, C. Lapierre by name, has assigned.

The cable connecting Canada with Jamaica and the West Indies was completed on Sunday last, 30th January. Congratulatory telegrams from the Jamaica commercial authorities were received on the following day by the Montreal and Toronto—we presume, also the Halifax—boards of trade, and by Hon. Adam Brown, of Hamilton, who was a government commissioner to that island.

The new directory of Manitoba and the North-West reflects the marked commercial and industrial activity of that region in the unusual number of changes and new names which it contains. Tables of statistics show the progress made in agriculture. The banking and postal returns show Winnipeg in a favorable light. A table is given of the population of that city for every year beginning with 1876, when it was 3,240. The population this year is placed at 45,000, being an increase of 2,850 over that of last year. The average increase per year for the past ten years, according to the same authority, having been nearly 2,400, the estimate of the growth for the past year is not extravagant.

– D. A. Jones, the bee man, of Beeton, W. L. Silvester and L. M. Dougherty, of Stouffville, Ont.; Geo. H. Silvester, of Ringwood, and Harold A. Robinson, book-keeper, of Toronto, form the Mountain Mining Company, Limited, just incorporated in Ontario. Capital stock, $491,000. —— Another company incorporated by the Ontario Government, in January, is the Triggs Gold Mining Company, Limited, for mining, milling and development. Capital stock, $500,000; parties, Jeremiah Horner Triggs, mining engineer, and John Walker Miller, caterer, Rat Portage; Frederick D. Sargent, of St. Paul, Minn., caterer; Frank Hurd Sargent, of Milwaukee, caterer, and Charles Flagler Miller, of Minneapolis, bank teller.

Recently reported country failures in the Province of Quebec are as follows; J. E. Ray, of Riviere Blanche, who began a small general business in 1895, with the assistance of his father, has been asked to assign, owing about $1,800. ——At Amqui, in the same vicinity as the above, the failure is reported of J. L. Langlois, who began business at the same time, and who offers only 10 per cent. on liabilities of $2,500 ——Alexandre Berthelette, a carriage maker of St. Laurent, has consented to assign on demand. ——Marie Louise Fiset, of Hull, whose husband is a notary, has been doing a business in furniture, etc., for quite a number of years, but is now in difficulties, and proposing to pay 40 cents on the dollar. Liabilities are figured at $18,000, of which $13,000 is said to be due to her husband.——Three young dry goods clerks went to St. Hyacinthe last spring, full of hope, from Three Rivers, and started a retail dry goods business, under the style of "Le Syndicat de St. Hyacinthe." They have not been able to make a success of the business, and are now reported as having assigned, owing about $5,000.——C. D. Meikle, of Richmond, began a moderate general business two years ago, and though possessing some fair amount of experience, has found it uphill work, and desires to retire from business and pay his creditors 60 per cent. on liabilities of about $1,500.

The assignment is reported of the Gananoque Furniture Company, Limited. The company was incorporated in 1894, with an authorized capital of $20,000, as successors of H. McKenzie & Co., by whom the business was first started thirty years ago.——Not many months since, J. A. Eby succeeded to the book and stationery business of J. B. Pewtress, at Carleton Place, Ont. A few days ago judgment appeared against him, in favor of a Toronto publishing firm, and his assignment has followed.

Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers,
262 West Broadway, New York.

Mercantile Summary.

THE earnings of the Canadian Pacific Railway last year were $24,049,538, and deducting working expenses the net profits were $10,303,775, as compared with $8,107,581 in 1896.

THE annual statement of the town of St. John's shows the receipts of last year to have been $20,374, exclusive of a loan of $5,000, the total assessments amounting to $15,449. Licenses contributed $2,810 to the revenue; markets $867, and drains $135. The actual expense of running the corporation was the same as in 1896, and the floating debt was reduced by $1,400.

THE five persons whose names follow have been incorporated by Ontario letters patent by the name of the Cardinal Electric Light Co., Limited; capital stock, $20,000: George Frederick Benson, of Montreal, merchant, and John Dowsley Reid and Duncan Gow, physicians; James Cumming Nagle, chemist, and George Reid, book-keeper, all of the village of Cardinal, Ont.

THE Davies Furniture Company, Limited, has been incorporated in Ontario, the parties being Sydney James Davies, and Frederick Barnes Duffett, furniture dealers; John Alexander Sinclair, book-keeper; Nicholas Adams, cabinet maker, and Charles Samuel Hicks, salesman, all of Toronto. They will buy the business of S. J. Davies, and the capital stock is ten thousand dollars.

THE modest capital of $99,000 is all that is claimed by the five persons incorporated as the Muskoka Gold Mining and Development Company, Limited, for mining, milling and reduction: viz., George Spurgeon Burt, physician; Samuel Andrew Cunningham, railway agent; James Hankinson Jackson, general merchant, William Ormsby, general merchant, and George Fletcher Rice, jeweler and prospector, all of the village of Severn Bridge, Muskoka.

SEVERAL farmers and others in Haldimand and Welland county have gone in together to buy and sell farm implements, machinery and general merchandise, under the name of the Attercliffe Co-operative Store Company, limited, and are content with a capital of $2,000, in five dollar shares. The names and designations of the parties are Chas. Dolan, of Moulton township, farmer; John Bradford Moore, of Wainfleet township, farmer; Seaman Lafayette Tisdale, of Caistor township, farmer and saw-mill owner; Harmon Webster Tisdale, book-keeper, and James Kirk Tisdale, of Attercliffe, brickmaker.

THE Baltimore *Trade* suggests that every packer of canned goods should put his name on his own goods, and that besides an association brand should be established to be used only by the members. That journal anticipates that Congress will this spring pass a pure food law, in the framing of which the canned goods packers may be prepared to exercise their just influence.

A LOT of Duluth and Michigan people, seven in number, form the J. O. 41 Gold Mining Co. of Rainy River, incorporated 18th January in Ontario; capital, $500,000. The same authority incorporates Geo. E. Casey, of Elgin county and several Toronto men, J. Enoch Thompson among them, as the Yukon-Klondyke Co-operative Mining Company of Ontario, Limited.

IN September, 1895, Henry Proctor, druggist, removed from Toronto to Drayton and assigned in the following February. Business has since been carried on under his wife's name. The stock has been mortgaged and she now makes an assignment.——A cash offer of 50 per cent. is made to the creditors of Frank R. Newberry, dealer in men's furnishing in Hamilton, on liabilities of $5,000. He has nominal assets $1,000 less.——An assignment is made by B. B. Ostram, druggist, Frankford, who had several law suits. In one of these he is held liable for $500 and heavy costs.

UNDER favorable auspices, Joseph Aube began a dry goods business in St. Henry suburbs of Montreal, about four years ago, and for a time did fairly well. Latterly his habits have occasioned some comment, and his failure is now reported. Liabilities are about $14,000, assets nominally $12,000.——Drolet & Gagnon, selling men's furnishings in Montreal since last fall, have already failed. Mr. Gagnon was previously unsuccessful in the dry goods line.——Pierre Marsan, shoe dealer, has assigned; his liabilities are scheduled at $7,900.——A demand in insolvency having been served on A. W. Kelly, contractor, he has consented to assign.

THERE are two hotel men, or firms, reported in difficulty this week. One of these is A. McKinnon & Co., who formerly kept the Pacific Hotel, and now the Victoria, at Sault Ste. Marie. Both the building and chattels are mortgaged for about all they will realize, and M. has assigned. The other party, who also assigns, is U. J. Ianson, Uxbridge. In 1896 the chattels of the Queen's Hotel were sold by an assignee, and he became the purchaser. Since then he has not been able to make more than a livelihood.——James McComb, dealer in men's furnishing goods at Peterboro, to whom reference was made in these columns last week, has assigned, as intimated was probable.

ROBERT SPITAL, formerly of the firm Spital, Burn & Gentleman, who failed in London some years ago, in consequence of this is now carrying on business under cover of his wife Anna, and both are in financial difficulty.——In 1888, W. J. McComb removed from Consecon, to Trenton, and opened a tailoring shop. The following year he assigned, and creditors wrote 60 per cent. off their claims. Five years later, another assignment followed. This time he paid his creditors ten per cent. more. Lately several writs have been issued against him, and he makes a third assignment.——R. D. Perry, who keeps a general store and post-office, at Holbrook, has been less than two years in business, and made but little, if any, progress, although he claims to be worth more than $1,000. He has assigned.

Mercantile Summary.

ON Sunday last a steamer of the Head Line left St. John for Dublin, on Monday the "Dunmore Head" for Belfast, and on Saturday the "Concordia" for Glasgow, the last named carrying flour, peas, rye, oats, provisions, spruce deals and paper pulp.

THE cable of the Halifax and Bermuda Cable Company has been extended from Bermuda to Jamaica, thus placing Halifax in direct communication with the West India Islands, so that no American cable need now be used. Canadian telegraph companies have reduced the rate on messages for Jamaica from all points in Ontario and Quebec, from $1.19 a word, the rate hitherto in force, to 48 cents. Both the Great North Western and the C.P.R., telegraph companies announce the reduced rate, which of course pleases the West Indians.

ON Wednesday morning a fire took place in Winnipeg which utterly gutted one of the finest four story blocks in the handsome Main street of that city. The McIntyre block is destroyed, and this means, with the contents of many stores, offices and sample rooms which that extensive block contained, a loss of between $300,000 and $400,000. The insurance, so far as we can learn, amounts to $193,600 in thirty one companies, twenty-one of which are British, the remainder Canadian and American.

A DISASTROUS blow has been suffered by the Ontario town of Clinton and the enterprising Doherty Organ Co., in that town, by the burning on Tuesday last of the extensive factory, together with a million feet of seasoned lumber and 800 or 900 organs in course of construction. How the fire originated no one seems to know; its progress was rapid and in the course of a gale with the mercury far below zero could not be stayed. While the loss is probably $70,000 or more, the insurance, in ten British and three Canadian companies, is about $30,000. The town council of Clinton has offered Mr. Doherty a loan of $25,000 to re-build.

THERE is such a thing as a milkman's etiquette. We do not know all its features, but one thing, it appears, they are as particular in regulating as doctors, and that is advertising. Last Saturday, the Wentwort County Milkmen's Association held a meeting in Hamilton. It was explained that the meeting was called to take some action regarding the advertising methods of one of the members. "The member accused of adopting unfair means to get custom was present, but he withdrew and a committee was appointed to wait upon him and get him to agree to stop a certain manner of advertising."

AN important scheme in the American railway world was outlined in the New York *Tribune* of 31st January. Referring to the Vanderbilt roads and especially the consolidation of the Lake Shore with the New York Central, that journal says it is simply the initial step in a larger railroad plan that in scope and extent eclipses anything hitherto undertaken in the history of railroading. This is to consolidate into one company the whole Vanderbilt system and such lines as it may be able to control and lease, and place the whole under one management. The next step will be the merging of the Cleveland, Cincinnati, Chicago and St. Louis railroad, generally known as the Big Four, with the Chesapeake and Ohio, under the name of the former. The Big Four is a Vanderbilt property. The next step will be to bring the roads into the new combination of the Lake Shore and the New York Central. The next road to be merged will likely be the Chicago and Northwestern.

GRAND TRUNK RAILWAY SYSTEM

**Are You Going
To the
Klondyke ?**

The Grand Trunk Railway is the popular route to the Yukon and gold fields of the Klondyke. The route is via Chicago, St. Paul, Seattle, and Victoria, the leading ports to Alaska.

William Ogilvie, F.R.G.S., Surveyor to the Dominion Government, says, in referring to the various routes to the Yukon:

" We now go to the Dyea route, which has been used by the Indians for generations—and they evidently knew their business. It is estimated that 95 per cent. of the traffic that has already gone into the Yukon has gone via Dyea, which is the clearest possible evidence of its superiority over all other routes '

A PERSON of practical business experience having some surplus capital would like an opportunity to invest in some profitable business in Toronto, where further skill and capital would give it increased success. Address P. O. BOX 459, care of Monetary Times, Toronto.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for North Bay Wharf," will be received at this office until Monday, the 21st day of February next, inclusively, for the construction of a wharf at North Bay, Nipissing District, Ontario, according to a plan and specification to be seen at the offices of the Town Clerk, North Bay, and H. A. Gray, engineer in charge of Harbor and River Works, Ontario, Confederation Life Building, Toronto, and the Department of Public Works, Ottawa.

Tenders will not be considered unless made on the form supplied and signed with the actual signatures of tenderers.

An accepted bank cheque, payable to the order of the Minister of Public Works, for one thousand five hundred dollars ($1,500.00), must accompany each tender. This cheque will be forfeited if the party decline the contract or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By order,
E. F. E. ROY, Secretary.

Department of Public Works,
Ottawa, 31st January, 1898.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

Mercantile Summary.

A HANDSOME presentation of solid silverware was made a few days ago to Mr. J. A. Richardson, who leaves the position of manager of the Imperial Bank of Canada branch at Ingersoll, and assumes charge of the branch just opened by that bank in Montreal.

THE traffic arrangement by which the Canadian Pacific Railway has for years had running powers over the Grand Trunk track from Toronto to North Bay, has come to an end it seems, with the 1st of February. Failing a new arrangement, which we understand has not yet been reached, the Canadian Pacific will have to bring its western winter traffic with Toronto to and from the West around by Smith's Falls.

THE agitation for the restoration of the duties on binder twine continues, and desperate attempts are being made to keep out the American products. The Continental Binder Twine Works, West Brantford, have been closed down. The machinery has all been placed in order for preservation during non-usage, and the engine has been dismantled. It is said some 70 hands in all will be thrown out of employment.

QUITE a large departmental store in Winnipeg, carried on by George Craig & Co., is in financial difficulty. Mr. Craig was the sole owner, and has been in the Prairie Province since 1882, and kept a good-looking store in Portage la Prairie four years before removing to Winnipeg in 1886. He is much esteemed, and his mistake appears to have been over-trading on his somewhat limited capital, his stock being doubled in six years; an assignment has been made.——Sparling & Messer, small dealers in fruit and confectionery, Morden, Man., and F. Ashford, another fruit dealer in Winnipeg, have assigned.

FEW firms can show a record which excels in energy displayed and results achieved that of the Toronto Electric Motor Company. This company has been in business for only five years, and within that period has sold 600 machines, a number which, when it is considered they range in value each from $75 to $3,250, means a large output of plant. Within thirteen days, from January 3rd to January 18th of the present year, this company closed 23 contracts with different firms, a fact which speaks well for the business activity of the Dominion, in the different parts of which they were distributed. A 130 K.W. generator and switchboard apparatus is being placed in the premises of the T. Eaton Company. This means 2,500 lights, and the machine is to be in working order in August.

TRANSACTIONS in London, in the way of new loans or the formation of new companies of every kind, are working up towards a great total for 1898. In the first three weeks of January, according to the London *Economist*, the total subscriptions to new issues were £12,353,366 where in the same period of last year they were only £7,713,665, and in previous years from £2,000,000 to £4,000,000. The whole year 1897 compared with previous years as under in the matter of total subscriptions. Total offered for subscription for whole year:

1897..................	£157,299,000
1896..................	152,8 6,791
1895..................	104,690,104
1894..................	91,831,505
1893..................	49,141,188

IN December, 1896, the firm of Runians & Butler, who came from Brampton, where the former had prospered, opened a departmental store in London. The latter named gentleman was never really a partner and the firm's trouble has arisen through making heavy purchases in October last. The former found it impossible

to meet current bills and has suspended payment, with liabilities of about $75,000, and the assets, chiefly stock, will probably exceed this by $25,000. A meeting of creditors will be held just as soon as an inventory of the stock is completed.——After thirteen months' general storekeeping in Kirkwall, Daniel Shelton has assigned. The business was new to him.

THE firm of Convay & Co., dry goods dealers in Chatham, made a bad failure a year ago, with liabilities of $6,800, and the business was closed. From there they went to Paris and opened another dry goods store in October last. They very soon ascertained that they had plenty of competition even in Paris, and this soon resulted in an assignment. Their stock, amounting to $5,900, is offered for sale on Wednesday next.——About thirteen years it is since Jones & Barnum have been handling coal in Cobourg; for a long time they did a large and prosperous business. Now they are feeling it difficult to collect accounts and have assigned. The recent appointment of collector of customs at that port is a fortunate one for Mr. Jones, on whom it was conferred.

AN OLD-FASHIONED STORM.

Some bitter weather has been experienced this week. On Tuesday a storm of wind and snow swept over the country from the lakes to the Atlantic, continuing for a day and a night. Western Ontario felt it less, probably, than the eastern end of this Province and all Quebec. A Montreal correspondent writes, on Wednesday: "Old Boreas has treated us to another storm this week, compared to which last week's effort was but a gentle zephyr. There was nothing like the same snowfall, but the snow was of that powdery, easily-drifting character, which is the terror of railway men, and not only were country roads badly blocked, but railway trains were only run with much irregularity. I have heard of many travelers stormbound at interior points." Railway trains were delayed from four to twelve hours each, in spite of the free use of all the snow ploughs the roads could muster, as well as gangs of men. On Thursday the wind has moderated though the temperature is still low.

DRUGGISTS' COMBINATION DISSOLVED.

For the past several years, determined attempts have been made by retail and wholesale druggists to put an end to the underselling of drugs and the general supplies which druggists are accustomed to handle. Associations have been formed in both retail and wholesale circles, but somehow the "cutters" have managed to get the goods, and the demoralization of trade has not been prevented. The old, old story of trade combinations has been repeated. A few houses who lack principle have used the combination for their own ends, violating it when a customer could be made by violation. The strong, reliable houses of which there are a number in the drug trade have kept the agreement, but their obligations have resulted in pecuniary loss. At a meeting of the Wholesale Druggists' Association in Montreal this week, Mr. Evans, of the firm of Evans & Sons, one of the most important drug houses in Canada, gave notice that he wished to retire from the association. His reasons were that it had failed in its primary object of aiding the retailers, and that the principle of a combine on prices was wrong, and that the members had not lived up to their agreement. The withdrawal of Evans & Sons meant that the association could not live. So a resolution was passed voting the association out of existence after the 5th inst.

Debentures.

PRESIDENT,

The HON. SIR OLIVER MOWAT,
Ex-Minister of Justice of Canada, Lieutenant-Governor of Ontario.

VICE-PRESIDENT,

J. W. FLAVELLE, Esq.,
Managing Director The Wm. Davies Co.
Director Canadian Bank of Commerce.

The Toronto Globe, in referring to the first three months' business of the Company, said:

"It was generally known by those in the business that this new aspirant had secured a fair share of the new insurances taken out in the last three months, but it will be a surprise to nearly all to hear that the applications received amounted to over one million and a quarter of dollars, of which more than one million were approved and policies issued. This phenomenal record—for such it really is for a new company—compares favorably with the business of the older and progressive life insurance companies of the Dominion, and considered in the light of the character of the business, gauged by the large average amounts of premiums and policies, it is quite safe to say that the record is unparalleled in our country."

THE SITUATION.

Short as is the time since the Klondyke railway contract was announced, it is already becoming clear that the ratification of the bargain will have to depend upon the view which Parliament may take of the urgency of the occasion. It would, in fact, be vain to seek for any other ground of justification of a contract in which a Government bonus of over $3,000,000 worth of public property is bargained away within a few weeks of the opening of Parliament. The urgency was great and pressing, and if it could have been foreseen, in all its force, should have been provided for sooner. Events moved apace, owing to the threatened famine in the Klondyke; the reason for prompt action became more urgent every day. We can now see that valuable time has been lost by delay, but it imports nothing to be wise after the fact. The delay having taken place, was the Government justified in entering into so large a contract so short a time before the meeting of Parliament? This is the question of which ratification would in a normal state of things depend. It would be a mistake to put the defence of the act on the ground that the contract is not for a money grant; money or money's work is the same thing under different forms; and if the public interest demanded that the road be built at once, the duty of the Government would have been the same, if it had to pay money instead of land. What is highly objectionable is the practice of handing over public resources to enrich private individuals; and it is greatly to be desired that the necessary ratification, in this case, should be accompanied with the assurance, on the part of the Government, that this system must end with the present contract.

There is little reason to doubt that, with its large majority, the Government will be able to secure sufficient votes for the ratification of the Klondyke Railway contract. Even the leader of the Opposition, if Sir Charles Tupper is still to be regarded as leader, promises to give his sanction to this feature of the Government policy; it remains to be seen whether his followers will here be willing to follow. For one, it appears, Mr. Foster will oppose ratification. Col. Domville, who on the general policy of the Government is counted among its supporters, opposes the Klondyke contract. These two incidents may mean little or much. According to the strength of the combination in its favor, the rival route from Edmonton north may show a considerable demonstration in its favor, especially if the reported discovery of gold on rivers connecting with the Mackenzie be confirmed. Objection will naturally be made to the monopoly clause of the agreement, and there may be difficulty in maintaining a monopoly against the company which had a previous charter from Skaguay, over the White Pass, to Fort Selkirk, in another charter over another pass.

Of the character of the Klondyke Railway, under the provisional contract entered into between the Government and two contractors, no hints have been let drop in the first semi-official announcement of the deal. Does the contract call for a standard road, or is a narrow gauge what the contract calls for? Between these two classes of road there is said to be, on the route in question, a difference in cost of $10,000 a mile. If a narrow gauge is to serve the purpose, as it probably would fairly well, 25,000 acres of land per mile may be taken at a valuation of $1 per acre. There is, of course, room for wide differences of opinion as to their value; and a transaction for the acquisition of as many acres, at $1 an acre as represent 150 times 25,000 acres, has enough of the speculative element in it to satisfy the avidity, if not the despair, of all the exchanges of the world. Unless there be some powerful combination in favor of some rival scheme of which we hear little or nothing, ratification is not likely to be defeated; for better for worse, it is almost sure to go through. The attitude of the Senate may be matter of some uncertainty.

To the declaration, in form of resolution of the United States Senate, that the bonds of the Government may be paid in silver, the House of Representatives replied by a direct negative, with a majority of fifty. The division in the House ran nearly on party lines, only two Republicans voting with the minority, and only two Democrats with the majority. The decision may be a guarantee that so long as the Republicans maintain their majority in the House, the payment of bonds in silver will not be assented to. Mr. McKinley, in a speech delivered in New York, went so far as to say that no matter what might be the wording of the contract, the Government would never consent to pay in silver. He can speak for himself, as the chief of the Executive; but if the contingency of payment in silver depends upon the Democrats getting the upper hand in both branches of the Legislature, it cannot be said that the future is without danger. The part which party may play in the question will be best understood by recalling the belief which prevailed in the early part of the last Presidential campaign, when Mr. McKinley hesitated to take sides on the silver question; that he would join the Silverites if he thought the majority was not on the side of gold. His present attitude continues the Republicans as the advocates of the gold standard, while the Democrats almost solidly take the side of silver. All now depends on a party victory by the Democrats; and as that is sure to come in the course of time, it would be possible to say how long the gold standard will last, if we knew how long it will be before a party revolution is brought about.

In the discussion of the Teller motion to pay United States bonds in silver, the ground was taken that this was all the contract called for; and the former juggling with the word "coin," in acts of Congress, gave color to the contention. Undoubtedly silver is a legal tender; and when the word "coin" was put into the statutes, the gold advocates were at liberty to persuade themselves that it meant gold, and the silver advocates to comfort them-

Already, says a private letter from Ashcroft, this travel has commenced, though it must be borne in mind that the Ashcroft route is not a winter but a summer route, and it is not desirable to use it before May.

AN INSOLVENCY ACT.

A forcible presentation was made before the Government at Ottawa the other day on the subject of an insolvency law by a deputation of the Montreal and Ottawa boards of trade. The president of the Toronto Board was unable to be present on the occasion, but the views of the council of this board on the subject, repeatedly made known on former occasions, concur in the main with the views urged by the deputation on the 15th instant.

There is a very strong feeling of the need of an insolvency law on the part of the mercantile community in Canada. Few are found to justify the existence of provincial legislation which permits a debtor to select from the list of persons to whom he is indebted two or three whose claims he will pay in full, while the rest get fifty cents, or perhaps ten cents, in the dollar. The unfairness of such an arrangement appeals to almost any man, except, of course, the creditor who is preferred. And what is thought of this legislation by European houses, which have often to suffer from it, has been made known again and again. Some of them simply decline giving any credit in Canada while such one-sided legislation exists. And they may urge, too, with force, that the arrangement in question, which provincial laws permit, is one that invites a dishonest trader to take advantage of it.

In the discussion with members of the Government, mention was made of the law of the Province of Quebec for the distribution of a debtor's estate. And it was approved by one or two of the speakers. Nor are we badly off in Ontario, as compared with some of the other provinces. What is now sought is a complete doing away with preferences; also an equitable distribution of assets; and besides these a reasonable discharge clause. There is, too, a feeling against official assignees as a class, and a desire that they may not be reconstituted. But it is not easy to see how the law can be administered without some such functionaries, call them what you please.

IMPROVED ROADS.

It will interest those who are working for the improvement of country roads in Canada, to learn that a member of the New York State Senate, Mr. Guy, has introduced a good roads bill, which, if carried, will virtually carry out a recommendation made by David B. Hill, when Governor. This measure aims to provide for the construction of an improved highway across each county of the State, to follow the line of the principal market highway in the county, and to be built at State expense under the direction of the State Engineer and Surveyor. Governor Hill favored the construction of two highways in each county, running in opposite directions, but one is better than none. These improved highways are to be of macadam, eighteen feet in width and made of good material, that they may serve as object lessons in roadbuilding, and lead the people of the communities traversed by them to improve future cross-roads for themselves. The selection of highways by the supervisors must be approved by the State Engineer and Surveyor. He is to let the contracts to the lowest bidders and supervise the work.

A yearly appropriation of $500,000 until the work is finished is proposed by the bill. The maximum price fixed is $3,000 a mile for the new roads. The counties will only be called upon to pay for the surveys and for building and repairing any large bridges that may be necessary. The highways are to be maintained by the counties. No attempt is made to tax the owners of abutting property. Senator Guy assumes that the farmers of New York State cannot be expected to pay taxes for the building of improved roads, which are quite as great an advantage to the cities and market towns where the farmers sell their produce as to the farmers themselves. The senator criticizes the wheelmen who have of late taken the lead in the good roads movement, and who have accomplished nothing because they have insisted on compelling the farmers to bear too great a share in the expense of roadbuilding. Hence the farmers have defeated the cyclists' bills. It may well be argued, says the Buffalo *Courier*, in commenting on the proposal, that the wishes of the bicyclists are secondary to the needs of the people who use roads to take their products to market. But, in the existing agricultural depression, farmers cannot build these roads for themselves. It is as proper for the State to expend a few millions to build good roads for the farmers as it is to spend many millions in improving the canals for the benefit of the cities.

MORTGAGE LOANS.

In our article of last week on this subject an error crept into the statement of figures of the Mortgage Loan Companies Association of Ontario, which made out the assets of those companies to be enormously beyond their true amount. The correct amount of the assets of these thirty-four Ontario loan companies is $97,148,610, and not $397,148,610. The error of three hundred millions arose from our having copied the figure in the memorandum of the association meeting made in our issue of January 21st, which was wrong. A subscriber asks why the amount this year—$97,148,610—is so much less than a year ago, when it was $105,793,131. The main reason is the withdrawal from the association of one company, the Huron & Erie Loan and Savings Company, which had been for nine or ten years a member. The assets of this company amounted to $6,405,012 at the close of 1896.

MINING ENTERPRISE.

It would seem, judging by the British press, that the attention given to Canada's mineral wealth by Old Country people has been intermittent and upon the whole slight. Visitors, scientific and other, have come and gone, and as a rule have reported favorably, but, with the exception of a "Klondyke" spasm of company-forming in 1897, not much impression seems to have been made. Now, however, we find a recognition in an unexpected quarter, for the London *Economist* has commissioned its former Johannesburg correspondent to visit and report upon the various goldfields of the world. . . . "The Indian, Australian, Canadian and other goldfields will be reported upon subsequently. It is our hope to be able in this way to furnish our readers with honest and trustworthy information in regard to the various goldfields, gathered on the spot by a thoroughly qualified expert." As we showed in an editorial of 24th December, the *Economist* has admitted that the merits of British Columbia as a producer of minerals were, "in the opinion of many experts, still far from being properly recognized." That it has been influenced by these opinions appears from the fact that it has commissioned a qualified expert to visit Canadian goldfields —not, we assume, the British Columbia ones alone—and report upon them. We may hope, therefore, that the large and influential financial interests which look to the *Economist* for information and advice will by means of such visit sooner or later be led to pay some attention to the claims of Canada as an inviting field for mining enterprise.

BUTTER EXPORTS, 1897.

There is every reason for Canadians to feel pleased at the progress made by the butter makers of the Dominion during the past two years. In 1895 there was exported from Canada to the United Kingdom 38,949 cwts, while in the year just completed 109,402 cwts. of Canadian butter found a market in Great Britain. But while the Canadian dairymen may well be pleased they should by no means rest satisfied with present results. The British people consumed in 1897, 3,217,801 cwts. of butter, and the colonies contributed only 378,834 cwts. to this amount. A better showing, however, can be made by both Canada and the Australasian colonies. The seasons in the two regions are such that Great Britain can depend the year round upon fresh grass butter from the colonies. The largest exports from Canada are made in July, August, September and October, while in the months of November, December, January, February, March, April and May, considerable receipts may be looked for from Australasia. June an "off" month with the butter makers of both colonies. We append a table showing the butter receipts of Great Britain for the past three years, compiled by Messrs. W. Weddel & Co., London, England. Canada's increase is marked:

RETAIL MERCHANTS' ASSOCIATION.

The Toronto retail merchants have associated themselves to work out reforms which they consider necessary to healthful trade conditions. They are watching their interests, both in the Provincial Legislature and at the City Hall. The annual meeting of the association was held on the 25th ult., and several interesting speeches were made.

Secretary Trowern urged upon the members the necessity of looking to the interests of retail merchants first and foremost in casting their ballots for members of the coming Legislature, and to vote only for those who supported their bill now before the House. He stated that upon being invited to address the city council and merchants of Peterboro, he found them unanimous in their opinion that retail merchandising must be placed upon a higher plane, and be considered as one of the leading issues with all retail merchants in casting their votes at the coming elections, and they promised to do their duty.

This being the first annual meeting the election of officers then took place, which resulted as follows: President, Mr. W. B. Rogers, the Chas. Rogers Sons Co., furniture, Yonge street; first vice-president, Mr. Wm. Dineen, W. & D. Dineen, hatters; second vice-president, Mr. George Boxall, hardware, Yonge street; treasurer, Mr. Henry Davis, Berlin wools, Yonge street; secretary, Mr. E. M. Trowern, of B. & H. B. Kent, jewelers, Yonge street.

Mr. W. B. Rogers, the newly-elected president, expressed great hope for the future of the association, and was glad to know that retail merchants were becoming alive to the public issues that affect the interests of the city and in retaining all honorable methods connected with the retail trade. He stated that at the next regular meeting he would address the merchants at length on the plans for the coming year.

A STARTLING FAILURE.

The recently noted failure of J. H. Blumenthal & Sons, who have been carrying on three large clothing stores, in Montreal, has created much discussion and criticism, and the firm's numerous creditors have decided to refuse them a settlement by way of compromise. At the time of the failure, it is stated the firm was not in arrears in their payments for merchandise. It is further alleged that quite large payments had been made to relatives shortly before the failure, and that considerable quantities of the goods so liberally bought during the past six months, on a very fair credit, have been pawned, and sold at mill price or below, through other parties, to manufacturing clothiers, etc. Deliberate proceedings of this kind are open clearly to the worst construction that can be put upon them, and are to be reprobated in the strongest manner.

At a meeting of creditors held on the 27th inst., the firm made a proposition to pay 35 cents in the dollar, but the creditors refused this offer, and instructed the assignees to sell the stock, peremptorily, in lots to suit purchasers. The liabilities of the concern will probably total up some $140,000. To show their hitherto good standing, it may be stated that there is one creditor for over $20,000, two creditors had trusted the firm with from $10,000 to $20,000 worth of goods each, four for over $5,000, twenty-one for amounts between $1,000 and $5,000, besides quite a number of smaller sums. To have thrown away such a credit among wholesale men as these amounts imply may be taken to mean that the Messrs. Blumenthal compensated themselves or their friends, somehow, for its loss.

MERCANTILE ARITHMETIC.

Mercantile Arithmetic is one of the subjects on the intermediate examination of the Institute of Chartered Accountants. In view of the fact that most of the candidates who come up for examination are deplorably weak on this point, the programme committee of the Institute asked Mr. David Hoskins, secretary and principal of the British American Business College, to read a paper on the subject. Mr. Hoskins' paper contained many practical illustrations of his subject. We quote a few of his remarks:

"Every young man who expects to earn his living as an accountant should be able to handle accurately, rapidly, and intelligently the various classes of problems which are likely to arise in every day business life. They should see that they are quick and accurate in operations involving common Fractions and Decimals. My own experience as a teacher warrants me in saying that only a very small proportion of our Public School and High School pupils get a good knowledge of decimals. I can assure you, positively, that there is no hope whatever of becoming proficient in mercantile arithmetic unless you can readily perform any operation involving the addition, subtraction, multiplication or division of either whole numbers, fractions or decimals. As a means of improvement in multiplication and division, I would suggest that the multiplication table be learned as far as 20 times 20. The result would be an immense improvement in both speed and accuracy in commercial calculations.

"Facility and accuracy in the use of decimals and fractions are indispensable, but even after these are acquired a great deal remains to be done. Care must be taken to apply the intelligence to all kinds of problems that come up from day to day in our business offices, and not to trust to memory and rule alone in seeking for solutions. No one can expect to be proficient unless he cultivates his general intelligence by accustoming himself to efforts of reasoning in which he has to arrange the data for himself, as well as operate for results upon them when arranged, for skill in arithmetic consists less in the following of rules, under circumstances in which their application admits of no doubt, than in determining the circumstances in which the rules apply, and any limits which these circumstances impose upon their application. You may practice rules to an indefinite extent, and still through lack of practice in problems which exercise the reasoning powers, find yourselves unable to cope with comparatively simple questions.

"By far the greater number of problems that arise in the various departments of business may be classed under the well-known heading of "Percentage." This is the term applied to all calculations in which 100 is used as a unit of measurement or the basis of comparison. The principle of percentage may be applied to all transactions of business and are in general use in almost every department of practical life. The subject of trade discounts is a branch of percentage with which we should be thoroughly familiar. In many branches of business it is customary for manufacturers or dealers to list or catalogue their goods at the highest possible market rate and allow a series of discounts thereon, according to the quantity ordered and the condition of the market. In such cases when the market varies, instead of publishing a new catalogue or list price with each fluctuation, it is only necessary to quote a change of discount through a trade journal or by personal letter. If two or more rates of discounts are allowed, only the first is reckoned upon the gross selling price, and each succeeding rate of discount is computed upon the proceeds of the preceding discounts. For example: If a bill of hardware amounted to $230, and were subject to discounts of 20 per cent., 10 per cent. and 5 per cent., we would first deduct 20 per cent. of the $230, leaving $184; then deduct 10 per cent.

Already, says a private letter from Ashcroft, this travel has commenced, though it must be borne in mind that the Ashcroft route is not a winter but a summer route, and it is not desirable to use it before May.

AN INSOLVENCY ACT.

A forcible presentation was made before the Government at Ottawa the other day on the subject of an insolvency law by a deputation of the Montreal and Ottawa boards of trade. The president of the Toronto Board was unable to be present on the occasion, but the views of the council of this board on the subject, repeatedly made known on former occasions, concur in the main with the views urged by the deputation on the 15th instant.

There is a very strong feeling of the need of an insolvency law on the part of the mercantile community in Canada. Few are found to justify the existence of provincial legislation which permits a debtor to select from the list of persons to whom he is indebted two or three whose claims he will pay in full, while the rest get fifty cents, or perhaps ten cents, in the dollar. The unfairness of such an arrangement appeals to almost any man, except, of course, the creditor who is preferred. And what is thought of this legislation by European houses, which have often to suffer from it, has been made known again and again. Some of them simply decline giving any credit in Canada while such one-sided legislation exists. And they may urge, too, with force, that the arrangement in question, which provincial laws permit, is one that invites a dishonest trader to take advantage of it.

In the discussion with members of the Government, mention was made of the law of the Province of Quebec for the distribution of a debtor's estate. And it was approved by one or two of the speakers. Nor are we badly off in Ontario, as compared with some of the other provinces. What is now sought is a complete doing away with preferences; also an equitable distribution of assets; and besides these a reasonable discharge clause. There is, too, a feeling against official assignees as a class, and a desire that they may not be reconstituted. But it is not easy to see how the law can be administered without some such functionaries, call them what you please.

IMPROVED ROADS.

It will interest those who are working for the improvement of country roads in Canada, to learn that a member of the New York State Senate, Mr. Guy, has introduced a good roads bill, which, if carried, will virtually carry out a recommendation made by David B. Hill, when Governor. This measure aims to provide for the construction of an improved highway across each county of the State, to follow the line of the principal market highway in the county, and to be built at State expense under the direction of the State Engineer and Surveyor. Governor Hill favored the construction of two highways in each county, running in opposite directions, but one is better than none. These improved highways are to be of macadam, eighteen feet in width and made of good material, that they may serve as object lessons in roadbuilding, and lead the people of the communities traversed by them to improve future cross-roads for themselves. The selection of highways by the supervisors must be approved by the State Engineer and Surveyor. He is to let the contracts to the lowest bidders and supervise the work.

A yearly appropriation of $500,000 until the work is finished is proposed by the bill. The maximum price fixed is $3,000 a mile for the new roads. The counties will only be called upon to pay for the surveys and for building and repairing any large bridges that may be necessary. The highways are to be maintained by the counties. No attempt is made to tax the owners of abutting property. Senator Guy assumes that the farmers of New York State cannot be expected to pay taxes for the building of improved roads, which are quite as great an advantage to the cities and market towns where the farmers sell their produce as to the farmers themselves. The senator criticizes the wheelmen who have of late taken the lead in the good roads movement, and who have accomplished nothing because they have insisted on compelling the farmers to bear too great a share in the expense of roadbuilding. Hence the farmers have defeated the cyclists' bills. It may well be argued, says the Buffalo *Courier*, in commenting on the proposal, that the wishes of the bicyclists are secondary to the needs of the people who use roads to take their products to market. But, in the existing agricultural depression, farmers cannot build these roads for themselves. It is as proper for the State to expend a few millions to build good roads for the farmers as it is to spend many millions in improving the canals for the benefit of the cities.

MORTGAGE LOANS.

In our article of last week on this subject an error crept into the statement of figures of the Mortgage Loan Companies Association of Ontario, which made out the assets of those companies to be enormously beyond their true amount. The correct amount of the assets of these thirty-four Ontario loan companies is $97,148,610, and not $397,148,610. The error of three hundred millions arose from our having copied the figure in the memorandum of the association meeting made in our issue of January 21st, which was wrong. A subscriber asks why the amount this year—$97,148,610—is so much less than a year ago, when it was $105,793,131. The main reason is the withdrawal from the association of one company, the Huron & Erie Loan and Savings Company, which had been for nine or ten years a member. The assets of this company amounted to $6,405,012 at the close of 1896.

MINING ENTERPRISE.

It would seem, judging by the British press, that the attention given to Canada's mineral wealth by Old Country people has been intermittent and upon the whole slight. Visitors, scientific and other, have come and gone, and as a rule have reported favorably, but, with the exception of a "Klondyke" spasm of company-forming in 1897, not much impression seems to have been made. Now, however, we find a recognition in an unexpected quarter, for the London *Economist* has commissioned its former Johannesburg correspondent to visit and report upon the various goldfields of the world. . . . "The Indian, Australian, Canadian and other goldfields will be reported upon subsequently. It is our hope to be able in this way to furnish our readers with honest and trustworthy information in regard to the various goldfields, gathered on the spot by a thoroughly qualified expert." As we showed in an editorial of 24th December, the *Economist* has admitted that the merits of British Columbia as a producer of minerals were, "in the opinion of many experts, still far from being properly recognized." That it has been influenced by these opinions appears from the fact that it has commissioned a qualified expert to visit Canadian goldfields —not, we assume, the British Columbia ones alone—and report upon them. We may hope, therefore, that the large and influential financial interests which look to the *Economist* for information and advice will by means of such visit sooner or later be led to pay some attention to the claims of Canada as an inviting field for mining enterprise.

BUTTER EXPORTS, 1897.

There is every reason for Canadians to feel pleased at the progress made by the butter makers of the Dominion during the past two years. In 1895 there was exported from Canada to the United Kingdom 38,949 cwts, while in the year just completed 109,402 cwts. of Canadian butter found a market in Great Britain. But while the Canadian dairymen may well be pleased they should by no means rest satisfied with present results. The British people consumed in 1897, 3,217,801 cwts. of butter, and the colonies contributed only 378,834 cwts. to this amount. A better showing, however, can be made by both Canada and the Australasian colonies. The seasons in the two regions are such that Great Britain can depend the year round upon fresh grass butter from the colonies. The largest exports from Canada are made in July, August, September and October, while in the months of November, December, January, February, March, April and May, considerable receipts may be looked for from Australasia. June an "off" month with the butter makers of both colonies. We append a table showing the butter receipts of Great Britain for the past three years, compiled by Messrs. W. Weddel & Co., London, England. Canada's increase is marked:

RETAIL MERCHANTS' ASSOCIATION.

The Toronto retail merchants have associated themselves to work out reforms which they consider necessary to healthful trade conditions. They are watching their interests, both in the Provincial Legislature and at the City Hall. The annual meeting of the association was held on the 25th ult., and several interesting speeches were made.

Secretary Trowern urged upon the members the necessity of looking to the interests of retail merchants first and foremost in casting their ballots for members of the coming Legislature, and to vote only for those who supported their bill now before the House. He stated that upon being invited to address the city council and merchants of Peterboro, he found them unanimous in their opinion that retail merchandising must be placed upon a higher plane, and be considered as one of the leading issues with all retail merchants in casting their votes at the coming elections, and they promised to do their duty.

This being the first annual meeting the election of officers then took place, which resulted as follows: President, Mr. W. B. Rogers, the Chas. Rogers Sons Co., furniture, Yonge street; first vice-president, Mr. Wm. Dineen, W. & D. Dineen, hatters; second vice-president, Mr. George Boxall, hardware, Yonge street; treasurer, Mr. Henry Davis, Berlin wools, Yonge street; secretary, Mr. E. M. Trowern, of B. & H. B. Kent, jewelers, Yonge street.

Mr. W. B. Rogers, the newly-elected president, expressed great hope for the future of the association, and was glad to know that retail merchants were becoming alive to the public issues that affect the interests of the city and in retaining all honorable methods connected with the retail trade. He stated that at the next regular meeting he would address the merchants at length on the plans for the coming year.

A STARTLING FAILURE.

The recently noted failure of J. H. Blumenthal & Sons, who have been carrying on three large clothing stores, in Montreal, has created much discussion and criticism, and the firm's numerous creditors have decided to refuse them a settlement by way of compromise. At the time of the failure, it is stated the firm was not in arrears in their payments for merchandise. It is further alleged that quite large payments had been made to relatives shortly before the failure, and that considerable quantities of the goods so liberally bought during the past six months, on a very fair credit, have been pawned, and sold at mill price or below, through other parties, to manufacturing clothiers, etc. Deliberate proceedings of this kind are open clearly to the worst construction that can be put upon them, and are to be reprobated in the strongest manner.

At a meeting of creditors held on the 27th inst., the firm made a proposition to pay 35 cents in the dollar, but the creditors refused this offer, and instructed the assignees to sell the stock, peremptorily, in lots to suit purchasers. The liabilities of the concern will probably total up some $140,000. To show their hitherto good standing, it may be stated that there is one creditor for over $20,000, two creditors had trusted the firm with from $10,000 to $20,000 worth of goods each, four for over $5,000, twenty-one for amounts between $1,000 and $5,000, besides quite a number of smaller sums. To have thrown away such a credit among wholesale men as these amounts imply may be taken to mean that the Messrs. Blumenthal compensated themselves or their friends, somehow, for its loss.

MERCANTILE ARITHMETIC.

Mercantile Arithmetic is one of the subjects on the intermediate examination of the Institute of Chartered Accountants. In view of the fact that most of the candidates who come up for examination are deplorably weak on this point, the programme committee of the Institute asked Mr. David Hoskins, secretary and principal of the British American Business College, to read a paper on the subject. Mr. Hoskins' paper contained many practical illustrations of his subject. We quote a few of his remarks:

"Every young man who expects to earn his living as an accountant should be able to handle accurately, rapidly, and intelligently the various classes of problems which are likely to arise in every day business life. They should see that they are quick and accurate in operations involving common Fractions and Decimals. My own experience as a teacher warrants me in saying that only a very small proportion of our Public School and High School pupils get a good knowledge of decimals. I can assure you, positively, that there is no hope whatever of becoming proficient in mercantile arithmetic unless you can readily perform any operation involving the addition, subtraction, multiplication or division of either whole numbers, fractions or decimals. As a means of improvement in multiplication and division, I would suggest that the multiplication table be learned as far as 20 times 20. The result would be an immense improvement in both speed and accuracy in commercial calculations.

"Facility and accuracy in the use of decimals and fractions are indispensable, but even after these are acquired a great deal remains to be done. Care must be taken to apply the intelligence to all kinds of problems that come up from day to day in our business offices, and not to trust to memory and rule alone in seeking for solutions. No one can expect to be proficient unless he cultivates his general intelligence by accustoming himself to efforts of reasoning in which he has to arrange the data for himself, as well as operate for results upon them when arranged, for skill in arithmetic consists less in the following of rules, under circumstances in which their application admits of no doubt, than in determining the circumstances in which the rules apply, and any limits which these circumstances impose upon their application. You may practice rules to an indefinite extent, and still through lack of practice in problems which exercise the reasoning powers, find yourselves unable to cope with comparatively simple questions.

"By far the greater number of problems that arise in the various departments of business may be classed under the well-known heading of "Percentage." This is the term applied to all calculations in which 100 is used as a unit of measurement or the basis of comparison. The principle of percentage may be applied to all transactions of business and are in general use in almost every department of practical life. The subject of trade discounts is a branch of percentage with which we should be thoroughly familiar. In many branches of business it is customary for manufacturers or dealers to list or catalogue their goods at the highest possible market rate and allow a series of discounts thereon, according to the quantity ordered and the condition of the market. In such cases when the market varies, instead of publishing a new catalogue or list price with each fluctuation, it is only necessary to quote a change of discount through a trade journal or by personal letter. If two or more rates of discounts are allowed, only the first is reckoned upon the gross selling price, and each succeeding rate of discount is computed upon the proceeds of the preceding discounts. For example: If a bill of hardware amounted to $230, and were subject to discounts of 20 per cent., 10 per cent. and 5 per cent., we would first deduct 20 per cent. of the $230, leaving $184; then deduct 10 per cent.

of the $184, leaving $165.60; then deduct 5 per cent., which would amount to $8.28, leaving $157.32 as the net amount of the bill.

"The net results of a series of discounts is the same regardless of the order of their arrangement, thus: 25, 20 and 10 per cent. of an invoice is the same as 20, 25 and 10, or even in the order of 10, 20 and 25 per cent., but the net result will be different if the separate rates themselves differ, although the sum of the discount series—in this case 55 per cent.—may be the same.

"An important point which should not be overlooked is the fact that in several sets of discounts, each set totalling to 30 per cent., the largest discount is obtained by taking the series which shows the largest single discount. For example, 25 and 5 off is better than 20 and 10 off, and still better than 15, 10 and 5 off."

MERCHANTS BANK OF HALIFAX.

Another of the prominent banks of the Maritime Provinces sends us its report for 1897. This is the Merchants Bank of Halifax, which does business in five provinces of the Dominion as well as in Newfoundland, and has twenty-nine branches. To do so extensive a business as this implies large resources. Accordingly we find that this bank has shareholders' capital amounting to $2,675,000, and deposits of $6,843,000, also that its circulation is nearly $1,200,000. Of its loanable capital $6,400,000 is advanced in current loans and discounts. The sum of $972,000 is held in specie and Dominion notes; nearly a million in call loans and $1,712,000 in Government and other debentures and bonds—a very good array of readily available assets.

Comparing the statement with that of the previous year there is an advance in the aggregate of assets. The earnings, though slightly less than in 1896, are still at the very satisfactory ratio of 13.32 per cent. on the capital. Seven per cent. was divided, $100,000 added to Rest, building it up to $1,175,000, and a good balance carried forward. The shareholders have reason to congratulate themselves that the institution makes so good a showing, both in respect of resources and earnings.

MONTREAL CORN EXCHANGE.

The retiring president, Mr. Edgar Judge, occupied the chair at the annual meeting, last week, of the Montreal Corn Exchange Association. During 1897, he said, a good deal of the time of the committee had been devoted to the burning question of harbor improvements, with the result, he was sorry to say, that the matter still stood pretty much in the position that it occupied a year ago, very little advance having been made. It may be remembered that at the last annual meeting a resolution was remitted to the committee as to the desirableness of the harbor being taken out of commission and its affairs being administered by one of the governmental departments. The report for the present year expresses the hope that the association will strenuously protest against any change in the constitution of the Harbor Commission, unless indeed the Government could be induced to reduce the number of its appointees thereon, so that the elected commissioners would be in the majority, instead of as now, in the minority. This report was concurred in unanimously.

A long discussion took place upon the request of the C.P.R. for permission to build a marine "leg" to their elevators in the harbor, which did not result in any definite pronouncement. Shortages on grain were then discussed, also St. Lawrence exports. On the latter topic, Mr. A. G. Thomson said the reason Manitoba grain did not come to Montreal was that the season was too late. Manitoba grain did not come to market until the end of September, when the port of Montreal was closing up for the season. It usually went to Buffalo, and from there to the seaboard, where it was held all winter, and sold as required. During the past season, Montreal had cleared the largest amount of grain in its history. And where did it come from? If the Americans took a portion of our Manitoba business, and we took double the quantity of American business this way, he did not see who was hurt, especially as it served this port better, since we could carry it at the time we got it, and we could not carry Manitoba grain.

The method of settlement of differences of opinion between eastern and western grain inspectors was referred to the incoming committee.

On the motion of Mr. Alex. McFee, seconded by Mr. John Torrance, a resolution similar to that adopted by the Board of Trade on the previous day in reference to the necessity of deepening of the Welland Canal to 20 feet was passed.

The scrutineers reported the result of the elections to be as under:—

President—Alex. McFee, by acclamation.

Treasurer—W. A. Hastings, 66 votes, against J. E. Rendell (defeated), 41.

Members of Committee—C. B. Esdaile, 88 votes; R. Peddle, 85; Joseph Quintal, 83; A. G. Thomson, 81; David Robertson, 79; E. F. Craig, 77; Bartlett McLennan, 67.

Board of Review—T. A. Crane, chairman, by acclamation; W. W. Ogilvie, 100 votes; G. M. Kinghorn, 99; D. G. Thomson, 92; J. B. McLea, 87; Auguste Girard, 83.

BRITISH CANADIAN LOAN COMPANY.

Again this company affirms its determination not to take credit among its earnings for past due interest not received. This is plainly right; and if there are companies which continue to take credit for interest earned, but unpaid, as if it were interest paid, they must have had a rude awakening to the danger of such a course in the expose of the Farmers' Loan Co. the other day. Earnings were somewhat less, and the dividend of the British Canadian has been reduced from seven per cent. to six. This results partly from a reduced volume of business, but also, and no doubt mainly, from the reduction felt generally in the rate obtainable on sound securities, a reduction which has not yet ceased. The company, we observe, has reduced its liabilities abroad by about $100,000, and has also effected a reduction of its current expenses, while it has a sum of $126,000 in readily available assets on either side of the Atlantic. The directors in their report speak hopefully of the prospects of business generally, and also consider that the lending of money on mortgage by Ontario companies may still be done at a profit. At the same time they urge, and we agree with them, that extreme care and economy in management are necessary, and even in spite of these, the dividends are likely to be less than in former years.

UNION MUTUAL LIFE.

The Union Mutual Life Assurance Company of Maine has done business for many years in Canada. We had occasion the other day to remark upon the enterprise the company had shown in improving the property it had held for a dozen years or more in Chicago. The assessors of that city consider the property in question to be worth $465,400, although it stands among the assets of the company at only $361,980. By the plan in view it is believed that within three years the property will be disposed of at a profit over what would have been received if it had been undertaken to make the sale in one single block. The policy of the directors has been approved at the annual meeting, as also that which improves largely the value of the head office building in Portland, Maine. The annual report of the company for 1897 occupies three columns of the Portland *Advertiser*. It shows gains in premium income, total income, assets and surplus, during the year, after paying to policy-holders $837,205. An increase of business in force brings the total up to $39,943,000; the total assets are $7,236,555, and the surplus over half a million dollars. This good company has approved itself to all who relish sound administration and careful life underwriting. And the non-forfeiture law of Maine is appreciated as a boon by many policy-holders. The officers re-elected are:

President—Fred E. Richards.

Vice-President—Arthur L. Bates.

Clerk of the Corporation—Josiah H. Drummond, jr.

TEMPERANCE AND GENERAL LIFE.

A very encouraging result is shown in the death rate experience of the Temperance and General Life Company for twelve years. Its average ratio of death claims for that period has been 3.34 lives per 1,000 and $3.77 per $1,000 in amount in the Temperance Section (that is, among abstaining policy-holders), 4.02 lives per 1,000 and $4.91 per $1,000 of the annual average of the company's total business. This is a low ratio; and the advantage shown in the smaller mortality among the teetotal membership confirms the experience of the large society of similar name in the Old Country with respect to its abstaining members. The company's total business at risk at the close of last year was 6,314 policies on 5,917 lives for $7,260,786. Three-fourths of this total, or $5,473,000, was in the Temperance Section, and 1,389 policies for $1,787,740 in the General Section. The new business of the year was $1,790,500 under 1,605 policies. The company's assets increased by nearly seventy-five thousand dollars during the year, and now stand at $574,291. It had no interest in arrears and no real estate on hand at the close of the year, an unusually satisfactory showing for a company to be able to make.

FIRES AND FIRE APPLIANCES IN HAMILTON.

The amount of fire losses in Hamilton for 1897 was under one hundred thousand dollars. Mr. Aitchison, chief of the fire department of that city, in his report to the city council, states the total losses by fire for the year at $96,689, which is rather more than double the average aggregate of fire loss in that city for ten years past. The fires in frame structures numbered 34; fire in steam yacht, 1; fires in private dwellings, 27; fires in barns, stables, sheds, etc., 9; number of chimney fires, 25; number of rubbish fires, 8. The city engineer recommends the laying of 103,200 feet of 12-inch mains, at a cost of $24,800; and 5,000 feet 6-inch mains, at a cost of $2,700; to which add cost of valves and hydrants, bringing the whole up to $29,725. The Canadian Board of Fire Underwriters ask what steps have been taken to carry out the improvements asked for by the deputation which waited on the committee last year, to which reply is proposed that nothing definite could be done in the meantime. There is no immediate prospect of building another main, the citizens already having defeated a by-law for that purpose. It is proposed to build a twelve-inch main on York street, to Dundurn or Sophia streets, and along either of the last mentioned streets to King street.

"FIND THE DIVIDEND."

A firm in Hamilton sends us an assignee's statement in connection with a small estate in Norwich, "which," they add, "may be interesting to you as an illustration of how creditors fare in these matters. Latest puzzle out—find the dividend!" The matter in question is the estate of John V. Magee an insolvent, and the statement is as follows:

ASSETS.

Amount received for stock and fixtures	$567 65
Amount collected from book debts	45 74
	$613 39

PREFERRED CLAIMS.

To paid for advertisement for sale	$ 6 81
Paid feed for horses	13 03
Paid railway fare and expenses in going to and from Norwich, collecting accounts, etc.	19 00
Rent, one year	100 00
Rent to G. C. Sutton	28 00
Ball & Ball, solicitors' costs	97 66
Postage stamps	1 69
Assignee's fees	52 00
Witness fee, assignee	1 00
Discount on note	75
Inspector's fees	40 00
Paid taxes	20 00
Law costs, R.C.C. suit	133 45
John V. Magee, exemption	100 00
	$613 39

JOHN MAGEE,
Assignee.

We have looked, as requested, for the dividend, but in vain. The whole $613 collected has been swallowed up in rent, fees, costs, and expenses of one kind and another; say, 8½ per cent. to the assignee, 6½ to the inspectors, 16 per cent. to the solicitors of the estate, and 21 per cent. more for "costs in R.C.C. suit," whatever this may mean. Here is 52 per cent. in these four items. The creditors get nothing.

IN THE DRY GOODS STORE.

Blanket mills, knitting mills and tweed mills, in fact one may say, the woolen manufacturing industry of Ontario generally, are well employed. Some of them are running overtime to catch up with orders. Not only are orders for warm goods for the Pacific coast brisk and peremptory, but there is good request for spring materials.

Canadian manufacturers of tweeds have for the most part concluded that the prices at which their mills have been running are too low for profit, and we understand they are coming into conference, and hope to secure united action in the direction of higher prices for their output. Makers of underwear have been able, it seems, to agree upon a better footing than the cutting of prices and terms which was formerly indulged in.

A smart-looking shop window is one of the best attracters of trade that a retail tradesman possesses, in the opinion of the *Hardware Trade Journal* of Birmingham. Says that journal: "The shop window must be clean, neat, and show a smartly arranged collection of goods. The arrangement of the shop window indicates the nature of the business man who owns it. Let yours be bright; make your shop window the smartest in the street; let a good variety of well-arranged goods be seen there; let the prospective buyer see something of what you have in stock. It is impossible to employ too much care and skill in the arrangement of the goods in the shop window, in the shop, and in the showroom."

The Hanover Woolen Mills Company, Limited, is the name of a company incorporated last month in Ontario to make woolen and knitted goods, capital stock $20,000; persons: William Irvine, John Black and Henry Brigham, all of Bentinck, Grey Co., Ontario, farmers; Frederick Frook, of the township of Brant, in Bruce Co., farmer; Joseph Hoffarth, of Carrick, farmer; Daniel Knechtel, furniture manufacturer, and Henry Poehlman, produce merchant, both of the village of Hanover. Another company with similar powers and with a capital of $10,000 is the St. Lawrence Blanket Company of Gananoque, Limited, to make blankets, tweeds and yarns. Incorporators: William John Gibson and Erastus Cook, both of Gananoque, manufacturers; James McParland, of Kingston, wholesale merchant, and John Herbert Bagg, chemist, and Edward Goodwin, manufacturer, both of Brooklyn, New York.

FOR GROCERS AND PROVISION DEALERS.

A correspondent of the Halifax *Chronicle* writes: "Canada is the only country now having any lobsters of any account, the rest having been over-fished, and if the Government does not enact laws for its preservation very soon, even here this valuable shellfish will soon be exterminated. The people of the Bay of Fundy, almost without exception, are favorable for an act fixing the minimum size at 10½ inches. Even the canners of Digby county have signed petitions to that effect."

The Inland Revenue Department has received petitions from some of the eastern boards of trade praying that the law respecting canned goods should be amended by requiring the packer to place, in clear lettering on the can, the net weight of the contents and the date when the goods were packed. The department will ask the views of the boards of trade throughout the country on this request. Some years ago petitions of this nature reached the department, but were so strongly opposed by the canners that the matter was not pressed at that time. The contention of the canners is that if goods are put up properly, it matters not whether they are one or ten years old, but that the stamping of the date on the can unduly prejudices purchasers.

The Carleton council is in favor of establishing a County Cheese Board in the city of Ottawa, and recently passed this resolution: "That having cognizance of the great and growing importance of the cheese industry, not only of the whole Ottawa valley, but of Carleton in particular, and recognizing the excellent shipping facilities afforded by the railway system as well as the steamboat lines centering in Ottawa; and the fact that cold storage is also available, that this county council approves of the action of the Ottawa Board of Trade in the steps taken towards the establishment of a cheese board in the city of Ottawa, as calculated to be of great benefit and convenience to the farmers of the whole Ottawa valley. And this council further tenders its heartiest support and active co-operation in furthering this most worthy object."

INSURANCE ITEMS.

A branch of the Sun Life Assurance Company of Canada has been established in Paris, France.

The Sun Life Assurance Company claims to have done the largest new business in Canada during 1897. We have not seen the figures.

The Lloyd's Plate Glass Insurance Company of New York, has purchased the plate glass insurance business of Boivin, Wilson & Co.

A good showing is made by the Great West Life for last year. It has written $1,400,000 more business than in the preceding year, involving an expansion of the premium income by $50,000. The business in force now exceeds seven millions.

The business of the United States branch of the Lancashire Insurance Company for 1897 is published, showing very satisfactory results, thus: Total income, $2,036,835; net premiums, $1,977,673; expenditure, including losses, $1,693,386. This shows an underwriting profit of $284,287, and a gross profit of $343,449. We have also learned that the income of this company in Canada for 1897 amounts to $287,045, being an increase of something like twelve thousand dollars over that for the previous year.

Not many days ago we had to chronicle the sudden death of Sheppard Homans, so well known as the founder and long the president of the Provident Savings Life Company of New York. And we have now to notice the tragically sudden death last week of his successor in the presidency of that company, Mr. Charles E. Willard, who, while climbing the stairs of the elevated railroad station at Eighty-first street and Columbus avenue, tripped and fell backward, fracturing his skull and breaking his neck. Mr. Willard was an estimable man, who had but recently retired in the prime of life from active insurance work.

BERLIN BOARD OF TRADE.

The annual meeting of the Berlin Board of Trade was held in the council chamber of that town on Tuesday, 11th January, some twenty members being present. The treasurer's statement showed a good balance in hand. Three new members were elected. A resolution of thanks to the Grand Trunk Railway for placing the new Berlin railway station on the site recommended by the board was carried. Mr. J. M. Staebler, the retiring president, made a brief address. He stated that during the past two years numerous applications had been received by him for the location of industries in Berlin, but all wanted capital, and the formation of joint stock companies. Companies of this nature did not have sufficient success here, however, and the board had not been called together to consider them. The manufacturing industries of Berlin have all been doing exceedingly well, he said, and many have increased their capital. The last census shows there is a large floating population in Berlin, the number of boarding houses having doubled within a short time. He trusted the population would continue to increase, and by combination of efforts among business men the business importance of Berlin would steadily gain.

Nominations were then made for officers. Messrs. L. J. Breithaupt, Ed. Smyth, W. C. J. King, and C. K. Hagedorn, were nominated for the presidency. All withdrew but the latter. For the vice-presidency, Messrs. S. J. Williams, J. U. Clemens, and G. V. Oberholtzer were in the field. The first two retired. Members of the council were then chosen, Mr. H. L. Jansen declining nomination. The following were elected officers for the ensuing year by acclamation:

President—C. K. Hagedorn.
Vice-President—G. V. Oberholtzer.
Secretary—J. S. Hoffman.
Treasurer—Ed. Smyth.
Councillors—Messrs. Hugo Kranz, J. U. Clemens, J. R. Stauffer, W. C. J. King, G. M. DeBus, Robert Smyth, A. L. Breithaupt, G. C. H. Lang.

A STRIKE.

The weavers of the Rosamond Woolen Mills at Almonte, Ont., are on the strike, as the result of a difference between employers and employees as to wages. Both parties appear to be determined and it is impossible to say what the outcome will be. Some years ago the Rosamonds were accustomed to give their weavers a bonus for good work. This was abolished four years ago and caused considerable dissatisfaction. Times have improved and the employees were looking for a renewal of their special privileges, but on January 25th a notice was posted announcing a reduction in wages, which it is alleged will amount to ten per cent. It is said the weavers are determined to accept no reduction, but may return to work without pushing for the restoration of the bonus, a compromise the company probably calculated upon when they issued the notice of reduction. Mr. Rosamond states he informed the weavers Tuesday night that he would arrange a scale of wages to satisfy all reasonable demands, and is much annoyed that the workers are not at their posts. Conferences have been held, but were barren of results, neither side being inclined to yield. The remainder of the mill has closed down. As the looms are full of travelers' samples, the loss to the mill of the season's orders is possible, unless work is resumed at once. The Rosamond Company claim that for years they have paid higher wages than other mill owners.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, February 3rd, 1898, compared with those of the previous week:

CLEARINGS.	Feb. 3rd, 1898.	Jan. 27th, 1898.
Montreal	$14,549,771	$13,285,791
Toronto	8,307,722	7,807,617
Winnipeg	1,378,167	1 240,440
Halifax	1,143,587	1,016,205
Hamilton	649,347	548,374
St. John	432,997	511,103
	$26,461,591	$24,409,529

Aggregate balances this week, $3,938,705; last week, $3,375,198.

—Bids for the Toronto municipal loan of £213,000 sterling at 3½ per cent. were opened last week. Competition was lively, for there were twenty-three tenders. The loan was subscribed twenty times over. Of the fifteen bids for the whole issue, every one was above par, they ranged from 100·31 to 103·225, and for portions of the issue the offers ranged from 102·40 to 107½—the last being bid for $200,000 worth. Evidently the credit of the city is good, since London, New York and Montreal parties offered more than par for her 3½ per cents. It is not two years since the previous issue at the same rate brought only 97·03, and in 1897 Montreal fours sold at 105. But the fact that Toronto's credit is thus shown to be good, and that money appears easily obtained, is no warrant for the expenditure of great sums on a railway northward, to be owned by the city, as some of the daily papers are suggesting. A very satisfactory feature of the action of the city council in allotting the loan is that most of it is taken by Canadian concerns, the Canada Life Assurance Company takes $275,000 at 103.01; the Bank of Hamilton, $250,000 at 103.11; the Manufacturers Life, $25,000 at 104.90; the Western Canada Loan Co., $200,000 at 103; F. Thompson & Co., Sherbrooke, $213,500 at 102.83, and parties in Lincoln, England, $73,000 at 105.25. The average rate of the whole allotment is 103.185, and it yields to investors just about 3½ per cent. per annum. Canadians are waking up to the consideration that what is regarded as a desirable investment by English and American investors is hardly likely to be a bad one for themselves.

—A correspondent sends a glowing account of the growth of the district around Edmonton, and shows how that town is going ahead in consequence. Already two Canadian banks have branches there, and two more are opening presently. The letter reminds us of what was said by Mr. Thomas, general manager of the Molsons Bank, and the directors of that institution who accompanied him on a trip to Western and North-Western Canada, returning shortly after New Year's Day. Along the Calgary and Edmonton Railway, between Red Deer and the Saskatchewan, says Mr. Thomas, is one of the best farming districts throughout that country. The settlers belong to many nationalities, and are generally in a most prosperous condition. One French-Canadian family that had secured six quarter sections of land, viz., 960 acres, had netted $4,000 from their wheat crop during the past season. Speaking for the Molsons Bank party, Mr. Thomas said: "From the time of our departure until we returned, I never heard a single complaint, and this is saying a good deal, for you know that farmers are chronic grumblers. We talked with a great many, and one and all appeared to be abundantly satisfied with thei lot."

—An encouraging report is presented by the British Mortgage Loan Company for 1897. That the company's business has increased in extent and activity, is manifest from the enlarged figures of repayments and fresh loans; the surplus of deposits received over those withdrawn, in spite of lowered rates of interest thereon, and the greater volume of assets in mortgage loans. The value of its stock is at the same time established by the sale of a block of shares at 20 per cent. premium. Having loans on real estate exceeding a million of dollars, the amount of landed security which remains in the company's hands is only $8,174. Profit and loss shows $9.173 to the good, after paying interest on borrowed money, expenses and dividend of six per cent., the gross earnings having been $58,403, and the balance brought forward $660. The reserve fund is swelled to $100,000. Under such circumstances, the directors and shareholders of the company may be pardoned for the congratulations in which they appear to have indulged at the meeting.

—An increased business is shown by the Perth Mutual Fire Insurance Company for the year 1897. The amount at risk at the end of the year was $15,795,103, under 13,838 policies, which means 1,781 more policies and $1,779,000 more insurance than in the previous twelve months. The losses were less than in 1896; the income larger, the disbursements about the same, though we observe a lessening of office and minor expenses, which indicates close economy. An increase of assets is shown, among the larger items of which are $66,000 in debentures and mortgages, and $9,458 in real estate and office building. The surplus of assets over liabilities is increased to $170,905. The patrons of the Perth Mutual have had cheap and satisfactory insurance, and the losses under adjustment are less than five hundred dollars.

—Although the losses of the Waterloo Mutual Fire Insurance Company were some $16,000 heavier in 1897 than in the preceding year, the directors do not seem at all disturbed, but rather disposed to congratulate themselves that they are better off in that respect than some other folk. The increase of business during last year was from a total of 24,197 policies insuring $25,920,000 to 27,244 policies covering $27,900,000. But the losses paid were $133,408, where in 1896 they had been only $117,354: the other expenditures have, however, been kept economically down. The balance shown by the company over re-insurance, and every other liability, is $212,612.

—In an article on the Toronto Financial Corporation, in THE MONETARY TIMES of 21st January last, the name of Hon. E. J. Davis, Provincial Secretary for Ontario, was mentioned as vice-president of that concern. We are informed that, although Mr. Davis was a director therein, he resigned his position as such on 31st December, 1896. As the company had made no return to the Government since that date, we concluded that he was still on the board.

Meetings.

BRITISH CANADIAN LOAN AND INVESTMENT CO., LIMITED, TORONTO.

The twentieth annual general meeting of the shareholders of the above company was held at the company's office, 25 Adelaide street east, on Wednesday, the 2nd inst., the following shareholders being present: A. H. Campbell, William Ince, Dr. U. Ogden, John Burns, Samuel Trees, Henry Pellatt, Hamilton Cassels, J. H. Mayne Campbell, R. A. Grant, W. Macdonald, Edward R. Greig, A. H. Campbell, jr., Thomas Mortimer, C. C. Baines, Alexander Dixon, Joseph Mundey and George Robinson.

On motion, the president, Mr. A. H. Campbell, was appointed chairman, and the manager, Mr. R. H. Tomlinson, secretary of the meeting.

The secretary, after reading the notice calling the meeting, read the report of the directors and auditors and the financial statement, as follows:

REPORT.

The directors beg to submit the twentieth annual report of the company. The amount of sterling debentures sold and renewed during the past year was $246,360, and the amount redeemed $124,168. The amount outstanding at the end of the year was $1,371,755, being a decrease of $96,603 in the amount outstanding at the end of the previous year. On currency debentures there has been received $279, and redeemed $2,359. The balance current being $266,867. The total amount of sterling and currency debentures outstanding is $1,638,622.

During the year the sum of $156,018 has been received in repayment of loans on mortgage, and $79,124 paid out for new investments, and mortgages to the amount of $74,100 were, after a careful re-valuation of the securities, extended for a further term. The loans on mortgage with interest to 31st December last amounted to $2,060,537.

After paying interest on borrowed money, the expenses of management and all expenses connected with the issue and renewal of sterling and currency debentures, also providing for all losses on sales of property during the year, the amount at credit of profit and loss is $32,654.82, made up of:

Balance from last year's statement	$ 5,918 22
Net profits for the year	26,736 60
	$32,654 82

which has been disposed of as follows:

Two half-yearly dividends, at the rate of 6 per cent. per annum	$23,908 90
Balance carried forward to next year	8,745 92
	$32,654 82

The payments of principal and interest on the company's investments have been greater during the past year than usual, the amount of interest received exceeding any previous year, except one, since the company was formed. The net profits, however, have been less, owing partly to a reduction in the volume of business done, but more especially from not taking credit for the past due interest on some of the borrowers' accounts, a policy which has been more rigidly enforced for the last three or four years than was previously considered necessary.

The improvement in Canadian business affairs, so pronounced during the latter part of the year, and promising so well for the coming season—owing to better crops and improved prices for the products of the farm, mill and factory—has already increased the demand for farm lands in Ontario and Manitoba, where the company's investments are made, and has also resulted in the larger payments on the investments above referred to.

The reduction in the rate of interest obtainable on first-class securities, referred to in previous reports, continues, owing to the large amount of money seeking investment, but it is confidently believed that by securing money at a lower rate on their debentures and exercising the greatest possible care and economy in management, loan companies will continue to do a fairly remunerative business, although the dividends payable to their shareholders must necessarily be less than formerly.

The thanks of the company are due to Messrs. Scott, Moncrieff & Trail, W.S., the general agents in Edinburgh, for the great interest they take in the company's welfare.

The balance sheet and profit and loss account, duly audited, are herewith submitted.

A. H. CAMPBELL,
President.

Toronto, 27th January, 1898.

STATEMENT OF AFFAIRS FOR THE YEAR ENDING 31ST DECEMBER, 1897.

BALANCE SHEET.

Liabilities.

Capital stock, 20,000 shares, of $100 each, $2,000,000, of which $20.00 on currency and £4 on stg. shares have been paid	$ 398,481 60

R. H. TOMLINSON,
Manager.

AUDITORS' CERTIFICATE.

We have made a careful audit of the books and accounts of the British Canadian Loan and Investment Company (Limited) for the year ending 31st December, 1897, and have made our usual examination of the securities; and we hereby certify that the above balance sheet and profit and loss account are correct.

DAVID HIGGINS,
HENRY WM. EDDIS, F.C.A.
Auditors.

Toronto, 27th January, 1898.

The scrutineers reported the following gentlemen re-elected directors for the ensuing year, viz: A. H. Campbell, William Ince, John Burns, Samuel Trees, W. R. Brock, J. H. Mayne Campbell and Henry Pellatt.

At a subsequent meeting of the newly-elected board of directors, A. H. Campbell, Esq., was re-elected president, and William Ince, Esq., vice-president.

BRITISH MORTGAGE LOAN CO.

Very gratifying statements were again presented to the shareholders of the above-named company, at their nineteenth annual general meeting, held on Thursday, January 27, 1898, in their offices, Market street, Stratford, Ont.

Hon. Mr. Ballantyne, the president, was appointed chairman, and Mr. Buckingham, the manager, secretary, besides whom there were present, Mrs. Lizars, Mrs. Robert Smith, Mr. Jas. Innes, ex-M.P. (Guelph), Mr. S. S. Fuller, Mr. James Corcoran (Toronto), Mr. W. Maynard, jr., manager of the Bank of Commerce, Alderman James Trow, Mr. J. W. Scott (Listowel), Mr. Winslow, manager of the Bank of Montreal, Mr. G. G. McPherson, Mr. George Innes (Woodstock), Mr. John McMillan.

The following report of the directors, the financial statement, and the report of the auditors, were severally read:

REPORT.

The steady and continuous decline in the rates of interest, combined with a constant and increasing inflow of capital, much of which remained in the bank without profitable employment, impelled the directors last July to make the slight reduction of one-half of one per cent. on deposits. At the same time, so as to further successfully meet the new order of events, and to provide for the stability of the company, the dividends paid on stock were reduced from 7 per cent. to 6 per cent.—a conservative course whose fruits are witnessed to-day in the augmentation of the reserve fund to the exemplary figure of $100,000. Whether the deposits were measurably checked by the change, it is not easy to say; but it is quite certain that in spite of it they have memorably grown in volume—from $519,416 to $573,839; showing that the company has been a sharer, in full measure and to spare, of the good fortune so bountifully showered this season upon the people as a whole.

Debenture money shows a slight diminution—from $66,168 to $60,931. During most of the year it represented a much larger sum, and beyond this it might have been considerably increased had the directors been disposed to accept all that was offered on debenture account. They were unable to use to advantage much of the money already on hand, amounting at one time to close upon $70,000, and therefore had to decline a good deal of new capital that was pressed upon them. They are glad, however, to be able to state that a better demand has again set in, and that at the date of this report there is a very fair market once more for all the company's funds. Judicial sales by public tender of a considerable block of the company's stock to close the estate of a deceased shareholder, since the reduction of the dividend, have established its price at 20 per cent. premium, the highest rate hitherto known to the directors.

Warned by examples in other quarters, unusual care continues to be exercised in regard to securities. Applications for loans have not only to pass the keen scrutiny of the manager, but the executive committee consider them carefully from every point of view, as well as the character of the applicants, most of whom are known to them, and they make no advances whatever until the properties are closely inspected and reported upon in writing by an experienced director, possessing a sound practical knowledge of farming lands. Nor does supervision end here; for the directors deem it to be their duty, at the request of the manager, to keep the debits and credits in the mortgage ledger frequently reviewed, and they speak therefore from practical knowledge, and with all confidence in the accuracy of the statement, when they give expression to their belief that the foundations of the company are firmly established upon bed-rock.

On loans of over a million of dollars, mortgaged property now in the hands of the company represents the insignificant sum of $8,174. It produces an adequate revenue, and is worth all the money set against it.

The amount at the credit of the profit and loss account at the end of 1896 was $660.28; at the close of 1897, $1,368.58. The gross earnings for the year 1896 were $55,827.77; last year, $58,403.30.

WM BUCKINGHAM, Manager.

AUDITORS' REPORT.

We certify that we have carefully audited the books of the British Mortgage Loan Company, of Ontario, monthly for the year 1897; that we have examined all vouchers and find them to correspond with the entries therein; and that the foregoing statement indicates the financial position of the Company on the 31st day of Dec. 1897.

C. J. MACGREGOR,
WM. DAVIDSON,
Auditors.

Stratford, January 17th, 1898.

The president, in moving that the reports and statements be adopted, said that while the reports of some companies of late had unfortunately been proven by subsequent events to be unreliable, he knew from his personal knowledge that the report of the directors and the audited statement signed by the manager, just read, were true and accurate accounts of the position of this company. The directors had discharged their duties in no perfunctory manner, but had followed their usual painstaking practice of verifying the correctness of the value of each security. It would be seen that the company was in a splendid position and that if a slight reduction had been made in the dividend rate, it was not because the seven per cent. had not been earned, but because the directors concurred in the sound judgment of good financiers as to the wisdom of continuing to build up the reserve. The effect of this policy was to enable the company to meet the ever-growing tendency towards lower earning rates by getting the command of cheaper capital, and it had come in upon them in excess of their requirements. As the investments had been mostly made within the limits of the county, where there had been no depressing after-effects of a "boom" in prices, the company had escaped losses in a remarkable degree.

The vice-president, in seconding the resolution, said it was the best of the many good reports invariably made since the company was established.

Mr. James Innes expressed the highest confidence in the management, which he said had discovered the true secret of success, and that was to make careful selection of the securities, and consequently to avoid the burden of carrying on its shoulders a lot of useless property. This was most commendable at a time when there had been such alarming shrinkages in values. He approved of the reduction in the dividend, so as to strengthen the position of the company.

Mr. Scott and others spoke in similar congratulatory terms, after which the motion was adopted.

Mr. C. J. Macgregor, M.A., and Mr. W. Davidson, county clerk, were re-appointed auditors.

Messrs. Maynard and Trow were chosen scrutineers, and reported the unanimous re-election of the former board of directors, namely: Hon. Thos. Ballantyne, Messrs. S. S. Fuller, James Corcoran, J. W. Scott, John McMillan, Geo. Innes, John Parker and Malcolm MacFarlane.

Thanks were cordially voted to the president and vice-president, the manager and assistant manager, and a grant of $200 was made to the president, and of $150 to the vice-president, in recognition of their services during the past year.

Hon. Mr. Ballantyne was afterwards re-elected president, and Mr. S. S. Fuller, vice-president.

WATERLOO MUTUAL INSURANCE COMPANY.

The thirty-fifth annual meeting of the policy-holders of the Waterloo Mutual Fire Insurance Company was held in the board room at the head office, Waterloo, Ont., on Saturday, January 22nd.

Among those present were Messrs. Geo. Randall, John Shuh, Wm. Snider, Simon Snyder, J. M. Muir, George Diebel, John Killer, C. M. Taylor, David Bean, Thomas Hilliard, J. H. Webb, M.D., M. Devitt, of Waterloo; John Allchin, New Hamburg; Thomas Gowdy, Guelph; P. E. Shantz, Preston; Allan Bowman, Blair; W. H. Bowlby, Q.C., and L. J. Breithaupt, Berlin; J. E. Livingston, M.P., Baden; J. L. Wideman, St. Jacobs.

The chair was taken by Mr. George Randall, president, and Mr. C. M. Taylor acted as secretary. The secretary read the minutes of the last annual meeting, which were confirmed.

The directors' report and the several financial statements were then read by the secretary, as follows:

REPORT.

Your board of directors beg to lay before you their report for the year ending the 31st of December, 1897, being their 35th annual report.

The following abstract has been prepared from several detailed statements about to be read to you, viz.: We have during the year just passed, issued 13,298 policies: the total number of policies in force is 27,244; the total amount insured thereunder, less amount re-insured, is $27,900,326. The average liability, therefore, under each policy is shown to be $1,024.

The aggregate assets of the company are $327,300.75, and the total liabilities $114,088.09, leaving a balance of assets over all liabilities to the amount of $212,612.66.

By comparing the printed statements in your hands for 1897 with the corresponding statements of 1896, you will notice that the business exclusively pertaining to the year through which the company has just passed has been such as to warrant your board in stating that the company has held its own notwithstanding the increase in the amount paid for losses in 1897 over that of 1896. In making this statement, we regret to say that a number of insurance companies doing business in Canada are not able to say as much regarding their Canadian business for 1897.

We conclude our brief synopsis of the business of the past year by calling your attention to the two main objects of this meeting, namely, the disposing of the several detailed statements to be read to you and the election of four directors. The retiring directors are: Messrs. John Allchin, Simon Snyder, Allan Bowman and John L. Wideman, all of whom are eligible for re-election.

GEO. RANDALL,
President.

AUDITORS' REPORT.

To the president, directors and members of the Waterloo Mutual Fire Insurance Company:

Gentlemen,—We beg to report that we have examined the books of account and vouchers of your company for the year ending the 31st December, 1897, and that we find the same correct.

We submit a statement of the receipts and expenditures of your company for the past year, a statement of your assets and liabilities, and also a list of the securities for the investments of your company.

Respectfully submitted,
J. M. SCULLY,
BENJ. DEVITT,
Waterloo, Jan., 1898. Auditors.

The president, in moving the adoption of the several reports, said that the past year had been a pretty hard year on the fire insurance companies, but the Waterloo Mutual had not suffered to such a great extent as many other companies, and the directors felt like congratulating the company under the circumstances upon the showing they had been able to make. The motion was seconded by Mr. John Shuh, vice-president of the company, and after some discussion, carried unanimously.

Messrs. J. M. Muir and D. Bean were appointed scrutineers and after a ballot had been taken reported the unanimous re-election of the four retiring directors.

Messrs. J. M. Scully and Benj. Devitt were re-appointed auditors for the ensuing year.

Immediately after the close of the annual meeting the directors met and elected Mr. Geo. Randall president and Mr. John Shuh, vice-president of the company for the ensuing year.

The following are the names of the gentlemen comprising the full board of directors: George Randall, John Shuh, S. Snyder, Geo. Diebel, Wm. Snider, Waterloo; J. L. Wideman, St. Jacobs; John Allchin, New Hamburg; Allan Bowman, Blair; P. E. Shantz, Preston; Thomas Gowdy, Guelph; James Livingston, M.P., Baden; Thomas Cowan, Galt.

PERTH MUTUAL FIRE INSURANCE COMPANY.

The thirty-fourth annual meeting of this company was held at its head offices in Stratford, Ont., on Tuesday, 25th January last, the president, Mr. William Davidson, in the chair. The following report and financial statement were presented to the members:

REPORT.

Your board of directors in laying before you the thirty-fourth annual statement of the affairs of the company, being for the year ended 31st December, 1897, have pleasure in being able to say that the operations of the year have resulted in a substantial increase in the amount of business written, and in the amount of our assets as well.

The amount of insurance written during the year was :

On the Mutual system	1,651	policies for	$2,386,187
" Cash "	5,713	" "	5,947,637
A total of	7,364	" "	$8,333,824

The number of policies in force and amount at risk on 31st December, 1897, was

On the Mutual system	4,001	policies for	$5,758,103
" Cash "	9,837	" "	10,037,000
A total of	13,838	" "	$15 795,103

an increase, as compared with the previous year, of 1,781 policies for $1,779,259. Of the total at risk there was re-insured $1,308,730, leaving our net liability for amount at risk $14,486,373.

The income of the past year was $124,842.32, and the expenditure $114,098.56, which amount includes the sum of $4,124 paid for losses which occurred in 1896, leaving a balance to be carried to capital account of $10,743.76.

Our total assets, including premium notes in hand, less all payments made thereon, amount to $228,050.85, and as our total liabilities, including the amount required to re-insure all current business taken on the cash system are $57,145.36, our net surplus is $170,905.49.

Detailed statements of the amount at risk, cash account, assets and liabilities, profit and loss account, and the inspector's and auditors' reports, are herewith submitted, and will, we hope, be found satisfactory.

Your directors have pleasure in meeting the members for the first time in the company's own building, and with reference to it would say that the growth of the company's business having rendered the office formerly occupied entirely too small, and the proper care and preservation of its records impossible. they were obliged to consider the question of securing increased office accommodation, and after mature consideration concluded they could not do better than erect a modern office building large enough to accommodate the company's increasing business, and to serve as a permanent home for it.

After careful consideration, the corner of Ontario and Waterloo streets was decided to be the best site available for the purpose, and the ground having been purchased, plans and specifications were procured from Mr. T. J. Hepburn, architect. The tender of Mr. James Stamp, contractor for the work, was accepted, and the work proceeded with under the supervision of the architect and our president, Mr. Davidson.

Your directors believe that the roomy structure in which we are met, substantial, elegant in appearance and up to date in vault accommodation, lighting, heating and all minor details as it is, erected at a cost less than $10,000, may be justly regarded with pride by every member of the company, as it is by them and by the citizens generally, especially as the interest on capital invested will not amount to more, if as much, as would be necessary by way of rent to secure the accommodation now necessary, and feeling that their action is fully justified by the greatly increased growth of the company's business, they trust that it may in future be even more amply justified by continued success.

The directors retiring this year are Messrs. William Davidson, Joseph Salkeld, Thomas Ballantyne and Andrew Kuhry, all of whom are eligible for re-election.

All of which is respectfully submitted.
CHAS. PACKERT, WM. DAVIDSON,
Manager. President.
Stratford, Ont., January 26th, 1898.

TORONTO MARKETS.

Toronto, Feb. 3, 1898.

DAIRY PRODUCE—Receipts of dairy butter are much larger than were expected for this season of the year. Dealers manage to keep the great bulk of the offerings well sold up. The quality of the dairy butter offered here is on the whole good, but there are complaints that the color is too light. We quote: Large rolls, 14c., and pound prints 15 to 16c. per lb. There is little or no tub butter in the market. The British markets have not been strong this week, and supplies have been diverted from that source to local centres, with the natural result that the home markets are depressed. There is a falling off in values of fully ½c. per lb., as compared with quotations made a week ago. Local consumption of cheese is large, and retailers who put in during the autumn months their supplies for the season's trade, are again in the market as buyers. The export demand is by no means active. Supplies of eggs are scarce, and prices remain firm. The cold weather is naturally having a marked effect upon the market. Dealers quote: Limed, 15 to 16c; cold storage, 15 to 16c.; and new-laid, 20 to 21c. per dozen.

GRAIN—The wheat market has fluctuated during the week. At the moment it shows signs of increased strength. The local situation is of course influenced by the trend of events in the United States, and the Western markets have been very unsettled. Peas remain quiet, and values are unchanged. Sales of rye at 48c. are reported. In barley there is little report. Corn remains easy. Oats of good choice quality are in demand for the milling trade.

GROCERIES—There is only a quiet trade doing in grocery circles. Perhaps the cold weather has frozen up the energies of the traveling men, or, more likely, has interfered with attendance upon the markets in country districts. Values are about steady. Canned goods, however, are stronger, and wholesale dealers are quoting an advance of about 5c. on vegetables. There is little or no change in dried fruits. The stock of currants in Greece has been reduced somewhat during the month; authorities estimating the total quantity remaining in Greece at 16,000 tons, which does not appear excessive, but at present high range of prices is probably sufficient for food purposes for all consuming countries. It remains to be seen whether France and the North of Europe can use any quantity of the goods at present range of prices for wine making. It is reported that a portion of the stock now remaining in Greece is of inferior quality. The sugar trade is quiet. Collections are in many cases unsatisfactory.

HARDWARE AND METALS—General trade has been very quiet this week, and orders have not been given as freely as was expected. No special reason can be given for the lack of movement. Forward orders are being freely booked covering spring and summer supplies. The outlook for the coming season is good and retailers in the country are of the opinion that a good turn-over will be made when the spring opens. There are no changes to report in values, and manufacturers have announced few alterations in price lists this year. Good orders are being placed for import.

HIDES AND SKINS—The local hide market still continues in a state of excitement in that merchants are paying more for hides than they are worth. Competition has for months rendered this business unprofitable, and there is unfortunately little signs of abatement. It is a question whether the butchers have anything to gain by the excessive prices now paid. As a rule, any advance which is made in hides is simply added on to the buying price of cattle, and consequently the farmer secures the whole benefit. Tanners and merchants are alike interested in seeing hides bought at a reasonable basis of prices. A report from Chicago, Feb. 1st, says: The market is firm; sales of hides at the moment are very moderate, owing to the extreme prices asked by packers. A sale was reported of 600 native steers at 11½c., and the price generally asked by packers was 11½c., with buyers at 11¼c., closing at 11¼ to 11½c. for native steers, 9¾c. for light Texas, and 10¼c. for heavy do.; 10¼c. for butt brands, 9½c. for branded cows, 9¼c. for Colorados, 10⅝c. for heavy native cows, and 11c. for light do.

PROVISIONS—In sympathy with a decline in dressed hogs, an easier feeling prevails in the price of hog products. Offerings of hogs are large, although country shippers are reluctant to accept packers' terms. For heavy-weights $5.80 to $5.90 is the standard quotation, while light hogs are quoted at $6 to $6.15. Provisions are steady. There is comparatively light trading in the market. Dealers think the situation bright, and look for an improved business so soon as the season advances. The demand from the West for provisions promises a strong development.

SEEDS—There is only a fair quantity of seed offering at present at different Ontario points. We note the following quotations: Alsike, $2.50 to $4: red clover, $2 to $4, and timothy, $1 to $1.75, according to quality. The New York *Journal and Bulletin*, Feb. 2nd, says: "Not a trade can be verified here or west in clover for export, among exporters, though they admit that the other side will want more of our clover seed before another season. Yet they prefer to wait, but it ought not to be for lower than present almost bottom record prices. We quote: Clover at $5.25 to $5.50 for common to fair, and $5.62½ to $5.75 for choice to fancy in car and job lots; No. 1 clover, export, $3.40 per bushel f.o.b. New York; $2.75 to $3 for fair timothy in car lots, and $3 to $3.25 for high grade.

WOOL—There is little or no change in the local market. The representative of a Boston firm is in the market with samples, but with what success he has met we cannot say. News from the mills show continued activity, and a good consumptive demand for all suitable classes of wools.

MONTREAL MARKETS.

MONTREAL, 2nd Feb., 1898.

ASHES.—The situation is virtually unchanged from a week ago. Receipts are slightly larger, but the European demand is not revived, and quotations remain pretty much of a nominal character. We quote first quality pots, $3.40 to 3 50; seconds, $3.15 to 3.20; pearls about $4.75 per cental.

CEMENTS AND FIREBRICKS.—The very cold weather has practically killed all demand for cements. Of firebricks some small sales are reported. We quote $2.10 to 2.20 for British cements; Belgian, $1.95 to 2.05; bricks, $17 to 22.00 per thousand.

DAIRY PRODUCTS.—The cheese market continues in unsatisfactory shape, there being practically nothing doing. Prices are again off somewhat from last week's level, and 8 to 8¼c. per lb. is a full quotation for finest grades. Butter, too, is very dull, with rather easier prices. We quote fine creamery 18 to 19c., finest dairy 15 to 16½c., rolls 14 to 15c. per lb.

DRY GOODS.—The 4th February is always a heavy day in the dry goods and woolen trade, for many notes come due then; some of the larger houses have been receiving a good number of remittances, against payments due that day, so that a very fair proportion of paper will be provided for, it is thought, and no failures of note are anticipated. The weather conditions during the week have been unfavorable to the movements of travelers, and the city elections have taken up a good deal of attention, but notwithstanding this a steady run of orders is reported by wholesale dealers generally. No changes are noted in values, but now that the underwear manufacturers have made some revision of terms, it is understood that the mills running on tweeds are getting together with the view of some concerted action with regard to prices in their line, which have been so ruinously low.

FISH.—The enquiry for pickled and smoked fish is by no means brisk, but values on the whole are fairly held. We quote:—Green cod, No. 1, $3.50 to 3 75; No. 1, large, $4 to 4.25; dry cod, $3.50 to 3.75; No. 1 herrings, $4.25 to 4.75; N. S. salmon, $12 to 13.00; B. C. ditto, $10 50 to 11.00; sea trout, $6 50 to 7.50; haddies, 6 to 7c.; bloaters, $1 to 1.25 per box; boneless cod, 4½ to 5c. per lb.; whitefish, $4.75 to 5.00 per barrel.

FURS.—Full mail advices regarding the London sales are not yet to hand. Local offerings of raw furs continue small, and it is reported that American houses are doing considerable buying at interior points, especially of mink, for which there is a good demand in New York. We quote:—Mink, large dark, $1.50; small, do., $1.00 to 1.25; marten, $1.75 to 2.25; fisher, $4.50 to 7.00; lynx, $1 00 to 2.00; otter, $1.00 to 12.00 for dark; pale, $5.00 to 7.00; red fox, large, $1.30 to 1.50; small, $1.00; cross fox, $3.00 to 6.00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large, $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7c. to 10c. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

GROCERIES.—Another storm, and a worse one, assailed us this week. Not so much snow fell, but it drifted badly and blocked up country

TENDERS FOR ASSETS
OF
THE FARMERS' LOAN
and SAVINGS COMPANY
IN LIQUIDATION

The Toronto General Trusts Company, Liquidator of the above company, will receive up to and inclusive of

Saturday, 12th February, 1898

tenders for the purchase of certain mortgages, amounting to about $300,000, on farm and city properties, subject to the approval of the Master-in-Ordinary.

Schedules of the mortgages can be seen on application at the office of the Farmers' Loan and Savings Co., 17 Toronto Street; or at the offices of the Toronto General Trusts Co., Liquidators, giving (1) Name and address of the Mortgagor. (2) Short description of the properties mortgaged. (3) Amount of principal secured by each mortgage. (4) Maturity and rate of interest. (5) Collateral securities and privileges. (6) Insurance.

The highest or any offer will not necessarily be accepted.

Dated at Toronto, the 21st day of January, 1898.

The Toronto General Trusts Co'y,
LIQUIDATOR.
J. W. LANGMUIR, Managing Director

roads over a great area. The railway trains were interfered with besides, and the volume of business is natturally affected. As regards values there is little new to report. Sugars are without change, ranging from 3½ to 3¾c. per lb. for yellows at the factory; granulated 4¼c., and Austrian 3 15/16c. The demand from jobbers for this line is reported as rather better. Molasses continues very firm, with supplies in narrow compass on spot, and enquiries made in Quebec and the lower ports show that none is available there. Advices from the island are to the effect that new crop Barbadoes is expected to open at about 10 cents prime cost. Barbadoes is held firm at 28c. in quantity. Porto Rico 26c., and Antigua, 20 to 21c. Teas are still inactive but firm. A representative of a Japan house, who was in town last week, secured only orders for a few lots of first pickings. Dried fruits are quiet; California raisins are easier on coast, owing to large quantities of rain-damaged goods in hands of packers, and fair average 3-crowns could be laid down at about 5¼ to 5½c.; but for standard brands, such as Griffin & Skelly's, there is no pressure to sell. In dried peaches and apricots, good demand on coast is reported with steady prices. Spices are showing increasing firmness, notably pepper and cloves. Canned goods continue high, and canners' agents quote tomatoes $1.25; corn, 85c.; and gallon apples, $2.50, all f.o.b. prices at factory.

LEATHER.—Firmness marks the situation. Prices of black leather are still low, as compared with hide values; it is claimed that tanners made no money last year, and that quotations for leather must advance sooner or later. The English market shows improvement, and a Nottingham buyer has been in the city picking up several fair lots; some good sales, particularly of sole, are also reported for the other side. We quote:—Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 18 to 21c.; juniors, 15 to 17c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; bufted cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 12½ to 13c.: polished buff, 11 to 13c.; glove grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

METALS AND HARDWARE.—In these lines the movement is a moderate one, and we hear of no special changes as regards values. Some American iron men have been pushing for pig iron orders, quoting $15 for No. 2 Niagara, but we do not hear of them securing much business. A 200-ton transaction in No. 1 Hamilton iron is under negotiation, and likely to be put through, at a shade under regular quotations. We quote:—Summerlee pig iron, $18.00 to 18.50; Carron, No. 1, $18.00; No. 3, $17.25; Ayrsome, No. 1, $17.00; No 3, $16.50; Shotts, $17.25 to 17.50; Carnbroe, $17.00, ex-store; Siemens pig No. 1, none; No. 2 Siemens, none; Ferrona, No. 1, $15.00 to 16.00; Hamilton No. 1, $16.00 to 16.50; No. 2, ditto, $15.50 to 16.00; machinery scrap, $14.00 to 15.00; common ditto, $12.00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do, I.X.,

METALLIC CEILINGS

One of our Designs

These ceilings are made in a great variety of designs, suitable for every description of buildings, including Hospitals, Churches, Schools, Asylums, Convents, Opera Houses, Offices, Stores, Residences, etc.

The many advantages of their use as a modern substitute for wood and plaster lie in the fact that they are light in weight, will not crack nor drop off, consequently no danger of falling plaster; are unquestionably durable, have air-tight joints, are easily applied, are practically fire-proof, are highly artistic, **do not harbor vermin** or **the germs of disease,** and possess splendid acoustic properties, in addition to many other points of excellence over any other form of interior decoration.

$3.90 to 4.00; P. D. Crown, I. C., $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2 90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, etc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ½-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1.50; three-sixteenths do.; $2 00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.60 sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 15¾ to 16c. for L. & F.; Straits, 15¼ to 15½c.; bar tin, 16½ to 17c.; ingot copper, 11¾ to 12¼c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.50 to 4.75; American spelter, $4.50; antimony, 8 to 9c.

Oils, Paints and Glass.—The good business in orders for spring shipment is fairly maintained. The only notable change as regards price is an advance in putty, the following scale having been fixed by the White Lead Association: Bulk putty in barrels, $1.65; bladders in barrels, $1.80; 25 lb. tins, $2.05; 12½ lb. tins, $2.30. Linseed oil and turpentine are held very firmly at recent advances. We quote: Turpentine one to four barrels, 51c.; five to nine barrels., 50c., net thirty days. Linseed oil, raw, one to four barrels., 45c.; five to nine barrels, 44c.; boiled, one to four barrels, 48c.; five to nine brls., 47c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c.; genuine red do., 4¼c.; No. 1 red lead, 4c.; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00. Paris green, 50 and 100 lb. drums, 15c.; 25 lb. drums, 15½c.; 1 lb. cartons, 16c.; pound tins, 16½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

Wool.—A wool salesman just returned from an extended trip among western millmen, reports great activity everywhere, most of the factories running overtime. Not only are the underwear men and manufacturers of heavy goods for British Columbia trade full of orders, but manufacturers of light tweeds report a large number of repeat orders. The market is very steady at the quotations given last week.

THE SHIPPING TRADE OF AMSTERDAM.

The report of the Chamber of Commerce at Amsterdam on the state of the shipping industry in 1896 has just been issued. It says: The increase of the traffic in our harbor is a gradual and therefore a sound one, but it is slow. The movement of shipping shows a gradual but irregular increase from 1,607 vessels in 1883 to 1,848 in 1896. The tonnage, gross, in 1887 was 3,693,000 cubic metres in 1,609 ships, to 5,577.-000 cubic metres, and 1,848 ships in 1896, thus:

VESSELS YEARLY ENTERED AT AMSTERDAM.

	Number of vessels.	Aggregate burden, cubic metres, gross.
1887	1,609	3,693,000
1888	1,576	3,824,000
1888	1,642	3,964,000
1890	1,675	4,200,000
1891	1,723	4,576,000
1892	1,632	4,554,000
1893	1,558	4,515,000
1894	1,666	4,986,000
1895	1,676	4,988,000
1896	1,848	5,577,000

Traffic with the ports on the east coast of England and Scotland is increasing, as the entries at the port of Ymuiden show. It is noticeable, too, that the size of the vessels is increasing:—

ENTRIES FROM ENGLAND AND SCOTLAND.

	1892.	1894.	1896.
Leith	91,837	95,168	123,847
Newcastle	180,361	242,518	319,005
Sunderland	8,316	13,632	16,768
Hartlepool	15,496	1,847	2,053
Hull	163,474	156,368	260,470
Goole	......	......	176 330
London	437,427	506,045	525,653
Cardiff	4,693	5,299	48,246
Swansea	6,864	7,834	25,803
Bristol	......	......	107,556
Liverpool	98,382	78,563	100,659

In the above series Hull alone shows a diminution this year, but, at the same time, the high figure for Goole attracts our attention. This table manifests in every respect a strongly developed intercourse. A migration of the traffic towards the cheaper and less distant harbours on the east coast, to which we pointed last year, and as we specially mentioned at the expense of Liverpool, is not perceptible this year, at least not to the disadvantage of the western harbors. Nevertheless, the adjacent eastern ports still present the greatest development.

LEFT IN LONDON CABS.

The most striking thing about the articles left in London vehicles is the increase in their number. In two years there was a rise from under 30,000 to 38,000 a year. This may be partly due to a great increase in the number of people who ride in cabs; or it may be that a stricter supervision of the cab-stands induces the cabmen to be more careful in searching their vehicles. Sir Edward Bradford says that the great increase has taken place since the inspecting staff was augmented.

What extraordinary things are named among the miscellaneous articles left in cabs and stage carriages and deposited in the Lost Property Office under the care of the police. Sir Edward Bradford mentions sewing machines, bicycles, a perambulator, and several mail carts. To forget an umbrella is easy enough, and no fewer than 17,000 of these were found in one year by drivers and conductors in their vehicles; but the absence of mind implied in leaving a perambulator, a sewing machine, or a mail cart in a vehicle is uncommonly near to imbecility. Nearly 3,000 purses were found. For the loss of these how many people were suspected of pocket-picking? Artificial teeth were found; the dropping of them needs explaining. The neglect of stuffed birds is as intelligible as forgetfulness of any other parcel, but the passengers who left behind a parrot, two canaries, five larks in cages, and a live rabbit, must have been singularly indifferent to their animal pets. —*London News*.

—Veneer cutting has reached such perfection that a single elephant's tusk, 30 inches long, is now cut into a sheet of ivory 150 inches long and 20 inches wide.

NOVELTY WOOD MILLS OF MAINE.

The spool factories of the State of Maine turn out annually about 250,000,000 spools, which will hold fifty thousand million yards of thread—200 yards to the spool. There are seventeen of these factories in the State, employing 550 hands, at average wages of $1.50 a day each, or $247,500 a year total. In the making of the spools 30,-500 cords of white birch timber, or 15,-250,000 feet, are used. This timber is worth $4 a cord. A large part of the spool timber cut in Maine is not manufactured there, but shipped from Bangor to great factories in England and Scotland. Last year Bangor exported 6,978,668 feet of spool bars to the United Kingdom, the value being $144,000, and more will be shipped next year. There is practically no limit to the supply of white birch available.

The so-called "novelty mills" of Maine are numerous all through the hardwood districts. In these mills are turned out all kinds of little wooden boxes, many of which are used by druggists; checker boxes, checkers, dice boxes, wooden stoppers, handles of a thousand different kinds and shapes, toothpicks by the million, ladders, swings, sleds, school desks and chairs, toy carts and wheelbarrows, tables, desks, cycle stands, baby sleighs and other things too numerous to mention. The largest "novelty" factory in the world is at South Paris, Oxford county, where 200 hands are employed.

A Dixfield factory has just completed an order for 8,000,000 checkers and 200,000 dice boxes, and at another factory in the same town they have made this year 525,-000,000 toothpicks. One firm has made 5,000,000 skewers, such as are used by butchers. Wooden bicycle rims are also an important article of manufacture. The product of these factories goes to all parts of the world. The timber used was once considered practically worthless.—*New York Sun.*

THE CANADIAN SHIPPING TRADE.

We question whether American merchants are aware of the extent to which the Canadians have availed themselves of the opportunity their connection with England affords of building up a maritime interest by purchasing steamers constructed in Great Britain. The substitution of iron and steel for wood, and of steam for sail power, struck a much more serious blow at the industries of the Maritime Provinces of Canada than it did to the industries of the United States. We lost our shipping, it is true, but it was only one of a variety of interests which we possessed. But in certain parts of New Brunswick and Nova Scotia it was practically the only business interests the people possessed. Nothing can be more melancholy than a visit to some of the old ship-building towns of Nova Scotia, which were formerly alive with industrial activity, but which are now, industrially considered, dead places. The facilities then existing represent an industry which has as much passed away as the construction of stage coaches passed after the general use of railways as a means of land transportation.

But our Canadian brethren have, apparently concluded that it would be unwise to abandon the sea simply because they were not in a position to build vessels of the modern type. That is what the blindness of Congress has compelled American ship merchants to do; but as no such restriction existed in the case of Canada, her ship merchants have concluded to keep in the old business by adjusting their trade to new conditions. They have ordered, and are ordering, steamers to be built for them in the English shipyards, or have purchased craft already constructed, and have entered vigorously into competition for the purpose of getting their share of the commerce of the high seas. They are doing this not so much by paying mail subsidies to fast lines of steamers for the purpose of carrying passengers across the Atlantic in a swift and luxurious manner, but by building and using the humble but vastly more useful "tramp" steamer, in which more than three-quarters of the world's commerce is carried. It is with these as in former days it was with the freight ships of our Boston merchants, which were the ones that won credit for the American flag by exhibiting it in all parts of the world, and not the passenger-carrying packet ships of the "Black Ball" and other lines, that used to make fast passages between England and this country.

The Canadians will succeed in building up an extensive trade, a trade in which we could succeed far better than they if we only had the good sense to adopt the methods which they have followed, and buy our ships where we could buy them cheapest.—*Boston Herald.*

A PRINCE OF TRAVELERS.

Mr. Thomas Rhodes, senior, commercial traveler in Sheffield, has now retired from "the road," after over fifty years of service. Mr. Rhodes has in his time represented many British firms, including Messrs. John Brown & Co., Messrs. Sanderson Brothers, Messrs. Cocker Brothers, Messrs. Samuel Fox & Co., Messrs. John Henry Andrew & Co.—all these being of Sheffield—and Messrs. John Oakey & Sons, of well-known emery fame, of London. Mr. Rhodes traveled for several firms at a time, their interests, of course, being distinct, and therefore not competitive. He was a typical man of commerce of the fine old English type, and one of those men whom, when you meet in the street, you involuntarily turn round to have another look at. He traveled all over the continental markets, speaking French, German, Spanish, and Italian, possessing in this way a great advantage over rivals whose linguistic accomplishments are most frequently confined to a single tongue beyond their own. His address and appearance were attractive and striking, so much so that he was familiarly known abroad as Count de Rhodes, and was a *persona grata* in the best circles of foreign society in commerce and politics. Mr Rhodes, I am informed, was the first commercial traveler to take an order for armour plates. This was in the days of Sir (then Mr.) John Brown, who was the first to produce armour for ships' clothing in Sheffield.

On the evening of the 5th instant a number of friends, in recognition of the high esteem in which they hold Mr. Rhodes, and to express their regret that increasing years compelled him to retire, entertained him to dinner at the King's Head Hotel.—*Hardware Trade Journal.*

TOBACCO IN ONTARIO.

Statistics received by the Ontario Department of Agriculture go to show the cultivation of tobacco in Ontario has proved more profitable to the few engaged in it than the general growth of any of the ordinary cereals. Some time ago tobacco was experimented on in the Leamington district, in Essex county, but not until the last year or two have the results been very noticeable. The marvellous crop which was raised this year proves without doubt that tobacco can be grown with much success. According to the latest report 300,-000 pounds was grown in the County of Essex during the year 1897. An acre generally produces about $100 worth of tobacco. Lewis Wigle, of Gosfield, reports that from the fourteen acres he took $2,500 worth of tobacco.

—"Let me collect my thoughts," said he. Then came a little lull; "Alas, I am afraid," said she, "you find collections dull."—*Cleveland Plaindealer.*

50 YEARS The Year 1897 was the SEMI-CENTENNIAL

OF THE

Canada Life Assurance Company

ESTABLISHED 1847

DECISIONS IN COMMERCIAL LAW.

AUCTION SALES.—Through the influence of the Retail Merchants' Association the Ottawa city council altered a by-law in such a way as to entirely prohibit auctioneers from doing business on the market. One Albert Bollander attempted to sell a horse there the other day and a charge was laid against him by Inspector Hornidge. It is maintained that the by-law is *ultra vires* and the decision of the court will be awaited with interest.

VASEY v. THE MONTREAL GAS CO.—An action for damages for breach of contract was decided by Mr. Justice Mathieu sitting in the Superior Court. The plaintiff alleged that the defendants had contracted to deliver to the plaintiff all the ammoniacal liquor made at their works at a certain strength, and also their spent oxide of iron used in the purification of gas, and that they had not complied with their obligations in delivering the said commodities. It was alleged that in consequence of the defendants' failure to comply with the contract his plant and factory had become almost useless and considerable loss had been suffered. It was held that the defendants, the foregoing having been proven, had no right to sell the said commodities to other parties during the term of the contract, and judgment was given in favor of the plaintiff.

DUNN v. PRESCOTT ELEVATOR CO.— The plaintiff company, a Chicago concern, brought an action to recover $15,300 damages for defendants' alleged negligence, want of skill and improper conduct in storing, warehousing and taking care of 112,300 bushels of corn. The jury found that 76,586 bushels of the corn became unfit for export as a result of "rain and want of proper care while in the elevator," and assessed damages at $8,610. In the trial court Falconbridge, J., held that the contention of the defendants that the ship was responsible for damages from rain could not affect the result in view of the finding of the jury that the heating was due to the rain and to want of reasonable and proper care while in the defendants' charge.

WHAT ARE INTOXICANTS?

Judge Desnoyers, of Montreal, held last week that beer, or any liquor, containing two per cent. alcohol is an intoxicating beverage. The case was in the Police Court, and the Judge condemned Mary McDonald, Jean Bte. Savage and Alphonse Bonneau to $150 fine or three months on charges of selling liquor without licenses. The defence maintained that the beer which defendants sold, termed "Jubilee Beer," was a non-intoxicating drink, and put Mr. Fafard, a chemist, in the witness box to prove that the beverage contained only two per cent. alcohol. What lends especial interest to the decision is the fact that not long ago Judge Dugas, sitting in the same court, upheld a similar defence and dismissed the case on the strength of Mr. Fafard's testimony that the beer only contained two per cent. alcohol.

LAKE steamers continue to increase in size and carrying capacity. Record cargoes of last season will be exceeded the Cleveland *Review* thinks, immediately following the opening of navigation next spring. The largest cargo of grain as yet moved on the lakes was that of the steamer "Cresent City"—225,000 bushels of corn, equal to 6,300 net tons, which was taken from South Chicago to Buffalo. Already the Corrigan steel barge "Australia" is loaded at South Chicago with 226,000 bushels of corn to leave for Buffalo in the spring.

Mercantile Summary.

Customs collections at Halifax for January were $83,715, as against $72,994 for January last year.

Several days ago the bankhead works at Vale Colliery, Thorburn, were destroyed by fire, causing a loss of $6,000 or $8,000, and throwing 160 men and boys out of work.

The difficulties between the Rosamond Woolen Company and its weavers have been amicably settled. On Saturday last, Mr. Rosamond met the weavers, and an agreement was accepted by the strikers, and they resumed work Monday.

After a long illness, A. W. Croil, manager and president of the National Electro and Stereotype Company, died in Toronto on Sunday last, aged 46. Deceased was a Montreal man, and son-in-law of Mr. A. S. Irving, of the Toronto News Company.

Three hundred Englishmen started from Southampton for the Klondyke on Saturday. Another steamship load is expected to start in a few days. Besides these, who sail direct for the Pacific coast, numbers will come by the regular steamship lines and cross the continent by rail.

A company composed of New York and Philadelphia capitalists, and named the Manhattan Steamship Co., capital $1,000,000, has been formed to operate a steamship service between New York, Maine and the Maritime Provinces. Contracts have already been given for three steel twin screw, double bottom, high speed steamers for freight and passengers, having large space devoted to cold storage. Each steamer will have 126 staterooms, with two berths each.

From Nova Scotia the following recent failures are reported. J. W. Wallace, a dry goods dealer of Halifax, has found his business declining to such an extent as to be obliged to suspend, and has submitted an offer to creditors to pay 50 cents, in 4, 8 and 12 months. His general liabilities are $12,179, and there is accommodation paper to some $2,000.——A winding-up order has been issued in the matter of the Victoria Co-operative Store Co., of Victoria Mines. The business was started as a co-operative store, by a number of miners, about six years ago, but was regularly incorporated as a joint stock company in 1894, with authorized capital $15,000, in shares of $5 each. Recently they have been sued quite often.——Otto Wile, a Bridgewater grocer, is seeking a settlement at 40 cents.

The week's commercial casualties in the Province of Quebec are as follows; Joseph Levasseur, a grocer, etc., at Bic, has assigned, after a brief two years' attempt at business. He began business entirely without experience, having been previously a farmer. Liabilities are $2,150, and assets apparent $1,800.——Mrs. Rodden, long in the dry goods business at Waterloo, Que., has been obliged to abandon her estate, owing about $4,200, with assets of equal figures.——M. Benoit, a St. Hyacinthe coal dealer, finds himself embarrassed, and is trying to arrange a settlement.——Pare & Frere, general dealers at Granby, whose unexpected failure we noted a fortnight ago, are making their creditors an offer of 55 cents on liabilities of $14,400.——The Misses M. A. & E. Draper, dry goods dealers, Sherbrooke, are asking creditors to accept a settlement at 50 cents; they owe about $5,000.——J. F. Guillet, butcher and trader, Danville, has assigned to the court.

The Merchants Bank of Canada is establishing a branch at Neepawa. The Winnipeg *Free Press* says the bank will take over Dr. Harrison's business there.

A man named Thomas Rabbett, who has a small store at Granite Creek, B.C., has assigned.——Duncan McPhail, tailor at Kaslo for three years, has assigned. A few days before he did so a judgment of $700 was recorded against him.——The sheriff is in possession of the stock of Donato Panebianco, grocer, in Vancouver.

Much smuggling has been done between Cape Vincent, N.Y., and Kingston. To the recent raising of the duty on tobacco is attributed the fact that 3,246,000 less cigars were made in Canada in the past six months than for the same time in 1896; and a decrease of 217,371,000 in cigarettes. Local dealers say there have been just as many cigarettes smoked, the difference in the number having been made up by smuggling.

In April, 1897, the Cooper Machine Company of Toronto was incorporated, with $20,000 capital, one-fourth of which was paid. Last week their creditors had a meeting and their statement showed assets of $4,800, against liabilities of $5,500. An offer of 40 per cent. was made, and it seems probable that their creditors will accept their proposal.——B. N. Powell, tailor, Toronto, assigned one year ago, and his wife bought the stock. Since then the business has been continued under the style of Powell & Co. A bailiff took possession.

Minor Montreal failures for the week are as follows: H. Raith, making wool hats in a small way, has filed consent to assign.——J. Raston, shoes, has arranged a composition at 60 cents on the dollar.——H. C. Gregoire, dealing in fancy goods and crockery, and recently insolvent, proposes an arrangement at 40 cents.——Our friend John Chinaman is getting sufficiently civilized to appreciate the advantages of insolvency, and J. A. Pang, laundryman and trader, figures as having made an assignment of his estate this week. His liabilities are put at about $800.

One of the directors of the Boston Coal Mining Co., Mr. John C. Gordon, writes to the mayor of Halifax offering suggestions concerning tourist association work. He recommends the towns of the province to join interests and get up a first-class tourist manual or guide, to be placed in the hands of the great mass of American summer tourists, who annually spend many millions seeking relaxation. It is said that the people of New Hampshire have received for many years past, as revenue from the summer visitors to that State, from $6,000,000 to $8,000,000 annually. Why should not the undoubted attractions of the Maritime Provinces be made to yield millions in like manner. Charles Dudley Warner thinks Cape Breton a perfect gold mine in landscape value.

A meeting of the creditors of J. H. Doherty, clothier, Ottawa, was held in Montreal last week, when liabilities were shown at about $28,000. Mr. Doherty did not find it convenient to attend the meeting, and no settlement was reached. The failure has made a very unfavorable impression, especially in the face of Mr. Doherty's quite recent claims of a very considerable surplus, now resolved into a deficiency, and there is a probability of his examination before a judge.——Lang & Kemp, dry goods men, of the same city, are in some embarrassment, and it is reported they have threatened to call on some of their creditors, with the view of getting an extension. They show a very fair surplus of $11,000 over liabilities of $28,000.

Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers,
262 West Broadway, New York.

Mercantile Summary.

A movement is on foot for establishing a joint stock company at Carp, with the object of sinking shafts in some of the mineral places in that vicinity.

The firm of Charles Burrill & Co., of Weymouth, has dissolved. Messrs. William and James Burrill, of Yarmouth, are winding up the business of the firm.

The Dominion Bank authorities have decided upon the opening of a branch in Montreal. Mr. C. A. Bogert, of the Toronto staff of that bank, has been appointed manager.

The stock of the Ziegler-Hinch Company, general store, of Guelph, was sold by auction at Suckling & Co.'s, to J. A. Duggan, of Stratford. It was valued at $23,894, and brought 68 cents on the dollar.

Rhodes, Curry & Co., of Amherst, N.S., have been awarded the contract for building sixty new cars for the I.C.R., and their shops are reported to have sufficient work on hand to last them six months.

The annual meeting of the James Pender Company, Limited, of St. John, N.B., was held last week. The former board of directors was re-elected: Messrs. W. H. Murray, Chas. F. Woodman, Geo. S. Fisher, W. O. Purdy and Jas. Pender.

The creditors of W. A. Miner, St. Thomas, who recently sold his grocery store to I. Kingswood, had a meeting on Tuesday last, and an arrangement was arrived at whereby the assets will be realized upon and divided ratably among the creditors. Liabilities are about $600 and book debts over $1,000.

No decision was reached at the meeting of the creditors of J. H. Doherty, retail dry goods, Ottawa, who assigned to E. R. C. Clarkson. It was decided, however, to examine Mr. Doherty at Ottawa and endeavor to obtain an explanation as to how the deficit of over seven thousand dollars occurred.

—The British American Coal Company has been incorporated with a capital of $100,000. It includes amongst the incorporators Clarkson Jones, Frederick Wyld, W. T. Jennings, W. R. Brock, John Flett, S. F. McKinnon, J. G. Jones and others of Toronto, and D. D. Mann, of Montreal.

—Yet another insurance company is going to try the fire business. This is the Equity Fire, which has been incorporated under the Ontario Act, with head offices in Toronto. The subscribed capital is $300,000, and the paid-up capital, we are told, is to be $30,000. Those interested in the company are Thos. Crawford, M.L.A., Archibald Campbell, M.P., Judge Morgan, H. Van Norman and others.

The *Gold Hunter* says that the old Molega mine, N.S., has been sold to New York parties, and it is thought George Stewart, of Truro, will have charge. The property has been idle for some time.

The value of goods exported and imported during the month of January, as shown by the returns of the Winnipeg customs house, was $1,804,064, namely, $1,538,496 of exports, principally wheat, and $266,958 imports. These figures are greatly larger than those for January last year.

Lewis Wigle, of Essex county, Ont., recently shipped a carload of tobacco from Leamington to Montreal, and for some of it realized as high as 12 cents per pound, and a prominent farmer of Gosfield last week placed an order for 50,000 tobacco plants. So that the agriculturists of that favored county are going into tobacco cultivation in earnest.

By Ontario letters patent, the Saugeen Electric Light and Power Company of Ontario, Limited, has been incorporated. Charles Edward Kilmer, of Southampton, electrician; Clarence Hurd Burnham, of PortElgin, electrician; Joseph Barber and James Barber, of Georgetown; Edward Kilmer, merchant, of Walkerton, are the parties. Capital, $20,000.

A meeting of the creditors of S. F. Taylor & Sons, felt boot makers, of Walkerton, was held last week in Toronto. Besides the manufactory the firm had a retail boot store at Walkerton, and have also property in Milton. They show assets and liabilities nominally equal at a round $10,000. This differs from previous statements, when they claimed a surplus of nearly $24,000. However, the plant which cost the firm $15,000 is not worth this unless operated, so it was placed among the assets for only $2,000. The factory is mortgaged to the Canadia Permanent for $1,865. The firm asked 3, 6, 9 and 12 months time, which was granted.

Major Walsh, the Yukon administrator, does well to sound a note of warning against the expected inordinate inrush to Klondyke. He clearly hints that there is no opportunity for even a fourth of the 250,000 immigrants expected, and asserts that if a big host rushes in, it will be quite impossible to convey into the country during the short import season half the requisite necessaries of life. One thing, however, says the British Columbia *Mining Critic*, the Major leaves out of his reckoning: "The 250,000 people, mostly foolish and misguided, won't stay—at least 200,000 will return to warmth and civilization long before next winter. The Yukon most assuredly cannot maintain long 50,000 people; a fluctuating population of from 20,000 to 25,000 will probably fully suffice for its adequate development."

Incorporation is given by letters patent in Ontario to the B. L. Kennedy Co., of Toronto, Limited, to make boots and shoes, and infants' footwear; capital, $5,000; parties, Letitia Kennedy, Byron Ladu Kennedy, Alex. Adams and John Clark Laidlaw, accountant. Also the Scottish Colonial Brokerage Company, of Toronto, Limited, to negotiate loans and to buy and sell bankrupt stocks, etc., etc.; capital stock, $20,000; parties, Wm. A. Milne, Byron L. Kennedy, manufacturer; John Clark Laidlaw, accountant; Edwin J. A. Watts, book-keeper; William Williamson, stationer. The small wares and fishing tackle business of Allcock, Laight and Westwood, in this city, is to be acquired by a company of like name, with capital stock $30,000, composed of Samuel Allcock, of Redditch, Eng.: Clara Westwood, Benj. Westwood, Henry Parmley, Alfred W. Blight and James Totton, traveler.

Mercantile Summary.

APPLICATION has been made for the incorporation of a company to be known as the Woodstock, N.B., Sash Balance and Lock Company, to manufacture and sell a patented window raising and locking contrivance.

THE Toronto Rubber Company is looking for a new site for its works, and among other places is negotiating with Hull, Que. It is understood that the company will ask for about $40,000 as a bonus from the city. Some of the leading aldermen are in favor of giving the company very favorable terms, but they consider this amount too high.

THE Montreal Plumbers' Association held its annual banquet on the evening of the 3rd inst. The trade of the whole Dominion was represented on the occasion, with the exception of the Lower Provinces, the delegates from Halifax and St. John being snowed up somewhere east of the city. Mr. J. W. Harris, the president of the Association, occupied the chair. The toast list was ably looked after, and the whole affair was very creditable to the plumbing fraternity.

THE imports entered for consumption at the port of Montreal last month amounted in value to $3,245,948, as compared with $2,454,310 for the corresponding month of last year, showing an increase of $800,000. This increase was shared by both between free and dutiable goods, the former having increased from $682,501 to $912,265; while in the case of dutiable goods the increase was from $1,758,000 to $2,311,000. The exports amounted in the aggregate to $2.312,400 as compared with a total of $1,415,000 in January, 1897. The total duty collected last month was $671,288, as compared with $517,363 in the same month last year, an increase of about $154,000.

AN application has been made by Thomas H. Lawry, Mrs. F. Carpenter, Miss Louise Lawry, and J. J. Scott, of Hamilton, and Anderson Fowler, of New York, for a charter for the T. Lawry & Son Company, Limited, Hamilton. The company proposes to take over the extensive pork packing business of the late Thomas Lawry, and before long the output will be much increased. Mr. Fowler is a member of the firm of Fowler Bros., one of the large American provision houses in the world. T. H. Lawry is to be managing director of the company. Mr. Lawry states that the firm's produce has given such satisfaction in Europe that it was proposed to do an extensive export trade in connection with Fowler Bros.

THE municipal authorities of Halifax, N.S., are making efforts, as our readers know, to secure better railway communication with Yarmouth, along the south shore. The routes proposed are two; one known as the Hervey line, which would connect at Shelburne with the Coast Railway, and run to New Germany on the Central Railway, crossing the Liverpool River 19 miles above the town, to which it is proposed to build a branch. From New Germany the road would go on to some point on the I.C.R. between Windsor Junction and Halifax. The line would pass through the interior, and be about 145 miles in length. The other route is that of the Coast Railway, to run from Yarmouth to Shelburne, and thence through Lockeport, Liverpool, Bridgewater, Mahone Bay, Chester and Margaret's Bay, to some point between Bedford and Halifax on the I.C.R., and giving a total mileage from Yarmouth to Halifax of about 225 miles.

A PERSON of practical business experience having some surplus capital would like an opportunity to invest in some profitable business in Toronto, where further skill and capital would give it increased success. Address P. O. BOX 459, care of Monetary Times, Toronto.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for North Bay Wharf," will be received at this office until Monday, the 21st day of February next, inclusively, for the construction of a wharf at North Bay, Nipissing District, Ontario, according to a plan and specification to be seen at the offices of the Town Clerk, North Bay, and H. A. Gray, engineer in charge of Harbor and River Works, Ontario, Confederation Life Building, Toronto, and the Department of Public Works, Ottawa.

Tenders will not be considered unless made on the form supplied and signed with the actual signatures of tenderers.

An accepted bank cheque, payable to the order of the Minister of Public Works, for one thousand five hundred dollars ($1,500.00), must accompany each tender. This cheque will be forfeited if the party decline the contract or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By order,
E. F. E. ROY, Secretary.

Department of Public Works,
Ottawa, 31st January, 1898.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

Mercantile Summary.

THE annual meeting of the Toronto Electric Light Co. was held this week, on which occasion the financial statement presented showed a surplus of $7,000 over dividends paid. A steady growth is shown in the business all through the past year, especially in private incandescent lighting and power. The old board of directors were re-elected.

THE Canadian Pacific earnings for the week ending the 31st record another large increase. The return of traffic earnings from January 21st to 31st :—

1898	$472,000
1897	353,000
Increase	$119,000

THE Grand Trunk earnings for the past week also show a substantial increase over the previous year. The earnings from 22nd to 31s of January :—

1898	$596,203
1897	512,183
Increase	$ 84,020

THE village of Pontypool lies in about the centre of the County of Durham. It is a small place, with a population of about four hundred, and it has a number of stores and shops like any other village. This week we have to record the failure of one of its merchants. Josiah Perrin opened a general store there in 1885, and at one time did a fairly good trade, making some money. Latterly, however, business has been falling off, and he makes an assignment.

THE Starr Manufacturing Company, of Halifax, have purchased, says the *Maritime Merchant*, the patent rights, stock and material of the Forbes skate, made by the Forbes Manufacturing Company, whose business is now being wound up. The Starr company will begin making the Forbes skate the coming summer, and place it on the market in time for next winter's trade. The company now make fifteen or twenty different lines of skates.

THE old-established importing Quebec dry goods firm of Messrs. Simons & Foulds was dissolved on 1st February, by expiry of time, Mr. Archibald Foulds retiring from the business. The house was founded nearly fifty years ago by Mr. John Simons, and has had an honorable, and, we believe, successful career. The business is in future to be carried on under the name and style of Simons & Minguy, by Archibald Simons and Jean Minguy, who have been connected with the business for well nigh twenty years, and for the last five years have been partners in the firm.

— SEVERAL more dry goods failures are reported from Montreal since last issue. One of them, that of L. H. Boisseau & Co., is quite considerable in extent, the liabilities reaching some $110,000, but it cannot be said that the failure was totally unexpected. Still they had no difficulty apparently in getting all the credit they wanted. A meeting of creditors was held on Tuesday afterneon, but the insolvents did not attend, and nothing special was done. —— Paquette & Michaud, another Main street concern, is also insolvent. They claimed a fair surplus not long ago, but at a meeting of creditors held a few days ago the statement submitted showed a deficiency of some $7,000, on liabilities of $27,000. An offer of 50 cents, in payments spread over three years, was made, but declined by the great majority of creditors, and an investigation was ordered.——A smaller dealer, A. Granger, has also assigned. Not longer ago than last spring he compromised liabilities of $7,000 at 70 cents.

THE result of the smelting operations of the Hall Mines, Limited, are thus given for the four weeks ending 28th January, 1898. There were 27 days, 12 hours smelting, during which 5,675 tons of ore were smelted; yielding 372 tons of matte, containing (approximately)—157 tons copper, 109,070 ozs silver, 338 ozs. gold.

THE Halifax city council is attempting to regulate the milk trade. J. L. Rowantree representing the William Harris Abattoir, Toronto, according to the Halifax papers, was recently in that city. It is stated his mission was to undertake to supply the Halifax market with fresh beef. Considerable Ontario beef, says the *Chronicle*, is now imported to this city, and even from as far west as Manitoba. This item will be a pointer to the correspondents now discussing the Nova Scotia farmer and the home market. The Ontario firm mentioned are negotiating for a show room on Barrington street. They will send their dressed beef here in refrigerator cars. The Harris abattoir at Toronto is a big concern, having a capacity of 200 cattle and 1,000 sheep daily. It is said Mr. Harris' object is to ultimately erect cold storage in Halifax. He is sending 150 head of cattle to England in the next trip of the 'Gallia."

ADAM CRANSTON,
Chairman Fin. Committee, Galt.

Galt, 31st Jan'y, 1898.

Mercantile Summary.

A DISSOLUTION is announced by a well known boot and shoe firm, in Clinton, Taylor & Sons, who have been in the business in that town for some twenty-four years. Mr. Jacob Taylor retires, and the business will be continued under the old firm name, by Israel Taylor, who has long been closely identified with it.

THE failures in Toronto since our last report are not numerous, nor is the amount involved large. J. H. McMahon, a small baker on Wellesley street, has assigned. —— The bailiff is in possession of the millinery stock of Miss Jennie E. Hovenden, and the same gentleman disposed of the assets of Thomas Cullerton, carriage maker, on the 7th inst.

FROM the Far West comes word that J. J. Woods & Co., bicycle dealers in Vancouver, have assigned.——A general storekeeper at Cartwright, Man., named M. C. Williams, has made an assignment.——A week ago we mentioned here that Runyans & Butler, of London, were in financial difficulties and that their business was in the hands of a receiver. Since then the firm has assigned.

AT one time Edward Sharp worked in a Woodstock furniture factory, and saved from his earnings about $800. Then he started in the furniture business for himself. One of the things he did that he ought not to have done was to grant credit to nearly everyone who asked it, and a year ago when he needed some money, instead of collecting from his customers he placed a chattel mortgage on his stock. Now we hear of his assignment.

MR. A. J. THOMPSON, cattle dealer, of Toronto, now in the Argentine Republic, shipping cattle to Europe, has cabled his partner, Mr. John Sheridan yesterday, for a copy of the Canadian steamship regulations regarding the ocean carriage of cattle. The present regulations in the Argentine are very unsatisfactory, and Mr. Thompson is trying to induce the Government to adopt the same restrictions as those in force in Canada.

THE Toronto Board of Trade received the other day a report of a resolution passed by the Chicago Board of Trade, concerning the report of the commission appointed at the Indianapolis Monetary Convention for a complete monetary system. The resolution recommends maintaining gold as the standard of value, and the providing for the largest possible use of silver consistent with the maintenance of the gold standard; also for withdrawing as soon as possible the general Government from the issuance of all forms of credit currency.

THOMAS H. THOMAS moved from Sudbury to Wahnapitae last summer and opened a hotel. Judgments have since been recorded against him for goods supplied, and at last he has made an assignment.——About January, 1895, James Craig & Son moved from Cottam, in Essex county, to Emsdale, where they carried on a general store and ran a sawmill. They were burned out a year ago, and although it was thought the loss was not heavy they do not appear to have been able to recover their position; at any rate they have assigned.

S. H. GRIFFIS, boot and shoe dealer at Newmarket, has effected a compromise with creditors at 50 cents on the dollar, his liabilities being $3,000. He says he has been handicapped for lack of capital, and has had strong competition. How does the "competition" feel that pays 100 cents on the dollar?——A dry goods firm in St. Catharines, Griffis & Co., have assigned. This firm succeeded J. A. Griffis, who failed in 1894, with liabilities amounting to about $11,000.——Rogers & Hamilton, plumbers in Hamilton, dissolved partnership last June. Andrew Rogers has since continued alone, but owing to strong competition he has not been able to make it a success, and now assigns.

THE Farmers and Traders Life and Accident Assurance Company, Limited, has held its annual meeting. Considering that it only opened its doors in March last, and that months were occupied in organizing, the company has done by no means badly in securing 343 applications for $330,000, of which a quarter million has been accepted. This is a good record for a young company. No deaths have taken place among its policy-holders during the year. Shareholders residing in places as far apart as Glengarry, London and Tilbury, expressed themselves as satisfied in an uncommon degree with the position and prospects of the Farmers and Traders Life.

IF it were not for a lack of capital, many more people would be en route to the Klondyke in the spring than are going. There are numbers of merchants who lament the fact that their capital is insufficient to carry out big ideas for spreading out their business, and there are men who have failed in business that give as a reason "I had too little capital." To those of the first class we would say find a Klondyke where you are; the second class we would admonish to make the most of what they have and make that successful before spreading out; those of the last class we would advise to give no reason at all, if they can give no better than that mentioned. Capital is not everything. Brains count, and so does hard work.

MANY will hear with regret of the death on yesterday morning, after lingering awhile partially paralyzed, of Mr. George Maclean Rose, of the Hunter, Rose Publishing Co., of this city. Mr. Rose may be said to have been part of the political, as well as the literary, history of Canada. Born in Caithness, Scotland, he came to Canada in early manhood in 1852 and began as a printer in Montreal, removing in 1858 to Toronto. It was not long before he was sent to superintend the Government printing at Quebec for Samuel Thompson, and when the firm of Hunter, Rose & Co. was formed, that firm did Government printing for a time at Ottawa, concentrating here about 1871. Mr. Rose had a wide acquaintance with public men in Canada, was well known as a publisher, as a strong teetotaller, and as an honest man. Mr. Rose was many years treasurer of the Toronto Board of Trade, and was a director of the Ontario Bank at the time of his demise.

A FAILURE of some importance is that of Spittal & Co., dry goods dealers in London. The owner of the business was Mrs. M. N. Spittal, wife of Robert S. who failed about four years ago. The liabilities are said to be $11,000 and nominal assets $10,000.——R. B. McGregor, men's furnishings, St. Thomas, has assigned also. This business was established nearly three years ago. For some time past he has been very unsatisfactory in payments.——The most important failure during the week was that of W. H. Berkinshaw & Co., at Trenton. The senior in this concern was at one time of the firm of Smithers & Berkinshaw, who failed in Toronto in 1889. He obtained a discharge shortly afterwards and started business in Trenton. His stock has always been a large one, and it is said was too big for his capital. Now he has assigned to his principal creditor, with liabilities upwards of $30,000

Debentures.

Municipal Debentures bought and sold, also Government and Railway Bonds. Securities suitable for Investment by Trustees and Insurance Companies and for Deposit with the Government, always on hand.

PRESIDENT,
The HON. SIR OLIVER MOWAT,
Ex-Minister of Justice of Canada, Lieutenant-Governor of Ontario.

VICE-PRESIDENT,
J. W. FLAVELLE, Esq.,
Managing Director The Wm. Davies Co.
Director Canadian Bank of Commerce.

The Toronto Globe, in referring to the first three months' business of the Company, said:

"It was generally known by those in the business that this new aspirant had secured a fair share of the new insurances taken out in the last three months, but it will be a surprise to nearly all to hear that the applications received amounted to over one million and a quarter of dollars, of which more than one million were approved and policies issued. This phenomenal record—for such it really is for a new company—compares favorably with the business of the older and progressive life insurance companies of the Dominion, and considered in the light of the character of the business, gauged by the large average amounts of premiums and policies, it is quite safe to say that the record is unparalleled in our country."

F. G. COX, Managing Director.

TORONTO, FRIDAY, FEBRUARY 11, 1898.

THE SITUATION.

Canada having the right to navigate the Yukon, under the Treaty of St. Petersburg, is interested in the American regulations recently issued for the navigation of that river. The mouth of the Yukon is too far north for the part of the river within the United States to be of much use to Canada, and as access to the Klondyke is being made more easy by other and shorter routes, we have very little interest of a practical kind in what the American authorities decree with regard to this route. Transfer of cargo from sea-going to river boats or the converse, is confined to the port of St. Michael, under the supervision of customs officers. These officers may board any vessel bound for the United States, at a distance of four leagues from the shore, to demand the manifest and enforce the laws of the Republic. Under what rule this unusual search of a foreign vessel, if search it can be called, is made we are not aware. Any American vessel entering St. Michael's with passengers or cargo for Alaskan ports, if it does not desire to proceed, must transfer its cargo to another American vessel. The reason of this is, of course, that a foreign vessel cannot trade between one American port and another on the river. But a cargo coming down the river may be transferred to a British vessel bound to a port in British Columbia. The British right to navigate the Yukon had for its object a through navigation to the Klondyke region; it was useful three-quarters of a century ago, and until recently; but the mouth of the Yukon is too near the North Pole to make the navigation of the lower part of that river of much practical use now, or apparently in the future.

Customs complications at Juneau, Dyea and Skagway have been subjected to new regulations by the United States Government, which, if supplemented by the Ottawa Government, may remove a good deal of the friction hitherto felt at these points. The new regulations permit deposit of duties with return thereof, when the circumstances warrant it, the goods not having been consumed on American territory, or a bond may be given for the American duty, subject to cancellation of proof of right thereto. There is a practical difficulty about getting the rebate, which is payable at the wrong end of the passes. Some members of different Boards of Trade have asked our Government to assume the payment of the certificates for return of duties and collect the amount from the American Government. A custom house broker in that region would ask too much, it is presumed, for cashing these certificates, and the intervention of the State is invoked in lieu thereof, and the State agrees to accept the task.

One provision of the Klondyke Railway contract has caught the attention of the Treasury Department at Washington: the part of the bargain that prevents any competing road being built farther north, partly over American and partly over Canadian territory. Congress will be asked to do something that has for its object the securing of the trade to the Klondyke for Americans. The Parliament at Ottawa is just as anxious to secure it for Canadians. The monopoly of the Canadian company, in itself highly objectionable, would probably help to secure the trade for Canada. The best gold fields of that part of the world are in our own territory, and the trade connected with it is properly part of the domestic or internal trade of Canada. This is the third occasion on which, under pressure of necessity, Canada has been called upon to build railways to connect different parts of her territory. The first was built by the Government directly; the second by money subsidies; the third is to owe its existence to a land subsidy. If the Intercolonial ever becomes profitable, in accordance with the present day prophecies, we shall get something for our money; out of the C.P.R. we shall never get a cent. The Klondyke road may bring something in the form of royalty, but if we keep the figure at 10 per cent. for Government lands, while it is only one per cent. on the railway company's lands, we shall get much less than would have come under an uniform figure of reasonable amount.

Senator Carter, at Washington, has introduced a bill which provides "that native born Canadians shall be accorded in the Territory of Alaska the same mine rights and privileges [as are] accorded to American citizens in British Columbia and the North-West Territories by the laws of the Dominion of Canada, or the local laws, rules and regulations." This looks to an exceptional bit of reciprocity, the value of which for either country depends entirely on the reciprocal privilege. The subject would be better dealt with as part of a general scheme of reciprocity. The mining outlook, at present, in the regions named, would give practically all the benefits to citizens of the United States, and none to Canadians. At the same time, with our liberal mining policy and the exclusive mining policy of the United States, which for countries other than Canada the bill does not propose to relax, this is at least a nominal concession, which Canada has no motive to repel. The confining of the privilege to native Canadians we must regard as an oversight; in that form the overture would not be unacceptable; all Canadians, whether natives or not, stand on the same footing. If the Carter bill requires an uniform mining policy in British Columbia and the Klondyke, there is nothing to guarantee that it can be obtained.

Already the economic conditions on which mining in the Yukon region is carried on, have undergone a great change from their primitive state. Mining there, even on the placers, has to a large extent ceased to be an occupation in which a poor man can engage on his own account. This is made plain by a published letter of the Rev. F. Flewelling, of Dawson City, who represents the Canadian C.M.S. Claims having become dear are procurable only by capitalists, and the workman who is not also a capitalist, must seek employment from some one who has both a claim to operate on, and capital to set other labor than his own in motion. And Mr. Flewelling adds that labor is already in excess of the demand. The state of things here described, though true of the neighborhood of Dawson City, is not necessarily true of other places. There must, in fact, be a vast number of claims elsewhere, obtainable at Government prices. The land grant to the railway company will make it harder for the poor miner to work on his own account. We do not find that the company is restricted to any price at which it may dispose of its lands, except those which may be rated as arable, as the C.P.R. is, and doubtless it will be prepared to exact the full pound of flesh: every cent that the operation will bear. Hereafter the rush of poor men to the Klondyke is likely to be moderated, and the chances of their obtaining suitable claims at first cost and the lowest rate of royalty is, it is to be feared, seriously lessened.

As a case has arisen which makes it desirable that the limitations of the Governor-General in touching on public questions, in his individual capacity, should cease to be matter of doubt. It seems that Lord Aberdeen, at the National Club last November, in a public speech, expressed some opinions on the policy of Preference. The First Minister having his attention directed to the fact by a member of the Opposition, was asked whether he assumed responsibility for the utterance. Sir Wilfrid Laurier's reply was confined to what was assumed to be a matter of fact; that "His Excellency spoke on that occasion not as Governor-General, but as Lord Aberdeen." The inference is that such an utterance does not require to be covered by the responsibility of the Minister. But it leaves untouched the question whether a Governor-General can divest himself of his official character, before the public, and comment on matters of public policy on which political parties differ. The Speaker of the House of Commons being asked whether the speech as delivered was subject to criticism in the House? gave what seems to us to be the true reply: "That His Excellency's speeches or acts in regard to public questions are not free from criticism, because he has responsible advisers on the floor of the House to answer for them." It is always desirable to keep the Governor-General's name out of political debate; and this is best done by the absence of material on which party can fasten with appearance of legitimacy. After a day's consideration, during which Lord Aberdeen's Toronto Club speech was read in Council, Sir Wilfred thought better of it and announced that the Ministry assumed the full responsibility for the utterance.

At a manufacturers' convention, New York, the president lamented that "upon the high seas our [American] flag is scarcely ever seen," that of sixteen leading steamship lines not one is American. There are a few people in England, not many, who, on their part, tell us in their lamentations, that of many vessels which sail under the British flag there is nothing British but the register; that the vessel may be, and often is, built in a foreign country, owned by Americans, commanded by a Dutchman, manned by a crew of no nationality, not one of whom understands the English tongue; the very British ensign on the mast bought in a slop shop in Amsterdam. Such is the story told of the effect of the repeal of those navigation laws to which the American still clings with the grip of death, and the existence of which is the main cause of the low state of the American mercantile marine.

The Italian Minister of Customs announced in the Chamber of Deputies that the duty on wheat could not be abolished, but added that it could be safely reduced, and action in this direction is looked for soon.

COTTON DRESS GOODS.

The manufacture of cotton dress goods in Canada is a comparatively new industry, its success having been assured only during the past two or three years. The manufacturers' agents are already showing the wholesale trade their samples for the coming autumn season. Previously, plain goods have been most in demand, but fancy effects promise to be all popular during the fall of 1898. There has been a wonderful improvement in this trade, and the manufacturers allege they can develop any pattern within the range of textile designs. The cotton dress goods shown this year have every appearance of woolen goods. In the United States a fabric with a cotton warp and woolen filling has sold well, but the difference in utility and appearance is not sufficient to offset the difference in price, and the Canadian cotton mill owners do not follow this example at all extensively.

For next autumn small patterns will be in vogue. Fancy tartans are shown in various colors and effects. They do not represent the pattern of any particular clan but are very attractive, and as the taste of the public has been already developed in this direction they promise to be "sellers," even though, perhaps, meaningless to a Highlandman. There is a wide range of colors in the new patterns, and as a rule, they are very bright. Some of the different shades of red are seen in almost every pattern. Prices, of course, vary greatly with the quality, and will be offered to the trade at all the way from 10 to 35 cents per yard. On the whole, the cotton dress goods for next autumn are a credit to the manufacturers. The mill of the Canadian Colored Cotton Goods Company, at St. Croix, N.B., has been working on these different lines for some time, and their excellence may be considered in a large measure due to the specialization which a large capital and numerous mill plants make possible.

One of the important reforms that the retail trade has long demanded of the manufacturers is a decrease in the number of yards contained in dressgoods pieces. In the wide widths it has been usual to put 60 yards of goods in a piece, which is far too much of a single pattern for the average retailer to handle. The department store and the large dry goods houses of the cities and towns have had an unfair advantage over the merchants of the villages and small towns in this matter. It is pleasing to note that the autumn goods will show some improvement, a reduction of about ten yards having been made by manufacturers in the wide widths, where the evil was most burdensome to retailers.

EXPORT SUGGESTIONS.

The distinction that Canadians have long desired is being made in the United Kingdom between the products of the Dominion and those of the United States. The secretary of the Bacon Curers' Association of Great Britain and Ireland recently had occasion to write to the Westminster *Gazette*, and in his letter he says:

"As an ardent sympathizer with the idea of reciprocal trade within the Empire, it is a satisfaction to me personally to know that the superiority of Canada's products is displacing those of the United States in this market." Again he says "I think the salvation of our own agricultural class may be nearer its accomplishment when they take a leaf out of the Canadian book and learn to imitate the energy and scientific methods which characterize Canadian agriculturists. I know something of their methods, and have long taken a deep interest in the subject. Our home Government, too, might take a useful lesson or two from that of Canada in the care it exercises to foster and develop what must ever remain the first of industries."

Several important shipments of dressed beef have been made from Toronto this week for export *via* Portland. It is pleasing to know that the long desired beginning of this trade has at last been made.

The Prussian Minister of Finance, Dr. Miguel, issued a decree on the first of the month, which goes into effect immediately, prohibiting the importation of every kind of American fresh fruit. The decree has been sent to all the German ports and frontier stations, excepting Bavaria, Saxony and Wurtemburg. The United States Consul at Hamburg, Dr. Hugh Pitcairn, telegraphed that 16,000 barrels of American apples have been forbidden to be unloaded, and that two trains full of American fruit have also been forbidden to cross the frontier at Emmerich, which, aside from Hamburg, is the principal place of entry for American fruit. On receipt of this news a strong remonstrance was sent by the United States Government to the Foreign Office, calling attention to the evident violation of treaty rights. The Prussian Government prohibits the entry of American fruit on the allegation that California and other vermin threaten to infect German trees and fruit. The Canadian authorities cannot be too watchful of the interests of our own fruit growers, and it is agreeable to note that some measures are being taken to prevent the destruction of our fruits.

There have frequently been men or concerns who proposed to develop Canadian trade in foreign countries by acting as general agents for manufacturers of all sorts of commodities. This kind of "by-and-large" representation has given anything but good results. Speaking to the *Journal and Bulletin of Commerce* a New York merchant recently said: "It is impossible for one man to be thoroughly posted and able to overcome the many obstacles with which a salesman meets, and particularly in foreign countries, where they have to deal with the competition of other markets. A well known fact is," this merchant continued, "that this state of affairs has been one of the greatest drawbacks to the manufacturers' interest in developing foreign trade. How can a traveling salesman do justice to a jewelry concern, a shoe factory, and an agricultural implement manufacturer at the same time; any one of the lines would take a salesman a year before he is well posted. If such is the case with three lines, how must it be with, say, ten or fifteen different branches? Export trade is every year being done under more favorable conditions and to better advantage for the manufacturers. One seldom hears of those combination salesmen who start abroad with a number of accounts, thus deceiving the majority of manufacturers they assume to represent. The greater portion of these travelers have only served to interfere with the healthful growth of export trade, but the tide has turned and now it is difficult to find a manufacturer who has not been warned by a neighbor or an export firm to beware of the combination traveler."

RETAILERS' PROSPECTS.

As to the predictions of the last few years concerning the fate of the retailer—that he must pass away and be heard of no more for ever, they have not all been fulfilled, for there are hundreds and thousands of retailers in business. Wholesale dealers tell us that there are probably more really competent retail storekeepers, and more cash buyers among them now, than ever before in Canada. At all events a larger proportion of them. Still it is true that many of the weaker and less competent small shopkeepers have gone to the wall, and it is just as well that some of those who remain should consider what changes and chances are ahead of them.

Department stores have come, and they are likely to remain; they sell for cash, they keep enormous stocks, they deliver goods promptly, and they sometimes give real bargains. With the probable extension of trolley lines of rail, and with the actual excursion trips that railways make to the cities, the road of the small retailer in city or country is made harder to travel. Therefore let every merchant fortify his business by adopting the soundest rules. Let him collect his accounts promptly; let him sell more nearly for cash; let him meet competition rationally; let him push profitable goods with all his strength, and restrict his buying to what he can sell, and sell quickly. As the San Francisco *Country Merchant* puts it: "The necessity of the hour is to make the business pay, whatever it is, or else the retailer must prepare to join the wage-workers of the world with whatever grace he can command."

"WHERE ARE YOU DRIFTING?"

This is the question put to business men at the beginning of this year by an American financial journal, *American Investments*, published in Buffalo: a journal which has a racy American way of putting things, that is calculated to make the reader think. It asks the business man whither he is drifting? and then goes on:—

"Probably not one business man out of a hundred knows with any degree of accuracy. Some don't know enough to find out, and others are in such bad shape that they are afraid to see it put down in cold figures. The first class have no business to be in business, and the second need to learn the lesson of courage and look a bad thing squarely in the eye for all it is worth. About eighty per cent. of our business men go into enterprises without knowing whether they are precisely fitted for them. They had a little money, could borrow some more, and as others had succeeded, they thought, of course, they could. Where there is neither adaptability nor sufficient capital, is it any wonder there are so many failures? These ill-fitted business men are the very ones that do not "keep the run of their affairs." They argue that as the other fellow made money in the same business, they must necessarily be doing the same. They would feel insulted if asked to put their hopes and expectations on paper. As an example how many business men can figure out the difference between selling strictly for cash and on ninety days time? Precious few. How many can figure out the annual advantage in buying under a three per cent. discount for cash and on sixty days' time? The number is also equally few."

We have some reason to know how large a proportion of retail businesses, and even factories in Canada are conducted by Rule of Thumb. The proportion is probably not smaller in the United States. And the pressure of competition by ignorant traders and traders without skill or method makes it hard for the competent trader to live. Our contemporary perceives this, and says: "And because fools and ignoramuses rush into a business because others have succeeded, really worthy men are compelled to suffer. Ignorant competition is of the worst kind. Business men, active or retired, need to do two things in order to insure success and ward off impending disaster. First they need to study and understand the transpiring of events and endeavor to compile from them a formula that will enable them to shapen a course that will fit the future. Then they should have the ability to carefully analyze the results of their past work and ascertain its trend."

The days when a farmer could leave his farm, the sailor his vessel, the carpenter his bench, and "go into business," as a storekeeper, with a good prospect of success, are past and gone. Unhappily, the days when he could get credit to enable him to take the step are still with us—such is the easy-going folly of our wholesale dealers and large manufacturers. If a man, artisan or farmer, who has saved up money chooses to buy goods with it and start as a trader, selling at sensible prices, the risk is nobody's but his own. For an importer to sell a man goods *on credit*, however, to go into competition with a dozen or a hundred other customers of that importer, and sell at slaughter prices through ignorance or need, is to lessen the chances for the dozen or the hundred, and to impair the value of every promissory note given by his customers.

THE MUTUAL RESERVE FUND LIFE.

At the recent annual meeting of this well-known assessment society, held in New York a couple of weeks ago, it was reported that the new business obtained by the society during the past year amounted to $56,234,785, bringing the total amount in force up to $301,567,101. This shows a serious reduction compared with previous years, when the amount of business written, and the amount in force at the end of the year were as follows:—

December 31st.	New Written.	Total in Force.
In 1894	$66,408 225	$293,366,166
In 1895	59,738,790	308,659,371
In 1896	73,026,330	325,026,061
In 1897	56,234,785	301,567,101
This year's loss	$16,791,545	$23,458,960

To put on $56,234,785 of new business and yet have what was previously on drop down by so large a sum as $23,458,960, shows a fearful condition of lapse. Here is how the account stands:

Insurance in force December 31st, 1896	$325,026,061
New insurance added in 1897	56,234,785
Total insurance to be accounted for	381,260,846
" " in force, 1898	301,567,101
" disappeared somewhere	79,693,745
The death losses in 1897 were	4,162,603
Balance disappeared somewhere	$75,531,142

If this is the result of one year's operations, how long will it take to use up the whole $301,567,101 of business now claimed to be in existence on the books of this old-time braggadocio concern? If $4,162,603 was paid for death losses in one short year (in 1887, we notice that $1,378,681 paid the losses) how long will the $5,402,688 of total assets, now claimed, stand the drain, if that fund has to be called upon for deficiencies in the collections?

We learn from the 14th annual statement, which was issued in January, 1895, that the society was then certified by four State commissioners to have on hand surplus assets and gross assets much in excess of what it is now reported to possess, as follows:—

Year ending.	Assets.	Liabilities.	Surplus.
December 31, 1894	$5,568,611	$1,850,809	$3,717,802
" " 1897	5,462,688	2,330,237	3,072,451
Change in 3 years	—$165,923	+$479,428	—$645,351

This means that with an increase of total insurance to be paid, from $293,366,166 in 1894 to $301,567,101 in 1897, there has come a decrease in surplus cash assets of nearly three quarters of a million dollars.

With such a condition of things in the society as a whole, it might be expected that the officers would feel exceedingly reluctant to announce another jump in the assessments. We suppose every effort has been made to conceal the fact that a tremendous addition is now again being made to the bi-monthly calls upon the old members. These members have borne the burden and the heat of many previous assessments, and some double assessments, without having their faith and patience strained to the snapping point. But a further test is now forthcoming.

"What's the matter with the Mutual Life of New York?" said one old-time assessment payer. "Nothing," we answered. "Well," said he, "what do they want to double my assessment for now?" We answered that the Mutual Life of New York was all right, but he must be in some counterfeit concern, for no life insurance company worthy of the name ever doubled its rates. So he confessed to using the wrong name, and wanted to know why the Mutual Reserve Fund did not carry out its contract with the P.P.I. of St. Thomas (meaning the Provincial Provident Institution which the Mutual Reserve absorbed), and continue the members at the old figures. We answered him that they could not carry out such a contract, if it was ever made. They had to pay the death losses, and old men like him must expect to pay, not merely double, but treble and quadruple what the P.P.I. had been charging, or lose every cent paid in. He said he was paying about $32 for a certificate of $2,000, and we showed him that the natural premium at his age was $53, and next year would be $58; and five years hence, $80; and ten years hence, $125; and in fifteen years $188 a year. He went away feeling comforted with the idea that he would not live long enough to be assessed so high as that, and also expressing a hope that "she will hold out a little longer, and not go to smash so suddenly as the Massachusetts Mutual Benefit did."

Another elderly gentleman complains that he has now had a second rise in his assessment in the short space of two years. For some years after joining, his certificate cost him $235 per annum, then it rose to $348, and now he is mulcted in $611.20 for the year 1898. He naturally wants to know where the end of this thing is to be. We may suppose there are a good many friends of our late Mayor Kennedy, who boomed "this thing" when he was in office some years ago, who would be glad to get some enlightenment on that subject.

Still another party joined in 1887 for $5,000 at age 56, and paid, as per advertisement in that good religious paper the *Christian Guardian*, only $105 a year, apart from $15 for expenses. Two years ago he had this $105 raised on him to $158.40, and he is now blessed with calls for $360.90. Is he not a happy man? It takes all the Christian virtue he can command, to prevent boiling over with gratitude toward the gentlemen who are responsible for the fix he now finds himself in at 67 years of age. He holds one of the promised "bonds" that were advertised five years ago with such a costly flourish, good for not two hundred dollars if he pays fifteen years. But what is it worth in the face of the fact that instead of another being sent him now, at the close of his second five years, as promised, actuary Eldridge writes him Feb. 1st, 1898, that there is "no margin of accumulation in the later years, but a gradual absorption of the accumulations." And worse than all, the table of rates on the back of his calls shows that his payments the next five years will run this way:—Age 68, $405; age 69, $440.70; age 70, $480; at age 71, $522.60; at age 72, $570.10. And if he is unfortunate enough to live to 75, it will be $722.70; and at 80 the call is $1,098.55. He has already paid $2,034, and by that time $6,416 more of his hard earnings will have disappeared in the sink-hole, making a total of $8,450 and interest thereon, for $5,000 of insurance. And no certainty of that being the end of it.

According to the *Spectator*, of New York, a strong effort is being made to get the old members to surrender their certificates, and take some new-fangled affair called the "five-year-combination-option-policy." "If they do not," the *Spectator* says, "they are liable to have their assessments increased, for there is nothing more certain than that the insurance risk increases as the man grows older, and age must be paid for. By exchanging their policies for the new form, they get a level premium policy, with rates unchangeable, that is guaranteed by all the resources of the association." Its resources are very small.

Experience has amply demonstrated that the course of this journal toward the Mutual Reserve Fund, and all other such concerns, was the right one, in warning the public that nothing but disappointment could come from putting trust in their promises to give insurance at half the price charged by regular companies. The *Spectator* says further, in confirmation of this: "It is well known that since Mr. Burnham became president of the Mutual Reserve he has been endeavoring to place its bu iness upon a footing that would give greater security to its policyholders. Experience had demonstrated that the old plan to which his predecessor, E. B. Harper, was wedded, of attempting to carry its policies to maturity at the same price as was charged when the holders originally became members, was erroneous. The failure of numerous assessment companies that tried to do business upon this plan served to emphasize the well formed opinions of expert life insurance men."

And here follows the announcement of the tremendous up-lift in the bi-monthly assessments for 1898: "Since the above was written the Mutual Reserve has sent out to its agents an announcement that the rates of premium were advanced on what are known as the "Fifteen-Year Class" of members. This class is made up of those who became members when the association was in its infancy; when the rates charged were insufficient to provide for their insurance as they grew older. This mistake is now being rectified by charging them the rates applicable to their present age."

Comment is needless.

NATIONAL VERSUS STATE SUPERVISION OF INSURANCE.

The indescribable nuisance of State supervision of insurance in the United States, with its results of inconsequent regulations and inconsistent decisions by men who are, many of them, ignorant and arbitrary officials, has long been felt by the insurance world. But of late the nuisance has grown worse, if possible, and the vagaries of a few of the State superintendents have caused a feeling to arise that the system should be put an end to, and that national supervision should take its place. A bill to provide for the change is now before Congress.

A number of prominent underwriters in various parts of the United States have lately expressed their opinions upon the suggested change. Some are timid and non-committal, apparently afraid of vengeance in high quarters, but others speak out freely in condemnation of State supervision. Among the latter is John A. McCall, now president of the New York Life Company, but at one time insurance superintendent for that State. Here is what he says: "I have your letter of the 20th inst., asking for my views about national supervision of insurance companies in connection with Senator Platt's bill recently introduced in Congress. The passage of the Act, or some similar measure, is a consummation devoutly to be wished."

INCENDIARY AND OTHER FIRES.

As an analysis of the experience of the company, the report of the inspector of the Economical Mutual Fire Insurance Company is interesting. Besides a number of observations and recommendations, an analysis is made of the causes of the 273 fires by which the company made losses during last year as far as they could be learned. There were 17 fires ascertained to be incendiary, and of the 77 attributed to "unknown" causes not a few are believed to have been raised purposely. Defective chimneys account for 17 and chimney sparks for 16; lamps and gas jets are responsible for 25, stoves and furnaces for 18. Lightning is put down as the cause of 9 fires—one would have expected a larger number. Spontaneous combustion, explosion, matches (15), sparks (20); defective stovepipes or thimbles, fire-crackers and cigar stumps are among the other causes of fire assigned, and no less than five are attributed to electric light. A plea is made by Mr. Powell in the same direction as that urged by the directors in their report, viz.: that fire losses should be registered by municipal clerks, etc. The report suggests that the Government should appoint special officers to investigate suspicious fires. When nearly 30 per cent. of a year's fires must be put down by a company to unknown causes, it is true that some unusual means were taken to get at their origin.

FURNITURE EXPORT.

We have repeatedly contended in this journal that Canada ought to be an important exporter of furniture. It is agreeable to us therefore to see that an effort is to be made to establish such trade. The Ontario Government is to be asked to incorporate a company for the export of furniture. The parties asking are Messrs. George McLagan, of Stratford; J. J. Orr, of Stratford; the Authes Company, of Berlin; Band Bros., of Plattsville; Bell & Co., of Wingham, and J. Bell, of Napanee. The intention of this body is to supply the market in Britain. It will, we are told, buy furniture from any manufacturer in Canada, whether of the company or not, and is only for selling purposes. The idea is to send goods in the "knock down" stage to Liverpool, where a large factory will be carried on by the company, and perfected goods placed on the British markets.

WINNIPEG BOARD OF TRADE.

The annual meeting of the Winnipeg Board of Trade was held on Tuesday, 1st February, Mr. D. W. Bole, president, in the chair. The first business was the reading of the president's address, from which we have made some extracts for publication in another part of the paper. Referring to postal matters, and the attention shown by Government to representations by the Board in improving communication in the West, Mr. Bole commended the urgent request from Cardston, Alberta, for increased mail facilities. There are now 1,300 people in the Leeys Creek settlement, and they only get one mail a week. Collections sometimes take three weeks. A mail at least twice a week from Lethbridge would be of practical service to Winnipeg wholesale merchants, who are doing a constantly increasing trade with this progressive district.

As to Klondyke traffic, while declining to recommend any special route, the speaker showed that an interior route, not by the Pacific coast, would be distinctly Canadian, and supplies taken by such a route would be drawn from Canadian sources. He also dwelt upon what we mentioned editorially last week, the wealth of the Peace River country, and districts between that and the Yukon. Freight rates were mentioned, and the efforts of Mr. Ashdown and other Manitoba gentlemen had resulted in better rates to Revelstoke and the Kootenay country. Express rates, too, have been reduced. The improvement of St. Andrew's rapids is a matter near to the hearts of Winnipeg merchants, but Mr. Bole shows that much of Manitoba besides that city would be benefited by the desired improvement. A fresh cordwood supply for the capital and for other towns will soon be needed (already cordwood has to be brought from the States), to say nothing of the iron and other deposits of the Lake Winnipeg region which would be developed by making these rapids navigable.

A matured plan for the settlement of vacant lands close around Winnipeg has not yet been submitted, but the matter is not being neglected. Speaking of the marked increase of bank clearings at Winnipeg during 1897, indicating the increased business of the city, he believed that a still greater year of promise had been entered upon now. The mineral development going on in the Lake of the Woods district, the approaching opening of the Crow's Nest railway, the growth of manufactures in Manitoba, the likelihood of a beef-packing industry being started—all these added to the increased success of the Western farmer must do good to Winnipeg.

Mr. Hespeler, Mr. Nairn, Mr. Richardson, and others, discussed the valuable report of the retiring president, and the reports of the treasurer, Mr. A. Strang, and the secretary, Mr. C. N. Bell, were approved. During last year 38 new members were admitted, and the membership is now 177.

The election of officers being held, the following were chosen without opposition:

President—Mr. A. M. Nanton.
Vice-president—Mr. E. L. Drewry.
Treasurer—Mr. Andrew Strang.
Secretary—Mr. C. N. Bell.

The following members of council were elected: D. W. Bole, John Galt, F. W. Thompson, J. H. Ashdown, J. Y. Griffin, F. W. Stobart, James Redmond, W. Georgeson, A. Wickson, G. F. Carruthers, John Russell, C. A. Baskerville, R. L. Richardson, M.P., W. R. Baker, J. Girvin, and Jerry Robinson.

The Board of Arbitration is as follows: Kenneth Mackenzie, E. L. Drewry, G. F. Galt, G. J. Maulson, S. A. D. Bertrand, J. H. Brock. R. T. Riley, S. Spink, John Galt, Wm. Hespeler, and Stephen Nairn,

WINDSOR BOARD OF TRADE.

The annual meeting of the Windsor Board of Trade, was held on Tuesday, 8th February. The president, Mr. J. J. Foster, occupied the chair.

The president made a short address. Nine new members were elected and their names registered.

There were two nominations for president—Messrs. Greenhill and Geo. Bartlet—but the former withdrew. The officers for the year are as follows:

President—Geo. Bartlet.
Vice-president—John Curry.
Treasurer—G. E. Copeland, re-elected.
Secretary—Miles Cowan.
Council—J. J. Foster, G. V. J. Greenhill, George Mair, R. Padden, Geo. H. Nairn, A. N. McLean, H. P. Vollans, Thos. Dow and J. M. Duck.

Mr. Greenhill in the absence of the president-elect was called to the chair. A number of members then spoke, and it became evident from the discussion, that the presence of natural gas, in Windsor, cannot be held out as an inducement for new industries to locate in that city, as the Natural Gas Company are bound by an agreement with the Interior Construction Co. (otherwise the Standard Oil Co., who laid the pipes in the river) which prevents their quoting a rate to manufacturers less than the retail rate given to private consumers.

TRURO BOARD OF TRADE.

On Friday, 28th January, was held the annual meeting of the Truro, Nova Scotia, Board of Trade. The proceedings were actively conducted, and the address of the retiring president, Mr. D. B. Cummings, was found interesting. The following officers were elected:—R. J. Turner, president; L. J. Walker, 1st vice-president; S. M. Bentley, 2nd vice-president; George A. Hall, secretary-treasurer; together with an active executive committee. The election of Mr. Turner to the presidency is regarded as an additional compliment to that gentleman, who has recently retired from the mayoralty of Truro.

PROGRESS IN TEXTILE CENTRES.

LYONS, FRANCE.—The attention of the mills is still principally directed towards the delivery of spring orders, which in many cases are overdue, but which are everywhere being accepted willingly. The principal weaves—such as taffeta in stripes, checks and plaids—are so low in manufacture that there can be no fear of an overproduction, and buyers, therefore, remain anxious to receive their goods. Good grades of black silks have not improved in demand, but damas glace meet with increased favor. Paris ordered large quantities of small brocaded effects on striped grounds, the latter being mostly in light hues of three or four colored combinations. The stripes are mostly in hairlines, but Pekins one centimetre wide are also seen. Wool-filled textures sell freely as well for dress as for cloaking materials. The principal makes are black and colored bengalines, also moire velours, poplins and gros-grain bayaderes. Satins in plain and quadrille are in good demand, and colored faille and poult de soie have been more sought, especially in fashionable shades.

NOTTINGHAM.—A fair trade is doing generally, and in the plain departments orders are behind hand. Valenciennes laces and insertions sell well in white, ivory, and butter. Torchons, Maltese, Brabants, Malines, etc., are in fair call. Oriental laces still sell freely. Not much is doing in embroideries, but crochet and curtains, window blinds, and furniture laces are moving in large quantities for home, colonial, and export. Most are in white, but colored goods are needed for special markets. Makers up of fancy goods are fairly employed, and anticipate a still better trade.

MANCHESTER.—Cheap clothing has now become a more marked feature of the business than ever, and the prices of some grades have been reduced to a very low point. The fancy hosiery branches keep fairly well engaged, but plains, both cashmere and cotton, are rather dull. There is not much doing in dress goods, for which the enquiry has for some time been poor. The French houses engaged in this business are complaining. The linen end of trade with the Spanish West Indies has been almost crippled, and there has been practically no compensation in the demand from neighboring markets. Melbourne and Sydney are now better markets than Havana, and the same remark may be said to apply to Toronto and Montreal, as far as the linen trade is concerned. There is not the same amount of movement as formerly in the British West India trade, although representatives of some houses transact a large business with Jamaica and other islands in those seas. There is nothing fresh to report in the silk branches. There is a moderate movement in silk ribbons, and a fair demand for moires. Silk velvets are quiet. The demand for lace curtains is rather quiet, but should improve before long. There has been a tendency towards the curtailment of lace curtain purchases lately, but the spring trade is expected to show a decided improvement.

BRADFORD.—Though it seems as if nothing will suffice to seriously increase the volume of business in the raw material here, and transactions are almost as scarce as ever, the market does undoubtedly continue to derive strength from the firmness of values at the London sales. Top makers will not now sell merino except at an advance, and values of worsteds and English are fully firm, though it is extremely difficult to force even the fractional advance. Holders have more confidence in the future, and are not pushing sales. Mohair is very firm, but prices have not moved up so well as has been the case abroad. Alpaca is also occupying a strong position, and more of it has been changing hands lately. There is again a marked absence of business in the export yarn trade, the slight improvement noted a few days ago having had the effect of checking further business by making spinners firmer in their demands. Spinners report that a good deal of underselling is taking place on the continent, and that is interfering to a large extent with the possibilities here.

DRY GOODS ITEMS.

The Montreal spring millinery openings have been fixed for Tuesday, Wednesday and Thursday, March 1st, 2nd and 3rd. Preparations are being made for a good attendance.

The annual meeting of shareholders in the Merchants Cotton Company was held on Tuesday last in Montreal. The report presented was considered satisfactory. The election of directors resulted as follows: A. A. Ayer, president; Gilman Cheney, vice-president; directors, Robert Mackay, J. P. Cleghorn, Jonathan Hodgson, R. B. Angus, James Crathern; Mr. Wm. G. Cheney is secretary-treasurer.

The forthcoming report of the Maine commissioner of industrial and labor statistics will include tabulations of facts received from one-half the cotton manufacturing business in the State. These show that the raw material and wages entering into a given product in 1880 were together 77 per cent., while in 1897 the same items constituted 91 per cent of the product. Taking the value of the product as a basis, wages have increased from 22 per cent. in 1880 to 33.1 per cent. in 1897. Average annual earnings in 1880, $249.73; in 1890, $312.50; in 1897, $289.50.

One of the United States consuls at Edinburgh, Mr. Rufus Fleming, tells his Government that there is extreme depression in the Scotch tweed trade. For several months the tweed industry in Galashiels and Hawick has been practically lifeless. To some extent this condition, he reports, is due to foreign tariffs, but the tweed manufacturers are forced to admit that the competition of Yorkshire goods has severely affected their trade. This competition of the Yorkshire worsteds and Scotch tweeds for the home and colonial markets has been about as keen as any contest that is recorded.

On Tuesday last the Montreal Cotton Co. held its annual meeting, on St. Peter street, forty or fifty shareholders being present, Mr. Andrew F. Gault, the president, was in the chair, and appointed Mr. D. F. Smith to act as secretary of the meeting. The financial statement and reports for the past year were submitted and appeared to be considered highly satisfactory. The election of the directors resulted in the return of the retiring board, as follows:—Messrs. A. F. Gault, Chas. Garth, Jac. Grenier, Hon. J. K. Ward, S. H. Ewing, R. S. Stevenson and Samuel Finley. When the newly elected board of directors met, Mr. A. F. Gault was re-elected president, Mr. Chas. Garth, vice-president.

A Boston man, Mr. G. H. Worthington, has been engaged in the manufacture of cotton yarn at Shanghai for several years, and came by the C.P.R. home for good, having decided that America is preferable to China. He says that a large quantity of Indian cotton is now being used in the Chinese mills, the demand having exceeded the supply of the native grown material. There are 270,000 spindles running in Shanghai, 90,000 at Woofoo, 18,000 at Foo Chow, and 15,000 at three other points. The mills are run almost exclusively by native labor, both men and women being employed, and the yarn is sold to the natives in the country districts, by whom it is woven into cotton cloth The machinery in use is almost exclusively of English make.

FOR GROCERS AND PROVISION DEALERS.

Mail reports from England are to the effect that stocks of figs are running very light and are controlled mostly by second hands. The stock there, it is reported, consists chiefly of duty-paid parcels.

An English contemporary says, or rather one of its correspondents says, that according to his experience, English grocers' assistants would prefer a somewhat earlier closing each evening to the weekly half-holiday which has become customary in many places in England.

The currant market in Greece has quieted down, but prices there show no particular change. Total stocks in that market are variously estimated from 12,000 to 16,000 tons, a small stock in any event, and should be entirely cleared before the next crop is ready for shipment.

London cables predict 800,000 bushels surplus wheat for export from Australia and its "Neighboring Isles." But this is no more than has often been sold here in one day on this crop, and does not amount to any more, except as it may show that Australia will not be an importer of wheat this crop.

A small boy entered a grocer's shop lately and putting an egg on the counter said to the grocer, "Mither sent me back wi' this egg. It's no guid, she says." The grocer was greatly surprised—or appeared to be—and exclaimed, "It must be guid. It's just fresh fra the country." Small Boy—"Which country?"—*London Grocers' Monthly*.

A worthy man died in Boston the other day, Mr. Henry L. Pierce who was for more than forty years the owner and manager of the well-known chocolate works in Dorchester and Milton, Mass. He provided in his will for the payment of $100 to all the mill hands who might be in the service of the company at the time of his death. This bequest was carried out to the letter one evening last month, when the beneficiaries under the will, to the number of 425, were paid in alphabetical order, and the evening was closed with music and dancing.

The secretary of the Winnipeg Board of Trade has received a communication from the Hon. Sydney Fisher, Minister of Agriculture at Ottawa, in which he states that he has intimated to the Ontario Fruit Growers' Association that the prohibition of the importation of foreign fruits is practically impossible. He further assures the Winnipeg board that its representations will be carefully considered before the matter is in any way dealt with. The communication is in reply to a despatch sent to the minister from Winnipeg in regard to the prohibition of foreign fruits, a measure being strongly urged upon the Government by the Ontario Fruit Growers' Association. The letter pointed out that as no pears, plums or peaches are grown in Manitoba and the North-West, and every attempt to import fruit from Ontario or British Columbia has resulted in loss, the enactment of such prohibitory laws would be a very serious matter to Manitobans.

The secretary of the Cleveland Retail Grocers' Association recently addressed the Detroit Retail Grocers' Association, and said that in 1895 there existed in Cleveland a most deplorable condition of affairs among the grocery trade of that city, which has, however, in a marked degree disappeared. This has been accomplished wholly through organization. Abuses still exist and the army of hucksters still pursue their calling, cutting into the profits of the legitimate trade. Yet we feel more than pleased with the good results attained, and shall continue to push forward until many of these obstacles have been removed, and a higher standard in the grocery business shall have been reached. "We have during the past two years," he says, among other things, gotten the wholesale commission merchants, and others who cater to the retail trade, to refrain from selling to consumers; we have compelled the huckster to take out licenses, by arresting those who failed to observe the ordinance which compels them to pay a fee of $35 per annum." The same speaker, Mr. Godfrey, who is also editor of the *Ohio Merchant*, mentioned the establishment of a card price on sugar which is lived up to by every tea and grocery store without exception in Cleveland, and by which he estimates that between $8,000 and $9,000 per month has since March, 1896, been saved to the trade of the city. A uniform price has also been established on a certain brand of soap, allowing a fair profit to all handlers, and they are working, with excellent prospects for the same upon package coffee.

TRUSTS CORPORATION OF ONTARIO.

The report of the Trusts Corporation of Ontario gives evidence, this year as in former years, of the extent to which organized effort and associated capital are replacing in Canada individual labor and responsibility in such matters as receivership, guardianship or administration of estates. Furthermore, it now appears that testators are in a number of cases appointing such associations trustee and executor, their wills having been deposited in the vaults and strong boxes for safe custody. Again, the number of trusts placed in the hands of this corporation has increased in number, though not in amount, during the year. We observe a change in the composition of the directorate, Dr. Digby, of Brantford, and Wm. Mackenzie, of Toronto, replacing Sir Richard Cartwright and Hon. J. M. Gibson, who retire.

IMPERIAL LOAN AND INVESTMENT COMPANY.

Although the gross earnings of the Imperial were ten thousand dollars less last year than in 1896, the net earnings were almost equal, the outgo for exchange, commission and interest having been considerably reduced. After a dividend of six per cent., there was $3,692 to carry to Contingent Account. The statements of two of the speakers at the meeting, as to the condition of the company's securities and the assurance that it has no loans on suburban unproductive property have a very satisfactory sound, at a time when shareholders are on the look out for such blemishes among loan company securities. And the language of the president as to the policy of the company is decidedly reassuring. There were some enquiring shareholders at the meeting—there are likely to be enquiring shareholders at other like gatherings as well, and they are rather to be welcomed than otherwise—but the management was able to satisfy them thoroughly. One of these gentlemen made the rather unpopular suggestion that it might be wiser, in view of the earnings, to pay five per cent. dividend instead of six. If such a policy should be found necessary, there are other companies which would have to adopt it before the Imperial.

UNION LOAN AND SAVINGS COMPANY.

The improved condition of industrial and commercial affairs in Canada, so hopefully looked forward to a year ago by the president of this company, and the enquiry for landed property, which then showed some signs of beginning, have scarcely yet, it seems, had time to affect the earnings of the Union Loan Company. It shows gross earnings of $113,944, which is some $14,000 less than the previous year, but we judge from the report and proceedings that earnings are more narrowly scanned this year, and hypothetical profits more carefully examined before being announced. The vice-president states that of the year's earnings $101,000 was actually received in cash during 1897, and most of the remaining $12,000 has since been received. This is intelligible; and more of this kind of circumstantial statement will be welcomed this year at loan companies' meetings. The aggregate of the company's securities is placed, we observe, at some $120,000 less than last year; and to offset this sterling debenture and deposit liability is nearly $100,000 less, while some Canadian deposit borrowings have been transformed into debentures. The report states that the board has been able to effect an increased efficiency in management at a decreased cost for working expenses, an achievement on which they are to be congratulated. We observe that Dr. Geikie retires from the presidency, his professional engagements not permitting him to continue, and that Mr. Stark, who is a business man of experience and shrewdness, has been chosen to succeed him.

NEW YORK LIFE.

The progress of the New York Life in Canada is shown in an interesting way by the following figures, which represent the Canadian business as at December 31st, 1897: For the first time in the history of the company its yearly income in Canada has exceeded $1,000,000. The total income in Canada last year was $1,014,896.40.

	Dec. 31, 1896.	Dec. 31, 1897.
The new business actually paid for within the year	$ 2,474,992 00	$ 2,861,050 00
First year's premiums paid within the year	84,195 21	107,710 44
Total paid business in force	21,782,848 00	22,925,289 00
Sworn and approved assets in Canada	4,300,038 10	4,778,777 40

These assets will shortly be increased, we are told, by further substantial deposits with the Canadian Government. These figures includ only business actually paid for within the year, as per sworn statement gazetted by the Canadian Government, according to the agency director, Mr. R. Hope Atkinson.

There is thus an increase in new business in total in force and in Canadian assets. The handsome surplus of $323,594 over all liabilities in Canada is shown.

—The figures of inward and outward trade of Nova Scotia for 1897 have been published. The exports of that Province were of the value of $11,312,000 as compared with $10,999,000 for the year 1896. Imports were valued at $7,957,000 last year, as against $8,336,000 in the previous twelve months.

THE ÆTNA LIFE.

Another year has been added to the successful life of this fine old New England company, and it keeps on adding to its resources and showing further advantages to policy-holders. The annual statement of the Œtna Life Insurance Company for 1897 shows large increases in the principal departments of its business. There is an increase in accident premiums of $145,452.33; in accident income, $146,811.94 in surplus, $176,371.45; in interest, $189,207.91; in income, $515,402.51. Then the increase in assets is $2,027,694.96; in life business, $5,025,957; in accident insurance, $22,099,320. In results to its policy-holders the Ætna has achieved a record which we do not remember to have seen surpassed. The company, while modern, is conservative in its methods, but by no means slow or unprogressive.

THE JANUARY FIRE LOSS.

The fire loss of the United States and Canada for the month of January, as compiled from the daily records of the *N.Y. Journal and Bulletin of Commerce*, aggregates $9,472,500. The year 1898 has commenced favorably as to a reduction in fire loss, as will be seen from a comparison with the figures for the month of January in the years 1896 and 1897:—

	1896.	1897.	1898.
January	$11,040,000	$12,049,700	$9,472,500

During January there were 192 fires of a destructiveness of not less than $10,000 each. The fire underwriters may congratulate themselves upon the record of the first month of the year. February, however, has opened disastrously and the losses incurred already this month do not sustain the prospects of an unusually prosperous year for the business. The unfortunate conflagration in Winnipeg will contribute no small share to the burdens which the insurance companies in Canada have been compelled to bear. The months of January and February are always of special interest to the fire underwriters, who have some apprehensions in regard to the first month of the year, fearing moral hazard on left-over holiday stocks and fires due to defects in heating apparatus brought on by cold snap sin February.

LIFE ASSURANCE NOTES.

The *Medical Examiner* for January editorially remarks: "The more we consider the relation of the doctor to insurance, the more valuable his assistance appears, although there is a disposition to ignore and belittle him by other departments of a company. The doctor is one of the main factors which renders successful insurance possible." True for you, Dr. Wells.

The results of the business in Canada last year of the Standard Life Assurance Company have been, we are told, very satisfactory. The new risks written in the twelve months amounted to $1,930,000, and the income of the year in Canada exceeded a million dollars. A light death rate has been experienced, which is a favorable feature for participating policy-holders. The Toronto business is, we understand, considerably larger than in previous years. One is surprised on looking over the Blue Book, to find that the Canadian investments of the Standard exceed twelve millions of dollars; it deserves, therefore, the consideration in this country which it seems to receive.

Mrs. Potts, manager of the Woman's Department of the Mutual Life of New York, at its Boston office, recently gave a little talk to some fifteen ladies on the question of life insurance. This is the sort of thing which appears to be constantly going on across the Atlantic, where the ladies are steadily increasing their hold upon the insurance business. The company named is to be congratulated on having secured as superintendent of its Women's Department, at Toronto, a representative of decided ability in the person of Miss Katharine M. Lizars, whom many in Canada know and appreciate as one of the authors of that fascinating book "In the Days of the Canada Company."

A well-known Canadian life company forwards to us a letter, of which the following is a copy, showing how outraged the writer feels over the alarming increase the Mutual Reserve Fund Life has lately made in its rates:—

"Washington, D.C., Feb. 7, 1898.

"——— Life ——— Co.,

"Toronto, Canada.

"Will you send me the rate you will issue to me a life insurance policy for $3,000. I have been carrying a life insurance of $3,000 in the Mutual Reserve Fund Life Insurance Co. of N.Y., for nearly fifteen years. I began by paying $7.47 every sixty days, with annual dues of $6. When I received the policy I was assured that the premium would not exceed that amount, but a year or two ago it was increased to $10.23, and I continued to pay without complaining until my last assessment came, February 1st, when I was amazed to find they had raised me to $18.09 [every half year]. I have come to the conclusion that the concern is too increasingly expensive and uncertain for me, and I want to get out of it. I have met and done business with your agent in Ontario, and I like the way your company does business.

"I am 58 years of age, am in perfect health, and have not (to my recollection) employed a doctor in twenty years; have been in the United States since 1890. Will be pleased to hear from you.

"Yours truly, L. H.,

"Washington, D.C."

FIRES IN MONTREAL.

On Monday last the fire commissioners of Montreal made their report upon the fires of that city during 1897. These gentlemen, Messrs. Alfred Perry and J. Poirier, investigated no less than 556 fires during the twelve months, and took evidence on oath there anent. Two persons were brought before the commissioners, accused of incendiarism, but the depositions made against them being insufficient they were discharged. The report of Messrs. Perry and Poirier gives in tabular form the class of property destroyed, or injured, the amount of insurance, and the losses incurred in each case. The total losses were $579,257, and the amount of insurance $1,292,552. A large proportion of the fires had been caused by the explosion of coal oil lamps, and coal oil stoves. There has been a steady increase from year to year in the number of investigations, the figures being 315 for 1895, 458 for 1896, and 556 in 1897. The losses for 1897 were much less than in the previous year. It is to be desired that every city and town should make like enquiry into the causes of fires in their midst.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, February 10th, 1898, compared with those of the previous week:

Clearings.	Feb. 10th, 1898.	Feb. 3rd,, 1898.
Montreal	$14,811,986	$14,549,771
Toronto	8,066,341	8,307,722
Winnipeg	1,453,593	1,378,167
Halifax	1,288,741	1,143,587
Hamilton	783,920	649,347
St. John	621,980	432,997
	$28,026,561	$26,461,591

Aggregate balances this week, $4,234,977; last week, $3,938,705.

—The annual meeting of shareholders in the Guarantee Company of North America, was held in Montreal a week ago, The report submitted contains the following figures:—Amount of bonds in force $43,196,496. Gross revenue, $295,173.01. Assets, $956,196.63. Surplus to shareholders, $444,797.71. Total resources, $1,320,196.63. The total amount paid and provided for indemnity to employers to date is $1,442,259.69. A dividend of six per cent. was paid, together with a bonus of 2 per cent. out of the ascertained profits of the year. The directors are as under:—E. S. Clouston, John Cassils, Geo. Hague, Hartland S. MacDougall, H. W. Cannon, of New York, Edward Rawlings, E. C. Smith, of St. Albans, Vt., William Wainwright and Robert Kerr. The president is Mr. Rawlings, and the vice-president, Mr. McDougall.

—By the courtesy of the secretary, we have received an advance copy of the report for 1897 of the Winnipeg Board of Trade. The council is pleased to report that the business men of the Province are recognizing the desirability ot associating themselves for business purposes Requests for the forms to be taken for organizing boards of trade have been received from Saltcoats, Selkirk, Grenfel, Emerson, Cypress River, Souris and Hartney.

—The Vancouver Board of Trade has established an agency in Seattle, Washington State, to afford information of Vancouver's advantages over the United States cities in supplying outfits for the Klondyke at lower prices and of a more suitable character. The result has displeased Seattle outfitters, as miners realize the saving they would effect by outfitting in Canada.

The annual meeting of the Keystone Fire Insurance Company has been held in the company's office, Princess street, St. John. The following named gentlemen were elected officers for the ensuing year: Hon. A. F. Randolph, president; Lt. Col. Markham, vice-president; Senator Cox and J. J. Kenny, of Toronto; R. W. W. Frink, A. P. Barnhill and F. G. Knowlton, directors.

Meetings.

TRUSTS CORPORATION OF ONTARIO.

The ninth annual meeting of the Trusts Corporation of Ontario was held at the offices of the Corporation, Nos. 19-21 King street west, Toronto, on Tuesday, the 8th day of February, 1898, at 12 o'clock noon.

Among those present were: The Hon. J. C. Aikins, Mr. J. L. Blaikie, Mr. G. A. Boomer, Mr. W. H. Cawthra, Mr. Wm. Cooke, Dr. Digby (Brantford), Mr. Wm. Gordon, Mr. Wm. Hendrie (Hamilton), Mr. Matthew Leggat (Hamilton), Mr. Thomas Long, Mr. A. Manning, Mr. W. D. Matthews, Mr. E. B. Osler, M.P., Mr. Thomas Paterson and Mr. George Porter (Bowmanville), Mr. R. S. Schell (Brantford), Mr. Fred. J. Stewart, Hon. S. C. Wood, and others.

On motion, the Hon. J. C. Aikins took the chair, and Mr. A. E. Plummer, the manager, was requested to act as secretary of the meeting, and read the following report, together with the financial statements, auditors' certificate, etc.

REPORT.

The directors of the Trusts Corporation of Ontario beg to submit their ninth annual report, together with all financial statements, showing the business of the Corporation for the year ending the 31st December, 1897.

Your directors have much pleasure in reporting a steady and continued increase in the business of the Corporation, the number of trusts committed to our care being larger than in any previous year. As this yearly increase has been steadily maintained from the inception of our business, we look upon it as a gratifying evidence of the Corporation's growing usefulness in supplying a reliable and well-adapted medium for the transaction of a business in its nature of the utmost importance. The volume of new business represented has not been so great as some other years, but in a business such as ours, where trusts vary so much in size, this fluctuation may be expected.

The new trusts undertaken during the year, embracing administrations, executorships, trusteeships, guardianships, receiverships, and committeeships of lunatics, amounted to $575,150, in addition to which a number of miscellaneous trusts, such as the appointment of the corporation as trustee for bondholders and businesses of like nature were created. In addition, we have been advised that a number of wills have been made since our last meeting, appointing the Corporation executor and trustee, many of which have been lodged in our vaults for safe custody.

During the past year, a number of estates were wound up, being disposed of or partly distributed among the parties entitled thereto, and there is now remaining in the hands of the Corporation assets belonging to trusts estates amounting to nearly five million dollars.

A satisfactory increase has been made in the rentals from our safe deposit and storage department, the number of deposit boxes rented showing a steady growth in this business.

During the year, Sir Richard Cartwright, K.C.M.G., M.P., of Kingston, and Hon. J. M. Gibson, M.P.P., retired from the directorate and their places were filled by the election of William Mackenzie, Esq., of Toronto, and J. W. Digby, Esq., M.D., of Brantford.

After a short address from the president on the general business of the Corporation, the report was unanimously adopted.

The usual votes of thanks were passed to the directors and others, and Messrs. J. M. Martin, F.C.A., and Maitland Young were appointed auditors for 1898.

Mr. Geo. A. Boomer and Mr. Fred. J. Stewart having been appointed scrutineers, reported the following gentlemen elected as directors for the ensuing year:

Hon. J. C. Aikins, J. L. Blaikie, Wm. Cooke, Dr. J. W. Digby, W. C. Edwards, M.P., Hon. Senator Gowan, K.M.G., Wm. Hendrie, J. J. Kenny, M. Leggat, Thos. Long, Wm. Mackenzie, Hon. Senator McLaren, Alex. Manning, W. D. Matthews, B. B. Osler, Q.C., E. B. Osler, M.P., Hugh Ryan, and the Hon. S. C. Wood.

At a subsequent meeting of the directors, the Hon. J. C. Aikins, P. C., was elected president, and the Hon. S. C. Wood, and Mr. W. D. Matthews, vice-presidents.

IMPERIAL LOAN AND INVESTMENT COMPANY, OF CANADA, LIMITED.

The twenty-ninth annual meeting of the shareholders of the Imperial Loan and Investment Company of Canada, Limited, was held at the offices of the company, Toronto, on Monday, the 7th day of February, 1898, for the purpose of receiving the directors' report for the year ending 31st December, 1897, and electing directors for the current year.

Among the shareholders present were Messrs. John Aitken, R. L. Benson, Josias Bray, J. Bond, Alexander Bell, Barlow Cumberland, P. M. Clark, Dr. Daniel Clark, Wm. Davidson, C. C. Dalton, J. K. Fisken, George Hallen, Alderman Lamb, E. H. Kertland, Sir Geo. A. Kirkpatrick, H. M. Pellatt, Miss Hanna Robinson, Geo. Robinson, B. Saunders, H. Swan, J. G. Ridout, C. A. Tobin, Dr. Thorburn, S. G. Wood, R. S. Wood, Magnus Shewan and Alexander Smith.

REPORT.

The directors have much pleasure in presenting to the shareholders a statement of the company's accounts for the year ending 31st December, 1897. The gross earnings for the year, including a sum of $95.40, received as a premium on stock, amounts to $105,667.52.

Which, after deducting interest on bonds, deposits, commissions, and the cost of management and all other charges, leaves a net profit of	$ 46,705 89
Two dividends for the year at 6 per cent. amount to	43,013 10
Leaving a surplus of	$ 3,692 79
This surplus has been carried to credit of the contingent fund, which now amounts, after charging up all losses on properties sold during the year, to	$ 21,602 15
Rest account is	160,000 00
Total Reserve fund is	181,602
Interest on mortgages has been fairly met, the amount received on that account during the year being	114,949 00

The books and securities of the company have been duly audited by your auditors.

E. H. Kertland, Manager.
James Thorburn, President.

Toronto, 25th January, 1898.

Statement of Liabilities and Assets 31st December, 1897.

Liabilities.

To stock	$ 720,647 96
Dividend No. 56, payable 8th January, 1898	21,513 20
Rest account	160,000 00
Contingent fund	21,602 15
Deposits	31,654 55
Currency debentures	185,750 00
Interest accrued	2,295 50
Sterling debentures	720,173 18
Interest accrued	7,752 10
	$1,871,388 64

Assets.

By mortgages on real estate	$1,818,247 98
Loans on stock	50,129 05
Cash in banks	2,746 12
Cash on hand	265 49
	$1,871,388 64

PROFIT AND LOSS ACCOUNT.

Dr.

To cost of management, including salaries, directors' fees, auditors' fees and office expenses	$ 12,233 58
Manitoba expenses	1,756 68
Dividends Nos. 55 and 56	43,013 10
Interest on debentures and deposits	39,827 49
Agents' commission on loans and sterling exchange	4,304 96
Tax on dividends	838 92
Transferred to contingent fund	3,692 79
	$105,667 52

Cr.

By interest on investments	$105,572 12
Premium on stock	95 40
	$105,667 52

AUDITORS' REPORT.

To the Imperial Loan and Investment Company, of Canada, Limited:

Gentlemen,—We beg to report that we have carefully examined the books, accounts and vouchers of the Imperial Loan and Investment Company, limited, for the year ending 31st December, 1897, and have found them to be correctly stated.

We have verified the balances of the subsidiary ledgers.

The balance sheet exhibits a correct view of the company's affairs. We have also examined the securities and found them in perfect order.

Robert Sewell,
T. E. P. Trew,
Auditors.

Toronto, 25th January, 1898.

On motion of Alderman Lamb, seconded by C. C. Dalton, Esq., Dr. Thorburn was moved to the chair, and Dr. Kertland to the position of secretary for the meeting.

The notice calling the meeting was then read by the secretary.

In moving the adoption of the report, the president said:

Gentlemen,—In moving the adoption of the report, which, as customary with us, has been placed in the hands of the shareholders one week before the annual meeting, I will not take up your time unnecessarily, but should like to direct your attention to a few items of interest in connection with the financial affairs of the company.

You will have noticed in the report before you, that after defraying all expenses, there remains a net profit for the year of $46,705.89, from which the shareholders have received two half-yearly dividends at 6 per cent. per annum, amounting to $43,013.10, leaving a surplus of $3,692.79.

This surplus your directors have deemed it prudent to carry to contingent account, a fund specially set apart to provide against losses, which, experience teaches us, are sure to occur more or less in defiance of the most judicious and careful management, and after charging this fund with all losses ascertained during the past year, there remains a balance to that account of $21,602.15.

The reserve fund remains $160,000, or about 23 per cent. of your paid-up capital.

I wish to call your attention to a very important matter in the report, namely, that the actual cash received during the year, as interest on investments, exceeds by some thousands the gross earnings for that year, indicating that all claims for the year, including dividends and the amount carried to contingent fund, have been met from interest received and not from anticipated receipts, which might or might not prove substantial.

The indications of renewed prosperity, after so long a season of depression, referred to in my last report, are, I am happy to state, becoming more evident. May we not, therefore, look forward hopefully to the near future? I emphatically answer Yes.

The recent discovery of gold mines, and the great influx of people consequent thereon, have caused an increased demand for produce, and given steady employment to thousands, resulting in higher prices for provisions, and an increasing demand for farm property of all kinds, both in Ontario and Manitoba. All these things point to an era of renewed prosperity, on the threshold of which, you will all agree with me, we now stand.

Our Edinburgh agents have written us

in some anxiety as to the failure of the "Farmers'" Loan Company, but, by this time, it will have become as evident in Great Britain as it is here, that, should that institution fail to meet the demand of its creditors in full, it will be owing to a gross mismanagement not at all likely to obtain in any other loaning company in this city.

The failure of the Toronto Financial Corporation has been noted, an institution ignorantly styled by some a "loaning" company, but, as you know, this corporation had nothing whatever in common with loaning companies, being simply a banking business investing its funds in a great measure in promissory notes at a high rate of interest. We have informed our agents in Edinburgh that the protection of our bondholders shall still be, as it ever has been, our first care; that we have for many years paid dividends at seven and six per cent. because our cash receipts on interest account have justified us in so doing, and that if, in the near or far future, at any time, cash receipts should not justify such dividends, we shall certainly cease to declare them at that rate or at any higher rate than such as our earnings approve.

In view of the lower rates now to be had from first-class investments, entailing a decrease in earnings only partially compensated by the lower rates paid on debentures and deposits, it has been deemed expedient to curtail the working expenses so far as consistent with the due efficiency of the staff, and to this end your directors have made arrangements, satisfactory to all parties concerned, reducing expenses for the current year to as low a figure as possible.

I have much pleasure in testifying once more to the integrity and efficiency of the company's staff in their several departments, and also to the interest in our affairs displayed by our agents in Edinburgh.

I beg leave to move, seconded by Sir George A. Kirkpatrick, the adoption of the report. But before putting the resolution I shall be glad to answer any questions which any of the shareholders may desire to ask me. Several questions in reference to the nature of the company's securities, etc., were then put to the president, especially by Messrs. Barlow Cumberland, J. G. Ridout, George Hallen and Henry Swan, all of which were answered to the complete satisfaction of those gentlemen and of the shareholders present.

In seconding the president's motion for the adoption of the report, Sir George A. Kirkpatrick, the vice-president, said:

I have pleasure in seconding the motion, which has just been made by the president, that the report of the directors with the accompanying statements be adopted.

It must be satisfactory to the shareholders to know that the actual amount received in cash, for interest for the past year, has been in excess of all the charges for interest on debentures and deposits, for all expenses, and for payment of the dividends.

This shows that your securities are live and active ones. Indeed, I may say that in Ontario we have only one property on hand which is unproductive, and only a small amount has been loaned upon it.

You will be pleased to know that your company has no loans on suburban unproductive property.

The only loans your directors care to entertain are upon such high class security that the rate of interest obtainable is annually decreasing. To make any profit, it is necessary to obtain money on our debentures at the lowest rates. We have, comparatively speaking, a small amount of debentures falling due this year, and we must be prepared to pay them off, unless renewed at reduced rates. If paid off it will involve a contraction in the amount of our loans.

The abundant harvest last year in Manitoba and the realization of good prices for all farm produce has restored confidence and hope to the settlers in that country. Lands sell readily; old debts and considerable arrears of interest have been paid, and everything betokens a new era of prosperity, which would benefit all the financial institutions, your company included, which have loaned money to the settlers for the development of that great country. As an evidence of the returning prosperity of Canada during the past year, I need only refer to the great expansion of our trade which has taken place; the large increase in the exports of farm produce and of animals and their products of over $10,000,000 over the exports of the preceding year, all of which goes directly to the benefit of the farmers, that large class of the community upon whose prosperity so much depends; and to the increase in the bank deposits since 1st January, 1897, of $25,000,000.

These figures surely should make every person interested in Canada full of hope for the future and feel confident that in no other country will the capitalist find a safer investment for his money.

The motion was then put to the meeting and carried.

Moved by Wm. Davidson, seconded by Dr. Daniel Clarke: That the thanks of the shareholders are due, and are hereby tendered to the president, vice-president and directors, for their services during the year, and that the sum of $1,500 be paid them for their services, to be divided among them as they may decide. Carried.

Moved by H. M. Pellatt, seconded by C. C. Dalton, That Messrs. Robert Sewell and T. E. P. Trew be paid $200 each for their services during the past year, and that Mr. Robert Sewell and Mr. T. E. P. Trew do act as auditors for the current year.

It was moved in amendment by Barlow Cumberland, seconded by H. Swan: That Mr. T. E. P. Trew shall act as auditor for the current year, and that the appointment of another be left in the hands of the directors, and that the auditors shall receive $200 each for their services. This amendment was then put and carried.

Moved by Alderman Lamb, seconded by Alexander Smith, That a poll be now opened for the election of directors, and that the same be closed whenever five minutes shall have elapsed without a vote having been entered, and that Bernard Saunders and C. C. Baines be scrutineers, and that they shall hand the result to the manager, and that they be paid the sum of four dollars each for their services. Carried.

ELECTION OF DIRECTORS.

The scrutineers handed to the manager the following names as the result of the vote for the election of directors for the current year: Dr. Thorburn, Sir George A. Kirkpatrick, Ald. Daniel Lamb, Richard Shaw-Wood (London), E. H. Kertland, C. C. Dalton, H. M. Pellatt.

At a subsequent meeting of the directors (Dr. E. H. Kertland in the chair), James Thorborn, M.D., was re-elected president, and Sir Geo. A. Kirkpatrick, vice-president for the current year.

UNION LOAN AND SAVINGS COMPANY.

The thirty-third annual meeting of the stockholders of the Union Loan and Savings Company was held at the company's offices, 28 and 30 Toronto street, Toronto, on Wednesday, the 9th day of February, 1898, at 12 o'clock noon, and was largely attended, amongst those present being: Walter B. Geikie, Esq., M.D., F.R.C.S., E., president, in the chair; John Stark, Wellington Francis, Thomas Gilmour, Wm. N. Eastwood, Rev. Dr. Robert C. Moffat, William Cook, Rev. Dr. J. H. Starr, Chas. McCaffry, Dr. J. C. Patton, Alexander Smith, William Spry, R. C. Carlyle, Geo. Robinson, J. J. Maclaren, Q.C., Harman Schmidt, Magnus Shewan, Arthur Harvey, T. Mortimer, Kennedy Cerberry, Robert Bustard, Prof. John Fletcher, R. D. Moffat, M.D., Henry Jordan, and others.

Mr. McGee, the manager, was requested to act as secretary, and read the notice convening the meeting, as also the directors' report:

REPORT.

The directors beg to submit the statement of acounts for the year ending 31st December, 1897.

The earnings for the year amount to $113,944.73. After paying two half-yearly dividends at the rate of 6 per cent. per annum, a balance of $1,316.71 remains to the credit of contingent account.

The reserve fund stands at $200,000.

The repayments from borrowers amount to $307,742.09, showing a satisfactory increase over last year.

The company's debentures and deposits have been reduced by over $100,000.

Mr. Maclean, the late manager, resigned in the month of September last, and at the unanimous desire of the board, Mr. James C. McGee, for some years a director, and one of the largest shareholders, accepted the position.

Your directors refer with pleasure to the visit during the past summer of W. C. McEwen, Esq., W.S., Edinburgh, resident director in Great Britain, who was thus afforded an opportunity of becoming familiar with the affairs of the company.

The directors regret to announce the retirement of Francis Richardson, Esq., owing to advancing years: Mr. Richardson having been continuously a director of the company since its formation, and was for many years its esteemed president.

The vacancies on the board have been filled by the appointment of Wellington Francis, Esq., and Thomas Gilmour, Esq., of this city, who are well and favorably known, and who represent large interests in the company.

Amendments to the company's by-laws, bringing them into conformity with the recent Act of the Legislature, will be submitted for approval. The auditors' report hereto appended, shows that they have audited the books of the company, and found them correct.

The directors hold their seats from year to year, but are eligible for re-election.

Respectfully submitted,
W. B. Geikie,
President.

Financial Statement for the Year Ending 31st December, 1897.

JAMES C. MCGEE,
Manager.

We, the undersigned, have audited the books of the Union Loan and Savings Company for the year ending 31st December, 1897, and find them in conformity with the above statement, and have checked the vouchers and mortgage registers, and found them correct.

JAMES CARLYLE,
JOHN N. LAKE.
Auditors.

The president on rising to move the adoption of the report, said:

The annual report for the year ending December 31st, 1897, together with the statement of accounts, is in your hands.

You will see that the earnings of the company during the year amounted to $113,944.73, and after paying two half-yearly dividends at the rate of 6 per cent. per annum, and all other charges, the reserve fund stands at $200,000. The repayments by borrowers show the amount of $307,742.09, being a considerable increase over the amount so repaid last year.

The company's debenture and deposit indebtedness have been reduced by more than $100,000 during the year. In November last our sterling debentures were largely renewed, while all those due at that time in Canada were renewed.

You will note with pleasure the general and marked revival of business throughout Canada after the prolonged period of depression. The abundant harvest of 1897, the bright prospect of the opening up and developing of the immense mineral wealth Canada has been proved to possess, a greatly increased demand in Great Britain and elsewhere for Canadian products of all kinds, and last, but not least, the fact that Canada has taken, during the past year, a position of prominence altogether unprecedented as an increasingly important part of the Empire, with the result of drawing public attention strongly to her capability, and the best means of developing these—we recognize in these facts good reasons for anticipating a long era of greatly increased prosperity.

Your directors have been able to effect important changes in two directions, viz., an increase of efficiency of management, with a decrease of cost. These changes will, in the next annual report, show a large saving in cost of management and working expenses. This could not be shown in the present report, because the changes alluded to were not effected until late in the year.

In September last the resignation of Mr. Maclean, who occupied the position as manager of the company for many years, was tendered and accepted. Mr. James C. McGee, who has a large interest in the company, and has been a member of the board of directors for some years, was appointed to succeed Mr. Maclean. It is due to Mr. McGee to say that since his appointment, his attention to every detail of the company's business has been untiring and exceedingly satisfactory in every way to the board.

The report refers to the visit of W. C. McEwen, Esq., W.S., our resident director in Great Britain. The members of the board gladly welcomed him amongst them. His visit,, as the report states, enabled him to make himself familiar with the affairs of the company in which he has always taken the deepest interest. On his return to Scotland, Mr. McEwen prepared a circular to the friends of the company in Great Britain—debenture holders, shareholders, etc. In this he directs special attention to the improved and improving condition of affairs in Canada, and to the excellent harvest. He speaks very highly of Toronto and of the country generally. Of the company's debentures, he speaks as follows: "Mr. McEwen is satisfied that its debentures form a thoroughly sound investment of their class." Of Canada he closes his circular by saying: "It is a country which only requires to be known and visited in order to get the attention it deserves, but has not yet received."

The report speaks of the retirement from the board of Francis Richardson, Esq., our senior director. He retires owing to advancing years, having been continuously a member of the board since the formation of the company, and for most of his years of service was its highly respected president. He leaves the board with the best wishes of all its members. The vacancies on the board have been filled by the appointment of Wellington Francis, Esq., and Thomas Gilmour, Esq., of this city, both gentlemen being large shareholders, and well known as successful and able business men.

The by-laws have been amended by leaving out several useless provisions, and by bringing them thus simplified into accord with the Loan Companies Act of 1897, and a resolution approving of their adoption will be submitted to this meeting.

The vice-president, in seconding the adoption of the report, said:

It will not be necessary to occupy much of your time, the president in his remarks having gone very fully into matters. It might, however, be satisfactory to the shareholders to learn that of the $113,944.73 shown as received as interest on investment, viz: from mortgages, city debentures, Government scrip, and rent of properties, $101,000 was actually collected in cash, and a large proportion of the balance has since been received.

You will observe that the company's deposits have again been reduced during the year by the payment of over $25,000. Deposit money is cheaper than money borrowed on debentures, but being subject to withdrawal on short notice, the directors are not encouraging it, but are asking depositors to take debentures in lieu thereof. Our currency debentures have been added to by over $8,000, showing increasing confidence in this company. Owing to the failure of a Canadian loan company to meet its maturing debentures, Mr. McEwen was unable to secure renewals for all the company's bonds falling due in 1897, but now having personal knowledge of the company's affairs, and knowing the security for debenture holders to be unquestioned, it is confidently expected that he will not have much difficulty in securing renewals for the greater portion of the bonds maturing this year.

The president has referred to the change in management, and reduction in working expenses. I wish to emphasize the fact that this has not been done at the cost of efficiency. The business of the company is receiving more care and attention, and Mr. McGee and his competent staff have done, and are doing all in their power to obtain the best results from the company's business, and already there has been a marked improvement in this respect.

The Rev. Dr. J. H. Starr and Mr. Harvey each spoke briefly in terms complimentary to the management, and the following resolutions were passed unanimously:

"That the report of the directors, and statement of accounts submitted to this meeting be received, and adopted."

"That the thanks of this meeting be given to the company's resident director in Edinburgh, Mr. W. C. McEwen, W.S., for his valuable services in connection with the company's debenture business for the past year, as also to Messrs. Allan, Buckley, Allan, and Milne, for the interest taken in the company's business during the past year.

"That the Rev. Dr. Moffat and Mr. H. L. Stark be, and they are hereby appointed scrutineers, for the purpose of determining the vote of the directors for the current year.

"That the thanks of the meeting be given to the directors, auditors, and officers of the company, for the satisfactory manner in which they have discharged their respective duties, and that Dr. Carlyle and Mr. E. B. Freeland be, and they are hereby appointed auditors for the current year, their compensation to be fixed by the directors."

"That the general by-laws now submitted to this meeting be confirmed and adopted."

The scrutineers reported the following gentlemen duly elected directors of the company: W. B. Geikie, M.D., John Stark, William N. Eastwood, H. B. Yates, M.D., W. C. McEwen, W.S.; Wellington Francis, and Thomas Gilmour.

At a subsequent meeting of the board, Dr. Geikie was re-elected president. Dr. Geikie thanked the board for the renewed expression of its confidence, but owing to his professional and other numerous duties, desired to be relieved from the position and John Stark, Esq., was elected president and Wellington Francis, Esq., vice-president for the current year.

JAMES C. MCGEE,
Manager.

February 9th, 1898.

TRANSACTIONS ON TORONTO STOCK EXCHANGE.

Business on the Toronto Stock Exchange has been fairly active during the week, and stocks generally firm. Bank shares have been very little dealt in, but continue strong. Commerce sold at 136¾ at the beginning of the week, and closed at 138. Imperial has fallen to 194. Ontario has advanced 2½ points, and is quoted at 103½. Western Assurance advanced a fraction, and is now selling at 167⅜. C.P.R. Stock sold from 86¾ to 88⅜, a gain of $⅜ on last week's price. Toronto Railway has shown an advance from 98⅛-102¾. Loan companies are steady. Following are the transactions for the week: Ontario Bank, 37 at 103½; Canadian Bank of Commerce, 280 at 136¾-138; Imperial Bank, 95 at 193¾-194; Dominion Bank, 10 at 257; Bank of Hamilton, 3 at 173; Brit. America Assur. Co., 133 at 128½-128⅞; Western Assurance Co., 700 at 166⅝-167⅜; Consumers' Gas Co., 2 at 212; Montreal Gas Co., 620 at 196½-197⅝; Dominion Telegraph Co., 15 at 132; Ontario and Qu'Appelle Co., 90 at 50; Canada North-West Land Co., pref., 120 at 52; Canada N.-W. Land Co., common, 300 at 15; C.P.R. stock, 2,020 at 86¾-88⅜; Toronto Electric Light Co., 455 at 136¼-137⅛; new, 29 at 117¾-119; Commercial Cable, 825 at 186¾-188¼; reg. bonds, $72,300 at 106⅛-106½; coup. bonds, $12,000 at 106-106¾; Bell Telephone Co., 100 at 174⅜-174½; Richelieu and Ontario Navigation Co., 245 at 112¾-112½; Toronto Railway, 1,095 at 98⅛-102¾; London Street Railway, 530 at 179¼-178⅛; Canada Landed and National Investment Co., 45 at 101¼; Canada Permanent Loan Co., 55 at 109½; 20 per cent., 10 at 80; Central Canada Loan Co., 10 at 125; Freehold Loan Co., 58 at 92-94; 20 per cent., 393 at 73-74; Huron and Erie Loan Co., 9 at 167-170; London and Canadian Loan Co., 45 at 73; London Loan Co., 3 at 105; Manitoba Loan Co., 40 at 40; Western Canada Loan Co., 20 at 120; 25 per cent., 145 at 90.

DISSATISFIED POLICYHOLDERS.

A meeting of policyholders in the Covenant Mutual Life Association, of Galesburg, Ill., was held in the I.O.O.F. hall, at which were present a large number of the Hamilton members of the association, who have held policies for the past twelve or thirteen years, and some of the remarks made were anything but complimentary to the institution's management. The cause of the meeting was the receipt by the members of a circular with reference to a new form of policy which it is proposed to adopt, the alternative of which is an increase of rates—from double to treble the present scale—in March, and the rating of members at present age instead of age at entry. Mr. William Amor was elected chairman, and Mr. William Donaghy secretary of the meeting.

The institution is licensed under the Dominion Act, and has about fifty members in this city. Ten years ago it had 140 members here. The steady rise in rates has led to numerous withdrawals. The society has issued 140,000 policies, but the present membership is about 45,000, lapses and claims having pulled down the number, the rates rising accordingly. A Hamilton insurer gives the *Times* this statement of his payments: 1885, $32.40 for $5,000 policy; in 1886, $35.40; in 1887, $45.90; in 1888, $45.90; in 1890, $55.40; in 1895, $62.10; in 1898, it is proposed to increase it to $124.20.

At the meeting the situation was discussed, and various views were expressed. Some wished to wind up the company; some said they would drop out, and a few were for changing the policy. The general feeling was that the Government ought to act in the matter.—Hamilton Times.

—Mr. J. J. Milladge, of the firm of Gibbons & Milladge, grain brokers, has been appointed manager of the Boissevain branch of the Union Bank, and leaves this morning to take charge. Mr. Milladge was accountant of the Boissevain branch when it was started, and afterwards was located at Souris. It is reported that on his return from the east Mr. H. B. Shaw, accountant in the Union Bank, will go to Indian Head as manager of the Union Bank branch in that town. Mr. Shaw is captain of the Winnipeg hockey team, and the Winnipeg football team, and will be greatly missed by both these organizations. —Winnipeg *Free Press.*

—Liverpool has just found it impossible to float a loan for £1,500,000, as the Stock Exchange refused to list it. This is due to sharp practice on the part of the corporation with the brokers when it issued a small loan three years ago.—*Gazette.*

—San Marino, the little republic in the Apennines, has proved that it is up to date by having a bank failure and arresting all the directors for fraud.

TORONTO MARKETS.

February 10th, 1898.

DAIRY PRODUCTS.—In dairy products the offerings have been greatly increased this week, but choice qualities have held their values and are in good demand. The large offerings of creamery, due to the continued dullness of the export trade, have resulted in weakening the local market; for tubs the outside quotation is 18c., while 19½c. is quoted for prints. There is a fairly good local trade in cheese, but the United Kingdom has not improved, and former quotations rule. Receipts of new-laid eggs are increasing, and in country centres they are freely purchased by retailers at 16c., while on the street they are worth 18c. per dozen. Of limed, stocks are light, and dealers quote 14½ to 15c. per dozen.

FLOUR AND FEED.—There is little new in the trade. Values remain about as last reported. The demand is moderately active. Bran and shorts meet with a good active movement.

GRAIN.—Values of wheat have advanced all along the line. Deliveries at present are small, as the country roads are in wretched condition. There yet remains, according to the estimate of a leading authority on the street, 25 to 33 1-3 per cent. in the hands of Ontario farmers. It is not expected that deliveries will increase for some time. The "Corn Trade News" review of the foreign crop situation speaks very favorably of the crops in the United Kingdom. France—Crop prospects good. Russia—Very little fresh news at hand. Argentine—Reports rather irregular and offers scarce. Chili—Offers few. India—A fair crop is expected in Kurrachi districts. Roumania—Crop looks well. Austro-Hungary—Cold weather prevails, and fields bare of snow. Italy—Crop prospects satisfactory. Spain—Prospects good. Belgium and Holland—Generally favorable. In reviewing the situation an interesting comparison is made, showing that the total stock of wheat at six principal ports of America and Europe are now only about half what they were two years ago. On the other hand, the floating supply is much larger than it was in 189/ or 1896. It estimates that the United Kingdom can only rely on a weekly average of 920,000 bushels up to June 25 from the floating supply, and fresh purchases will have to be made to supply the balance of requirements.

GREEN FRUIT.—The trade has had to face unfavorable weather conditions. The changableness in conditions has adversely affected the quality of the fruit. It is a peculiar feature of the fruit business that shoppers must usually see to buy, and the extreme cold has, of course, prevented personal shopping. There is an improvement in lemons. The quality of the stock here at the moment is not as good as it might be, but fruit purchased in New York and Boston will be here before the close of the week. We quote: Oranges—Washington Navels, 96s. 112s, $3.25; 126s, 150s, $3.50; 176s, 200s, $3.25 per box; Bahamas, 150s, 176s, 200s, $2.50 to $2.75 per box; Valencias, 420s, ordinary, $5.50 per box; 420s, large, $7 per box; 714s, large, $7.50 per box; Bitter or Marmalade oranges, $3.50 per box; grape fruit, 96s, 126s, $3.50 to $4 per box. Lemons—New Messina, fancy, 300s, 360s, $3 to $3.25; choice, 300s, 360s, $2.75 to $3; bananas, extra fancy fruit, per bunch, $1.50 to $1.75; apples, $3.50 to $3.75 per bbl.

GROCERIES.—Business this week has not been active, and the movement on the whole is probably not quite so good as that of the previous seven days. In sugars there has been an advance of 1-16c. all round, with the exception of No. 2 granulated, which remains without alteration. The demand for sugars is very little better than it was some weeks ago. Teas find moderate movement. New shipments ex "Ninan," from Colombo, of exceptional value, strong flavory teas, are expected here soon. Japan teas worth about 17 to 18c., are firm. and none too plentiful. There is little that is new in canned goods. Values remain steady at former advanced rates. Beans show exceptional value, but somehow the fact is not appreciated by the public. We quote:

Tomatoes, 3 lbs. (1897)......	per doz.	$1.25
Corn, 2 lbs.......	"	85c.
Peas	"	85c.
Beans	"	85c.
Asparagus	"	2 25
Pine apple, extra standard ..	"	2 00

Strawberries......	"	1 50
Citron, flat tins.....	"	1 00
Peaches, 3 lbs....	"	2 00
" 2 lbs....	"	1 30
Plums, greengages, 2 lbs.	"	1 15
" Lombards, 2 lbs... ..	"	1 00
" Lombards, 3 lbs	"	1 40

PROVISIONS.—There is an easier feeling in dressed hogs During the cold weather country shippers did not make the expected consignments, and it was surmised they were storing the hogs awaiting a change in the situation. It came, but did not take the anticipated turn. The warm weather brought forward such large receipts that packers have had somewhat the better of the market. Sellers are now coming forward with propositions, whereas a week ago buyers were soliciting consignments. Holders are willing to accept packers' prices, which are about as follows: $5.75 to $5.80; for light-weight Western hogs, $6 to $6.10, and "street" hogs $6.10 to $6.20 per cwt. Products are rather more active than is usual at this season of the year. All classes are affected by the improvement. Smoked meats are very active. Long clear bacon is in excellent request, and there are on all hands heard strong opinions as to its value. Packers look for a good trade in the West this season. From now until the close of the packing season in April and May, there will be activity among the winter packers in prepartion for the expected good movement.

SEEDS.—There is little or no change in the market. Merchants are not anxious buyers, as the result of weakness and apparent apathy in foreign markets. Local prices are nominally unchanged. We quote: Alsike clover, $2.50 to $4; red clover, $2 to $4; and timothy, $1 to $1.75, according to quality. In New York, according to the *Journal and Bulletin*, 8th inst.: "There is more jobbing inquiry for clover since the weather improved. Still the moving of stuff is slow and still checks trade. Exporters are indifferent. We quote: Clover at $5.25 to $5.50 for common to fair, and $5.62½ to $5.75 for choice to fancy in car and job lots; No. 1 clover, export, $3.40 per bushel, f.o.b. New York; $2.75 to $3 for fair timothy in car lots, and $3 to $3.25 for high grade. Flax, No. 1, Chicago, c.i.f. New York, $1.20."

WOOL.—Little that is interesting can be said of the local trade. All wools suitable for blanket making purposes are in active demand, while a better class that will meet the needs of knit goods manufacturers are in more active request. The January series of London wool sales closed Feb. 2nd. There have been available during the series 171,000 bales, of which quantity 152,000 bales were sold, 82,000 bales to the home trade, 60,000 bales for the Continent, and 10,000 bales for America, and 19,000 bales, including 8,000 bales which were not offered, are held over for the next series. The opening of the present series was marked by animated all-round competition, except on the part of French operators, and a general advance of five per cent. was established. Lambs' wool was in meagre supply, and realized extreme rates. Crossbreds were largely offered, and fine, well-grown sold well. Lately, irregularity has been noticed in short faulty, with prices in buyers' favor. At the closing fine greasy crossbreds were ½d. to 1d. dearer, while others were unchanged. Slipes ranged from parity with the last series' quotations to ½d. higher. South African, in moderate quantities, met with ready sale, hardening since the opening. Closing: Snow whites ½d.; Western fleece, washed, 1d. to 1½d.; Eastern, ¼d. to ½d., and greasies, ¼d. to ¾d. higher.

MONTREAL MARKETS.

MONTREAL, 9th Feb., 1898.

ASHES.—There is no appreciable alteration in the state of the market. Receipts are at the rate of about 25 barrels a week, and the demand still slow. We quote first quality of pots $3 40 to 3.50; seconds, $3.15 to 3.20; pearls nominal at $4.75 per cental.

CEMENTS AND FIREBRICKS.—Some revival of enquiry for cements is reported from the West, quotations being asked for several lots, including one of 3,000 barrels, the stock being wanted in anticipation of milder weather permitting outdoor work. Locally business is quiet, but prices are firm. In Europe manufacturers of English cement are asking higher prices, some quoting an advance of 15c. a barrel, and Belgian makers quote from 5 to 8c. advance, so that opening prices this spring may be calculated on as being high. Firebricks have been moving out fairly well the past several weeks at $17 to 22.00 per thousand. Some fair orders for spring importations are being booked.

DAIRY PRODUCTS.—The cheese market remains almost discouragingly dull, and no business of any consequence is reported. Holders, however, do not show any great inclination to sacrifice their goods, and quotations are about 8 to 8¼c. for finest grades. In butter there is not much doing beyond a steady local consumptive demand for good grades, and values incline to easiness; for fine creamery 18 to 18½c. is about the figure, fine dairy 15 to 16½c., rolls 14 to 15c. New laid eggs are coming in more freely, and are consequently easier in price at 23 to 24c., limed 13 to 16c., best candled 15 to 16c. per doz.

DRY GOODS.—It may be said that dry goods payments were very fairly met on the fourth of this month. With some of the leading houses the percentage of paper met was not so large as calculated on, but this was due in great measure to several recent important failures, and the proportion of payments is reported better than an average, and ranges generally from 55 to 60 per cent. Orders continue to come in well from outside points, and some North-West and British Columbia buyers have been in the city, making fair selections. The spring millinery openings have been fixed for March 1st, 2nd and 3rd, and it is expected will be largely attended.

FISH.—Although Lent sets in on the 23rd inst., no special demand has yet developed for fish, and prices are without notable change. We quote:—Green cod, No. 1, $3.50 to 3.75; No. 1, large, $4 to 4.25; dry cod, $3.50 to 3.75; No. 1 herrings, $4.25 to 4.75; N. S. salmon, $12 to 13.00; B. C. ditto, $10.50 to 11.00; sea trout, $6 50 to 7.50; haddies, 6 to 7c.; bloaters, $1 to 1.25 per box; boneless cod, 4½ to 5c. per lb.; whitefish, $4.75 to 5.00 per barrel.

FURS.—The heavy snowstorms have interfered with consignments from back country points, and receipts continue light. In prices there is nothing new. We quote:—Mink, large dark, $1.50; small, do., $1.00 to 1.25; marten, $1.75 to 2.25; fisher, $4.50 to 7.00; lynx, $1 00 to 2.00; otter, $1.00 to 12.00 for dark; pale, $5.00 to 7.00; red fox, large, $1.30 to 1.50; small, $1.00; cross fox, $3.00 to 6.00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large. $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7c. to 10c. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

GROCERIES.—The only noteworthy feature of the week is a slight betterment in refined sugars, which were advanced a sixteenth of a cent on Tuesday. Factory prices are now 4 5/16c. per lb. for standard granulated, and 4c. for Austrian refined; yellows, 3 9/16c. to 3¾c. Refiners report a rather improved demand, and the factories are again in operation. The market for raw beet has been making some gain in strength, last cables quoting 9s. 3d. Molasses holds all the firmness lately noted. Teas on spot continue surprisingly dull, and it is thought in some quarters that jobbers are holding back from buying, in the hope of bearing the market, but nearly all the Japans here are in two strong hands, who show no disposition to shade prices. Two more representatives of Japan houses were in town soliciting orders, since last writing, but did not accomplish very much in the way of actual business, it is reported. English advices report Ceylons a little easier, and that teas coming forward show improvement in quality. Cheap blacks are reported to be moving slowly, and China greens inactive. The local rice milling company will resume operations in April or May, when some shipments of paddy are due. Prices at the moment are firm, but it is expected there may be some easing off later in the spring.

HIDES.—Dealers' quotations for No. 1 hides range from 9 to 9½c. per lb. with the quality falling off, owing to the grub coming in. Receipts are also lighter, as the country kill is over. Quebec tanners are not buying hides at all liberally, and there is an accumulation of some few thousand hides in warehouse here, but the company is stiff in its ideas. Chicago is reported very firm at 10c. Calfskins are unchanged at 8 and 6c. per lb.; but some scarcity is predicted by several authorities this spring. Lambskins bring 90c. to $1 each.

HOPS.—The market has continued quiet the past fortnight, and no important business is reported. Good to choice Canadians are quoted at 14 to 16c.; yearlings, about 8c. per pound.

LEATHER.—The market for black leather may be called appreciably stiffer. Western pebble could hardly be bought below 13 to 13½c., and it is a question if anything very desirable could be got in Western splits at 22c. Quebec tanners are asking 20 to 21c. for their splits, and for juniors 18 to 20c. Local buying is not particularly brisk, but tanners and dealers report good enquiry from England for both sole and blacks, the market there having apparently undergone much improvement since the collapse of the engineers' strike. The New York market is reported firmer in sole. We quote:—Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 20 to 21c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; bufted cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 13 to 13½c.: polished buff, 11 to 13c.; glove grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

METALS AND HARDWARE.—The week has been a quiet one both as regards actual business and changes in values, nothing being reported in the latter respect. The efforts to secure orders for American pig iron do not seem to have resulted very successfully. Some moderate business is reported in domestic bars at $1.40, and in plates and galvanized sheets at quotations. We quote:—Summerlee pig iron, $18 to 18.50; Carron, No. 1, $18; No. 3, $17.25; Ayrsome, No. 1, $17.00; No. 3, $16.50; Shotts, $17.25 to 17.50; Carnbroe, $17.00, ex-store; Siemens pig No. 1, none; No. 2 Siemens, none; Ferrona, No. 1, $15.00 to 16.00; Hamilton No. 1, $16.00 to 16.50; No. 2, ditto, $15.50 to 16.00; machinery scrap, $14.00 to 15.00; common ditto, $12.00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do, I.X., $3.90 to 4.00; P. D.Crown, I. C., $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2.90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, etc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1.50; three-sixteenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.60 sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 15¾ to 16c. for L. & F.; Straits, 15¼ to 15½c.; bar tin, 16½ to 17c.; ingot copper, 11¾ to 12¼c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montange spelter, $4.50 to 4.75; American spelter, $4.50; antimony, 8 to 9c.

OILS, PAINTS AND GLASS.—Firmness marks the situation as regards both turpentine and linseed oil; glass is also held stiffly, and it is reported that Belgian and German makers

METALLIC CEILINGS

O e of our Designs

These ceilings are made in a great variety of designs, suitable for every description of buildings, including Hospitals, Churches, Schools, Asylums, Convents, Opera Houses, Offices, Stores, Residences, etc.

The many advantages of their use as a modern substitute for wood and plaster lie in the fact that they are light in weight, will not crack nor drop off, consequently no danger of falling plaster; are unquestionably durable, have air-tight joints, are easily applied, are practically fire-proof, are highly artistic, do not harbor vermin or the germs of disease, and possess splendid acoustic properties, in addition to many other points of excellence over any other form of interior decoration.

—The Kentucky Way.—Colonel Corkright—"I understand that Majah Gore is terribly despondent ovuh his failure in business." Colonel Bludsoe—"Yes, suh; the majah is so worried ovuh his financial troubles that he has been driven from drink."—*Puck*.

THE Hudson's Bay Company's sales of farm lands and town lots for the nine months ended the 31st December last amounted to $141,781, and the cash receipts to $95,963, as against $64,228, and $83,708, respectively, for the corresponding nine months of 1896.

—Customer—"You remember you sold me this coat yesterday? You said you would return the money if it wasn't satisfactory." Clothing Merchant—"But, my dear sir, it was quite satisfactory: I never had better money than that in my life."—*Boston Traveler*.

—"Are you the manager of this store?" 'Yes, sir. What can I do for you?" "I want to enter a complaint." "What's wrong?" "I asked that young woman over there if she had any ear muffs. She said, 'For yourself?' I said 'Yes,' and she told me to go to the third counter south." "Well?" "The third counter, south, sir, is the overshoe counter."—*Chicago Daily Tribune*.

—At the meeting of the Southwestern Loan Company, held in St. Thomas last week, the following directors were elected, viz.: Dr. Gustin, M. A. Gilbert, Dr. Kains, J. Campbell (Erie Mills), P. Couse, J. Marlatt and J. Dodd. A by-law was passed fixing the term of office of directors at one year. At the directors' meeting Dr. Gustin was elected president and M. A. Gilbert vice-president. Mr. W. E. Leonard is manager.

STUDY OF FOREST FIRES.

According to Dr. Bell, who writes recently, in the *Scottish Geographical Magazine*, the forest fires of Canada are generally caused by lightning. In the great forest that stretches between Alaska and the Straits of Belle Isle, the portions recently burned are easily recognized by the tenderer green of the foliage from the parts which have been longer spared. A fire in the woods rushes along with the speed of a galloping horse. The branches and dead leaves on the ground burn like tinder, and the flames rise to nearly 200 feet. Resinous pine woods burn fastest. One of these fires extended 160 miles in ten hours. The traces of such a fire remain for nearly a century. Birds and beasts are stifled or burned. Beavers and muskrats, which are amphibious, have a chance of saving their lives.

After the fire a few trunks of the largest trees are left. Next spring roots begin to sprout and seeds to grow. In fifteen or twenty years the soil, which had been burned over, is covered with poplars, willows, etc , which shelter young firs and other trees. In fifty years the conifers are uppermost, and in 100 the others are dying out beneath the pinewood just as has been stated recently by the Ontario Reforesting Commission. A third of the forest region of Alaska, Dr. Bell says, has trees of 50 years old, another third trees of 50 to 100 years, and the rest trees over 100 years old. The fire seems to suit the Banksian pine, as it opens the pines and sets free the grains. Without fires this species would hardly reproduce itself. Such fires took place even in the Pleistocene epoch of geology.

CARELESS LIFE INSURANCE.

When the public comes to understand that the money it invests in life insurance is an investment, and not a speculation and a gamble, it will proceed with as much caution in this matter as it does in buying a house, a bill of dry goods or groceries. The reckless manner in which persons take up life insurance in doubtful, risky, and even bankrupt concerns is simply amazing. Persons who do this sort of foolish business will watch the grocer's scales to see that they get full weight when they buy a pound of coffee or sugar; but at the same time will permit some smooth-tongued agent to beguile them into taking out a life-insurance policy which does not insure.—"*The Hermit*," *in Leslie's Weekly.*

THE POWER OF THE FRATERNAL SOCIETIES.

Members of the fraternal beneficiary orders were in evidence at the last election in Massachusetts. A member of the last legislature who has been for twenty years an agent of old-line insurance companies, barely saved his seat this year by four votes, and has since been told by a member of a fraternal order that it was his occupation that so nearly caused his defeat. In another case where a Democrat was elected in a Republican district he, too, has been told his success was due to the fact that his opponent was an insurance man. The fate of the Massachusetts Benefit and the Bay State Beneficiary has led the members of the fraternal orders to prepare for adverse legislation, and to look out that their friends were elected to the legislature. The membership of the insurance committee certainly looks as if the speaker had been used for the advantage of the fraternals. The House is honey-combed with members of fraternal beneficiary associations. The singular votes of some members have been explained by their resolution to stand by each other.—*N. Y. Evening Post.*

THE INCREASE IN COMPANIES.

In the preface to the latest edition of his valuable "Stock Exchange Year Book," that for 1898, Mr. Thomas Skinner comments on the remarkable fact that, "whether prices tend upwards or downwards, whether the bank rate rises or not, whether foreign politics are perturbed or otherwise, the great modern work of forming joint-stock companies goes on at an ever-increasing rate. In 1896 the registered capital of new companies was in excess of the very large total of 1895, and so far as the figures are available for 1897 the number of companies formed exceeds that of any previous year." The official record of joint-stock companies registered under the Acts of the United Kingdom for the ten years up to and inclusive of 1896, was as follows:—

	No. of Companies Registered.	Authorized Capital.
1896	4,735	£309,532,947
1895	3,892	231,368,077
1894	2,970	118,431,570
1893	2,617	96,654,161
1892	2,607	103,403,331
1891	2,686	134,261,673
1890	2,789	238,759,472
1889	2,788	241,277,468
1888	2,550	353,781,594
1887	2,050	170,172,674

The total number of companies actually existing, and the total amount of capital paid up thereon, were at the respective dates as follows:

	No. of Companies Existing.	Total amount of paid-up capital.
April, 1897	23,728	£1,285,042,021
" 1896	21,223	1,145,402,993
" 1895	19,430	1,062,733,821
" 1894	18,361	1,035,029,835

A REMARKABLE CIRCULAR.

In our editorial columns will be found an article on the Mutual Reserve Fund Life Association. Since that article was written we have been called upon by a gentleman who took out a policy with the association in 1885. He tells us that the rate of premium he then paid was $30 per year per $1,000 at age 55; in 1896 and 1897 he had to pay $90, but now he is asked to pay $150, and he naturally demurs. The circular he has received from the company is as follows:

Mutual Reserve Fund Life Association,
305 Broadway, N.Y., 1st Feb., 1898.

To Members, Fifteen-Year Class, Mutual Reserve Fund Life Association:

The call herewith issued is to meet your proportionate share of the mortality of the entire association, and is determined in accordance with the terms of your contract and in virtue of the power reserved to, and duty resting upon the association.

The cost of life insurance is necessarily an increasing cost, since increasing age carries increasing liability to death; but the payments by which that cost is to be met may be upon either a level basis or one following the natural increase of cost. In the former case, there must be very considerable accumulation in the earlier years, which will be employed to meet the excess of cost in later years, thus maintaining uniformity of payment. This method was not in use in this association at the time your contract was issued.

The only legitimate modification of the increasing rate of payment presented by the alternate method, under which the association operated exclusively at the time when the Fifteen-Year Certificates were issued, is through the application of any specially provided accumulation or by savings in death cost.

The amount provided in the earlier years of this class in the way of accumulation has been employed, under direction of its membership, in maintaining rates below the contract basis, and so much below those of current age as to allow no margin of accumulation in the later years, but instead to require the gradual absorption of the earlier accumulations, until all available sums have been so employed, and now this class must depend to pay its proportionate share of the mortality of the association upon the current payments of its members, which must be made large enough to cover that share. There exists no other source from which to meet it.

The members of the fifteen-year class have had the following in return for their payments:

1. Insurance at the actual cost required to pay their share of the mortality based on the experience of the entire association, which has been much less than the mortality in their said class.
2. The entire benefit of their own overpayments:
3. Credit for their full proportionate share of the receipts from interest and other sources.
4. The application, as they have matured, of their bonds at face value in payment of future dues and assessments.

In the future, as in the past, a member of this class will be charged on account of current death cost, only the same amount as every other member who is of the same age and on whose life the association carries the same risk.

In the future, as in the past, the members of this class will enjoy the full benefit of all payments over cost, if any, that they may make.

In the future, as in the past, not one dollar of their payments over and above the current cost of insurance, calculated on the same basis for all members of the association, will be diverted to make good any deficiencies in the payments of other classes of members.

In the future, as in the past, they will be required to meet their share of the current cost in accordance with the terms of their contracts, as the members of the other classes are and will be required to meet their share.

It is the duty of the management to require full payment from every member for benefits enjoyed. It is the only way in which the duty of the management can be fulfilled, and all of its outstanding contracts, exceeding $300,000,000, be kept absolutely secure. It is upon the basis of duty to every member, and the basis of the principles upon which alone sound and permanent insurance can be given, that the re-apportionment which goes into effect with this call is made.

Geo. D. Eldridge,
Actuary.

—Mr. James Robertson, president of the Toronto Rubber Co., addressed the Cornwall Town Council on Jan. 27th, in connection with the proposal to remove their factory from Port Dalhousie. He explained that their reason for removal was the need of a larger site. Over 200 hands are at present employed, and are paid over $1,500 per week. The company had a capital stock of $100,000, of which $92,000 were paid up. They want a site of four acres, a 400 or 500 horse-power and a bonus. Thirty per cent. of the employees are females. Sherbrooke and Hull, P.Q., are anxious to secure the factory. Nothing definite was done, but it is understood that the Town Council will offer a site and water power equipped, and in working condition there.

—The Androscoggin cotton mills, Lewiston, have shut down in all departments for an indefinite period, owing to the strike of a portion of the operatives against a reduction in wages. A number of the cotton mills of New England remain closed. and there is no sign of a calling off of the strike. A 10 per cent. cut was made in the Lawrence and Forestdale, L.I., mills last week, and the workers submitted in order to be able to help the other strikers financially.

50 YEARS The Year 1897 was the SEMI-CENTENNIAL

A Handsome Catalogue

"The Steele, Briggs Seed Co., Limited, have issued their annual catalogue in the shape of a very handsome volume of over 100 pages. The covers are beautiful, front and back, both bearing exquisite floral designs. The front page contains pictures of sweet peas and of the new pink Roamer rose, while the back has two magnificent pictures of two new giant orchid flowering, Italian cannas, the Italia and the Austria. The contents of the volume are as interesting and as up-to-date as usual, and contain some tempting offers"—Toronto Globe, Feb'y 9, 1898.

DECISIONS IN COMMERCIAL LAW.

ALLEN v. FLOOD.—Judgment was given by the House of Lords on Dec. 14th in this important case which involves the relations of employers and employees. Flood and Taylor were employed by the Glengall Iron Company to do woodwork on a ship. They had previously, as non-union men, aroused the antipathy of the iron workers, who, through one Allen, an official of the union, secured their dismissal. There was no breach of contract as Flood and Taylor were employed by the day. Allen's motive, it was alleged, was one of spite, since the dismissed workmen were at the time not competing with members of the union, since working on another part of the ship. An action was brought against Allen. The case finally found its way to the House of Lords, where it was held:

"There is a class of cases which have sometimes been referred to as evidencing that a bad motive may be an element in the composition of civil wrong; but in these cases the wrong must have its root in an act which the law generally regards as illegal, but excuses its perpetration in certain exceptional circumstances from considerations of public policy These are well known as cases of privilege, in which the protection which the law gives to an individual who is within the scope of these considerations consists in this, that he may with immunity commit an act which is a legal wrong, as but for his privileges would afford a good cause for action against him; all that is required in order to raise the privilege and entitle him to protection being that he shall act honestly in the discharge of some duty which the law recognizes, and shall not be prompted by a desire to injure the person who is affected by his act. Accordingly, in a suit brought by that person, it is necessary for him to prove an intent to injure in order to destroy the privilege of the defendant. But none of these cases tend to establish that an act which does not amount to a legal wrong, and therefore needs no protection, can have privilege attached to it, and still less, that an act in itself lawful is converted into a legal wrong if it was done from a bad motive." Lord Bowen (at that time Lord Justice Bowen), in the case of "Mogul Steamship Company *v.* McGregor," laid it down that in order to constitute legal malice, the act done must, apart from bad motive, amount to a violation of law. "The root of the principle is that, in any legal question, malice depends not upon evil motive which influenced the mind of the actor, but upon the illegal character of the act which he contemplated and committed."

AMERICAN WAREHOUSEMEN'S ASSOCIATION v. ILLINOIS CENTRAL RAILWAY.—As the "free storage case," this cause before the Interstate Commerce Commission has been followed with interest, both in the United States and Canada. The decision rendered last week holds that, with no general duty to act as warehouseman for indefinite periods in connection with its primary obligations as a common carrier, a railroad cannot assume to provide shippers with valuable warehouse facilities which are not essential to its business as a carrier, without furnishing them for all shippers at all times, and upon the same terms, and notifying the public. The decision is of course directed against a practice which has in the past resulted in discriminations, and might lead to serious evils.

Mercantile Summary.

THE county of Simcoe offers four per cent. debentures to the extent of $50,000. They are repayable in twenty years.

THE *Progres de l'Est* has been given the following estimate of the population of Sherbrooke: French, 6,552; Irish, 532; English, Scotch, and others, 3,292; total, 10,376.

A CONTRACT for building what is known as the Midland Railway of Nova Scotia has been awarded to William G. Ried, with whom Fitzpatrick Bros. will be associated. The road is to be completed by July, 1899. Its length, from Windsor to Truro, will be 60 miles, and it is to be equipped by the date named.

ONTARIO letters patent have been issued incorporating the following companies: The Dundalk Woolen Mills Company, Limited; capital $20,000, in $25 shares; the Essex Basket Company, Limited; capital $25,000, in $25 shares; the Windsor Brewing Company, Limited; capital $20,000, in $25 shares.

WILLIAM FITZRANDOLPH, of Lawrencetown, brought to Halifax last week about 700 raw furs, consisting principally of fox, minks, marten, wild cats, otter, raccoons and musk rats. The *Chronicle* says they were purchased for a Truro firm for $400. Mr. Fitzrandolph has already disposed of about $3,000 worth of raw furs this season.

ON Monday last there was a meeting of those interested in the defunct Midland Trust Company of Port Hope, among whom were many ladies. The decision was reached that there should be a meeting of the depositors. Therefore the depositors are notified to meet in Port Hope to morrow afternoon, 19th February.

WHAT is known among the boys on the road as "A Circus" is expected to take place at the approaching meeting of the Commercial Travelers' Mutual Benefit Association, to-morrow night, at Shaftesbury Hall, at 8 p.m. What are described as matters of vital interest to the welfare of the association will come up for discussion on that occasion.

"HERE's to Captain Kidd, as he sailed, as he sailed." It appears that the seekers for Captain Kidd's buried treasure in Mahone Bay, N.S., are not discouraged yet. The Oak Island diggers are sinking a new shaft. This makes eight pits and no treasure yet. Other people digging for Kidd's treasures in other places have been equally unsuccessful, but less persevering.

THE Annapolis Valley has a telephone company, which supplies 450 instruments to its patrons. The annual meeting of the Valley Telephone Company was held last week at Middleton, N.S., C. R. H. Starr in the chair. It appeared from the report that during the year ninety-four new instruments were put in, making a total of 450. A dividend of seven per cent. was declared. A. W. Savary, H. McLean, S. W. W. Pickup, W. H. Weatherspoon, C. R. H. Starr, Dr. J. A. Sponagle, A. E. Calkin, A. J. Morrison, and A. B. Gates were re-elected directors.

—MESSRS. E. GOFF PENNY, Robert Archer, Wm. Strachan, Wm. Currie, and Robt. Law, give notice in the Quebec Official Gazette that they will apply for incorporation as the Jacques Cartier Pulp and Paper Company, with a capital stock of $50,000. Messrs. Wm. Currie, F. P. Currie, M. S. Foley, J. T. Shearer, Robert Law, the Hon. Judge Alderic Ouimet, John Livingstone, and W. G. Reid, will also ask for incorporation under the name of the Dufferin Falls Lumber Pulp and Paper Co., Limited, of Montreal, with a capital stock of $300,000.

Mercantile Summary.

THE Lake of the Woods Milling Company shipped a carload of flour through to Wrangel last week.

THE Merchants' Bank of Halifax is to open another branch in British Columbia. This one will be at Nanaimo. Mr. W. A. Spencer is to be manager.

THE new brick building of the Moseley Shoe Leather Co. at St. Henri, Montreal, is to be opened shortly. The company has been granted a bonus of $20,000 by the municipality.

TENDERS were received from H. O'Hara & Co., E. A. Stimson and other Toronto parties for $5,000 debentures of the town of Berlin, at 4½ per cent. W. H. Brouse secured the issue.

THE Ontario rolling mills was partially destroyed by fire on Sunday night in Hamilton. Loss about $35,000; partly covered by insurance. Over 200 persons are thrown out of employment.

LETTERS patent of incorporation have been granted to the St. Lawrence Anchor Fence Company, Limited, of Montreal, capital $20,000; and also to the Star Iron Company, of Beauharnois, Que., capital $60,000.

ILL-HEALTH has compelled J. W. McCabe, grocer in Stratford, to retire from business. He had only bought out T. J. Doak a few months ago. Now he sells out to G. B. Wray, who removes thither from Bowmanville.

THE rate payers of Sydney have unanimously ratified an offer made by the Town Council, of $50,000 and exemption from taxation, to Fraser and Graham, of New Glasgow, to assist them in establishing pig iron works within the town.

MAISONNEUVE, an eastern suburb of Montreal, has voted the $10,000 bonuses to Messrs. A. Daniel & Co., and G. Larin. Each of these firms will erect and operate a boot and shoe factory in the town, and will pay $20,000 yearly in wages. The factories are to be erected by the first of May next.

THE manager of the British Columbia Sugar Refinery at Vancouver, was convicted by Magistrate Macrae of carrying on a business as a wholesale trader without taking out a license. A fine of $25 was imposed, and the company was ordered to pay $50 for a license for six months. The company will appeal.

FROM St. John, N.B., is reported the failure of B. Gandy, a jobber in salt, and general commission merchant, who has been long in trade in a moderate way. Liabilities are about $5,000.

THE Three Rivers Iron Works are just completing the addition of a large brick machine shop and foundry to their buildings. The firm has large contracts on hand, which will give full work for months.

THE suspension is announced of Taylor & Co., dry goods merchants, Kingston, Ont. Mrs. Ida L. Taylor, wife of A. D. Taylor, has been the legal owner of the business of late years, owing to previous troubles of her husband. The liabilities are not yet known.

SEVERAL further failures are reported from Ottawa. L. T. Rochon, grocer, doing business in his wife's name, as Rochon & Co., is asking creditors to accept 50 cents, on liabilities of $3,054.——G. M. Walker's previous experience as a dry goods clerk does not seem to have stood him in good stead in the boot and shoe business he started about a year ago, as he has already assigned.——L. H. Nolin, dry goods, doing business under cover of the name of his sister, Amelia Nolin, has made assignment of his estate. He has been trying to sell out for the past few months.

A SOMEWHAT important failure just reported in the manufacturing confectionery trade, is that of Tester & Co., Montreal. Mr. Tester retired from the business some years ago with a fair competence, selling out to Thomas Montgomery, who associated with himself J. McBride. The latter was a wholesale fruit merchant, and contributed $20,000 of special capital. The business was continued under the above style, with fair results for a time, but for the last two or three years collections have been hard, and failures frequent, and the firm have shown signs of financial distress for some time past, culminating in a demand of assignment being served on them last Saturday. The liabilities are not yet ascertained.

THE annual meeting of La Chambre de Commerce of Montreal has just been held. Mr. Joseph Contant, the retiring president, took the chair. The annual report being laid on the table, its adoption was moved by Mr. J. X. Perrault, seconded by Mr. Leclerc. The report was adopted unanimously. The new president, Hon. Mr. Desjardins, taking the chair, delivered his address, in the course of which he briefly reviewed the commercial questions of the day which in any way affected Montreal. He deprecated the delay in the harbor improvements, which, he said, was the duty of the Government to plan and carry out. The new officers and council are as follows: Hon. Alphonse Desjardins, president; Mr. L. E. Geoffrion, first vice-president; Mr. D. Masson, second vice-president; Mr. Ubalde Garand, treasurer; Mr. S. Cote, secretary. Council—Alphonse Racine, H. Laporte, Hon. J. D. Rolland, G. Boivin, D. Parizeau, O. Faucher, J. X. Perrault, Robert Bickerdike, M.P.P.; L. J. A. Surveyor, Arthur Gagnon, Hon. L. J. Forget, H. A. A. Brault, L. E. Morin, sr., C. P. Chagnon, Joseph Haynes, C. H. Catelli, L. E. Beauchamp, P. E. Paquette, J. E. Savignac and Armand Lalonde.

Mercantile Summary.

In Quebec city Mrs. Latulippe, and Mamie Brownrigg, doing a millinery business, as Brownrigg & Co., since March, 1897, have assigned, and A. L. G. Dugal, hatter, offers 30 cents.

The general store firm of Crawford & McMillan at Sandon, B.C., have assigned. The immediate cause of this was a suit started by two creditors a few weeks ago. At the first of this year the statement of the firm showed a surplus over $10,000.

We note two fresh failures in Halifax, N.S. Henry Hechler arrived from Germany some 20 years ago, and established himself in a tobacco and fancy goods business, in which he was fairly successful. He lately has become involved through a trusteeship for a brother-in-law, and has had to assign, owing about $6,000.——G. Hershfield, a pork packer and dealer, of many years' standing, has also become embarrassed, and has assigned, making preferences of $7,000. The total of his liabilities is not yet ascertained.

A meeting of the St. Thomas Street Railway Company was held last Friday night, when a by-law was passed authorizing the issue of $50,000 stock, while contracts were let for electrical equipment to the Canadian General Electric Co., and for eight cars to the Ottawa Car Co. These will cost $31,400. The company has now closed contracts for rails, ties, trolley poles, cars, engines and electrical equipment, at an aggregate of $50,400, and tenders are now invited for wiring and special work to the amount of $12,000.

In Eastern Ontario there have been the following failures, of minor import, reported recently. J. W. Brennan, Cornwall, dealing in shoes and liquors, a somewhat unusual combination, has assigned.——J. A. Fairman, quite recently established as a confectioner at Pembroke, has also assigned.——A meeting of the creditors of C. B. Miner, tinsmith, etc., at Cobden, was lately held at Smith's Falls, when he submitted an offer of 50 cents, on liabilities of about $6,000. Nominal assets were shown of about $4,000.——Thos. Wilson, jun., who succeeded in 1884 to the custom shoe business of his father, in Lanark, has found it necessary to assign.——Jane McDonald, milliner, Arnprior, who lately became Mrs. Craik, has assigned to the sheriff, and shows liabilities of $700.

The liabilities of Mrs. J. Moisan, of Drummondville, Que., amount to the large sum of $13,000. She has been continuing the general store business of her late husband, and approached creditors a few days ago with an offer of 35 cents on the dollar, which apparently has not been favorably received, for a demand of assignment has been served on her.——C. Henault, for some years doing a small general business at St. Barthelemi, has assigned, owing $3,500.——M. Echenberg, jr., dry goods, St. Hyacinthe, whose insolvency we lately noted, has effected a compromise at 30 cents, of which 20 cents is payable in cash, and 10 cents on time, secured.——A voluntary assignment has been made by S. P. Leger, general dealer, of Portage la Nation, in the Ottawa district. He had formerly been a shantyman and farmer in a small way, and began about two years ago without experience.

Debentures for Sale.

Sealed Tenders will be received for the purchase of **$50,000 Debentures of the County of Simcoe,** until the 25th February inst., at 10 o'clock a.m., when same will be opened and considered.

These debentures are dated 15th February, 1898, bear interest at 4 per cent., payable half-yearly and are repayable in 20 equal annual payments, principal and interest combined, at the Bank of Toronto, Barrie, They are issued by authority of Special Act of Ontario Legislature passed last session, and a by-law of the county.

The assessment of the county is $20 000,000, and the only outstanding debenture debt is $11,000, due 1st January, 1899.

Parties tendering will state the actual amount cash offered for the whole or any one or more of these debentures, and not the rate on the dollar.

Tenders are to be sealed and addressed to "The Treasurer, County of Simcoe, Barrie,' and marked outside, "Tender for Debentures."

The highest or any tender not necessarily accepted

THOMAS DEAVITT, Warden.
ARTHUR CRAIG, Co. Treasurer.
Barrie, 14th February, 1898.

Mercantile Summary.

AMONG the enterprises of Winnipeg is now the Canadian Produce and Packing Company. It intends to carry on a pork packing and beef killing factory, and deal in produce of all kinds, and will put up large buildings. The members of the company are Messrs. J. T. H. McEwen, banker; Jas. Stuart, J. Lizzard, Jos. Carman, and J. S. Carveth.

A FEW weeks ago the general store firm of Wright & Co., at Minnedosa, Man., offered creditors 40 cents in the dollar. This was declined. Since then an arrangement has been made whereby they are to receive 50 per cent., payable in one year, with six per cent. interest.——An assignment has been made by Cornell, Spera & Co., Winnipeg, dealer in men's furnishings, who have been in business there for fifteen years. At one time they did quite a large trade, but have been losing ground lately. Last month they mortgaged their stock for $10,000.

IN July, 1895, W. Graydon became tired of life as a clerk in Toronto, and went to Mono Road, where he purchased the general stock of J. W. Shields for $3,000 cash. About eighteen months later he opened a branch store at Grand Valley. This was evidently a mistake, for we now hear of his assignment.——Another assignment is that of McKellar & Co., grocers at Strathroy. About a year ago they purchased, with the assistance of friends, a small stock. ——Sixty per cent. is offered to the creditors of Hamilton Smellie, dealer in dry goods, shoes, etc., Hepworth. Slow collections is assigned as the cause of embarrassment.

A COMPROMISE has been arranged with the creditors of Mrs. B. A. Kelley, milliner, Chatham, at 20 per cent., on liabilities of $2,800.——Another offer of compromise is that made by M. Crawford, grocer at Walkerton, who asks his creditors to accept 65 per cent. of their claims. He has always been well reputed as doing a nice trade, and this seems something of a surprise.——In 1888 J. W. Burriss opened a dry goods store in Chatham, and soon did a large trade, entirely too large for his somewhat limited means. A year ago his statement showed a surplus over $5,000. Lately his customers have been dropping off, and now he makes an assignment.

THE firm of Mayhew Bros., general storekeepers at Thamesville, is composed of four sons of F. J. Mayhew, of the firm of Mayhew & Harmer, whom they succeeded in the autumn of 1895. The purchase amounting to $15,000. The sum of $2,000 was loaned to them by their father, which they paid on account. As they had no capital, it will not be surprising to hear of their assignment now, with liabilities of $18,000, and nominal assets of $15,000.——John A. Macdonald succeeded Wm. Lesslie as a general storekeeper at Puslinch in January, 1895. Since that date he has barely made a living. Recently some claims against him were placed in suit for collection, and this has resulted in an assignment.——In August, 1892, John Cloy, a Thorold grocer, assigned. The stock was then purchased by his son, George D. Cloy, at 50 per cent. discount. Although he had the assistance of his father, George would seem to have had no better success, and now assigns.

AGENCIES WANTED

A man with good references and security wants agencies for Fire and Life Insurance Companies, also Loan Companies, Rat Portage District. Address

NOTICE TO SHAREHOLDERS

The Seventeenth Annual Meeting of the Shareholders of this Company for the election of Directors and the transaction of business generally will be held on Wednesday, the 6th day of April next, at the principal office of the Company, at Montreal, at 12 o'clock noon.

The common stock transfer books will close in London at 3 p.m. on Friday, February 25th, and in Montreal and New York on Tuesday, March 8th. The Preference Stock Books will close at 3 p.m. on Tuesday, March 8th.

All books will be re-opened on Thursday, April 7th.

By order of the Board.

CHARLES DRINKWATER,
Secretary.
Montreal, Feb'y 14th, 1898.

Canadian Pacific Railway Co'y.

Dividends for the half-year ended December 31st, 1897, have been declared as follows:
On the Preference Stock 2 per cent.
On the Common Stock 2½ per cent.

Warrants for the Common Stock Dividend will be mailed on or about April 1st, to shareholders of record at the closing of the books in New York and London respectively.

The Preference Stock Dividend will be paid on Friday, April 1st, to shareholders of record at the closing of the books at the Company's London office, 1 Queen Victoria Street, London, E.C.

The Common Stock Transfer Books will close in London at 3 p.m. on Friday, Feb'y 25th, and in Montreal and New York on Tuesday, March 8th. The Preference Stock Books will close at 3 p.m. on Tuesday, March 8th.

All books will be re-opened on Thursday, 7th April. By order of the Board.

CHARLES DRINKWATER,
Secretary.
Montreal, Feb'y 14th, 1898.

We learn from Quebec that on Tuesday last the bankrupt stock of the Adams Shoe Company was sold by auction. It was valued at $7,773, and was bought by Mr. Gaspard Rochette at 76¾ cents. The machinery, valued at $7,672, went at 32½ cents to Mr. McKean, of Montreal. The latter gentleman intends shortly to re-open this factory.

A meeting of the creditors of the Toronto Granite Company, Limited, marble manufacturers, will be held next week. The company was incorporated in 1891 with a capital of $45,000. Of this sum $13,000 was paid in stock, etc. Bad management is said to be the cause of their trouble, and an assignment has been made to A. E. Osler. No statement is yet prepared, but the liabilities are expected to reach about $25,000.

The Winnipeg *Free Press* of last Monday, says that the A. R. & C. Co. has made a sale of some more of the rails and rolling stock of the old Dunmore narrow gauge line. The stock disposed of consists of eighty miles of rail and fastenings, 100 cars, four cabooses and four engines. The material, we understand, is to be on the Teslin Lake road, and the machine shops at Lethbridge are working to their utmost capacity, getting it in readiness to ship.

Although having reached the great age of 82, (a man's friends can hardly wish or expect him to live much longer), there are many who will learn with sincere regret that Charles Davidson, of Guelph, has passed away, at more than four score years. Mr. Davidson had made the name of the Wellington Mutual Fire Insurance Company a household word in the district in which it did underwriting. He was a good citizen, a conscientious official, a faithful friend.

An arrangement hes been made with the creditors of J. B. Oke & Co., wholesale dealers in produce at Port Hope, at the rate of 40 per cent. on liabilities of $27,000. They have nominal assets of $10,000. When the Midland Trust Company suspended a few weeks ago, the firm owed it about $17,000 for advances.——M. Quinn, dealer in men's furnishing goods in Toronto, also owner of the Dominion Neckwear Company, has called a meeting of his creditors for to-day. No statement has been prepared, but the estate will show considerable deficiency.

EDITOR WANTED

For a weekly publication. Must be well versed in financial and insurance topics. Permanent position for the right man. Communications treated confidentially if desired. Address

	$8,240 39

TERMS—One-third cash; marked cheque for ten per cent. to accompany tender, and balance in two and four months, with seven per cent. interest, secured to the satisfaction of the undersigned.

Stock and inventory may be seen at 30 Colborne Street, Toronto. No tender necessarily accepted.

E. R. C. CLARKSON, Assignee

A decided sensation was occasioned in mining circles of British Columbia, when it became known on Monday last that an offer had been made by Mackenzie and Mann, the Stikine River railway contractors, to W. A. Carlyle, the British Columbia provincial mineralogist. They offered him $25,000 a year to go to Yukon as mining manager in their behalf. But Mr. Carlyle considered himself bound by an understanding with the British-American corporation, of which C. H. Mackintosh is president and director, and so declined the tempting offer.

Commenting upon the Farmers' Loan and Savings Company failure, the Montreal *Gazette* says: "Though it had a Cabinet minister as president, and a somewhat distinguished board of directors, it seems to have been mismanaged from the first. Its was another case of directors who did not direct, and who, in consequence, besides losing heavily themselves, have involved others in their misfortune. It is becoming an ordinary practice in Canada to get public men as presidents of financial corporations. The investing public would do well to remember that where a public man has not the business experience, the time, and the inclination to fulfil the duties of such a position, his name is worth nothing."

RICHELIEU AND ONTARIO NAVIGATION COMPANY.

On Monday, February 7th, the annual meeting of this company was held in Montreal, Hon. L. J. Forget, the president, in the chair.

The president touched upon the directors' annual report, which showed that the gross receipts were $688,026.09; operating expenses, $552,950.94; fixed charges, $26,945.09; net profit, $108,130.06.

The earnings show a gratifying increase over the previous year, both in the gross and net results. A sale of $150,000 of stock was made at par on 2nd November last. As a result of this sale, and the general operations for the year, the statement shows $15,280.17 cash on hand, as against a floating debt of $188,989.34 on 31st December, 1896. The company has contracted with the Bertram Engine Works Company, limited, of Toronto, for a new modern first-class passenger steamer, 277 feet in length, to be ready for the ensuing season, and at the same time made arrangements for the necessary capital for her construction by the sale of 2,400 shares of stock at par.

It is the intention to build another steamer of similar class for the same route, to be ready for the season of 1899.

Messrs. L. Armstrong and A. D. Porcheron were appointed scrutineers for the election of directors, the old board being re-elected, viz.: Hon. L. J. Forget, Messrs. Wm. Wainwright, F. C. Henshaw, Hector Mackenzie, E. B. Garneau, C. O. Paradis, James Swift, Joseph Lewis, R. Forget, William Hanson, J. K. Osborne. Hon. Mr. Forget was re-elected president, and Mr. Wainwright, vice-president.

The assets are shown to be $2,324,082.10, composed of steamers, real estate, buildings, wharves, etc., $2,165,709.69; coal, stores, provisions, etc., $82,306.82; accounts receivable, $60,785.42; cash in bank, $15,280.17.

As against these there are liabilities consisting of $1,500,000 capital stock; $523,166 of bonds; accounts payable, $68,143; and some small items, leaving a surplus of $223,059. The net income over and above fixed charges, expenses and interest, was $108,130 for 1897. There was paid a dividend of $81,000 (six per cent.), and the sum of $27,130 was carried to surplus.

Debentures.

Municipal Debentures **bought and sold,** also Government and Railway Bonds. Securities suitable for Investment by Trustees and Insurance Companies and for Deposit with the Government, always on hand.

GEO. A. STIMSON & CO.,
24-26 King St. West, Toronto, Ont.

Cents BURN EASILY

as dollar bills when you buy good coal, make steam, and then blow it out of unprotected outlets. You save every drop of waste oil. Why don't you save steam, too?

The "Heintz" Steam Trap

saves every ounce of steam. Is quick acting and positive. Works on mechanical principles—not on faith or theory.

The smallest size discharges one gallon of water per minute; the largest 210 gallons per minute, and not a puff of steam lost.

Saves its cost every month.

Managing Director The Wm. Davies Co.
Director Canadian Bank of Commerce.

The Toronto Globe, in referring to the first three months' business of the Company, said:

"It was generally known by those in the business that this new aspirant had secured a fair share of the new insurances taken out in the last three months, but it will be a surprise to nearly all to hear that the applications received amounted to over one million and a quarter of dollars, of which more than one million were approved and policies issued. This phenomenal record—for such it really is for a new company—compares favorably with the business of the older and progressive life insurance companies of the Dominion, and considered in the light of the character of the business, gauged by the large average amounts of premiums and policies, it is quite safe to say that the record is unparalleled in our country."

ORONTO, FRIDAY, FEBRUARY 18, 1898.

THE SITUATION.

Senator Scott has announced, on behalf of the Government of which he is a member, that after the 1st August next, tariff preference will be confined to the British Empire, and that the amount of the preference will be 25 per cent. That all the colonies will be included in the circle of preference, he seemed not to be quite certain. What will be the position of India in this programme? Will her cotton manufactures, which are denied the incidental protection of any revenue duty, be included? A preference within the British Empire, it is presumed, will not offend against the most favored nation clause of the British treaties, a colony not being a nation. Will the effect of this preference on Canada be the same as a renunciation of the most favored nation provision, or will Canada be entitled to the benefit of the clause as a colony of one of the contracting nations? Or is she to be considered as having, in the exercise of legislative option, contracted herself out of the clause? Can she receive where she does not give? When the Canadian Premier spoke of preference as a free gift offered by Canada to Great Britain, he must have been well aware that no equivalent for our action can now be got; that we have, in fact, long been in possession of the equivalent, in the free admittance of our produce in the British market. In Great Britain there is no large body of people seeking for duties on agricultural produce or manufactures; there is no considerable party willing to accept such duties; no government could get them accepted if it tried. There is no ground for the objection that the preference proposed is one-sided; it is the redress of a balance which had nearly all the weight in one scale.

The wisdom of a policy of preference must be determined by the result of its working. From a broad point of view, it is not entirely without objection. It is only by regarding the British Empire as an unit that this policy does not clash with that which England is chivalrously pursuing in regard to China: equal conditions of trade for all nations. If Canada were a country apart, and not a part of the British Empire, preference would place her on the lower commercial level of France, with her double tariff. If colonial preference become general within the British Empire, other nations would naturally object to further acquisitions of territory by Great Britain, though they might not, as they do not in the case of France, openly protest, unless, as in the instance of Madagascar, promises were violated and treaties pushed aside.

To the new phase of preference no serious objection is likely to be made in Parliament, seeing that it brings exactly what the political party in Opposition has been calling for. Doubtless it will be contended that an equivalent ought to be got, and protection will find a new opportunity to protest. But equivalents are not now to be looked for, and the preference proposed is only what Parliament has already agreed to. Instead of having all the great manufacturing nations for competitors, the competition will be chiefly confined to one, and with that the contest will be softened by a good round revenue duty.

To reach the starting point of the Klondyke railway, we shall have to make use of the Stikine River as far as Fort Wrangel. The river is American up to the boundary line, which is unsettled; but British subjects have a right to navigate it, under the treaty of St. Petersburg. British vessels navigating the river will be liable to the customs regulations of the United States. Our right of navigation of the Stikine is precisely the same as that which we have in the Yukon; and if the American Government can order our vessels to be boarded at a distance of four leagues from the coast to demand the manifest and enforce the customs laws of the United States near the mouth of the Yukon, it can do so at the approach of the Stikine. If it can designate the place, and make it exclusive, at which transhipment to or from river boats shall be permitted, in the one case, as it has assumed to do, it can do so in the other. We do not suppose that the exercise of our right to navigate the Stikine will be hampered by needless vexations; but we shall not be as free from obstruction on the Fort Wrangel route as we should be on an all Canadian route. Four other routes were all rejected by the Government because they ran, in part, through American territory; and as the one chosen has that defect at present, it follows that a further extension to a British Columbia port forms part of the plan, so far as there is a plan, for the future of the Government. That such extension entered into the calculation is further proved by the preference reserved for the present contractors, if the extension be made within a given time.

From the first, we stated that in the Klondyke railway deal there is a large speculative element. Just now there is, in some quarters, a disposition to exaggerate this feature. It has been given the name of a huge gamble. On the supposition that the transaction belongs to the order of gambling, which is often prohibited, there are two parties to the risk; and, if the transaction be objectionable from its uncertain character, neither party to it can claim a moral advantage over the other. If the deal were really as uncertain in its results as has been described, the question might fairly be raised whether the Government ought to have entered into it. There are many reasons why, in that case, it would have been better to provide the necessary facilities in some other way. But the risk is not so perilous as has been described, if it were, the mere statement of the fact would damn the enterprise, and prevent the contractors raising the money necessary to do the work. It so happens that nobody believes the appalling criticisms that have been made in Parliament on the extreme gambling character of the enterprise. They are made impossible by the reports of the Government's own explorers and geologists; by the experience and success of miners; by the enormous extent of the gold-bearing territory.

Secretary Gage of the United States Treasury interprets the American navigation laws in a way that makes impossible the carrying of American goods from an American port, say Seattle to Victoria and then transfer them to a British vessel for the purpose of having them carried to another American port, be it Dyea, Fort Wrangel, St. Michaels, or any other. The Treasury Department rules that this is a violation of the American navigation laws. The fine for infraction of this law it is proposed to raise from $100 to $200. The old rule, acted upon on these lakes, used to be that an American vessel could call alternatively at an American and a Canadian port, and go on repeating the operation to any extent. If the new reading of the American law is to prevail and to be reinforced by further amendments, there is nothing left for Canada to do but to carry on the trade with the Klondyke wholly through Canadian channels. Many things are in our favor in this competition. All the woolen goods required for that cold climate are cheaper in Canada than in the United States; and almost all other things which that trade calls for can be bought on better terms here than there. Besides, the duty on miners' supplies, otherwise payable, would be saved.

The maritime policy of the United States, overleaping itself will, in effect, play the game of Canada, by compelling us to rely upon our own lines of communication to the Klondyke exclusively. The necessity for this had been foreseen, and as the Government thought had been provided for in the contract to secure railway communication to that region within our own territory. But difficulties have arisen in connection with the approach by water to that road. We have a right, under treaty, to navigate the Stikine; but it is obvious that American competitors for the trade of the new gold fields are doing their best to render that right of no avail. The river is shallow, and goods have to be transferred from sea-going vessels to river craft. All sorts of proposals intended to nullify our right to navigation in this stream are being offered in Congress. Some of them are attempts to force Canada into bargains of a nature which it is impossible for this country to treat as serious, much less to consider. The only suggestion made that is intended to be serious is perhaps that which relates to the passage of a military force, as our Mounted Police is called, for the purpose of this discussion. The United States proposed to take fifty soldiers with the relief expedition; and our Government, after, as the Americans allege, Mr. Sifton and the British ambassador had agreed to permit a guard to go through, objects by assuming that the troops will stop at the provisional boundary. According to Mr. Howell, the Assistant-Secretary of the Treasury, there is a disposition on the part of the Americans to say that on the passage of these troops will depend the right of Canadian Mounted Police to go up the Stikine. The two cases are in no respect parallel. We have a right to navigate that river; the United States has no right to take troops into our territory, unless special leave is granted. All these things admonish us of the necessity of having an all-Canadian route to the Klondyke; but they also prove to us that the proposed railway, without an extension to a British Columbia port, will not give us such a route. Disagreeable as these attempts at obstruction are, it is fortunate that they have been made now. If we had built a railway in our territory beyond the White Pass, we should have been at the mercy of the United States. Luckily their jealousy could not be suppressed till we had committed ourselves in a way that must have put us at their mercy. The more unreasonable congressional orators are, the more they pursue a policy that will throw the bulk of the business into our hands.

It does seem as if the American Government was not at first, if at all, adverse to extending the bonding limit to Canadian goods up the Stikine River as far as Glenora, as our Government has asked them to do. A bill for that purpose, presumably with the concurrence of the Government, was introduced into Congress. The extraordinary amendment opposed to the bill was introduced by Senator Hansbrough, chairman of the committee on public lands. It is difficult to believe that he acted on the request of the Government; the more reasonable supposition is that Senator Hansbrough represents that section of the committee which thinks that the occasion presents a good opportunity for demanding from Canada favors, under the guise of a reciprocity, which would reciprocate nothing. We have a right to navigate the Stikine; but there is a point in that river at which we have to pass the American custom house. If that barrier is to be made very inconvenient to pass, we shall find it our interest to go by another route. We are not going to agree to pay for a right which is already ours, and for a facility which by the comity of nations we are entitled to. We do not propose to be coerced into giving a right of way, by rail, into our own territory, from an American port, now that we know the treatment we may be liable to in the contingency of the Hansbroughs becoming a majority in Congress; and less still do we propose to permit American miners to take into our mining region their outfit and supplies free of duty, which all other foreigners must pay. The bonding privilege demanded, in this connection, for American fishermen on the Atlantic coast might, provided their catches come in vessels usually engaged in commerce, upon a proper occasion, be granted; but the demand for it is wholly out of place in Senator Hansbrough's amendment to the Stikine bonding bill.

CHEAPER BANK DISCOUNTS.

At a recent gathering of the council of the Toronto Board of Trade, an important suggestion was made by a gentleman who had urged a year ago that the efforts of the banks to bring about a reduction of the rate of interest paid in the Post Office and Government Savings banks from 3½ per cent. to 3 per cent. should be supported. He brought up the question afresh, the issue now being a reduction from 3 per cent. to 2½, and the suggestion was well received. It may seem remarkable that in one short year there should be such a change in the position of money and affairs generally as to call for or justify another movement in the rate paid to Government depositors; but if the facts be examined, it must be admitted that there is a good deal to be said in favor of a reduction, which, however unwelcome it may be to the depositors interested, must be described as a step forward.

The moving cause at the moment is, no doubt, chiefly the great success of the 2½ per cent. loan issued by the Dominion last October. This stock has steadily increased in value, and in the opinion of conservative financiers, it is not unlikely to appreciate until it reaches the neighborhood of par. Even at the current rate, it indicates the ability of the Government of Canada to borrow money in the markets of the world at something under 2¾ per cent., and on that ground alone there is good reason to question whether the Government would be justified in continuing to pay depositors a rate of interest, which, when the necessary expenses of administration are added, makes their borrowings in that shape cost them one-half per cent. per annum more than the regular loans, and those not borrowed abroad altogether, for a very large portion of the last loan, as is well known, was taken up at home.

The duty of the Government to find a safe place of deposit, where ignorant and unskilled people may keep their savings, has always been admitted, but our objection has been to the Government taking care of the money of well-to-do people, and allowing them more than the money is worth. The administration of the Government and the post-office savings banks has been altogether too much in this direction, both by permitting large deposits to be made, and by paying a high rate of interest. The latter is an injustice to the taxpayer; the former, even if rates were still further reduced, must be regarded as an injustice to the whole body, for the savings of the people ought to be left as much as possible in the channels of trade, where only they serve to assist in the great work of developing the country.

The second argument in favor of the reductions is practically the first in another form, that is, that the increased volume of money in the country has led to a fall in the rate of interest, which should be considered now by the Government in fixing their rate. The extent to which the business of the country is carried on upon the bank deposits, as contrasted with loans made out of capital, may be seen from the following figures, in which we have compared the Bank Statements to the Government at the end of December, 1887, with that for December 31st, 1897.

Ten years ago the capital and rest of the Canadian banks were as follows:

Capital and Rest amounted to	$ 78,145,000
Deposits of all kinds to	113,261,000
Circulation to	34,354,000
So that the total amount available for carrying on the business of the country was	$225,763,000

Of this very considerable total the current loans and discounts, which may be taken roughly as representing the mercantile business carried by the banks, employed $157,083,523.

The similar figures in December last were as follows:

Capital and Rest	$ 89,805,000
Deposits	232,517,000
Circulation....................................	37,995,000
Total	$360,317,000
Current loans and discounts	$205,931,000

The clear meaning of this is that the mercantile business of the country is now wholly carried on by means of the deposits which the public places with the banks, and not on the capital of the banks themselves, which as in older countries has grown to be a mere foundation and guarantee of the solvency of the various institutions, and, as in older countries, is invested in bonds and similar securities. The cost of the deposits therefore is the chief factor in fixing the rate of discount.

The business public is interested in this question in a very direct way. We cannot get to the normal condition now existing in most civilized countries, where the rates for bank loans and discounts fluctuate freely with the value of money, unless the Government removes this artificial barrier, which even the maintenance of a 3 per cent. rate creates. Under the somewhat artificial conditions existing at present, for the maintenance of which the inflexible and relatively high rate paid by the Government for deposits is largely responsible, the best borrowers are on the same level as borrowers of much less satisfactory standing. This is not as it should be. It is sincerely to be hoped that the Dominion Government, which a year ago took a forward step in the reduction to 3 per cent., and which has quite as much reason and as good grounds for another forward step now, will not lose the opportunity.

ONTARIO LOAN COMPANIES.

There is not a little variation in the experience of different mortgage loan companies in 1897, as far as net earnings are concerned. Some companies, while they have benefited in a marked degree by the results of the good harvest in both Ontario and Manitoba, have experienced drawbacks in other directions which interfere with their profits. The London companies generally make a good, some of them a splendid, showing. They have escaped the results of Winnipeg and Toronto "booms" in former years, and are greatly more prosperous and comfortable by reason of the fact.

The Huron and Erie Loan and Savings Company, at its last annual meeting, presented a very handsome showing, one which, while it probably reflects the improved condition of general affairs in Ontario, assuredly shows to good advantage the earning power of this long-established company. The earnings, gross, $360,356, were at the rate of 6.11 per cent. on the cash value of mortgages, an unusual rate. After paying interest charges, commission, inspection and all other expenses, writing off $5,938, loss on land, and setting aside $15,000 for possible depreciation of securities, there remained enough net profit to pay nine per cent. dividend and place $20,000 to reserve. Such a result is one upon which the company deserves to be congratulated heartily. The reduced rates obtainable upon loans, the report tells us, has been largely met by reduced rates on debentures and deposits, the company's borrowings of which are $4,233,000, about a third of it in Britain on debenture. The home borrowings are thus increased while the British are lessened. It is to be expected in the case of a conservative and strong company like the Huron and Erie that careful valuations of its securities would be made, and writing off doubtful assets would be rigorously done. And we learn that the re-valuation begun in 1896 has been continued till almost every security has passed the test of a second valuator, independent of the first. The amount o real estate upon company's hands is remarkably small for loans of nearly six millions. This company, with 3,600 mortgages upon properties in the finest districts of Ontario, is unsurpassed in the character of its loans, and amply justifies in its results the character of its administration.

Another good statement is issued by the Ontario Loan and Debenture Company, namely that concerning the business of 1897. Not only have the interest earnings of the company been maintained—as a matter of fact, they were a trifle larger than in 1896—but a full and frank statement of losses and lock-ups is again made, a policy that cannot be too highly commended. It is noticeable that so large a sum as $872,000 has been received during the year in interest and repayments of principal, which we take to mean that $662,000, equal to one-fifth of the whole, has been repaid on the mortgage loans. This is a satisfactory commentary on the character of the company's securities, and an indication of the improved ability of Ontario farmers, to whom the loans are mainly made. While competition for loans is keen and the rate still shows a downward tendency, the directors meet such decline by a like reduction in the rate paid for borrowed capital. Thus they continue to pay off such maturing debentures as they cannot renew on terms that will leave the company a fair margin of profit.

But little variation is shown in the course of last year's business of the Dominion Savings and Investment Association compared with that of the previous year. Loans made were somewhat greater, the earnings both gross and net a trifle larger; but the principal difference was in the amount of deposits borrowed, which grew from $623,000 to $752,000, while less money is borrowed on debenture. After paying five per cent. dividend an amount somewhat in excess of the previous year was carried to contingent account. The directors find the transactions of the year satisfactory and the outlook hopeful, and congratulate the shareholders on the new premises of the society in the Temple building.

The policy of the Building and Loan Association has long been a waiting, economizing, hoping policy, and at last it seems, judging from recent transactions in Winnipeg land adjoining that which the association holds on Portage avenue, that something very satisfactory must shortly be realized from that long lock-up. The report shows that prudent economy has been practised, and the dividend has been reduced to 4½ per cent., which is a proper move. The particulars, given in the president's address, respecting new debentures, repayments, fresh loans, and especially respecting the payment of interest, proved very satisfactory to the shareholders at the annual meeting.

SPRING MILLINERY.

Already the conditions and prospects of the millinery trade for the spring of 1898 are being discussed by retailers. The placing trips have been completed and representatives of the wholesale houses report having met with good results. The bulk of the orders taken for the North-West and the Maritime Provinces have been shipped to their different destinations. There is every prospect of an active season's business in millinery. It is very curious to note the cautious way in which some of the retailers have been placing their orders. While novelties can never be bought with too much care and deliberation; there are certain lines of staple goods of which every energetic house is bound to sell a definite amount. Over-stocking is to be avoided, but it is possible to go to the other extreme and cripple trade by insufficient stocks.

The season is now far enough advanced to allow a summary of its leading features in spring millinery. Among materials, handsome effects are seen in straw. The closely plaited coarse straws, in all the prevailing colors, are the first novelties of the season. These may be had in made-up shapes, plateaux and crowns. Word comes from Paris that finely sewn straws, as well as Panama, Leghorn, Manilla, and other plaited straws of the same type will be equally fashionable. Another popular material consists of tinsel on net or chiffon. Tulle, so say the authorities, will be the chief rival of straw. Some of the trimmed shapes will show it used in layers, one over the other, until an opaque effect is produced, and then it is stretched smoothly over a firm shape, or arranged in the form of beret with the loose edges of the tulle separate and each bordered with narrow ribbon or a row of spangles.

Whatever the completed season may show, it will open with flowers as the favorite material for trimming. It always appears appropriate that, in the budding of spring, with indications of new life on every hand, flowers should be used for purposes of adornment. Roses will again stand first in popular favor, while we might mention lilacs, heath, fuchsias and nasturtiums as closely following the leaders. On the pretty Paris models there are two arrangements which have been principally followed, viz., to place the flowers in thick cordons or serried bunches about the brim of the hat, and in clusters on one side. When used in the first way they are a substitute for draperies of material, ribbons, quilling and the like.

The new shades of color are very striking, and must add much to the success of the season. All the orange tints, from nearly cream to deepest yellow, are in evidence. We have maize, regent, coque de roche and giroflee, the latter a deep nasturtium shade. From turquoise to dark paon there are martin, peucher, rollier and nocelle. Among the leading colors may also be enumerated geranium, begonia, reine, roi, fawn, beiges, castor and argent. In combinations black will be liberally used, but not in such a way as to dim the brilliancy of the season's effect.

Some of the leading Toronto houses have announced their millinery openings for Monday, the 28th inst. It is a pity that more consideration could not be given to the interests of retailers, and by general arrangement the opening day be fixed for Tuesday, as it is in Montreal. The anxiety of each house to secure an advantage over its competitors was, we believe, the only reason for selecting this day; and if it were not for Sunday there is no telling how far into the winter season the keen competition of the wholesale merchants to secure trade might drive the opening day. Retailers, however, can take the remedy in their own hands, and refuse to spend an extra and an idle day in Toronto.

BUTTER AND CHEESE.

Already merchants are beginning to study the situation in dairy products from the standpoint of next year's prospects. A year ago considerable quantities of Canadian fodder cheese were made in the early weeks of April. At the time there were many deeply interested in dairying who denounced this action as likely to result in serious injury to the trade. What was then generally considered unwise, would, if repeated under present circumstances, amount almost to a crime, so disastrous must the consequences be to Canadian dairy interests. In the spring of 1897 cheese prices were high in the view of short available supplies. At present there remain considerable holdings in the country which must, in part, be disposed of before the new season opens. The export demand is by no means strong, and would become even weaker were it the opinion on the other side of the Atlantic that Canadian factorymen were making preparations to rush heedlessly into the market with the first indications of spring.

Before the creamery system had taken a firm hold of the country there was some excuse for the haste with which factorymen were wont to enter upon each season's work. But where the winter creameries are operated there is little to be said in favor of cutting the season prematurely short. It is true that, at the moment, the butter market in Great Britain is not offering good values to dairymen, but there are good reasons to hope for some immediate improvement in the situation. From the records of shipments we may feel that the present season has marked distinct progress in the butter trade of the Dominion. For the four weeks ending January 29th the imports of Canadian butter into the United Kingdom amounted to 2,277 cwts., a material increase upon the movement last year.

From the United Kingdom comes word that the settlement of the engineers' labor dispute has given confidence to butter buyers and brought a better tone into the market. A feature that is also strengthening the confidence of buyers is the comparatively short supplies. Compared with last year the eight weeks ending January 29th show a deficiency in the imports of over 15,000 cwts. instead of an increase of over 35,000 cwts. which would be the normal rate of increase for the last four years. Both from

Australia and New Zealand it is expected there will be more butter than in February last year, but up to date the total arrivals for this season from these countries are respectively 101,110 cwts. and 31,038 cwts., while last season, to the same date they were 108,663 cwts. and 23,274 cwts. The total Australasian butter arrived this season is 132,148 cwts., which is just 211 cwts. in excess of the arrival to the same date last season.

AN ALL CANADIAN KLONDYKE ROUTE.

Instruction, and that of an interesting kind, was received by those Toronto people who attended the two meetings of the Board of Trade, on Wednesday and Thursday, addressed by Western men on behalf of the development of the Edmonton route to the Yukon country. It was natural that the Board should have asked the Dominion Government to at once undertake the construction of a wagon route between Peace and Nelson rivers, and thence to Pelly river; and to improve the portages on the Mackenzie river route. It does not appear that this need be an expensive undertaking, for the country is mostly easily undulating, and the benefit will be immediate and direct.

There is this fact to be considered. To go to the Yukon gold country by way of Edmonton offers a cheap route to the Yukon for the poor prospector, who can find means of livelihood for himself and live stock on the way. Then it would lead to the development of the important Peace River district, rich in minerals and in agricultural and grazing facilities. And again, it assists Canadian industries, commercial and manufacturing, as well as agricultural. As Mr. Oliver, M.P., put it at the Thursday meeting, "Of the outfitting trade which starts at Edmonton, Canadian merchants get the benefit of both the cost and the profit, for British or Canadian goods are used. Of the Yukon trade which starts at Vancouver, on the other hand, the United States gets the benefit of the cost of the goods [for they are American goods], and the Vancouver dealer makes only the profit on the sale of them." That the competition of the Pacific States of the Union is an aggressive competition appears from the fact, recited by the same gentleman, that he had seen in Edmonton a San Francisco drummer, traveling for a boot and shoe house, and for anything else that came handy, take an order from an Edmonton merchant for California beans. And this was his second trip. Another consideration is that there are other points, and perhaps better points, than Dawson City, toward which there is a craze. "Dawson is the last place to go to," says Mr. Oliver, "because the ground there is already staked and staked again. Parties of shrewd people, miners and others, from Oregon and California, have been coming into Edmonton ever since last August; thence they go along the north-west trail to strike the divide between the waters of the Yukon and the Mackenzie; that is, between the Liard and the Pelly (near the southern boundary of the Yukon district), where there is plenty of gold-bearing territory and many gold-bearing streams."

A good case was made out by this gentleman, as on the previous day was done by Mr. Bole and Mr. Bell, of Winnipeg, in favor of Governmental aid to the Edmonton water and wagon route. While not antagonizing the route by Vancouver and the coast, they showed that many are already going by the Edmonton all-Canadian route, and thrice as many, perhaps ten times as many, might be expected if prompt means were taken to assist their progress.

MALADMINISTRATION.

Since we wrote in December about the Farmers' Loan and Savings Company, its affairs have been looked into somewhat minutely by the liquidator, whose report has been made this week to meetings of the depositors and other creditors and of the shareholders respectively. To a condensation of this report, upon another page, we refer our readers. If the language of the interim liquidator, Mr. Osler, was strong in condemning the ignorance, carelessness and mismanagement which characterized the company's administration, that of Mr. Langmuir, who has looked more fully into its affairs, is far stronger. Dishonest practices and defalcation by the officers have been discovered; shameful negligence by the directors is manifest, and the question now is as to proceeding against them; then as to the auditors, a more astounding disregard of the reasonable functions of such officers has rarely been heard of.

When a depositor asked whether the auditors had made an examination of the books of the company, Mr. Langmuir opined that they had not. "He had questioned them, and they had told him that they had never asked for, nor seen, vouchers of any kind. They had always wound up by saying that they had placed absolute confidence in Mr. Bethune [the manager], and had taken his word for everything." The whole thing, Mr. Langmuir said, was so rank that it could scarcely be expressed. Such conduct of business is not to be condoned. To prevent its recurrence, punishment ought to be given where it is due. It is not fitting that in a commercial community this sort of maladministration should go on with impunity. The standing of the company and the respectability of those responsible for its carrying on make the case all the stronger against them, for the consequences of their negligence are so much the greater. While the matter of legal responsibility is being determined, it is premature to attempt to apportion the blame. But no effort should be spared to find out where the blame lies.

A DOUBTFUL USE OF THE ROTHSCHILDS' NAME.

No marked sensation has been produced, at Ottawa or elsewhere in Canada, by the announcement that the British Yukon Company, of which the Duke of Teck is president, who obtained a charter last session of the Canadian Parliament, to build a railway from the White Pass to Lake Bennett, is to begin the work at once and have the road ready for use in three months from the start. Mr. C. H. Wilkinson, representing the company, was reported to have arrived in Montreal on the 13th inst. There may be something in the fact that since this announcement was made, Mr. Sifton, speaking on the Klondyke Railway contract, denied that the contractors had got a monopoly. The question of monopoly may no doubt be answered yes and no. The contract provides for a monopoly so far as the Government can control the situation; but if the charter for two other and competing roads obtained previously are still alive and the companies in possession of them in a position to prosecute the work, no monopoly will be possible, in practice. Much has been said about the Rothschilds as looking for a contract to build a road, which was evidently not warranted. This is not the sort of business in which the Rothschilds engage. As different persons have been claiming to represent them, it is reasonable to conclude that there have been some fakirs in the field. Mr. Sifton, in assuming to separate the wheat from the chaff, told Parliament that Mr. Maitland Kersey is the agent of the

Rothschilds. It is a curious coincidence that this is the gentleman who organized a company of Americans looking to the building of a railway somewhere to the Klondyke, of which George Gould, John W. Mackay, M. L. Z. Leiter, known as a Chicago wheat monopolist, were members. Is this what has been called the Rothschilds' company?

TORONTO TRADE FIGURES.

Larger figures than usual are shown by the Board of Trade bulletin of imports and exports for January last. Imports were $2,169,729 in value, and exports $559,408, making the aggregate foreign trade of the port $2,729,137. Principal items of import were the following:

DUTIABLE GOODS.

	Jan., 1898.	Jan., 1897.
Brass and manufactures of	$ 4,701	$ 5,064
Copper "	337	123
Iron and steel "	104,657	80,254
Lead "	167	8,026
Metals and composition............	14,865	7,125
Total metal goods	$124,727	$100,592
Cotton and manufactures of........	$296,240	$173,494
Fancy goods	91,194	64,183
Hats, caps and bonnets............	18,709	21,685
Silk and manufactures of	118,833	80,454
Woolen manufactures..............	209,316	146,954
Total dry goods	$734,292	$486,770
Books and pamphlets	$23,353	$18,104
Bicycles, &c.	31,065	25,632
Coal, bituminous	49,823	22,009
" anthracite (free)	83,779	65,819
Drugs and medicines..............	21,355	12,681
Earthen and chinaware............	19,960	13,099
Fruits, green and dried	27,131	14,986
Glass and glassware	12,006	19,296
Gutta Percha	13,037	6,281
Flax	53,201	......
Jewelry and watches	23,954	24,792
Leather and manufactures of	21,606	17,821
Musical instruments	13,883	7,079
Paints and colors	10,166	4,024
Paper and manufactures of..........	32,903	23,716
Spirits and wines..................	15,657	4,652

The increased import of dry goods (?) and metal wares is thus marked; in paper and books, coal, bicycles, fruit, drugs and leather there were also larger amounts purchased. On examining the list of free goods imported a very unusual quantity of hides and skins appears, the value being $312,118; dyes and chemicals, wool, coffee, crude rubber, show increased import. The following are the comparative exports:—

EXPORTS, CANADIAN PRODUCE.

Produce of	Jan., 1898.	Jan., 1897.
The Mine..........................	$ 425	......
" Fisheries	9	$ 330
" Forest	1,199	6 547
" Field..........................	136,829	94 917
Animals and their produce	245,645	216,253
Manufactures	150,964	84,696
Total	$535,071	$402,743

A SHAMEFUL EXPOSURE.

Rather more than a hundred shareholders of the Farmers' Loan and Savings Company met on Tuesday in Toronto to receive a report of the liquidator, Mr. J. W. Langmuir, who as chairman of the meeting read a report detailing the condition of the company, into whose affairs he has been probing for some weeks. The story he had to tell is one of negligence on the part of directors, incompetency, deception and fraud on the part of employees, and incapacity on the part of the auditors. "A large proportion of the loans were taken on the security of vacant and unproductive lands, a class of security which, owing to shrinkage in values, is now only realizable, if at all, at a very great loss.

"The books of the company have not only been most defectively kept, but are in many vital particulars purposely deceptive and misleading, which, it is but fair to state, has rendered the supervision of the business by the directors exceedingly difficult, while the disregard of every proper principle that should prevail in keeping the accounts of a loan company rendered it not only exceedingly difficult to make out the condition of individual borrowers, but still more so to ascertain the true position of the company's affairs."

The liquidator plainly states that the company's doors have been kept open of late only by the "systematic falsification by the manager and accountant of the only official documents submitted to public scrutiny, the assets and liability sheets, and the profit and loss statements. If the auditors had properly discharged their duties, the deceptions practised by the manager, accountant and teller would long ago have been exposed and much loss avoided. Not only were the auditors guilty of gross neglect, but for reasons which they profess to be unable to explain they certified to the correctness of two distinctly different profit and loss statements for the year ending April 30th, 1897, as well as for the preceding year of the company."

There are discrepancies between depositors' pass books and the ledger. Out of 504 deposit accounts, 342 for $191,588 have been found correct, but of the remaining 162 there have been 71 examined, the pass books of which demand $69,766 while there is only $59,489 to their credit on the ledger. There are still 91 accounts of this sort to be examined. Then there is an apparently fraudulent issue of 45 shares fully paid-up stock. The condition of the stock as at 12th February, is 10,000 shares of $50 each fully paid stock, equals $500,000, and 1,145 shares on which $111,320 has been paid; aggregate paid, $611,320; and there is still owing on the 1,145 shares $445,930.

The company owes for taxes on vacant lands around Toronto, $35,000, and other dues of a like kind are estimated at $15,000 more. "The liabilities of the company at this date, subject to a further examination into the difference between the debenture account and debenture registers of about $2,000 is as follows:—

Sterling debentures..........................	$851,277 32
Currency debentures	205,193 33
Deposits so far as ascertained to date	288,310 40
Bank and sundry creditors about	65,000 00
Taxes, estimated	50,000 00
Total	$1,459,781 05

"The assets, according to the books of the company, and as stated in the 'assets and liabilities sheet' of April 30, 1897, which was duly certified to by the auditors and submitted to the shareholders at their meeting on June 2, 1897, are as follows:—

Investments	$2,194,807 68
Cash in bank	3,651 70
Cash on hand	3,399 87
Total	$2,201,859 25

"Of the $3,399.87 cash stated to be on hand, $1,467.81 was composed of worthless cheques and I.O.U.'s of the accountant and teller, and whether the balance ever existed or not is not known, as the auditors acknowledge that they had *never on any occasion verified the cash* in the teller's hands with the amount said to be at credit. . . . Reference should also be made to unwarranted overdrafts on deposit accounts of the manager, accountant and teller to the extent of $11,282 24. These irregular overdrafts are now under the consideration of the solicitors.

No regular mortgage ledger was kept, and the bookkeeping is described as "utterly bad and misleading." The securities of the company on productive properties are as in the subjoined list:—

Farm property	$267,939 99
City of Toronto	344,903 38
Toronto Junction	129,185 09
North Toronto and other suburbs	15,933 78
Towns and villages in Ontario	2,807 61
Unpaid principal of such mortgages........	$760,769 85

Showing that not much more than a third of the good mortgages were on farm lands. But the total unpaid principal of mortgages *on vacant land* is $1,359,348; and there are arrears of interest to $47,000 on farm loans, and a further sum of $341,000 in unpaid principal and arrears of interest on rented properties and vacant land in Toronto and Toronto Junction.

The total unpaid principal, arrears, etc., up to 12th February, is $1,747,875, and the liquidator makes out that the encroachment on capital amounts to $453,984. He thinks the shareholders will lose all their stock; not only this, but he questions if more than 50 cents in the dollar will be realized upon the assets of the company. Security for the three missing employees is recoverable from the Guarantee Company for $11,000; that is, $5,000 for the manager and $3,000 each for the accountant and teller. Replying to a question, Mr. Langmuir said: "The manager, the accountant and the teller had all deposit accounts with the company, and these were overdrawn between $12,000 and $13,000. That was fraudulent. Bethune was overdrawn from $6,000 to $7,000 and Pinkney and Scott by about $3,000 each. This had been going on since 1894."

The meeting elected the following gentlemen a committee of creditors to act with the liquidator: Rev. Dr. Warden, E. R. C. Clarkson, Alexander Patterson, and Dr. Moffatt. It is understood they are to serve without remuneration. On Wednesday afternoon the depositors met to select a committee to act with the liquidator, but were unable to agree upon the subject. At this meeting the question was asked by Mr. Ald. James Scott why no direct reference was made by the liquidator to the conduct of the directors? To this Mr. Langmuir replied: "I refer to the directors when I speak of the exceptional mismanagement and the fact that loans were taken on unproductive properties. The directors are responsible for this. I named the officers of the company specifically, because I had evidence before me of the falsification of the lists and the fraudulent taking of money of the company. The case of the directors is now before our solicitor, and will come before the Master."

TRADE WITH THE WEST INDIES.

A comparative list of the imports of Bermuda from the United States and Canada, respectively, and the exports thence to these countries, has been sent us by an enterprising Halifax firm, Messrs. J. A. Chipman & Co., who are familiar with the West India trade. Examination of this list (for the year 1896) shows that while Canada sends fair quantities of hay, oats, potatoes, lumber, preserved fish, and small quantities of other goods to Bermuda, there are 48 items out of a list of some 200 articles of which Canada sends none. For example, of agricultural implements, bicycles, bran (New York has sent 21,595 packages), candles, corks, corn, coal, electric goods, glassware, ice, and so on throughout the alphabet, to paper, stationery, tinware, and chilled meats, Canada's exports to the Islands are "nil" in four dozen items in the list, while the American furnishers send from hundreds of packages to scores of tons of *two hundred* kinds of goods.

It is important for Canadian manufacturers to learn, as we do from a circular accompanying this list, that the well-known Halifax forwarders, Messrs. Pickford & Black, of the Canadian line of West India steamers, are co-operating with the commission firm named in securing trusty agents in various islands to handle Canadian consignments. It is stated that a considerable increase is observable in the export trade thither thus far this winter, and we understand that the steamer "Beta" had a full inward cargo on her last trip from Jamaica to Halifax. A merchant in Hamilton, Bermuda, writes suggesting that information about Canadian goods and prices and freight rates is essential if a trade with Canada is to be built up. And he suggests that a Government agency should be established there to inform the people and to cultivate both inward and outward trade. And he adds: "Bermuda ought to buy the great bulk of its imports in Canada."

OUR AUSTRALIAN LETTER.

The Canadian agent in New South Wales, Mr. Larke, recently made a trip to the colony of New Zealand, and on his return the Sydney papers published interviews on the outlook of Canadian trade in that colony. He reports that he received the most cordial reception, and on every hand there were expressed opinions desirous of closer trade relations with Canada. The managers of many of the leading firms in New Zealand stated that where prices and qualities were equal, a preference would be given, in every case, to articles made within the Empire.

A few Canadian lines, notably agricultural implements, bicycles and cotton goods, have been pushed, and are leading the market there, and other lines will have equally good success if properly pushed. As an evidence of the sincerity of New Zealanders, two occurrences may be mentioned. A subsidy to induce the Canadian steamers to call at Wellington, the capital of the islands, was passed by the House without a dissentient voice. Last year a similar proposition was so strongly opposed that it was withdrawn before being submitted to a vote. For the first time in his experience in Australia, Mr. Larke says, orders were sent for goods simply on leaving catalogues and price lists, without samples being seen.

It is clear that the opportunity should be taken advantage of. The steamers now call at Wellington, so that travelers can stop off either coming or returning from Australia without extra expense.

New Zealand is composed of two large islands, with some small outlying ones. They are a thousand miles long by about an average of one hundred in breadth. This formation and the fact that they were originally divided into several provinces, has created four trade centres—Auckland, Wellington, Christchurch and Dunedin. The largest city and most important commercial centre was Auckland, but this supremacy is being wrested from it by Wellington, which, since the abolition of the separate provinces, has been the capital of the colony. It is situated at the southern portion of the North Island, and its central position and political prominence naturally tends to draw trade to it. Its business men are now awakening to the possibilities before them, though they have, in the past, had a reputation for conservatism that outrivalled that of Sydney. Still, Auckland, Christchurch and Dunedin, being the centres of rich districts of country, do, and will continue to control a large trade.

The population of New Zealand is not yet three-quarters of a million, but it is a land of great agricultural and pastoral resources, though mountainous. It has a much higher rainfall than Australia, and the pasturage and crops are better and more certain. It is claimed that the average wealth of the population of New Zealand is second only to that of Great Britain, and that its people enjoy a larger amount of income than those of any country in the world. They are, therefore, good customers, and its trade per capita is larger than the average of the Australian colonies.

Two years ago the Government of New Zealand placed a tax of £50 per annum on all commercial travelers visiting the colony. This prevented most Canadians from attempting to do business there. This tax has now been removed. The islands have suffered from the reaction from former high prices and speculation, but trade is improving, and credit is as good as in any country. Canadian commercial men will be heartily welcome in New Zealand, I feel sure, particularly in the South.

F. W.

Sydney, New South Wales, 12th January, 1898.

FOR GROCERS AND PROVISION DEALERS.

The ice season at Montreal has not been a success this year. In past years the ice houses have been about filled by this time, but this season, report states, only two of the big firms have completed their stocks.

The *Daily Trade Bulletin* says that there are at least two hundred points in the United States and Canada which have in store from 15,000 to 3,000,000 bushels of wheat which are not included in the visible supply.

The latest advices from India are that rains have fallen and that the crop has improved in appearance, resulting in more liberal offers by shippers. The current month and March are the harvest months in India, so that the rains reported are about equivalent to rains here in early May.

In the height of the fruit season in Southern California ninety car-loads of oranges are leaving every day for the East. As 300 boxes of 200 oranges fill each car, the shipments represent nearly 5,500,000 oranges every twenty-four hours. Shipments are particularly heavy from the new district of Redlands, where the orange groves are just coming into full bearing.

Touching the stories current in Montreal and elsewhere of seizures said to have been made by the Canadian Government of low-grade teas or tea-dust, it is known that there have been detentions of considerable importations for examination, and it is evident the Government intends to make some more decided effort to keep out the trashy rubbish, of which a certain proportion has found its way into this country, in the past.

The Klondyke trade has brought out a special demand for food stuffs that will have good keeping qualities and can be packed within small space. In the United States special efforts have been made to cater to this trade. Vegetables are put up in specially secure tins containing from one to twenty-five pounds each, and which when empty can be used as cooking utensils. They are manufactured by a patent process, which consists in steeping the freshly cut vegetables in a preserving fluid prior to evaporation. One pound of the dried product is stated to be equal to the following of the fresh goods: Potatoes, eight pounds; sweet potatoes, 10 pounds; onions, 18 pounds; carrots, 16 pounds; cabbage, 18 pounds; turnips, 20 pounds; string beans, 22 pounds; tomatoes, 40 pounds.

The organization of the new Canadian Horticultural Association has been completed. The president, Wm. Gammage, of London, in addressing the meeting at Toronto on the 11th inst., spoke of the value and need of associated efforts in all professions and trades, and said that none needed it more than they did. The object, he declared, was not to organize a trades-union to fix a scale of prices, nor to form a trust; it was simply for mutual conference and consultation, and to exchange ideas and to compare methods that they were organizing. Officers were chosen as follows: President, Wm. Gammage, London; first vice-president, F. G. Foster, Hamilton; second vice-president and vice-president for Quebec, Joseph Bennett, Montreal; secretary, Hugh McLean, St. Thomas; treasurer, John H. Dunlop, Toronto; vice-president for Ontario, T. H. Carter, Toronto.

IN THE DRY GOODS STORE.

A citizen of Jamaica recently in Canada says that our cotton manufacturers should find a profitable market in that island for their goods.

Spring goods are slowly making themselves seen in the retail stores, and within a fortnight the trade will be in the midst of the season.

The London feather sale was concluded last week, and, according to advices, with bidding brisk up to the close. Prices were firm throughout and show an advance on whites and feminas of from 10 to 15 per cent. Boas have advanced 20 per cent., with spadones showing an advance of 25 per cent. Blacks and drabs showed an advance of 10 per cent., with floss ruling 10 per cent. cheaper. The quality of the offering was generally good.

According to official reports published at St. Petersburg, the result of the Russian flax crop of 1897 has been disappointing in most districts of the empire. The area sown was considerably larger than in 1896, but the drought in June caused the plant to be stunted and thin, so much so that at many points the crop yielded much worse results than in the previous year. Speaking generally, the yield was large only when the area planted was much increased; elsewhere the crop has turned out as bad or worse than the year before. The quality is generally very middling and the fiber weak, with the exception only of the produce of Jaropolsk and Wologda, which show a better quality than in 1896.

An outline of a characteristic Western wedding is given in a recent issue of the Chicago *Tribune*. Here is an incident of it: "Theophilus," said the officiating clergyman at the altar, "do you take this woman"——. "Lady," corrected the bride, formerly of the ribbon department at Spotcash & Co.'s dry goods emporium. Curious, that while no one objects to a man being called a man, there is such a pronounced objection among the vulgar or ignorant to calling a woman a woman. It is hardly to be expected that the wife of Theophilus (of Chicago) possessed a copy of the Standard Dictionary, but if she did, a look at the word "lady" in the department of Faulty Diction, end of 2nd volume, would show her how not to use it.

From Leeds comes the report that: "Buying or ordering of spring and summer specialties for home consumption is limited, but that can only be *pro tem.* However, continentals, Canadians and a few Americans are concerning themselves with them in a real business-like fashion. The designs and ensemble of these coatings, suitings and trouserings, which do so much credit to the textile department of the Yorkshire College, get by far most attention. Prices for pattern parcels and for quick future delivery are in the aggregate from 5 to 7½ per cent. higher than any goods of the same class were a year ago. The market for medium and low tweeds, serges, Cheviots, vicunas, and union and other worsteds has some show of revival. The reason for this is that the engineers are going to work again, and the ready-made clothing factories are taking a more hopeful view of the future."

INSURANCE MATTERS.

The shareholders of the North-West Fire Insurance Company held their fourteenth annual meeting in Winnipeg last week. The following directors were elected: Messrs. Colin Inkster, president; W. R. Dick, vice-president; G. W. Baker, W. R. Allen, Thos. Gilroy, D. E. Sprague, J. Stanley Hough, Chief Justice Sir Thomas W. Taylor, J. A. Christie, Brandon; Hon. Walter Clifford, Austin; J. C. Kavanagh, Brandon, and Ernest M. Williams, Millwood. The manager is Mr. G. O. Woodman.

A compliment to the life agent was recently paid in an address by Walter S. Nichols, managing editor of the *Insurance Monitor*. "The Agent as a Dominant Factor in the Modern Business World," was his subject. In his view, the present tendency of the age is toward the agency. Hardly any business is done directly by the principal, and the successful agent in life insurance is much greater than the officer, because in him rested the responsibility of combating bad legislation, ignorance and fanaticism.

Klondyke life insurance policies are the latest thing in connection with the North-West rush, says the Winnipeg *Free Press*. "A man before leaving civilization and going into the dangers of the far north, can insure five or six thousand, and should he starve to death, his family at home would be provided for. The price is a little higher than ordinary policies. The Manufacturers Life Insurance Company, of which Mr. E. McDonald is western manager, is the company to introduce the new scheme."

Canadian policyholders in the Mutual Reserve Fund Life Association are not alone in their chagrin at the recent rise in that company's assessments. The Colorado policyholders are enraged. Last Monday night an indignation meeting was held, at which those interested protested against the policy of the company. Many of the Colorado pioneers are insured in the association, according to a despatch from Denver. About $400,000 worth of policies in this State are involved.

At the annual meeting of the Toronto Board of Fire Underwriters this week, a committee was appointed to formulate a schedule for the specific rating of that part of the city known as the congested district. In this rating, fire protective appliances will be taken into consideration. All the officers of the past year were re-elected. The president made a brief address reviewing the past year. There was a good attendance of Toronto members besides the following managers of companies from Montreal: Messrs. George Simpson, of the Royal; Lansing Lewis, of the Caledonian; G. T. C. Smith, of the Liverpool, London and Globe, and Thomas Davidson, of the North British and Mercantile.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, February 17th, 1898, compared with those of the previous week:

Clearings.	Feb. 17th, 1898.	Feb. 10th, 1898.
Montreal	$16,002,973	$15,811,986
Toronto	9,062,524	8,066,341
Winnipeg	1,186,546	1,453,593
Halifax	1,012,538	1,288,741
Hamilton	652,507	783.920
St. John	491,457	621,980
	$28,408,545	$28,026,561

Aggregate balances this week, $4,686,887; last week, $4,234,977.

—On Monday last the Canadian Pacific authorities surprised the Street by announcing a dividend of two and a half per cent. on the ordinary stock, making with the dividend already paid, 4 per cent. for the past year. The usual 2 per cent. was declared on the preference stock. The following figures give the results of the year's working:

Gross earnings	$24,049,534 00
Working expenses	13,745,758 00
Net earnings	10,303,775 00
Income from other sources	340,706 00
Total net income	10,644,482 00
Fixed charges, including guarantees and interest on land bonds	6,783,377 00
Net revenue available	3,861,115 00

This very satisfactory result has sent the stock up on the Canadian exchanges, and may be expected to have a like effect abroad.

—The annual meeting of the Merchants Bank of Halifax was held on Wednesday, 9th February. Among other business done was the passing by the shareholders of a by-law increasing the capital of the bank from $1,500,000 to $2,000,000, the issue and allotment of stock being left to the discretion of the directors. Upon the ballot being taken for the election ofdirectors for the ensuing year the following gentlemen were found to be the choice of the meeting:—Thomas E. Kenny, Thomas Ritchie, Michael Dwyer, Wiley Smith, H. H. Fuller, H. G. Bauld, David MacKeen. Mr. Kenny was chosen president, and Mr. Ritchie, vice-president.

—It has been stated that the Bank of Montreal would presently open a branch in the Yukon country. But no definite official announcement of the matter has been made. Another bank has, however, arranged with the Government to establish a branch in the Yukon for the handling of bullion and the transaction of the Federal Government's business. This is the Canadian Bank of Commerce. Mr. Wills, manager of the Orangeville branch of the Bank of Commerce, is to represent the bank at Dawson.

—The balance at credit of depositors in the Canadian Government Savings Banks amounted at the close of 1897 to $15,738,645. The deposits made during January were $224,141, and withdrawals $215,744.

—A despatch from Winnipeg says that the Manitoba Legislature has been called for the despatch of business on Thursday, March 10th. It is added that the session is expected to be a very brief one.

—A branch of the Ontario Bank is being opened this week in Alliston, under the charge of Mr. James Morris, formerly accountant at Ottawa branch.

Meetings.

HURON AND ERIE LOAN AND SAVINGS COMPANY.

The thirty-fourth general annual meeting of this company was held at its office, in London, Ont., on Wednesday, February 9th, 1898.

Present—Edmund Beltz, F. P. Betts, T. A. Browne, P. W. D. Brodrick, Thos. Caldwell, Hume Cronyn, Verschoyle Cronyn, H. E. Gates, Geo. F. Jewell, John Labatt, F. E. Leonard, J. W. Little, Chas. Morton, Philip Mackenzie, J. M. McWhinney, the manager, and others.

The president, J. W. Little, took the chair, and the manager, Mr. G. A. Somerville, acted as secretary. The minutes of the last annual meeting were read and approved, and the annual report and financial statement were submitted, as follows:—

REPORT.

The directors of the Huron and Erie Loan and Savings Company beg to submit herewith their thirty-fourth annual report, showing the results of the business of the company for the past year, accompanied by the balance sheet to December 31st, 1897, duly audited.

After defraying the expenses of management and all other charges, and making provision for doubtful debts, the business for the past year, including $22,113.39 brought forward from last year's accounts, shows a net profit of $166,085.25. Two half-yearly dividends of four and one-half per cent. each, and the income tax of $2,657.31 thereon, absorbed $128,657 31, leaving a surplus of $37,427.94, of which $20,000 has been added to the Reserve Fund, and the balance, $17,427.94, carried forward to next year.

The reserve fund now amounts to $750,000, or over fifty-three and one-half per cent. of the paid-up capital stock of the company.

The reduction in the prevailing rate of interest on choice mortgage loans has been largely met by the reduced rate at which money has been obtained on deposit and on the debentures of the company.

The re-valuation of mortgaged lands referred to in the last annual report has been continued, so that within the past two years almost every security held by the company has been inspected by a competent valuator, other than the inspector upon whose report the investment was originally made. Where the margin of security appeared doubtful, ample provision has been made.

The value of the real estate held by the company, exclusive of office premises, is $20,350. This sum includes all properties remaining unsold which have come into the possession of the company by foreclosure, failure to obtain purchasers under power of sale, or otherwise. Interest was paid more promptly than usual, and the arrears at December 31st were less than for a number of years previously.

Your directors desire to bear testimony to the very efficient manner in which the manager and other officers of the company have discharged their respective duties.

All of which is respectfully submitted.

J. W. Little,
President.

London, Ont., 26th Jan., 1898.

PROFIT AND LOSS STATEMENT FOR YEAR ENDING 31ST DECEMBER, 1897.

Dr.

To dividend No. 66, 4½ per cent	$63,000 00

Cash in banks	388,405 53	
		559,753 96
		$6,497,193 12

G. A. Somerville,
Manager.

We hereby certify that we have carefully audited the books and accounts of the Huron and Erie Loan and Savings Company for the year ending December 31st, 1897. The cash and bank accounts have been audited monthly; the postings and balances of all the company's ledgers examined quarterly; and we find the whole correct and in accordance with the above statements. We have also examined the company's securities, and find them in order.

Geo. F. Jewell, F.C.A., }
Thomas A. Browne, } Auditors.
London, 26th January, 1898.

The President, in moving the adoption of the report, said:—

"I am sure that the report which has just been read will prove satisfactory to all who are interested in the Huron and Erie. Notwithstanding the increased competition for good loans, the reduced rates of interest prevailing, and the low prices obtainable for real estate, the earning power of the company has been well maintained, the usual dividends have been paid and the sum of $20,000 added to the reserve fund.

"During the year seven hundred and fifty-two applications for loans were considered, of which only two hundred and ninety-nine were accepted. The policy of the board to confine investments strictly to Western Ontario remains unchanged, so that all the loans are within a comparatively short distance of the company's office.

"The real estate held as security for advances has practically all been re-inspected by competent valuators specially selected for the purpose, and their reports are a source of great satisfaction to the board, and will prove most valuable to the company.

"The real estate on hand amounts to $20,350, or about $16,000 less than at the close of last year. It consists entirely of farm property, part of which has been sold since the books were closed, and it is expected that the remainder will be quickly disposed of, especially in view of the improved demand for farms at somewhat higher prices, due to the abundant crops of last year and the better returns for farm produce generally.

"No part of the company's business receives more careful attention than the arrears on mortgages. Not only are they closely watched by the management under a most efficient system, but they are brought before the board at regular intervals, and each case is carefully considered.

"At the end of the year the total arrears of principal and interest amounted to only $70,605, being less than at any time for the past twenty years, with one exception. No doubt this satisfactory result is largely due to the excellent system adopted.

"Since the limit of our borrowing powers was reached a few years ago, no increase in the total amount of debentures issued by the company has been possible, but the dividend and net profits have been maintained chiefly in consequence of the more favorable terms on which money has been borrowed on debenture. Last summer the manager visited Great Britain and arranged to renew or replace by new money a large amount of maturing debentures at much lower rates than were formerly paid. Arrangements for further supplies of capital on very satisfactory terms were also made, and the saving thus effected, together with reduced rates on deposits and Canadian debentures, should have a very noticeable effect on the coming year's profits.

"I may state that since the first of January I have personally examined every account in the company's ledgers, except those in the savings department, and, as a result of that examination, I am in a position to say that, in my opinion. the company is not carrying at its face value a single account which does not appear to be healthy and active, or where the valuations do not indicate that the security is perfectly safe. In all cases where the margin, as disclosed by recent inspections, appears to be close, even where interest payments have been promptly met, an allowance has been made, apparently ample to meet any possible contingency, and no property has been withheld from sale waiting for better times.

"The manager and staff have, as in the past, performed their duties with energy and zeal, and no small share of the company's prosperity is due to their efforts.

"I have much pleasure in moving the adoption of the report."

Mr. Philip Mackenzie, vice-president, seconded the motion, which was carried unanimously.

The usual votes of thanks were tendered the president, directors, manager and other officers of the company.

Mr. V. Cronyn, in acknowledging the vote of thanks to the directors, referred to the fact that the Canadian debentures were almost equal in amount to those held in Great Britain. This he regarded as a very favorable feature, and a source of strength to the company, as any crisis arising would not likely affect debenture holders in both countries at the same time. Reports had occasionally been heard of companies finding it necessary to give very full explanations to bondholders in Scotland to allay suspicions aroused by the difficulties of financial institutions carrying on operations apparently similar, but in reality perhaps quite different from the legitimate business of a loan company. Fortunately we have been free from any trouble of that sort, but it was intended that the company should always be maintained in a position sufficiently strong to meet any demands that might be made upon its resources.

Messrs. George F. Jewell and Thomas A. Browne, having been appointed scrutineers, reported the following gentlemen elected as directors for the ensuing year: Messrs. J. W. Little, Philllip Mackenzie, Prof. Wm. Saunders, F. E. Leonard, V. Cronyn, and John Labatt.

At a subsequent meeting of the board, Mr. J. W. Little was elected president, and Mr. Philip Mackenzie vice-president.

ONTARIO LOAN AND DEBENTURE COMPANY.

The twenty-seventh annual meeting of the shareholders of the Ontario Loan and Debenture Company was held at their office in London on Wednesday, the 9th February, at 3 o'clock, p.m.

The following shareholders were present, viz.: Messrs. John McClary, A. S. Emery, William Bowman, William McDonough, W. A. Gunn, Frederick Barned, Albion Parfitt, A. O. Jeffery, J. C. Richter, Edgar Jeffery, A. M. Smart, J. M. McWhinney, and George F. Jewell, F.C.A., auditor. The president, Mr. John McClary, was in the chair, the manager, Mr. William F. Bullen, acting as secretary.

The twenty seventh annual report, as follows, was then taken as read:

REPORT.

The directors have much pleasure in submitting to the shareholders the annual report and balance sheet for the past year, duly audited.

The profits for the year, after deducting all charges, amount to $97,310, out of which two half-yearly dividends, at the rate of 6½ per cent. per annum, have been paid, leaving $19,310 over. Of this sum $10,000 has been added to the reserve fund, making it $480,000, or 40 per cent. of the paid-up capital, and the balance, $9,310, remains at the credit of revenue account. In arriving at the earnings your directors believe they have made more than ample provision for any possible depreciation in values of the securities.

The sum of $451,737 has been loaned, and $872,737, principal and interest, has been repaid during the year. Owing to the bountiful harvest, together with good prices for almost every product of the farm, borrowers during the latter part of the season met their payments with commendable promptness.

Your directors are continuing their policy of paying off all maturing debentures that cannot be renewed at such rates as will leave a fair margin of profit to the company.

We are pleased to say that the company's financial agents, Messrs. Mylne & Cook, C.A., of Edinburgh, continue to look carefully after the company's interests in Scotland.

The accounts of the company are, as usual, audited monthly by thoroughly competent auditors, appointed by the shareholders.

All of which is respectfully submitted.

John McClary,
President.

London, Ont., 19th January, 1898.

REVENUE ACCOUNT.

William F. Bullen,
Manager.

To the Shareholders of the Ontario Loan and Debenture Co.:

We hereby certify that we have audited the books and accounts of the Ontario Loan and Debenture Company for the year 1897, comprising a monthly cash audit and the verification of the postings and balances in all the company's books, and we find the whole correct and in accordance with the above statement. We have also examined the securities, and find them in order.

Geo. F. Jewell, F.C.A.,
A. M. Smart,
Auditors.

London, Ontario, January 19th, 1898.

Before moving the adoption of the report the President said:—

Gentlemen,—It devolves on me to move the adoption of the annual report and balance sheet for the past year, which has been in your hands for some time, and which I feel sure you will think highly satisfactory,

I may say that the company has made substantial progress in placing $10,000 to the reserve fund, and adding nearly $7,000 to the credit of the revenue account. These additions have been made to the company's capital after writing down any doubtful securities, besides making still further provision for any unexpected losses that may arise.

The substantial character of the assets are indicated by the repayment of $872,736 on account of principal and interest by the borrowers during the year.

All products of the farm, together with farm stock, are bringing much better prices, and the demand for farming lands is increasing.

The united policy of your board has been to confine our business to high grade securities. This has restricted the business to narrower limits and reduced earnings, but we are in hopes that the legitimate business of loaning money on real estate will increase in volume and security in common with the improvement in trade generally now apparent in all parts of the country.

We must recognize the fact, apparent to all, that there is excessive competition for the most desirable loans in all parts of the country, at reduced rates of interest, which we are endeavoring to meet as far as possible by a corresponding reduction in the rate of interest paid on our borrowed capital.

I am pleased to say that the manager and other officers of the company have discharged their several duties to the satisfaction of the board.

I will now move the adoption of the report.

The motion adopting the report was seconded by the vice president, and carried unanimously, and the retiring directors, Messrs. John McClary, A. S. Emery, Wm. Bowman, William McDonough, and W. A. Gunn, were re-elected for the ensuing year.

Messrs. George F. Jewell, F.C.A., and A. M. Smart were re-appointed auditors for the ensuing year.

At a subsequent meeting of the board, Mr. John McClary was re-elected president, and Mr. A. S. Emery vice-president.

William F. Bullen,
Manager.

DOMINION SAVINGS AND INVESTMENT SOCIETY.

The twenty-fifth annual meeting of the stockholders of the Dominion Savings and Investment Society was held at the society's offices, London, Ont., on Tuesday, the 8th day of February, 1898, at 11 a.m.

The president, Mr. Robert Reid, in the chair, and the manager, N. Mills, Esq., acting as secretary.

The following shareholders were present: Rev. J. H. Starr, Toronto; T. H. Purdom, D. Campbell, M. J. Kent, John Ferguson, Dr. Bettridge (Strathroy); W. Cadham, Col. R. Lewis, Francis Love, Samuel Wright, J. T. Moses, Dr. Sinclair, Alexander Purdom, Joshua Jackson, Col. F. B. Leys, E. Jones Parke, Q.C., Thomas Caldwell, Richard Thompson, Miss Boyd, J. K. McDermid, A. B. Campbell and others.

The minutes of the last meeting were read and approved.

The secretary read the report for the year 1897, which was adopted on motion of the president, seconded by Mr. John Ferguson.

REPORT.

The directors beg leave to submit the twenty-fifth annual report of the affairs of the society.

The transactions of the past year have been satisfactory. The shareholders are to be congratulated upon the suitable and very handsome offices now occupied by the society in the Temple building: they possess every facility for transacting the society's business, and since removal to their present offices the deposits in the Savings Bank have materially increased. The amount on deposit on the 31st day of December, 1896, was $623,292.06, and on the 31st day of December, 1897, it was $752,992.09, being an increase of $129,700.03.

In other respects there has been very little variation. The net earnings amounted to the sum of $53,207.18, out of which two half-yearly dividends at the rate of five per cent. per annum, amounting to the sum of $46,724.01 were paid, and the balance, or sum of $6,483.17, carried to the contingent account.

The amount loaned during the year amounted to the sum of $320,699.36, selected from loans applied for amounting to the sum of $558,557.54.

The manager and other officers have performed their duties efficiently, and everything that care and watchfulness can accomplish has been secured.

The books of the society have been duly audited by Messrs. J. K. McDermid and John Lochead, with the result which appears by their certificate attached to the statement. The directors much regretted the serious illness during the year of Mr. C. R. Somerville, who has for several years past proved to be a very efficient auditor, and are now much pleased that he has almost completely recovered.

All the directors retire annually, but are eligible for re-election.

Respectfully submitted,
Robert Reid, President.

Financial Statement for the Year Ending 31st December, 1897.

NATHANIEL MILLS, Manager.

London, January 26th, 1898.

We hereby certify that we have made a regular audit of the books of the Dominion Savings and Investment Society during the year 1897. The cash, bank accounts and vouchers have been kept under careful examination. All postings have been checked: all entries in the society's ledgers have been verified, and the accompanying statements of "Profit and Loss," and "Assets and Liabilities," are a correct showing of the affairs of the society.

J. K. McDERMID,
JOHN LOCHEAD,
Auditors.

Mr. Reid referred to the result of the year's business as satisfactory, pointing out the increase in the Savings Bank department, and referring to the fact that the rates of interest obtainable on loans continue to be low. He thought the report should give satisfaction for the present and hope for the future, notwithstanding that there was no reason to expect increased rates of interest in the future.

It was then moved by Mr. T. H. Purdom, seconded by Dr. Bettridge, that the election of directors be proceeded with, and that Messrs. E. Jones Parke, Q.C., and Francis Love be appointed scrutineers, and that the poll be closed whenever five minutes shall have elapsed without a ballot being cast. Carried.

The following gentlemen were then unanimously elected directors: Messrs. Robert Reid, C. H. Elliott, T. H. Purdom, J. H. Starr, Wm. Bettridge, W. J. McMurtry, Robert Lewis, John Ferguson, and John Morison.

It was then moved by Samuel Wright, seconded by Col. Lewis, that Messrs. J. K. McDermid and John Lochead be appointed auditors for the year 1898. Carried.

After a vote of thanks to the directors, the meeting adjourned.

At a subsequent meeting of the directors Mr. Robert Reid was re-elected president, Mr. Charles H. Elliott, vice-president, and Mr. T. H. Purdom, inspecting director.

BUILDING AND LOAN ASSOCIATION.

The annual general meeting of the Building and Loan Association was held at its offices, No. 13 Toronto street, Toronto, at 2 p.m. on Tuesday, the 8th day of February, 1898, the president, Larratt W. Smith, Q.C., D.C.L., in the chair.

There were present: Alex. Smith, Geo. W. Jackes, M.D., C. S. Gzowski, jr., H. L. Hime, J. J. Woodhouse, Robert Jenkins, Hamilton Cassels, Robert Thompson, R. L. Benson, W. Mortimer Clark, W.S., T. E. McCraken, H. W. Eddis, Allan Cassels, A. V. Delaporte, A. J. Somerville, Bernard Saunders, W. B. Hamilton, C. C. Baines, George R. R. Cockburn, M.A., J. G. Ridout, Sir John H. Hagarty, T. Sutherland Stayner, J. F. Smith, Q.C., Percival F. Ridout, Edward R. Greig, and others.

The following report was read:

REPORT.

The directors beg to submit to the shareholders their report for the past year, ending 31st December last, together with the usual financial statements.

The directors have deemed it advisable, in the interests of the association, to reduce the dividend for the last half year. The causes which have influenced the board in this course are: the continued depression in the value of real estate, the steady decline in the rate of interest obtainable on loans, and the necessity for a large expenditure, exceeding $9,000, from the revenue account, for repairs and permanent improvements on the properties which have fallen into the hands of the association.

Great care has also been exercised in taking credit only for such interest on investments as has been actually received, or is considered unquestionable.

The repayments by borrowers during the year have amounted to $161,363.

The sales of property, especially in Toronto, have been limited during the past year, but there is every prospect of improvement in this respect in the near future.

The bountiful harvest, both in Ontario and Manitoba, has encouraged the farmers to such an extent, that an increased demand is already noticeable for farm lands held for sale.

The association is largely interested in Winnipeg property, and what benefits Manitoba will no doubt, ere long, benefit the principal city of that province.

It will be noticed that there is a considerable increase in debenture expenses during the past year. This is accounted for by the fact that a greater number of debentures than usual came due during 1897, a very large percentage of which were renewed on favorable terms. In 1898 very few debentures will mature, either here or in Scotland, and consequently this item of expense will show a material reduction in the next annual statement.

A further saving of $2,355 has been effected in the office expenses, which are now reduced to the lowest possible point consistent with due efficiency.

For the information of the shareholders, it may be stated:

1. That the total amount invested in vacant lands, in Toronto and its suburbs, upon which the owners have ceased to pay interest, is under $50,000.

2. Of the house property here, in the hands of the association as mortgagees in possession, the vacancies have been reduced from 25 to 8 per cent. during the year.

3. That 87 per cent. of the interest taken credit for during the year has been received in cash over the counter, whilst the ultimate payment of the remaining 13 per cent. is considered unquestionable.

The usual monthly audit has been maintained as heretofore.

The manager has been most indefatigable, and has spared no efforts throughout a very trying year, to improve the position of the company, and the directors have very great pleasure in testifying to the value of his services as well as to those of his efficient staff.

All of which is respectfully submitted,
LARRATT W. SMITH,
President.

WALTER GILLESPIE, Manager.

We hereby certify that we have audited the books of the association, and have examined the vouchers and securities relating thereto, for the year ending 31st December, 1897, and have found the same carefully kept, correct, and properly set forth in the above statements.

HENRY WM. EDDIS, F.C.A.
JOHN M. MARTIN, F.C.A.,
Auditors.

Toronto, 13th January, 1898.

The report and financial statement having been read, the president, in his address to the shareholders said: Before submitting a motion for the adoption of the report which has just been read, I propose to make some remarks on the same, as well as on the financial statements accompanying it. The past year, especially towards the close of it, has been more than usually trying to loan companies here, owing to the collapse of a Toronto loan company under peculiar circumstances, calculated to create doubts in the minds of English debenture-holders, and to affect the credit of loan companies, both here and at home, and, happening as it did, at a time when business was beginning to recover from the late depression, it had the effect, for a time, of checking our operations, and obliging us to strengthen ourselves for any contingency that might arise. Fortunately our fears turned out to be unnecessary, as our debentures (very much larger than usual) were renewed even to a greater extent than before, and new money was obtained at lower rates than heretofore.

The report informs you that 87 per cent. of the interest credited during the year was received in cash, and I am glad to be able to state that of the 13 per cent. ($8,900) remaining unpaid, $3,425, or nearly 40 per cent. of it, has been collected within one month from the closing of the year's accounts.

Out of the earnings for the year, every expense incurred, and all ascertained losses on sales of real estate, have been written off.

Debentures to the extent of $210,300 became due during 1897: of this amount $208,000 were issued, or renewed, at lower rates, for which satisfactory result we are mainly indebted to our Edinburgh correspondents, Messrs. Fraser, Stodart & Ballingall, W.S., who for so many years have rendered most acceptable service to this association.

Our deposits, at the end of the year, were lower than they have ever been, and, since that period, have been still further reduced. I look forward to the time when they will have disappeared altogether, or have been converted (as some have already been) into debentures.

The actual rate of interest paid for our borrowed money to-day is 3.975 per cent., being the lowest in the history of the association.

The repayments on loans during 1897 amounted to $161,363, and we have lent new money, or renewed and extended mortgages, to the extent of $149,600.

The difficulties we have so long had to encounter, in carrying so large an amount of unproductive property in Winnipeg, are likely to cease shortly, as a demand for real property, owing to the effect of the late bountiful harvest in Manitoba, appears to have set in, and there are even now signs of considerable building operations in Winnipeg, for the coming spring.

The usual audit has been made, and everything has been found satisfactory. The management has been most energetic, and could not have been more efficiently or carefully conducted. For this I can personally vouch, having occupied a desk in the office, and devoted most of my time to the affairs of the association throughout the past year.

On the motion of the president, seconded by the vice-president, the report and financial statement were unanimously adopted.

It was moved by the Hon. Sir John H. Hagarty, seconded by Mr. A. V. Delaporte, and carried, that the thanks of the shareholders are due, and are hereby tendered to the president, vice-president and directors for their services during the past year.

The usual resolutions were then put and carried, after which scrutineers were appointed, and, on a ballot being taken, the former directors were unanimously reelected.

At a subsequent meeting held by the board, Larratt W. Smith, Q.C., D.C.L., was re-elected president, and George R. R. Cockburn, M.A., vice-president.

—"I don't wonder January wheat is high," remarked the professor in the agricultural college, glancing at the headlines in the commercial column. "It must be exceedingly scarce. My observation is that there is very little wheat raised in this country in January."—*Chicago Tribune.*

TORONTO MARKETS.

Toronto, Feb. 17th, 1898.

DAIRY PRODUCTS.—Receipts of butter are not excessive, although quite sufficient for all requirements. The quality of the dairy butter coming forward is satisfactory, although some complaints are made of light color. However, it is difficult for makers to avoid this at the present season of the year. There is little or no dairy tub in the market. Creamery is offered more freely. Cheese is in an uncertain position. The demand looked for this month did not materialize. The local trade is easy, at 8 to 9c. per lb. The cold weather has affected receipts of eggs. Prices of new-laid are firmer at 18 to 19c. per dozen, while in the early part of the week they were down to 17c. per dozen. Cold storage and held fresh eggs are about exhausted, dealers quoting 15 to 16c. per dozen, while pickled are worth 15c. per dozen. All stocks are light.

FLOUR AND MEAL.—Trade in flour is very active at present. There is an excellent demand from Quebec province, while some enquiry is coming from the Maritime Provinces. The export prospects are good. Values are steady. In feedstuffs prices are firm and advancing.

GRAIN.—The wheat market has been uncertain during the week, but although prices have been subject to fluctuation, they are about as reported last week. Barley is in fair demand. There is an active demand for buckwheat. Rye remains firm. Oats are in good request, while deliveries are not liberal. Peas remain firm.

GREEN FRUITS.—The fruit season has been on the whole very successful. Until recently there has been little waste in oranges. Recently the weather in Spanish fruit districts has been very unfavorable, and in consequence of frequent and continuous rains it has been found difficult to make shipments. As a result, stocks of Valencia oranges are very low, and new shipments are not expected. The trade must rely upon California seedlings to take the place of Valencias. High freight rates continue to stand in the way of trade in Western fruits, and dealers find they can offer better bargains in Spanish than in California oranges. Of Washington navels the stock is excellent, and an active demand is reported. The season for marmalade or bitter oranges is now opening up, prices are about as quoted last year, while the quality is all that can be desired. There is an upward tendency in lemons, partly the result of increased consumption in the Eastern States, where weather conditions have been very favorable. Bananas are quiet at present, but warmer weather is all that is necessary to stimulate trade. Almeria grapes are about out of stock.

GROCERIES.—February trade is not usually active. However, a fair amount of business is being done, and the movement is thought to be quite up to the season's average. Collections are made with greater freedom than some weeks ago, and reports from retailers indicate a decidedly better feeling in trade. Sugars remain unchanged. Advices from Colombo, January 5th, report that "prices during the month have been irregular, particularly for good medium and common broken Pekoes. Common leaf teas, however, on the other hand, have been well supported, and prices have been generally firm. Quality of teas offered during the month shows improvement." In canned goods the local market remains steady. Prices are well maintained at recent advances. Dealers quote: tomatoes (3 lbs., 1897) at $1.25 per dozen; peas and beans remain at 85c. per dozen, which figure they reached some weeks ago. Vegetable packers are offering here some good samples of evaporated vegetables, carrots, potatoes, cabbage, parsnips, and onions, which it is expected will be found of assistance in catering for the miners' trade. Where the fresh vegetables can be had it is not expected evaporated stock will meet with favor. An extensive trade has been doing in California dried fruits. Jams and marmalades ar in good demand." Advices from Singapore, Jan. 10th, say of the market: "Cloves, small supplies taken by dealers. Coffee—Moderate business at about last quotations. Nutmegs, lower. Black pepper not arriving freely; a moderate business at easier prices. White pepper, firm; a fair business. Rice, firmer; supplies moderate from Rangoon; small from Saigon. Sago, fair contracts in flour at slightly over last quotations. Tapioca, a moderate business near last prices."

HIDES AND SKINS.—No material change in the situation has taken place. Merchants are quoting 9½c. for green cowhides, Toronto inspection. Cured hides are offered at a nominal advance of ¼c. per lb. on the price of green hides. The *Globe* of the 17th inst. said: "The market is weaker and local dealers are looking for a decline of ¼ to ½c. within the next week." While this may be true, and in the interests of tanners, we hope the decline may take place, our reports do not lead us to take the same view. Cable advices received from Europe, February 16th, reported firm markets, with prices in most instances above a parity with those ruling on this side of the Atlantic. A report from Chicago, Feb. 16th, says: Market was firm at unchanged prices. The demand for hides was only moderate, but offerings were small and values were firmly maintained, closing at 11¼ to 11½c. for native steers; 9¾c. for light Texas; 10 to 10¼c. for heavy do; 10 to 10¼c. for butt brands; 9½ for branded cows; 9 to 9¼c. for Colorados; 10⅝ to 10¾c. for heavy native cows, and 11c. for light do."

LEATHER.—But little that is new can be said of the trade. Some enquiries from shoe manufacturers are coming forward for large lots, and the prices mentioned are such that tanners will be able to get out without loss if they do not make a profit. On the other hand, we hear reports of sales at figures which must mean a loss to the producer of the leather. From the centres of trade in the United Kingdom it is reported that "orders for boots and shoes are of much larger extent, but factories are still working only three-quarter time as a rule. There are indications, however, that the aggregate turnover will be above the average. The sales of leathers are very heavy, and stocks generally are light. American red sides, glove and satin hides, as well as fancy French calf skins, are very firm in price."

PROVISIONS.—Offerings of dressed hogs were fairly liberal during the week. Packers were paying $5.75 to $5.80 for heavy hogs, and $6 for light Western hogs, while light hogs from Northern Ontario bring $6.10 to $6.20 per cwt. The increase in offerings this week was to be expected, in view of the decline in the live hog markets. Products are fairly steady. Orders are not large, but packers state that business is in excess of last year's record. The advance in values in the United States is welcomed here. Western packers have been buying hogs at about 2c. per lb. less than Ontario packers, which, offsetting the duty, combined with lower freight rates, gave them an advantage in British Columbia and the western part of Canada. Our packers now feel hopeful of being able to hold this trade.

SEEDS.—Some considerable export shipments of clover seed are reported as having been made during the week, but this movement is pretty well completed. We quote: Alsike, $3 to $4; red clover, $3 to $3.70, and timothy, $1 to $1.75, according to quality. Foreign markets are not unusually interesting.

WOOL.—The local situation remains without change of moment. In a couple of months interest will be taken in the new clip, but until then Canadian markets will not attract special attention. Last week we reported the first series of London wool sales for the year. We are indebted to Messrs. Helmuth, Schwartze & Co., for a more detailed report: The broad result of these sales is a rise of 5 to 10 per cent. on Australian merino wools. Light conditioned and deep-grown Riverina and Queensland profited most by the improvement, and these descriptions, owing to American support were fully 10 per cent. dearer. As much may be said of light bulky broken and pieces, and of bellies, which to the end were in strong demand. In superior Western wools the advance is less marked, though some brands realized exceptional prices. For the bulk of medium and inferior grease wool the rise ranges from 5 to 7½ per cent., heavy descriptions showing it least. The improvement in scoured is similar to that in grease; fine Sydney lots were in special request, but all classes of scoured participated in the rise. Superior fine cross-bred was as favored by the market as merino wool, but the lower classes, though at one time they showed some advance, lost it again, and at the close of the series barely maintained the previous level. Cape wools, especially grease, fluctuated in price to some extent, but on the average a rise of ¼d. on grease and ½d. on scoured can be recorded. The sales, which close very firmly, were largely attended, and witnessed better competition from the Continent than the market has experienced of late. America took also, as expected, not a large, yet a fair proportion, but the chief support of the sales was the home trade, which bought freely throughout. The next series will commence on Tuesday, the 15th March, with a limit of 300,000 bales, the list however, being closed not later than the 11th March. The next available amount will be about 240,000 to 250,000 bales. The commencement of the third and fourth series has been fixed for the 3rd May and 28th June, with a limitation of 300,000 bales in each case.

MONTREAL MARKETS.

MONTREAL, 16th Feb., 1898.

ASHES.—A leading dealer just returned from England, reports a steady decline in the consumption of Canadian potash. in Britain, and looks for only a steady decline in the trade. Business on spot continues dull, with receipts limited, and only about 20 brls. all told, in store. Some few purchases of fair tares of first quality pots are reported at $3.45: seconds are worth about $3.15 to 3.20; and pearls, about $4.75 per cental.

CEMENTS AND FIREBRICKS.—Some further Western enquiries are reported for cement, but spot business continues very dull. Firebricks are wanted in moderate lots. We quote British cement firm at $2.10 to 2.20; Belgian, $1.95 to 2.05; bricks, $17.00 to 22.00 per thousand.

DAIRY PRODUCTS.—The cheese market shows a tendency to more steadiness, but there is really hardly enough doing to gauge the situation, and quotations are more or less nominal at 8 to 8½c. for finest. Butter, too, is very dull; it is claimed that a few parcels of extra fine new made dairy have realized 19 to 20c., but 18 to 18½c. is the ordinary quotation for fine; dairy, 15 to 16½c.; rolls, 14½ to 15½c. New laid eggs are in more liberal supply and are easier at 18 to 19c. per dozen.

DRY GOODS.—Wholesale business in this line may be called brisk at present. Orders keep coming in well, and quite a few Western dealers are writing for the despatch of their spring goods, so that the warehouses show quite a degree of bustle. Some North-West buyers have also been in town making fair selections. Outside the big departmental stores, the city retail trade is dull, in fact in almost poor shape, and it is getting more and more evident that the days of the man of moderate calibre are numbered. Manufacturers' agents, representing French and Bradford dress goods makers, report that Americans are free buyers, and that the market shows signs of stiffening.

FISH.—The market may be said to rule almost quiet, considering that Ash Wednesday is only a week ahead of us, but with the very much modified Lenten regulations now in vogue in the Roman Catholic Church, no very brisk business in fish is looked for as in past years. We quote:—Green cod, No. 1, $3.25 to 3.75; No. 1, large, $4 to 4.25; dry cod, $3.25 to 3.75; No. 1 herrings, $4.25 to 4.50; N. S. salmon, $12 to 13.00; B. C. ditto, $10.50 to 11.00; sea trout, $6.50 to 7.50; haddies, 6 to 7c.; bloaters, $1 to 1.25 per box; boneless cod, 4½ to 5c. per lb.; whitefish, $4.75 to 5.00 per barrel.

FURS.—The week has developed nothing new in this line. Quotations remain as before. We quote:—Mink, large dark, $1.50; small, do., $1.00 to 1.25; marten, $1.75 to 2.25; fisher, $4.50 to 7.00; lynx, $1.00 to 2.00; otter, $1.00 to 12.00 for dark; pale, $5.00 to 7.00; red fox, large, $1.30 to 1.50; small, $1.00; cross fox, $3.00 to 6.00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large. $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7c. to 10c. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

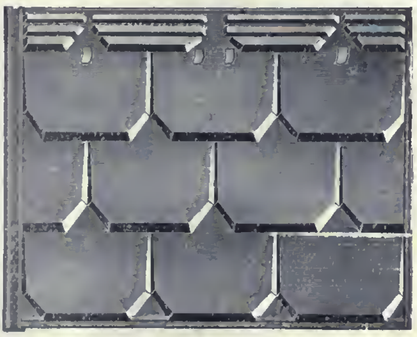
GROCERIES.—The week has been without special feature in groceries. Sugars maintain the slight advance noted last week, and are in a little better request. Quotations for molasses on the island have opened at 8c. first cost; but no cargo orders have been placed by local operators yet, and New York dealers are also said to be holding aloof, apparently in expectation of easier prices. The crop is estimated as a good one, being calculated at some 40,000 puncheons, as against about 37,000 puncheons last year. The improvement in the demand for teas, which was looked for after the middle of January, has not yet materialized to any great extent, and trading between first hands and jobbers is not all of an active character, but stocks on spot are comparatively low, with no more goods available in Japan till new crop, and holders say there is nothing whatever in the situation to cause them to ease off in their firm views. There have been reports of large seizures of low grade teas by the Customs these lack definite confirmation. Coffees are in fair request only, with a rather easier tone to the market. We quote:—Rio, 9 to 10c; Maracaibo, 11 to 13c.; Santos, 10 to 12c.: Java, 25 to 28c.; Mocha, 24 to 25c. Trading in dried fruits is dull, but prices are pretty steady. Sultana raisins are firmer abroad, and Valencias are in quite moderate supply on spot, with stocks exhausted in Denia. Shelled walnuts are advancing, and for almonds firmer prices are being asked.

HIDES.—The market retains all its firmness, though hides now offering are, as a rule grubby. Dealers are paying 9½c. for green, and in some cases 10c. it is said, though rarely getting beyond latter figure for cured from tanners, Calfskins are advanced a cent, and are quoted at 9 and 7c. per lb. for Nos. 1 and 2 respectively; lambskins, 95c. to $1 each.

LEATHER.—There is continued active foreign demand for sole, and the large Canadian tanners are said to be shipping more actively than usual. Values are very firm in this line, quite fair sales being reported of No. 2 manufacturer's at 22½c.; for No. 1 slaughter 26 to 28c. is quoted, and holders are not anxious sellers of large lots. Black leathers do not move actively, but dongolas are moving out well, and the market all around is a strong one. We quote:—Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 26 to 28c.; No. 2 do., 22 to 24c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 20 to 21c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c. harness, 24 to 27c.; bufted cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 13 to 13½c.: polished buff, 11 to 13c.; glove grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

METALS AND HARDWARE.—A sale of 100 tons of No. 1 Hamilton pig iron is reported at something under $16, but in Scotch and other brands there is little movement. Bars are in moderate request; in some quarters it is thought the burning of the large rolling mills in Hamilton may help to stiffen the market. In plates there is a fair jobbing movement. There have been quite a few enquiries regarding opening spring prices, but as yet comparatively few import orders have been placed. Pig lead keeps gradually easing off, and is now cabled at £12 7s. 6d., being a decline of about a pound since the highest advance of two months ago. We quote:—Summerlee pig iron $18 to 18.50; Carron, No. 1, $18; No. 3, $17.25; Ayrsome, No. 1, $17.00; No 3, $16.50; Shotts, $17.25 to 17.50; Carnbroe, $17.00, ex-store; Siemens pig No. 1, none; No. 2 Siemens, none; Ferrona, No. 1, $15.00 to 16.00; Hamilton No. 1, $16.00 to 16.50; No. 2, ditto, $15.50 to 16.00; machinery scrap, $14.00 to 15.00; common ditto, $12.00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates



Shows one Shingle.

How About the Roof

USE OUR CELEBRATED
EASTLAKE STEEL SHINGLES

If you want a thorough, durable protection that is quickly and easily laid—that is weather and lightning proof and will not ignite in case of fire—and that will last indefinitely if given a thin coat of paint once in five years or so.

We recommend them because we know they will give lasting satisfaction.

☞ Send for our Catalogue and read full and practical details.

—Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do, I.X., $3.90 to 4.00; P. D.Crown, I. C., $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2.90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, etc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1.50; three-sixteenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.60 sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 15¾ to 16c. for L. & F.; Straits, 15¼ to 15½c.; bar tin, 16½ to 17c.; ingot copper, 11¾ to 12¼c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montange spelter, $4.50 to 4.75; American spelter, $4.50; antimony, 8 to 9c.

OILS, PAINTS AND GLASS.—The only change in these lines is an advance of a cent in linseed oil. Turpentine rules firm at last revision of prices, and a large operator recently returned from the south, expresses his opinion that prices are likely to go up, basing his belief upon the fact that many of the distillers have had to seek new territory, besides which resin is realizing lower prices, so that manufacturers naturally try to make it up on the turpentine. In other lines there is nothing new. We quote:—Turpentine one to four barrels, 51c.; five to nine barrels., 50c., net thirty days. Linseed oil, raw, one to four barrels., 46c.; five to nine barrels, 45c.; boiled, one to four barrels, 49c.; five to nine brls., 48c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c.; genuine red do., 4½c.; No. 1 red lead, 4c.; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00. Paris green, 50 and 100 lb. drums, 15c.; 25 lb. drums, 15½c.; 1 lb. cartons, 16c.; pound tins, 16½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

WOOL.—The market rules very firm, with moderate orders reported from millmen. The cargo of Cape wool reported some weeks ago as on the way for this market, is now some 15 days overdue at New York. Prices remain as last quoted.

ECONOMICAL INSURANCE COMPANY.

The annual meeting of the Economical Mutual Fire Insurance Co., of Berlin, was held at the company's offices, on Friday, 28th January, 1898, at 2 o'clock p.m.

The president, Mr. John Fennell, occupied the chair, and Mr W. H. Schmalz, the secretary, acted as secretary of the meeting.

The minutes of the last annual meeting were read, and on motion of Mr. Jansen, seconded by Mr. Pabst, were adopted.

The president read the following directors' report:

REPORT.

This is the 26th annual report of your company. An examination of the financial statement herewith submitted shows that the company has had a fairly prosperous year. The volume of business now carried is $13,034,695, being an increase over 1896.

The fire loss during the past year was $81,417, against $91,449 in 1896—a reduction of fully $10,000, which enables the company to add nearly $2,000 to its reserve. This cash reserve fund now stands at $83,958.78, to which we add agents' balances, assessments in course of collection, accrued interest and rent, making the total cash assets (exclusive of Goad's plans) $90,918.10. To re-insure all our risks under both Mutual and Cash Systems would require $60,100, thus leaving our cash surplus $30,818, besides the unearned premium notes, amounting to $189,253, making a total surplus above all liabilities of $220,071.

As a result of the cancellation of a number of re-insurance risks, the cash business for the first quarter of 1897 became reduced by fully $500,000, but this was gradually replaced by direct and better paying business, till the amount now held on the Cash System is $8,394,899, being an increase of $419,123 more than it was at the beginning of last year.

The company issued during 1897, 5,950 policies, the total number now in force being 12,871.

These are divided as follows, viz.:—

In the Isolated branch	$6,224,221 72
" Mercantile "	4,923,933 18
" Hazardous "	1,936,540 74
Making a total of............	$13,084,695 64

It will be observed that this distribution places nearly half our risks in the isolated or safest branch.

While the amount of agents' balances, $10,571, may seem a large sum, it must be remembered that with most of the agents settlements are made monthly, and as the company's receipts are about $12,000 per month, the agents' balances represent only the December business. Most of this sum has since been paid.

Your directors desire to draw attention to a matter that is well known in insurance circles, namely, the number of incendiary fires. Out of 273 fires your company was called upon to settle last year, 17 were believed to be caused by the fire fiend and 77 are charitably classed as "Unknown." Putting these two classes together they form about one-third of the whole number. Many underwriters claim that incendiarism is responsible for fully one-half the fires that occur. For several reasons it is difficult to induce insurance companies to prosecute, single handed, supposed offenders, unless upon the most positive evidence. We would therefore suggest that fire insurance companies should unite in asking the Government to appoint officers charged with the duty of thoroughly investigating suspicious fires. Such action would, we believe, greatly reduce the fire loss throughout the country.

You will be called upon to elect five directors to take the place of those retiring, namely: Messrs. Breithaupt, Jacobi, Merner, Pabst and Snyder, all of who mare eligible for re-election; also a director for a term of one year to replace Mr. Powell, who resigned last year.

All of which is respectfully submitted.

J. FENNELL,
President.

AUDITORS' REPORT.

The president and directors of the Economical Mutual Fire Insurance Co.:

GENTLEMEN,—We beg to report that we have examined the books of account and vouchers of your company for the year ending 31st December, 1897, and that we find the same correct. We submit herewith abstract statements of the company's business for the past year, and of the present assets and liabilities.

J. S. HOFFMAN,
J. M. SCULLY, } Auditors.

Berlin, January 26th, 1898.

The adoption of the report was moved by the president, seconded by Mr. Lang, and carried.

The manager read the financial statement of the year's business, when Mr. Bowlby moved, seconded by Mr. Mackie, the adoption of the financial statement.

The inspector's report was then read, the auditors reappointed, and votes of thanks tendered to the agents of the company and to the directors.

The scrutineers having announced the names, the president declared the following gentlemen re-elected as directors for a term of three years, viz.: C. Pabst, F. Snyder, Hon. S. Merner, P. Jacobi and L. J. Breithaupt, also Mr. Joseph Seagram, M.P., as a director for one year.

A CHEMICAL FIRE ENGINE.

A couple of interesting and picturesque experiments took place on the 8th inst. in a brickfield near Uxbridge Road, with the "Rex" chemical fire engine, an American invention, of which Messrs. J. E. Spagnoletti & Crookes, electrical and mechanical engineers, are the British agents. The "Rex" engine, we are informed, has been in use now in the United States for a quarter of a century, and has met with great success. This is its first appearance in England, and it was examined a few days ago by Commander Wells and other experts. The engine employed—only a hand one, suitable for private use on an estate or in a village—consisted of two aluminium steel cylinders, each of thirty gallons capacity, mounted on wheels, with six loads of soda for each engine, and "Rex" hand extinguishers, two of which accompany each engine, six loads of acid, one hundred feet of one-inch chemical hose and other accessories. The object of the two cylinders is that one may be re-loaded while the other is working, and thus the engine is enabled to keep up a continuous stream of carbonic acid gas. It is claimed that this little engine "will throw over an ordinary house a stream of carbonic acid gas and water forty times more powerful as a fire extinguisher than water alone." The larger engines have a capacity of as many as 200 gallons, and throw a correspondingly higher jet.

A shed 14 feet square, built of wood, faced with tarred felt, had been erected for the purpose of the first experiment, and the shavings and timber which were scattered over the floor were, with the planks composing the shed, saturated with fifteen gallons of petroleum and five of naphtha. As soon as this was fairly alight—and of course the oil and naphtha made a huge flame and smoke—the engine was brought into play, and an ex-fireman of an American brigade, wearing the Bader patent fireman's smoke protector, which is something like a diver's helmet, got close up to the burning building, and in less than a minute got the flames well under control with the expenditure of about twenty gallons of fluid. In another quarter of a minute the shed was almost sparkless. A second experiment with a smaller shed and a couple of "Rex" hand fire-extinguishers, with a capacity of three gallons each was equally successful.—*Insurance Record.*

—An English journal says there is not now one steamer engaged in the Anglo-Indian passenger or freight service that is capable of more than fourteen knots, or 16½ miles per hour. The ordinary rate even of the P. & O. steamers is ten knots. A conference of the leading men in the British carrying trade has been arranged. The more far-seeing among them declare that they must start building twenty-knot boats without waiting until Russia completes the railway through Manchuria.

—The *Insurance Press* tells of a New York woman—Mrs. Catherine Clarke—who has an office on Broad street, and who makes it her specialty to insure the lives of her own sex. "But Mrs. Clarke departs from the usual order of things, and does not go out after her risks, after the manner of men, but advertises in the papers, and women of many classes come to see her in her office. They are coming down town anyway: Mrs. Clarke, by a craftily-worded card in the papers, says she is "at home;" what more natural than that they should call? Mrs. Clarke will succeed; she has hit upon a great scheme to get at a woman; with an afternoon tea-kettle on the brew, her possibilities are unlimited."

50 YEARS The Year 1897 was the **SEMI-CENTENNIAL**

OF THE

Canada Life Assurance Company

ESTABLISHED 1847

President—A. G. RAMSAY, F.I.A.
Secretary—R. HILLS Superintendent—W. T RAMSAY

DECISIONS IN COMMERCIAL LAW.

CERRI v. ANCIENT ORDER OF FORESTERS.—Held, that Cap. 86 of the Ontario Insurance Amendment Act, 1889, does not apply to benevolent societies having an age limit for membership, and where a man, older than the age limit, the misrepresentation of age having been innocently made, was admitted to the society and given an endowment certificate, it was held that the beneficiary named therein could not recover.

CAST IRON PIPE TRUST CASE.—This case ranks in the United States with that against the Trans-Missouri Freight Association in importance as determining the legal status of trusts and trade combinations. The methods of the "ring" were somewhat similar to those which the Parliamentary commission some years ago showed to have existed in Canada. The agreement provided for "open" territory and "close" or "pay" territory, the field was distributed among the members, and prices were regulated. The suit was a proceeding in equity begun by the Attorney-General on behalf of the United States against six firms making cast iron pipe. One interesting feature of the evidence showed that when a municipal corporation or large consumer advertised for tenders, the executive committee decided the price at which the pipe should be sold, and then the contract was auctioned to the highest bidder, others putting in tenders graded higher in order to give the proceeding the appearance of regularity. The very fact of the payment of a bonus is to be taken as *prima facie* evidence that the price was higher than would have been determined under conditions of competition. In the lower court the judge decided in favor of the trust on the ground that it could not be considered a violation of the 1890 Anti-Trust Act, since it did not interfere "directly and substantially with inter-state commerce or commerce with foreign nations." The Circuit Court of Appeals, however, takes a different view, and says that the combination attempted to regulate the trade in cast-iron pipe of thirty-six States, and quotes with approval the opinion of Chief Justice Fuller in the Sugar Trust case, "that in order to vitiate a contract or combination it is not essential that its result should be a complete monopoly; it is sufficient if it really tends to that end and to deprive the public of the advantages which flow from free competition."

QUEEN v. FORBES.—W. P. received money under power of attorney to distribute among certain *cestuis que trust*, including bondholders of a company of which he was solicitor. M. and W. held judgments against the company and obtained orders garnishing portions of the money in W. P.'s hands. Held by the Supreme Court of New Brunswick, on motion to quash the garnishee orders, that the moneys were trust funds in W. P.'s hands, and as such were not liable to garnishment.

—The French Ministry of Finance recently instituted an enquiry to learn the amount of gold in circulation. It has ascertained that there is $800,000,000 worth bearing the French stamp in circulation. This is said by a Paris paper to be a record amount, and that the United States has $720,000,000, Germany, $680,000,000, and Great Britain and Russia $600,000,000 each.

Mercantile Summary.

ONE hears of Klondyke orders wherever he goes. One commercial man writes us that the Brown & Wigle Company, of Kingsville, Ont., shipped ten bales, of 100 lbs., of Klondyke blankets to Dawson City the other day, put up in paper, and canvas waterproof lined.

AT Puslinch, John A. Macdonald, general merchant, assigns to F. H. Lamb, of Hamilton. A meeting of creditors was to be held on 22nd. The liabilities are $2,600, and assets of $2,500, these latter are of a very poor description, and creditors are not likely to realize much.

THE officers of the St. Martin's, N.B., Board of Trade for the coming year are:—Jacob S. Titus, president; Wm. Smith, vice-president; W. H. Moran, secretary-treasurer. The members of the council are: J. S. Titus, Wm. Smith, W. H. Moran, Dr. Gillmour, A. O. White, James Rourke, M. Kelly, A. W. Fownes, W. H. Rourke, A. Wishart, J. B. Hodsmyth, J. P. Mosher, F. M. Cochran.

THE snowstorms of late January and early Feb. have been both inconvenient and expensive for the citizens of Montreal. As many as 1,200 men were at work on one day this month removing snow from the streets, and it is estimated that 200,000 sleigh loads of snow have been removed since the storm. The cost of the removal of snow by the big storm of January 23rd is stated at $52,000, and on Sunday last there was another.

AN Ottawa paper states that Mr. McLeod Stewart will leave for England shortly, on business connected with the Ottawa and Georgian Bay Canal Company. He has been invited to give addresses on Canadian subjects whilst in Britain. He will be before the London Chamber of Commerce on the shortest water route from Chicago to London through Canada. On motion of Mr. Clemow, of Ottawa, the Senate has appointed a committee to examine the canal scheme.

FOR a dozen years at least, C. M. Foley has been a well-known lawyer in Paris, Ont. And he has long been entrusted with large sums of money by the confiding business men of the town and vicinity. These sums he guaranteed to invest in loan companies on the best terms. A week ago Mr. Foley was arrested on a warrant sworn out by Philip Whelan, charging fraud and misappropriation of $1,000. Since then six or eight other informations have been laid on the same charges. The magistrate required $10,000 bail, which Foley was unable to furnish, and on Saturday last he was committed to gaol. His defalcations are estimated to amount to $50,000 or $60,000. Bogus mortgages appear to have been Foley's specialty, and clients who felt secure because having the papers in their possession now find the documents valueless. Seven of the charges made against him now are for criminal breach of trust, for which the penalty is fourteen years.

Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers,
262 West Broadway, New York.

Mercantile Summary.

IT is about a year since J. D. Aaron began to trade as a general dealer, at Wabigoon, in new West Ontario, with a stock of $700, which had been bought for cash. Formerly he farmed at Brandon, but had little, if any, experience in storekeeping. He has more now. And he has assigned.——A bailiff is in possession of W. A. Johns' premises, at Wingham, under power of a chattel mortgage.——Hamilton Smellie, dry goods dealer, at Hepworth, whose troubles we noted last week, has since assigned.

As a presage of the great business expected by the steam and sail carrying trade of the Great Lakes next summer, the following saying of a prominent man may be quoted: "I have never seen the time during my connection with the Detroit Dry Dock Co.," says Gilbert N. McMillan, "when the amount of business in sight was greater than it is at present. Alike to everybody else, we are, of course, working on small margins, but there is a great deal of encouragement in a large volume of business."

DRAW a line on the map from Montreal down through New York City to Norfolk, Virginia, thence west through Cincinnati and Louisville to Cairo, on the Mississippi, northeast to the south end of Lake Michigan. All the territory thus enclosed, including all places on the southern peninsula of Michigan and all Ontario west of Toronto and south of Sault Ste. Marie, is territory to which the Merchants' Association of New York have secured reduced fares for purchasers at their spring trade conventions.

IN 1868 Wm. Willard opened a general store at Taunton, in Ontario County. From there he moved to Raglan, in the same county, in 1882, and about five years later he was burnt out, when he was obliged to assign. Then his creditors wrote off 25 per cent. of what he owed them. Long afterward, namely, in the fall of 1889, he opened another store. But four years later he found himself involved and was obliged to assign, with liabilities of $8,000. Since then he has been trading under cover by the name of Willard & Co., but with no better success. Now he makes his third assignment. Will he be allowed the opportunity of repeating it?

THE London Furniture Co., London, finds itself somewhat embarrassed at the first of the year. A few days ago a meeting of shareholders was held, and they decided to have a careful inventory of the stock made, and all unfinished work completed as soon as possible. Their liability is about $85,000, including $20,000 due their banker, which is secured by real estate and lumber on hand. For some time past it is believed that the business has been unprofitable, and their manager left about a month ago owing the company $3,000 ——After being in the drug business in Oakville about seventeen years, Rob. C. Balmer has assigned. Unfortunately for him, the business has not had for some time the attention it deserved. At one time he stood well with his creditors.

AT a meeting of the Quebec Board of Trade council, a letter was read from a man in London. England, asking if ice could be exported from Canada to England for the next season, as owing to the mild weather in Norway, the ice harvest in that country is in a critical condition. Reply was made that the application came too late in the season for ice merchants to export to that country. If ice were wanted in England, and applications for consignments were addressed early in the season, several ships could be ready to sail in the spring with cargoes of ice.

WITH reference to the interesting announcement of the Grand Trunk and Wabash railway arrangement, made last week, Mr. J. S. Richardson, the local agent of the latter road, tells us that his road is making great preparations for rapid passenger transfer between Chicago and New York. The Wabash having arranged for the use of the Glencoe air-line track of the Grand Trunk in West Ontario peninsula, it will be put in good shape for traffic by the use of heavier rails. It may be said, too, that this is a good deal for the Grand Trunk, bringing grist to its mill, while utilizing actively a portion of its less-used track.

A CHARTER has been granted to W. N. Eastwood, S. G. Beatty and others, to purchase the general store business of W. N. Eastwood, at North Bay, under the style of The North Bay Supply Co., Limited, with a capital stock of $24,000.——The Dundalk Woolen Mills Co. is also incorporated with a capital stock of $20,000. The first applicants for the charter, W. H. Peterson, woolen manufacturer, Dundalk; E. Mount Castle, T. Bolen, and Samuel McDowell.——J. D. Moore, of St Mary's, has disposed of his produce and manufacturing business in that town to a company that will operate it with a capital stock of $90,000, under the style of the J. D. Moore Co., Limited.——The wire and brass manufactory of George B. Meadows, in this city, will in future be operated by a joint stock company, with a capital stock of $20,000. The style of the business is to be the George B. Meadows Iron and Brass Works Co., Limited.

ON Saturday last a meeting of creditors of the Midland Trust Company, which had been called by a committee formed the previous week, met in a room of the town hall, Port Hope. The room was crowded. Mr. Thomas Long was appointed chairman, and Mr. W. T. R. Preston addressed the creditors at some length. The following resolutions were then submitted and carried: "That (1) this meeting request the assignee to call a general meeting of the creditors in the town hall two weeks from to-day, at two o'clock, for the transaction of general business." (2) "That a committee consisting of Messrs. John Wickett, Thomas Long, Capt. Hanning, F. W. Wilson and the mover be appointed, with power to add to the number, with authority to secure an independent opinion of the right of the estate of the late Thomas Paterson to rank on the estate of the Midland Trust Company, with full authority to call for papers and evidence as to the position of the said accounts, said opinion to be presented, if possible, at a general meeting of the creditors to be called by the assignee on Saturday, March 5, the cost of such examination not to exceed $250."

WHOLESALE TRADE ONLY SUPPLIED

Mercantile Summary.

RUNIANS & BUTLER, departmental storekeepers, London, whose troubles we noted several weeks ago, are offering creditors 70 per cent. on liabilities of $85,000, which will be accepted if properly secured. They claim to have a stock of $99,000.

A SMALL failure is reported in the manufacturing shoe trade at Montreal, namely, that o J. & T. Stephens & Co. They were unsuccessfu before in 1895, but resumed business in partnership with their former foreman. The present liabilities are about $7,000 direct and $6,000 indirect.

OTTAWA has a new fish company which will conduct its fishing operations in the inland lakes and Atlantic ocean, and have Ottawa as a distributing point for both fresh and salt water fish. The capital stock of the company is $20,000, divided into shares of one hundred dollars each.

A. H. BAKER, general storekeeper, at Rosebank, Man., has assigned after five years in business. Lately he has been slow pay and several of his creditors have sued him.——Messrs. Houghton & Bennett, general dealers at Rossland and Trail, B.C., have assigned. In October last they claimed a surplus of $2,000 over liabilities of $5,000.

THE Board of Control of Ontario fruit experimental stations is preparing an encyclopædia of information about all known Canadian fruits, which, it is expected, will occupy the same place in Canada that Downing's Fruit and Fruit Trees of America does in the United States—a standard work. The work will take years to complete, and is being published in sections, three being now issued.

ENERGETIC efforts are being made in connection with the projected bridge across the St. Lawrence at Quebec. Various citizens are canvassing for subscriptions, and there is now $200,000 subscribed by 195 shareholders. The required machinery for the test boring is expected from New York daily, and the work is contracted for by a Brooklyn firm. Mr. J. D. Guay, president of the Chicoutimi Pulp Company, according to the *Chronicle*, has his name down on the list for 500 shares.

DURING the past ten years Mrs. Elizabeth Sweet has been carrying on a millinery shop at Alvinston, where she barely made a living. Lately one of her creditors sued her for $600 and she makes an assignment.——In March, 1894, John Armstrong, grocer in Peterboro, assigned, and his creditors accepted 25 per cent. of what he owed them. About two years later he again assigned, and then succeeded in buying the stock back for 45 cents in the dollar, and mortgaged it to pay the amount necessary. Now we hear he is again in trouble and his store has been closed.

THE Toronto Retailers' Association has decided that departmental stores are not the only grievance which must be remedied. Among the things which the association proposes to take up are a change in the postal regulations, legislation to prevent false and fraudulent advertising, and a change in the Adulteration Act. They would also agitate the desirability of making Toronto a first-class summer resort, and would endeavor to secure a first-class hotel for tourists. The question of placing more seats in the squares, parks and church property, so that visitors coming into the city to shop and see the sights would have some place to rest, is also to be considered. They will also agitate for cheap locations for manufacturers.

CITY OF WINNIPEG
DEBENTURES.

Sealed Tenders marked "Tender for Debentures," addressed to the undersigned, will be received at the office of the City Comptroller, City Hall, Winnipeg, up to 3.30 o'clock p.m. on

Saturday, 9th April next,

for the purchase of $306,117 of City of Winnipeg debentures, as follows :—

LOCAL IMPROVEMENTS.

$25,307, running 7 years, with interest at 4 per cent.

$124,907, running 10 years, with interest at 4 per cent.

$37,053, running 15 years, with interest at 4 per cent.

$25,350, running 20 years, with interest at 4 per cent.

STRAIGHT CITY.

$27,500, running 35 years, with interest at 4 per cent.

$66,000, running 40 years, with interest at 3 per cent.

Of the local improvements $53,952 is for the city's share of the cost, the remainder being for the property owners' share, and guaranteed by the city.

Principal and interest (half-yearly), payable at the Bank of Montreal, Winnipeg,

Purchasers to take delivery in Winnipeg. Any accrued interest to be added to the purchase money.

Tenders may be for the whole or part. No tender necessarily accepted.

Further information desired can be obtained from the City Comptroller.

H. WILSON,
Chairman Finance Committee.
Winnipeg, Man., Feb. 11th, 1898.

Mercantile Summary.

VANCOUVER, B.C., advertises that twenty-six vessels sail from that port to northern points between Feb. 16th and March 31st. "Northern points" is good.

THE first Canadian Pacific through train from Montreal since Monday, arrived in Toronto at 8.30 on Wednesday. The snow is extremely deep.

A NEW town council is discussing the question of sewerage for Aylmer, Que., in earnest. They have several schemes planned out for beautifying the town, which, if carried into effect, will add greatly to its appearance.

THE Imperial Dry Goods Co. is organizing for the purpose of carrying on a general dry goods business in Winnipeg. They are to take over the business of Dunwoody & Steen and occupy this firm's premises.

IN response to a request from Mayor Shaw, of Toronto, the city council of Ottawa will send a deputation to Toronto on March 3 to assist in resisting the granting of the application to Parliament of the Bell Telephone Company, asking permission to increase its charges.

RECENT disclosures, says the Winnipeg *Price Current*, show that smuggling has been carried on to a large extent by the Mennonites on the reserves in Southern Manitoba. Tobacco, coal oil, and numerous other articles have been brought in in large quantities, duty free. The authorities are investigating.

ACCORDING to information which has reached the Fisheries Department, the catch of salmon trout on Lake Ontario during the past year has been better than for many years. Fish ranging up to 20 lbs. in weight have been caught. The herring industry is, however, said to be decreasing. The catch of white fish has been good, although somewhat irregular in its character.

TAYLOR & Co., dry goods, Kingston, Ont., reported in our last issue as embarrassed, have now assigned to Mr. T. D. Minnis. The liabilities are stated at $13,500, and apparent assets of $13,000.——W. J. Bradley, also in the dry goods line, at Brockville, is reported as compromising at 75 cents, on liabilities of about $10,000. He began on small capital in 1892, and has been regarded as a supply account of some Montreal or Toronto house.

THE people of Vancouver, B.C., are making a very energetic attempt to divert the outfitting trade from Seattle to the Terminal City. A. B. Diplock, a well-known business man of Vancouver, has been deputed by the board of trade to act as representative in Seattle, and has opened an office there. Although, says a local paper, this has not won for Mr. Diplock the best feelings from Seattle's business men, he has not had to use his remarkable physical powers and athletic training, which were not the least of his recommendations for the position.

THE annual meeting of the Association of Ontario Land Surveyors opened at the Parliament buildings, Toronto, 22nd inst., and was adjourned to March 8th, when the usual business of the meeting will be proceeded with. At the recent meeting of the Board of Examiners the following candidates successfully passed the examination for admission to practise, and were duly sworn in as land surveyors for Ontario, viz.: Wilbert Silas Gibson, Willowdale; John James Newman, Windsor; William Butterton Ford, Hamilton; Jas. Nevin Wallace, Hamilton; James Samuel Dobie, Port Arthur; William Arthur McLean, Toronto; William Walter Meadows, St. Thomas; Franklin Joseph Robinson, Middlemarch; George Laing Brown, Morrisburg. J. Herbert Jackson, of Windsor, passed the preliminary examination.

IT is reported that a deputation will leave Winnipeg for Ottawa shortly, to protest against any duty being imposed on lumber coming in from the States. The matter is creating considerable interest throughout the Province."

PAPERS were brought down at Ottawa on the 22nd respecting the offer for a direct steamship line between Canada and France. The company, for a yearly subsidy of $100,000 from the Dominion and a similar amount from France, will make 12 voyages between Boulogne or Dunkirk and Montreal in summer and Halifax in winter. The vessels, which will fly the French flag, would have a gross tonnage of 4,000 tons and a speed of 12 knots. Failing a cash subsidy, the company asks a guarantee of interest at 5 per cent. on a capital of $6,000,000. There is evidently nothing small about them.

AGENCIES WANTED

A man with good references and security wants agencies for Fire and Life Insurance Companies, also Loan Companies, Rat Portage District. Address

"K. C." Box N, Rat Portage

TO MANUFACTURERS!

The advertiser is prepared to invest say from $15,000 to $20,000 in a satisfactory Canadian manufacturing enterprise, and to take an active part in the business management of the same. An established business preferred.

Address "A. M. R."
Box 16, Monetary Times
Toronto, Feb. 22, 1898.

REAL ESTATE LOAN CO'Y
OF CANADA, LIMITED

The eighteenth annual meeting of the Company took place on the 2nd inst., and was well attended. The statement showed the following :

ASSETS

Loans on Mortgages, etc.	$421,412 02
Real Estate vested in Company	63,019 72
Office Furniture	100 00
Due by Bankers	12,153 60
	$496,685 34

LIABILITIES

To the Public :		
Open Accounts		$ 259 33
Debentures and Interest		42,778 95
Total due to the Public		$ 43,038 28
To Shareholders :		
Shares fully paid	$322,440 00	
Shares 20 p.c. paid	51,280 00	
Total Capital paid		$373,720 00
Dividends payable		7,521 76
Surplus, being composed of Rest, Contingent Fund and Undivided Profits		72,405 30
		$196,685 34

Several questions were asked as to the system of keeping the books and the general working of the company, which were all satisfactorily answered. One feature of the meeting was a statement congratulating the shareholders who held partially paid shares that they did so virtually without responsibility of any kind, as the liabilities of the company were trifling in amount, and could be paid off on a day's notice, if necessary or desirable.

The Board were unanimously re-elected. It consists of John Smart, Port Hope, President; William Cooke, Toronto, Vice-President; Dr. M. H. Aikins, Burnhamthorpe, and Rev. Dr. Moffat and Hugh Miller, Toronto.

Mercantile Summary.

ACCORDING to the *Free Press* of last Saturday, the Winnipeg real estate market has not been in such a healthy state since 1882 as now. Several large transactions have been recorded since the 1st of January, and quite a number of deals are pending. "The investments being made are nearly all in property within the business portion of the city. Building also promises to be unusually active this year."

A MEETING of the creditors of J & R. Young, an important firm of general dealers and fish merchants at Tracadie, N.B., was held a few days ago, when they submitted an offer of 30 cents in the dollar, cash. This figure was considered altogether inadequate, even allowing for heavy depreciation on real estate, fishing gear, etc., and the estate will likely be put into insolvency. Their general liabilities are $27,750, and $14,500 indirect to the Bank of Montreal, and they show assets as follows: Real estate, $21,200; stock, $6,700; fishing gear, $6,800; accounts receivable, $7,948.

THE spring millinery season of 1898 will be officially announced to have begun next week, when the Toronto and Montreal wholesale warehouses hold their semi-annual openings. Extensive preparations have been made for the trade, and it is safe to predict that neither the retail trade nor the public will be dissatisfied with the goods that have been purchased in the centres of fashion for their approval. An important feature in Toronto circles is the change in quarters made by S. F. McKinnon & Co., situated on York street, near the Rossin house. This firm, with its commodious new warehouse, is sure to be among the first visited by purchasers from the country. Not only millinery, but ladies' capes and jackets are handled by this house, and in both branches of business the goods are fashionable, and the stocks complete.

PIERRE TEDI, an Algerian, who, with his wife, did a sort of peddling business, settled down in a little grocery and confectionery business at Papineauville, Que., three years ago, has had to assign.——A voluntary assignment has been made by O. R. Fagnan & Co., grocers, Sorel. Mr. F. only began business in '95, failed in '96, resumed under cover of a brother's name, and is again in the toils.——O'Meara & Hodgins began business at Quyon, in 1887, with fair prospects, and seemingly did well for a time, but they credited over liberally, and have been found slow for some time past. Their failure is now announced, and assets are said to largely consist of poor book accounts.——A carriage-maker at Coaticooke, J. B. Bourque, has assigned to the court on demand of Gravel, Duquette, & Duhamel, wholesale carriage supplies, Montreal. He owes about $1,500.

THE present week has witnessed unusual snowfalls over Quebec and Ontario generally. In the neighborhood of the Canadian lake cities and towns, snow has been falling gently, but almost constantly, for several days and nights. It is hardly so deep, however, as to prevent travel, though it has hampered the railways. Montreal and Quebec city are burdened with deep snow. Our correspondent in Montreal says that the movement of goods has been notably affected by the heavy storm which set in on Sunday, and which has proved the severest of the winter in its effects, travelers being reported completely blocked in their movements for several days, and country traffic in some districts quite impossible. There are indications at the moment of writing—Wednesday night—of a thaw, which is badly needed to settle the snow, and so lessen the chances of its further drifting, which with the present heavy snowfall, would be as bad as another storm.

FROM Montreal is reported the suspension of Caverhill, Hughes & Co., one of the few English houses remaining in the wholesale grocery trade of that city. Mr. Hughes, the only present partner, has been confined to his bed through sickness, for the past six weeks, and much sympathy is expressed for him. The house was originally established, some years ago, as a branch of a Hamilton concern, under the style of Turner, Rose & Co. The firm subsequently become Caverhill, Rose, Hughes & Co., but Messrs. Rose and Laflamme, two of the four partners, retired about five years ago, the net returns being insufficient for so many, and the business was continued as Caverhill, Hughes & Co. A year ago last December, Mr. Caverhill withdrew, leaving a portion of his capital in the business, and he is the principal creditor now. A formal assignment has not yet been made, and figures of liabilities are not obtainable at the moment.

THE country districts of Quebec Province furnish the following quota of failures this week: F. W. J. Glasscock, general merchant, Marbleton, found it necessary a year ago to get 15 months' extension. He apparently has not been able to complete payments, and his assignment to the Court is reported. Liabilities are stated at $9,000.——J. D. Levasseur, doing a general trade at Riviere Blanche, in the Rimouski district, has become embarrassed and slow, through overstocking. He lately approached his creditors for an extension, but has now assigned, and is said to owe $6,400.——L. P. Beaudoin, in a small way of business at Grand River, Gaspe, has written his creditors, proposing a settlement at 35 cents, which they do not favor. About $1,500 covers his indebtedness.——Ulysse Bail, formerly Bail & Sabourin, general merchants, West Shefford, has been attempting a business beyond his capital, and has been calling on his Montreal creditors to get their signatures to a deed of compromise, at the rate of 60 cents on the dollar. He is said to owe $15,000, with nominal assets of about $14,000.——Another aspirant for a compromise settlement is E. S. Gleason, grocer, etc., at West Brome, formerly a clerk in Montreal, who opened store two years ago. He wants creditors to accept 25 per cent. of their claims, which amount to about $2,000. He has stock of about $1,000, and no book debts, having sold for cash principally, and creditors think he should explain how the deficiency arises.——The assignment is reported of Francoeur & Son, dry goods merchants, Coaticooke. They took over, in 1895, a business owned by a Montreal wholesale firm, which had been run as the "Bankrupt Stores Company."

Debentures.

Municipal Debentures **bought and sold,** also Government and Railway Bonds. Securities suitable for investment by Trustees and Insurance Companies and for Deposit with the Government, alwsys on hand.

GEO. A. STIMSON & CO.,
24-26 King St. West, Toronto, Ont.

Cents BURN EASILY

as dollar bills when you buy good coal, make steam, and then blow it out of unprotected outlets. You save every drop of waste oil. Why don't you save steam, too?

The "Heintz" Steam Trap

saves every ounce of steam. Is quick acting and positive. Works on mechanical principles —not on faith or theory.

The smallest size discharges one gallon of water per minute; the largest 240 gallons per minute, and not a puff of steam lost.

Saves its cost every month.

Managing Director The Wm. Davies Co.
Director Canadian Bank of Commerce.

The Toronto Globe, in referring to the first three months' business of the Company, said:

"It was generally known by those in the business that this new aspirant had secured a fair share of the new insurances taken out in the last three months, but it will be a surprise to nearly all to hear that the applications received amounted to over one million and a quarter of dollars, of which more than one million were approved and policies issued. This phenomenal record—for such it really is for a new company—compares favorably with the business of the older and progressive life insurance companies of the Dominion, and considered in the light of the character of the business, gauged by the large average amounts of premiums and policies, it is quite safe to say that the record is unparalleled in our country."

THE SITUATION.

If the disputes between railways, such as are now going on between the Canadian Pacific and other trunk lines, meant continued competition, on a reasonable level, the public would have reason to rejoice. But it is a fight for something else than the lowest maintainable competitive rates. The declaration of war came from the C.P.R., and the American roads reply by assuming to throw that company out of the Immigration Clearing House, that is, shutting it out from any immigration traffic at Boston and New York; whether the exclusion can be made effective is, it seems, an open question. From the side of the C.P.R., and from the side of the American roads, come charges of bad faith in connection with the carrying out of bargains for the division of traffic; each accuses the other of doing the unfair thing; and it is not unreasonable to suppose that both tell some of the truth, if they conceal more. The complaint of cutting of rates is heard on both sides; this practice is alleged to have gone so far as to embrace transatlantic lines. The C. P. R. alleges that things got so bad that it was obliged, in self-defence, openly to cut rates, for if it had appealed to the Board of Arbitration it would have been outvoted fifty to one. The C. P. R. had been allowed to charge differential rates, but when the Klondyke traffic loomed large, the American competing lines cut their rates to, they say, a level with the hitherto permitted differential of the C. P. R. The struggle is for this Klondyke traffic, which promises to be large. This traffic is creating all sorts of complications on the Pacific coast as well as overland.

A few days ago it looked as if France and England might come into collision in the neighborhood of the Niger, in West Africa. On the 5th April, 1890, a treaty was entered into between the two countries, which limited the sphere of French influence, east of the Niger, by a line drawn from Say, on that river, along 13° parallel to Lake Chad. News came that armed Frenchmen had overstepped this limit and were in danger of coming into collision with armed Englishmen. The French government has apparently found a way out of the difficulty by denying that any armed Frenchmen are in that region; though it has been suggested that the form of the denial is not free from ambiguity, since France may mean to contend that the place where the intruders are alleged to have been seen is not within the sphere of British influence. It is not enough that a line of division is drawn in a treaty; commissioners must adjust the details to the topography; and when it comes to this, France always pursues a dubious policy. Under the treaty of Utrecht, she prevented the actual division being made between Canada and the Hudson Bay Territory; and at a later period, before the conquest, she managed to consume six years over the boundary of Acadia, without reaching a conclusion. It is evident that she is playing the same game in West Africa; in which case, commissioners of the two countries met, at Paris, in 1896, but no agreement being come to, they came together again last year and are still sitting. It seems that conflicting treaties have been made by the natives with both countries; but that could not affect the treaty agreement between France and England.

Mr. Hamilton Smith, who represents a New York company and talks a good deal about the Rothschilds, in a letter to Sir Wilfrid Laurier, offers on behalf of his associates to build a railway from the Lynn Canal on the Dalton route, 288 miles, for a subsidy of 1,000,000 acres of land. He makes it a condition that no other railway from the Lynn Canal be authorized within the year, and that he be authorized to charge "proper traffic rates." He also offers to build a railway by the Stikine-Teslin route for a subsidy of 2,000,000 acres. He claims, on the basis of Mr. Jennings' report, that the provisional contract let to Messrs. Mackenzie and Mann will absorb 4,500,000. If Mr. Smith be in earnest he should have made his proposal in a formal way before the provisional contract for the Stikine-Teslin road created the actual complications.

By forced sale of the Kansas and Pacific Railway, the United States Government recovers the original amount of its loan to that corporation, but loses in the shape of interest a larger amount than it recovers. The incident emphasizes the difficulty of a Government recovering the amount of a loan to a corporation without loss. The alternative was for the Government to have bought the road, which course was advocated by those who favor the nationalization of railways. The nationalization of railways in the Republic would be an extremely difficult operation; though, if the experiment were worth trying, the forced sale of some of the great roads would have offered a favorable opportunity. In the absence of such forced sale it would be nearly impossible to fix the price. There is a fear, no doubt well founded, that the patronage of administering railways by the Government would be specially liable to abuse. There are abuses of another kind growing out of corporate ownership, and the only thing to do at present is to strike a balance between the two classes of evils and accept the least objectionable method. In Canada the Government gives bonuses to private persons undertaking railway construction, instead of getting a claim for the return of the capital. Of all the methods in vogue, in different parts of the world, this is surely the worst, and will by posterity be so classed.

From expressions dropped by members of the Government, during the debate on the Klondyke railway, it is uncertain whether the royalty on lands other than those to be granted to the railway company will be lowered. The discrimination—ten to one—is practically prohibitive on other lands than those which are to go to the company. What is the reason of this discrimination favorable to a private company and adverse to the great body of the people? Is the object to keep competitors for mining lands out of the field till the company has made its choice? Whatever the object, the discrimination will decrease the difficulty of collecting the royalty, on account of its unreasonableness.

No impartial person can view the continued depreciation of the Klondyke gold lands, for which the railway company has bargained, without amazement, the more especially as it is chiefly indulged in by official personages whose object is to defend the bargain. Messrs. Mackenzie and Mann are represented as little better than ninnies for having entered into what is described as the wildest of wild speculations. Undoubtedly, there's a large speculative element in the deal; but what are we to think of making a bargain of this kind toward which, when it has been made, one of the parties thereto acts as if it desired to defeat the floating of the scheme? Admitting as we have done, from the first, the large speculative element in the deal, we think the odds in the gamble, as it is called, are against the Government, decidedly, not to say largely. The contractors are to get 3,750,000 acres of lands, which may, and, by the estimates of the Government officers, do contain untold wealth. The whole world is anxious to take part in mining ventures in the Klondyke. The chances are that the lands which the company are to get could have been sold for several times the amount of the contract; and if this be so, the Government by becoming a party to the "gamble," will cause the public to lose the difference. Messrs. Mackenzie and Mann, private persons, were at liberty to gamble as they listed; but the Government, as trustee for the people, is in a different position, and is not authorized to gamble with stakes belonging to the public. Its business is to know what it is engaging the public, beforehand, to pay; to pay a reasonable price for what it gets, but not a price which may prove to be ten times the amount of the value it is getting.

The urgency of the Klondyke case will be admitted by all reasonable people. It was necessary to provide some speedy and expeditious mode of getting to that gold region. There is ground for complaint that decisive steps were not taken sooner to meet this necessity, but the business having been delayed till within a week of the meeting of Parliament, the reason for acting without the authorization of that body could no longer be pleaded. Parliament would, in six days, meet to express its own will, and it was scarcely worth while to anticipate its action at this late stage by an act of executive volition, when nothing was to be gained, in point of time, by the unauthorized contract. If such action could ever be justified, it would have been when the meeting of Parliament was unavoidably far off, and a great gain in time and construction would be made by immediate action. Parliament, under the circumstances, can scarcely consider the contract on its merits; practically its only function is to assent to a bargain already made. Meanwhile the contractors have no guarantee that the contract will be condoned by Parliament, and the delay must paralyze their efforts both in floating the scheme and in construction.

A RAILWAY PROPOSAL.

Once more the bonus beggar is knocking at the gates of Toronto. While the city need not object to the building of a railway from its borders to Sudbury, it has not such an interest in the undertaking as would justify the corporation in granting pecuniary aid thereto. If the Canadian Pacific Railway Co. intend to build the road, they are welcome to do so. They will not build this road for the accommodation, convenience or profit of Toronto; but because they think they can make it commercially profitable. After all the millions which Canada has given in aid of the C.P.R., its chief officer, a few days ago, argued that the business of the road must be conducted on purely commercial principles, and could not in any way prefer Canadian traffic to foreign. An independent or non-subsidized road would have a right to use such language; but we submit that the C.P.R. which is to a large extent a creation of the public resources of Canada has not that right.

That the proposal to build a railway from Toronto to Sudbury has in view solely the commercial interests of the C. P. R, does not admit of question; and now, when the company asks Toronto for a subsidy, is the time to remember that the habit of that company, when it has got all the subsidies it can, is, on fitting or unfit opportunity, to remind its benefactors that it acts wholly on commercial principles. If we run railways on commercial principles, we may well require that they shall be built on the same principle. Commerce deals for equivalents; bonus beggars exchange indefinite and often unmeaning promises for hard cash. It is a sort of confidence game, by which public money is too often conjured into private pockets.

Whatever may be the merits of the dispute which ended the arrangement for an exchange of passenger and freight traffic to and from North Bay, between the C.P.R. and the Grand Trunk, the fact stated by Manager Hays that "the Grand Trunk has been and is now quite willing to submit to disinterested, competent arbitration the points at issue," puts on the C.P.R. the responsibility of making the rupture final. If the old arrangement was unfair, arbitration would give the opportunity of curing the evil. In declining that arbitration, as it had a right to do, the C.P.R. doubtless did so in view of the probable construction of a railway from Sudbury to Toronto, which it believes will be more for its own advantage. The starting points of the two roads are far apart, though the lines converge to a point at this city. The road will create some traffic for itself, and cannot fairly be objected to as unnecessary paralleling. Let us begin on commercial principles, for there we shall end, no matter how many bonuses are given and how many shadowy promises are made.

FINANCIAL REVIEW.

We give below a condensation of the figures of the statement of Canadian banks for the month of Jan. 1898. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, &c.

CANADIAN BANK STATEMENT.

LIABILITIES.

	Jan., 1898.	Dec., 1897

The last banking return, given above, presents no features that are unusual at this time of the year. Circulation has decreased about $3,000,000, which is quite usual, and is nearly the same amount as that by which it was reduced last year. But the total is still $5,000,000 in excess of the circulation of 1897. This excess has been already touched upon in our review, and nothing further need be said about it at present. Deposits also have decreased by about the same amount that they decreased in the same month last year. But they are nearly $30,000,000 in excess of the amount in January, 1897, and deposits, along with circulation, are now far in excess of the loans and discounts of the banks; so that, speaking as a whole, the total of the loans and discounts of the banks are provided without touching upon their capital. This is generally the case in the banks of England and Scotland, and it is evident that year by year the banks of Canada are slowly approximating to the condition of their confreres in the United Kingdom. This aspect of things has a pertinent bearing upon the amount of capital necessary to carry on banking operations in this country.

At one time it was supposed that a large capital was needed to enable a bank to do such an extended business as the nature of Canadian banking called for, inasmuch as advances are required over widespread areas of territory, and, in certain lines of business, invariably for a considerable time. Consequently, all the leading, older banks were organized with a large paid-up capital, which in one instance was increased year after year until it became in respect of capital paid up, by far the largest banking corporation on this continent. And there are several others whose capital is quite equal to that of the largest institution of the United States. It was supposed also in former days that a large capital would ensure the stability and safety of the institution. This latter idea was entirely dissipated by the failure of two of the banks with very large capital, viz., the Bank of Upper Canada and the Commercial Bank of Canada, Kingston. And now, in the progress of events, it is being found that banks with a much smaller capital than was formerly thought necessary, are able to do a widely extended business. It must be confessed, however, that it is quite possible for bankers as well as merchants to spread themselves out too widely and contract liabilities at too many points for safety. In times of ease and prosperity no harm may come from such a course; but in times of difficulty, tightness of money, and general impoverishment such as occur at intervals, this course, undoubtedly, will be fraught with danger. The experience of banks in Scotland and England is sometimes quoted as a proof that branches may be extended almost indefinitely with safety; but the conditions there are almost diametrically opposite to ours in two respects. The conditions of business are very much more safe in the towns of England and Scotland than is the case here; and in addition, the country is so thickly inhabited that none of a bank's branches are more than a few hours away, or a night's journey at most. But in Canada, branches are being established which are more than a week's journey from headquarters. Under certain conditions this may be found at some future time to be a source of great inconvenience.

But with the larger banks, the question is one of the difficulty of making profits commensurate with the large amount of their capital. The dividends of Canadian banks are generally on a lower scale than those of England and Scotland, and Canada, undoubtedly, suffers by comparison in this respect. At the same time, we have reason to congratulate ourselves on the stability of the system as a whole, and on its admirable adaptation to the circumstances of the country.

KLONDYKE GOLD FIELDS.

The recent arrangement by which the Canadian Bank of Commerce is to be the banker of the Government in the Yukon District is a natural and reasonable one, under the circumstances. If the business of the Government is to be done with more banks than one—and it has been so done for some years back—there is no reason why the largest of the Ontario banks should not have a fair share of Government business. As to what business there will be for the bank to do it is impossible to say; and still more what profit may be made to the bank in doing it. Banking in a region so inaccessible and distant will not be unattended with danger, and must certainly be carried on at great inconvenience, until a telegraph system is established and regular communication inaugurated by rail and steamboat, together with express agencies for the transmission of money.

One may imagine that banking in such a region as the Klondyke will not be very attractive for bank officers. There are some curious stories told of the early days of banking in the Australian gold fields and the adventures of managers in riding, heavily armed, across country with parcels of money in charge. But the Australian gold fields were close to the great centres of population, while in the Klondyke the bank might be robbed, and its officials turned out in the street a month before anything could be heard of it. All this will disappear in time, but until such communications are established, the days of romantic adventures in gold fields may return again.

But quite apart from the actual banking of the gold-bearing region the development of business in other parts of Canada connected therewith appears likely to be very great, and possibly, enormous. Calculations as to the supply necessary for the men that are going, run up into scores of millions; all which will surely bring business to banks which are in the way of it, and should add to their profits somewhat. Already there have been large purchases of supplies of all kinds in eastern cities, although it is much to be regretted that too much of this business is going past the principal cities of British Columbia.

With regard to the route, without going at all into politics, we think there can be no question that a line is desirable that both starts and ends in British territory. It is unfortunately the case, but it is too obvious to be ignored, that the disposition of the United States is to raise difficulties in the way of the entrance into the Stikine River. And it appears not to be a temporary whim, but part of a settled policy. We are bound therefore to take account of it and to act accordingly. And we ought to have, in addition, an alternative route, and that route, of course, is *via* Edmonton. This latter will have the great advantage of opening up an immense extent of fertile and valuable country. The Peace River district has long been known as of this character, and in districts further north there is more likelihood than not of good deposits being found by prospectors or travelers before the Yukon district is reached. Therefore everything points to the desireableness of such a route, and the sooner it is under weigh the better.

All this will prove of immense value in the development of Manitoba and the North-West, and will accelerate the movement which has begun to set in of renewed prosperity. For there is every probability of considerable numbers returning from the Klondyke disappointed, or with as much money as they want. And if such persons could return through a fine region like that beyond Edmonton, numbers of them would no doubt settle down there, to the great benefit of Western Canada.

ABSTRACT OF BANK RETURNS.

31st January, 1897. [In thousands.]

Description.	Banks in Quebec.	Banks in Ontario.	Banks in the other Prov's.	Total.

Gold held, $11,764,399 = 50.71 per cent.

LUMBERING IN THE WEST.

Very similar views are held by lumbermen on the Pacific coast of Canada to those expressed on a recent occasion at a gathering of Ontario lumbermen, with respect to the need of some Canadian enactment countervailing the action of the United States Government as to duties imposed on lumber. At the close of last year a representative meeting of British Columbia makers of lumber and shingles conferred with the district members of Parliament and showed them that while Canadian manufactures in these lines were shut out of the United States by a duty, they had to face *in Canada* the competition of the American mills, whose product can come into British Columbia from the State of Washington, because Canada admits American lumber and shingles free. At this meeting it was shown that:

> "The very same products that we make are manufactured in those States lying to the south of us; their manufacturers have every facility for reaching our main Canadian markets that we have; they buy nothing from us; they are able to purchase machinery and all mill supplies from 20 to 33⅓ per cent. cheaper than we can; their general cost of living is about 25 per cent cheaper than with us; consequently, they are enabled to manufacture cheaper than we can. And, while they do not cater to any regular and legitimate Canadian trade, they regularly disturb our conditions and prices by using our markets as a dumping ground in which to unload their overstock, at prices lower than we can possibly produce a like article, on account of the reasons above set forth. At the same time, the benefit of cheaper goods is going largely, if not altogether, to the few dealers and not to the many consumers.
>
> "We would point out that, by reason of the above competition, many of the mills in our province have stood idle for several years past, while the mills that have been operated claim to have made no headway for the past four or five years.
>
> "We would particularly draw your attention to the fact that, as the tariff now is, it would pay us to move our plants to the State of Washington, as, if we operated there, we would not only enjoy the advantages as above outlined, but we would have a United States market, in addition to a Canadian market, within our reach. Already one of our firms has established itself in Washington, and others are discussing the advisability of taking a similar step, should the tariff remain as it is."

Since this action was taken events have stirred up other Western Canadians, as well as the lumbermen. Early in the present month a meeting of citizens was held in Vancouver, the mayor in the chair, to consider the "unjust restrictions placed on Canadian merchants and Canadian trade by the United States authorities in the Yukon country." The result of a long discussion was the passage of resolutions urging that timber and mining licenses should be granted only to British subjects and the citizens of countries according similar privileges in their own land to British subjects; that so long as Canadian lumber is taxed by the United States we should tax American lumber; that there is no need for American troops coming into the Canadian Yukon; and that the disputed territory should be administered jointly by the two countries. Evidently the hold which American merchants have secured of a large share of the mining supply trade, not only of the Kootenay, but the Pacific coast of Canada, is galling to merchants and manufacturers in our Western province. And they naturally and strongly resent an United States fiscal policy which tends to continue that trade in the hands of Americans.

MARKETING WOOL.

Although several months must pass before the new wool season is at hand, a word as to wool trade conditions may not be out of place. The new clip will come on a bare market, as Canadian fleece wool is practically out of stock. The large exports made to the United States prior to the passing of the Dingley bill, combined with unusual vigor in the home mills, has entirely cleaned up the product of 1897. On this account growers are looking for the season to open with high values. It is quite possible that at its commencement prices may rule comparatively high, but it must not be forgotten that the United States market is now closed to Canadian wool, and there are no signs of an immediate change in legislation. The mill owners will probably be first in the market, as merchants maintain that prices must fall as the season advances, and they are not disposed to lay in large supplies until a stable basis has been reached. At present market values in the United

States sixteen cents would be a buying price for Canadian wool intended for export.

With a prospect of low prices, a closer scrutiny than usual will be given to quality. Wool growers should exercise more care in their preparation of wool for the market. The practice of tying fleeces with binder twine should be discouraged by all interested in the trade, nor should sisal cord be used for sewing wool sacks. Manufacturers report that serious injury to goods is often caused by the adherence of small particles of vegetable fibre to the wool. Several American manufacturers, who in the past have been large manufacturers of Canadian wool, have refused to purchase wool which has come in contact with sisal. The marking of sheep with pitch, paint or any insoluble matter should be avoided. It frequently injures the sale of the wool, as it cannot be scoured out, and has to be clipped off, involving much labor and loss to the manufacturer. In packing wool for shipment it is advisable to carefully separate the wool according to description and quality, marking the packages distinctly in accordance with the selection.

AUDITING.

In a letter of enquiry about the subject of our last week's editorial on "Maladministration," a correspondent asks with respect to what was there quoted from the liquidator's words about the auditors of the Farmers' Loan Company: "Can it be true that people of sense would put their names as auditors to a report without having seen vouchers? And should not something be done to cure such a degradation of auditing." What we stated was unhappily true, and something should be done to cure the evil of perfunctory and incompetent work under the name of auditing. An auditor is "a person appointed to examine and verify accounts" as a good authority states, certainly not to certify the summary of accounts as accurate upon the mere word of any official without examination and enquiry. A man who will so certify is dangerous. If honest, he is incompetent; he does not know the rudiments of his duty. If known to be dishonest, no reputable company will employ him.

The necessity for proper auditing of accounts is strongly brought into prominence by recent events. The disgraceful state of affairs made known by examination into the Farmers' Loan Company shows not only neglect on the part of the management, but absolute incompetence on the part of the so-called auditors. The directors of public companies are unquestionably responsible for the conduct of their business; but when a balance sheet is handed in to them supposed to show a correct state of affairs, and so certified by the duly appointed auditors, they naturally conclude it is a correct statement. The question then arises, "Quis custodiet custodes"? what guarantee is there that the auditors are doing their duty, or are merely signing what they are expected by the manager to sign.

The matter has come up in other countries, where great sums have been lost by the same sort of misconduct, a crooked staff and a complaisant auditor. And experience has taught the sufferers there not to trust too cheap or too easy going auditors. Is Canada to be behind other countries in such an important question as this, involving, as it does, enormous sums of money and heavy suffering to many smaller losers? It requires some calamity like the one referred to to make men realize that auditing is professional work. Do we permit any one, without regard to his education, to practice as a doctor? Is not the legal man required to give evidence of his proper training? And yet anyone is supposed by some to be competent to act as an auditor. It would be a strange list, indeed, if it were prepared — the names and status of all the auditors employed and the amount of capital involved.

What is the remedy then? One remedy is to insist that auditors should be licensed; and in order to obtain such license they should give evidence of their qualifications, by passing the examinations of some such body as the Institute of Chartered Accountants. A public accountant or auditor should follow no other business, he should have a reputation to maintain and to lose; and necessarily any gross incompetence or carelessness on his part would entail the loss of his certificate. The average clerk or bookkeeper is by the very limited nature of his position unfitted to fill the important position of auditor; and above all the impecunious friend is the worst, as he only considers the audit as meaning so much cash to him, and not as a grave duty to be performed.

An auditor should be a man of principle and with sufficient force of character to say "No," when he feels it required, and to withstand the pressure brought to bear upon him to sign what he knows to be an untrue balance sheet.

It also clearly follows that the professional accountant, who is ever acquiring knowledge both from theory and practice, each equally important, must become an expert at his work. If it is necessary to employ expert men to supervise our municipal accounts—and it has been shown by a recent enactment that the Ontario Government, at all events, thinks it necessary—it is equally necessary that expert men should audit all accounts. It would be a safe rule to follow, that no accountant should be allowed to practice unless he has proved his qualifications. The auditor cannot, certainly, be held responsible for bad investments made by a board of directors, but he can, if he does his duty, prevent dividends being paid that are not earned.

Therefore, it behoves the directors, and still more the shareholders, to see that their auditors are something more than mere ticking machines, whose signatures certify to so much comparing of entries done; and it does not always do, evidently, to be guided by the manager in this matter, though we are satisfied that such an exposure as we have lately seen is the exception and not the rule.

The present seems an opportune time to insist that legislation should be brought to bear upon this important subject, not only as to the status of auditors, but to make it compulsory for them to be chosen by the shareholders, whom they represent.

LOANING ON MORTGAGE.

It is manifest that very many have been looking with anxiety for the 1897 report of Ontario mortgage loan companies. And enquiries from shareholders at annual meetings this month, of which we have heard in Toronto, having relation to the minutiæ of companies' affairs and details of their management, were more numerous than was at all usual. This is right and proper at any time, but especially to be welcomed at the present juncture; for since the occurrence of a disaster such as the failure of the Farmers' Loan and Savings Company, depositors and debenture-holders naturally ask if any more such companies are being mismanaged as this one was? and every means should be taken to reassure them. Again, there are known to have been losses and lock-ups made by private lenders and by corporate lenders at "boom" prices in Toronto as in Winnipeg. These lock-ups and losses, bad as they were in some cases, have been exaggerated by public rumor to a degree that is indicated in the fall of company shares to a low average. Here too, therefore, is a reason for full information being given, so that sound companies may not be prejudiced by unfavorable statements far beyond the truth.

It is, therefore, agreeable to observe that a number of the companies' reports are fuller than usual with respect to real estate on hand or the losses made upon what land may have been taken over. And some boards and presidents are more explicit than they were wont to be concerning matters of detail or even administration. Assuredly, there is in several instances courageous action in investigating assets, and a resolute writing-off when losses are found to have been made. One company goes so far as virtually to say to its bondholders abroad:—Gentlemen, we have probed our affairs to the bottom, and we think we can show you value for all we claim in the way of assets. Pray, therefore, send over an expert accountant, we will make him free of our office, he may examine every book we use, every security we possess, and we will give him all the help he asks for.—The offer has been accepted and the Scotch accountant is here. Such frankness is commendable in the company in question, and of itself cannot but produce a good impression. We hear of other companies pursuing a similar course. If the report made by this gentleman be of a satisfactory nature, it will have a reassuring effect generally.

The Land Mortgage Companies' Association of Ontario, which embraces 34 companies, had their annual meeting the other day, and representatives of twenty-four companies were present. A subject of discussion was the legislation last year proposed in Ontario affecting such companies. Not being able to get the bill postponed to another session, the association had to be content with some modifications of it. An objection which seems to have some force is the expense to which the legislation puts the companies, and through them the borrowers. We observe the paragraph of the Association's report referring to the Farmers' Loan Company and that portion of the president's address on the same subject. It is quite true that Ontario loan companies borrowing abroad have a good record in that no one of them ever defaulted till 1897. And it is pardonable, no doubt, to refer to this. But all such eloquence may be thrown away on creditors 3,000 miles off, who were assured not six months ago that the Farmers' Loan was all right. One way to satisfy people is to let some one selected by themselves see into our loan companies' affairs.

ONTARIO LOAN COMPANIES.

In writing, twelve months ago, about the mortgage loan companies of this province, we reminded our readers that "on not a few of the loans made at exaggerated values during the 'boom' periods of, say, 1882 in Winnipeg, and 1887 in Toronto, losses must be reckoned with. However hopefully these loans have been nursed, however energetically the properties taken over by companies have been handled to make them revenue-producing, in the case of a good many loss stares the holders in the face. Those companies that have already boldly faced the loss will likely have the less trouble in the future." The passing of another year confirms the opinion above expressed. Winnipeg properties, however, have shown more movement and realized better relative values in 1897 than Toronto ones. The largest of our loan companies, the Canada Permanent, for example, disposed of one half of its lands during last year, and the number of payments it received on account of all mortgages showed an increase of 2,000 in number. This company has recognized the desirability at the present time of unusual scrutiny of securities. Accordingly it has had employed for some months an extra staff to audit and examine. Not only this, for weeks past the investigating committee of the directors has been examining all loans. The result of this investigation has been that the management decided that larger deductions required to be made; and accordingly $300,000 has been taken from the reserve. It is the first time in the history of the company that such a step has been taken, but it is a creditable step, and its effect will likely be to induce other companies to do likewise. The Canada Permanent has written off in all $358,000, and thinks that will be enough, but there is a contingent fund of $102,000 besides. Even if $450,000 had been written off, instead of $300,000, there would still have remained a million at reserve—a buttress to the capital of $2,600,000 paid up. The company's revenue for the year was $625,827, but from this is deducted losses on realization of securities $34,083, leaving the sum given in the profit and loss account $591,744. The amounts of real estate foreclosed, $121,078, and held for sale under power, $766,000, are both much reduced from last year. It is important to note the remarks of the vice-president, who is also a member of the investigating committee of three, the others being Messrs. R. K. Burgess and G. W. Monk. This body, said Mr. Gooderham, reported "that there are no accumulations of unpaid interest on the books of the company, no interest having been charged on any account where there existed reasonable doubt of its being paid." This is very reassuring to any one who may have doubted the methods of this or other companies. And again, "the earning power of the company has not been diminished by these reductions [of $358,000], no interest having been charged against these properties." The paragraph of the president's address, too, in which he refers to the real estate market, is instructive. There is good reason to conclude that the affairs of this old company have been thoroughly looked into with the resolve that they shall be maintained on a safe basis.

We took occasion some months ago, in referring to loan companies' affairs, to mention with approval the course pursued by the authorities of the Western Canada Loan and Savings Company in estimating the value of their securities. They engaged auditors in Toronto and in Winnipeg (other than, and in addition to, those whom they were in the habit of employing), and instructed them to go through the books and mortgages of the company in Ontario and Manitoba and report what, in the judgment of these auditors, was the realizable value of such securities. After some months work, these officials reported that, excluding entirely the properties which were not producing interest, or which were in the hands of the company from any cause, the revenue from its active, interest-bearing securities was sufficient to pay a dividend of six per cent. on the capital of the company. To six per cent., therefore, the dividend of the Western was at once reduced. Now the directors have taken another step which equally deserves commendation, and which certainly shows that they have the utmost confidence in the strength of the company. They have invited a firm of Scotch accountants of the highest standing to send a representative to enquire on the spot into the company's affairs in the interest of British debenture-holders. This gentleman is in Toronto, and in the company's office; his report upon what he has seen and learned may, we presume, be expected shortly. The company's report shows the amounts received during 1897 for interest and on account of principal money, $466,168 and $435,605 respectively. The president explains that $56,175 has been written off for loses sustained on sales of property; also that the amount of property taken over by foreclosure or by quit claim deed is $250,266, while that acquired by the exercise of powers of sale is $842,433. The sum of these is, truly, no inconsiderable lock-up, but the Government return shows that it is less than 8 per cent. of the estimated value of the properties which the company's mortgages cover. Altogether, the exhibit made of the company's affairs is such as to justify the president in describing it as "a very clear statement of the business transacted during the past twelve months, the results of that business, and the satisfactory position of the company."

An unusual feature marks the report of the Landed Banking and Loan Company, unusual we mean in comparison with the other loan companies of Ontario this year. It is that larger net profits are declared from the business of 1897 than from that of the previous year. Not that gross earnings were larger, for they were not—lower rates of interest on loans prevented this—but that reduced interest payments and lessened expenses enabled a better net showing to be made. The assets of the company again show an increase in aggregate, being some $24,000 larger than last year. After paying the usual dividend an increased sum has been carried forward to 1899. We observe that deposits have been reduced by some $30,000; that is, they were, we presume, converted into a home debenture liability, and there is a slight increase in sterling debentures also. The directors say that their mortgage instalments have been satisfactorily met, and they also report that an examination of the company's securities has recently been made by the president and vice-president, who are competent and careful business men.

A statement upon which the proprietary and the management may both be congratulated is that of the Agricultural Savings and Loan Company. An increased business is shown; the cash value of securities is larger, and the repayments on mortgages have been satisfactory, the amount of interest in arrear being less than for some years past. In the face of the lower rates obtainable on loans, the earnings, both gross and net, "after providing for losses and anticipated deficiencies," are within a fraction of being as great as the previous year; $10,000 has been placed to reserve fund, and $3,730 carried forward.

A reduction of debenture borrowing from $290,000 to $234,000 is shown by the People's Loan and Deposit Company. On the other hand, deposits have increased slightly during the year. Properties were sold during the year to the amount of $34,599, making real estate bulk less among the assets. The loss sustained on sale was $7,881, and some $10,000 has been written off real estate and mortgage accounts. It is agreeable to find that the number of properties vacant on the company's hands is less than a year ago, and that the rental income is, therefore, larger. Collections from rent and interest amounted, the report states, to nearly five per cent. on the securities.

GREAT BRITAIN'S MEAT SUPPLY.

During 1897 more than 6,000,000 frozen sheep and lambs were imported into the United Kingdom, an increase of 540,000 carcases as compared with the receipts of the previous year. The expansion in trade took place for the most part during the second half of the year, the net increase up to June 30th having been only 25,000 sheep and lambs. This increase in ten per cent. of the receipts was unfortunately accompanied by a depression in values. Some of the cargoes arrived from Australia in damaged condition, but on the whole the quality was better than that of a year ago. About 60 per cent. of the mutton and lambs imported into the United Kingdom came from the colonies, which adds to the interest in the trade. An authority reviewing the trade says: "On the whole, however, the imports of mutton and lamb were of better quality than in 1896. The British Empire is not yet able to furnish a supply of beef sufficient for the wants of consumers in the United Kingdom, but the supplies of mutton now drawn from the Continent, South America and the United States could without much difficulty be replaced by increased shipments from New Zealand, Australia and Canada." There is every indication of a movement in Canada towards making efforts to cater for this trade. Montreal, Quebec, Toronto and Winnipeg are all spoken of as centres in the beef killing industry, and in several parts of the Dominion a beginning has been already made. It must not be forgotten, that should this industry assume large proportions, it would mean considerable development in leather tanning and other allied trades.

CANADIAN MINING CONFERENCE.

Twelve months ago we called attention to the February meeting, in Montreal, of the Federated Canadian Mining Institute, the importance and interest of which was signalized by the contribution thereto of exhibits by the Governments of Nova Scotia and Ontario, and by the presence of the Governor-General. We now learn that the second interprovincial conference of Canadian mining engineers and mine managers will be held in Montreal, under the auspices of the Federated Canadian Mining Institute, March 1st to 4th. A single fare passage rate has been secured, we understand, from the railways for this gathering.

Of the forty papers known to have been prepared for the occasion we have been favored with the titles of twenty. The provincial mineralogist of British Columbia, Mr. Carlyle, will present a summary of mining progress in that Province, while Mr. W. H. Merritt, of Toronto, will read a paper on the reefs and placers of that Province, and the paper of Mr. R. R. Hedley, of Nelson, B.C., upon the possibilities of smelting in Boundary District and the Slocan, read at Vancouver a few weeks ago, will again come up for discussion. Four other papers on the mineralogy and mining of British Columbia are to be presented.

Very wisely the authorities of the gathering have not confined its deliberations to the interests of the West alone, where popular interest seems meanwhile to centre, to the neglect of other portions of the country. The Maritime Provinces and Ontario will be well represented upon the occasion. Much may be expected from a paper on the mineral development of Nova Scotia, by Dr. E. Gilpin, F.G S., the well-known inspector of mines for that province. And the mineralogy of the carboniferous strata is to be dealt with by Henry Poole, M.A., M.E. Then the working of low grade gold ore will form the subject of a paper by C. F. Andrews, of Country Harbor, N.S., and the Hon. E. T. Moseley, of Sydney, will descant upon explorations in the Cape Breton gold fields, and John Rutherford, M.E., of Windsor, upon the Albertite deposits of New Brunswick.

The mineral wealth of Ontario will not be neglected upon the occasion, if one may judge from the papers prepared. The director of mines for that Province, Mr. Archibald Blue, will dwell upon the mining progress of Ontario in 1897. Modern forms of milling machinery will be illustrated by F. T. Snyder, of Keewatin; Professor Wilmot is to present notes upon the gold fields of Michipicoten, Lake Superior, excitement about which was so rife a few months ago. Compressed air mining forms the subject of a paper by C. E. Hanson, M.E., of Rat Portage, and the bromo-cyanide process for treating the mispickel ores of Hastings County, is the subject of a paper by Mr. A. P. Swinney, of Deloro.

The Province of Quebec has not, thus far, offered to contribute largely to the literature of the occasion. But the summary of mining progress in that Province, by J. Obalski, inspector of its mines, may be expected to be interesting. Matters of practical interest will be presented for discussion in the papers of Mr. E. A. Sjostedt, M.E., of Montreal, on the Chemistry of Foundry Practice, and of Prof. J. T. Donald, of the same city, on Concentrated Foods for Explorers and Prospectors. A feature of decided moment will be the presence of Mr. W. M. Ogilvie, the intrepid engineer whose name has become identified with the Klondyke gold field discoveries.

WESTERN LUMBERMEN MEET.

The annual meeting of the Western Retail Lumbermen's Association was held in Winnipeg, on Wednesday evening, February 9th, President T. A. Cuddy, of Minnedosa, was in the chair. About seventy five persons were present, including city and country members of the association. President Cuddy opened the meeting and read his annual address, which congratulated the members upon the improvement in business during the year past and the favorable prospects ahead. He also referred to some of the difficulties which they had been obliged to contend with during the year. Secretary John Dick read his financial report, showing that though the expenses had been somewhat heavier than the previous year, there was still a good balance in the bank. The membership in the association was stated to be 164, an increase of four during the year.

Reference was made to the quantity of lumber being brought in from the United States. Nearly all of this lumber, it was said, is the cheapest class of stuff. Much of it simply rubbish, yet it has a considerable sale because it is cheap. It seemed to be the feeling of those present that the home industry should get the preference, as that would be the way to build up the country and help one another, by advancing the general prosperity of the home interests. In the discussion it was brought out that lumber is being sold throughout the country on a very small margin, the profit being much smaller than is usually secured in other lines of business.

The election of officers was then proceeded with. J. B. Mather, of Glenboro, was elected president by acclamation, and H. Byrnes, of Winnipeg, was elected to the vice-presidency, also without a contest. A committee was appointed to select a council or executive, and the following were elected on the recommendation of the committee: D. E. Sprague, Winnipeg; R. H. O'Hara, Brandon: E. C. Jackson, Rapid City; D. McMillan, Morden; G. Miller, of Virden, and A. L. Campbell, of Melita.

ONTARIO CHARTERED ACCOUNTANTS.

The Chartered Accountants of Ontario held their annual meeting at the Imperial Bank Chambers on Friday evening, the 18th February. There was a good attendance, and the various reports handed in were very satisfactory. The report from the council submitted by the president, Mr. Geo. Edwards, showed thirteen candidates had successfully passed the examinations held in May and December last year, and that the percentage of their marks was good. Attention was also directed to the series of papers now being read before gatherings each month, on subjects carefully arranged for the benefit more especially of students going up for examination; though not only students, but business men generally, took considerable interest in these papers and the discussions that followed them. The treasurer reported that at no time had arrears of dues owing by the members been so low as at the present time.

Several members spoke, amongst whom may be mentioned Mr. J. J. Mason, F.C.A., of Hamilton, who came down especially for the meeting. The following members were chosen by ballot for the council for the ensuing twelve months: A. Blanchard, Kingston; Geo. W. Blatch, Ottawa; Wilton C. Eddis, Geo. Edwards, David Hoskins, A. Hart-Smith, Alf. Jephcott, Toronto; Geo. F. Jewell, London; J. W. Johnston, Belleville; W. T. Kernahan, Toronto; Henry Lye, Walkerville; J. J. Mason, Hamilton; F. H. Macpherson, Windsor; W. B. Tindall and Harry Vigeon, Toronto.

Afterwards, from amongst their number, as above quoted, the executive officers were elected as follows:—

President—Harry Vigeon, F.C.A.
First Vice-President—J. J. Mason, F.C.A.
Second Vice-President—W. T. Kernahan, C.A.
Treasurer—W. B. Tindall, C.A.
Secretary—Wilton C. Eddis, C.A.

The other committees were duly elected and also the examining committee, consisting of the executive committee and Geo. Edwards, F.C.A.; Alf. Jephcott, F.C.A., and Geo. Kappele.

At the conclusion of the business the newly elected president, Mr. Harry Vigeon, invited those present to adjourn to dinner at the National Club, where a pleasant evening was spent.

HOME SAVINGS AND LOAN COMPANY.

The nineteenth annual report of this company has been issued. For a wonder, its savings bank deposits do not show, as usual, an increase over the previous year. Possibly a reduction in the rate of interest paid upon them accounts for this. The earnings of the company, too, were less, which is doubtless, in a large degree, attributable to a lessened rate upon all loans, the result of the quantity of money everywhere offering for the purpose during most of the year. The usual dividend was paid and $5,000 added to contingent account. As is very proper in the case of a concern numbering its savings bank depositors by thousands, a thorough system of supervision and inspection is pursued in the office of the Home Savings. Cash transactions are certified daily by two auditors; the directors and manager at their weekly conferences review every recent loaning transaction; and before each annual meeting the board examines every security the company holds. It would seem, therefore, that as good security against loss is thus given as it is possible to provide.

QUEEN CITY FIRE INSURANCE COMPANY.

The reports of this company or the addresses of its presiding officers at the annual meetings are never very lengthy, but they generally contain matter which is suggestive and often instructive to the fire insurance policy-holder. At the meeting last week Mr. Scott drew attention to the growing balance at credit of profit and loss account as "one of the safeguards that has been built up, in the interest of shareholders and policy-holders alike, to meet any possible conflagration contingency that might arise." And he went on to show how, when a series of serious burnings scorched Toronto in 1895, it took only twelve per cent. of this fund to settle all the Queen City's losses that year, although carrying its full lines of risk in all of them. Behind this fund again is the reserve, the two forming the ratio of 3.93 per cent. of total liabilities, a handsome figure, and one which no other company in the Blue Book shows. That the patrons of the Queen City have had cheap insurance is clear from its history, and that its proprietors are well satisfied is abundantly manifest. The managers have shown that they understand fire underwriting and were not afraid to apply their principles to achieve the best results.

MILLERS' AND MANUFACTURERS' INSURANCE COMPANY.

At the twelfth annual meeting of policyholders of this, which is a stock and mutual company, the president, Mr. James Goldie, the well-known Guelph miller, took a backward glance at the operations of the company. And this is what he recalled: In twelve years its patrons had saved on the cost of their insurance the large sum of $186,873. That is, they had saved $158,659 through the rates of this company being lower than the regular tariff rates on such risks, and they had returned to them in dividends $28,214, which two amounts made up the sum first named. It is not surprising that this result was deemed satisfactory, and that members expressed their intention to try and get more manufacturers and millers to share such benefits. The business of last year exceeded that of the year before, and the revenue was larger. Fire claims, $14,200, while greater than in 1896 were very light considering the amount at risk. Ten per cent. was again declared to policyholders.

PHENIX INSURANCE COMPANY OF BROOKLYN.

Another satisfactory year's business is put to the credit of this good American company, and the results go to swell the handsome total of its figures. The company shows total assets exceeding five and a-half millions of dollars ($5,613,876) about four millions of which is in United States bonds, and other bonds or mortgages, while half a million is in real estate at market value. After setting aside $3,148,000 as a reserve for unearned premiums, and allowing for unpaid claims there is the handsome net surplus of $1,220,000 over all liabilities and shareholders' capital. It is significant of the extent of this company's business that its premiums in course of collection amount to the large sum of $426,255.

EXCELSIOR LIFE COMPANY.

Thn eighth annual report of the Excelsior Life Company mentions the fact that, having procured a license to do business throughout the Dominion, the company has secured authority to do business in Manitoba, New Brunswick and Nova Scotia, as well as representatives for those provinces, and looks forward to good results. The company is also introducing the monthly payment method, and finds it to suit extremely well the views and circumstances of the industrial classes of policy-holders. A commendable feature is the adoption of the Hm. 4 per cent. table in valuing contracts, the rate hitherto used being 4½. The aggregate in force is now $2,805,000, and the amount written during the year exceeded seven hundred thousand dollars. Larger and more convenient offices on Toronto street have been secured for the company's growing business. The premises are well lighted and pleasantly arranged, and not only the office staff, but the president and manager must partake of the benefit such agreeable surroundings produce.

IN THE DRY GOODS STORE.

If you ask wool dealers how business is, they will tell you it is middling, that is, their sales are moderate. But if you ask shoddy makers, they will say they have rarely been so busy. Whether this means that our woolen manufacturers are using more shoddy in their goods now-a-days, we scarcely venture to say, but this seems to indicate that they are. People have got so used to having "cheap goods" offered them, that they buy what appeals to their pocket, as a rule, without attending much to the genuineness or the wearing quality of woolens.

It is predicted that radical steps will be taken in the new Ontario Legislature to secure an act restricting departmental stores. Several candidates, it is said, have pledged themselves to bring in the necessary bill.

The heavy snow storms have interfered somewhat with trade during the past week and reports from country districts were not satisfactory. It is quite possible that the excitement of the elections has had an unfavorable effect upon trade in the Province of Ontario.

The Toronto department stores are all offering "Bargain Sales" in white goods, dress goods, furniture and other lines during the present month. The spring season is almost at hand, and in all likelihood stocks that are not disposed of in February or the early days of March must be carried over to the fall season.

As regards the China raw silk market, Shewan, Tomes & Co., of Canton, say, in their advices dated January 12, that during the period under review the market has been very strong and prices have been firmly maintained. This is due to the large settlements of silk made this season and many contracts with long delivery dates still outstanding. The Chinese say that cocoons are very near one hundred dollars per picul, and some filatures have stopped for want of cocoons.

The English felt hat trade has not opened brightly this year. Although some of the factories in the Manchester district are well employed, travelers report that in many parts of the country the prolonged dispute in the engineering trade has led to such a scarcity of money that the working classes are not able to purchase. Amongst straw-plaiters there is a keen demand for English "brilliant," a wide, glossy plait, very light, and made from split wheat straw. The extensive production of this plait, which is shipped in large quantities, is a direct outcome of technical education.

The Scotch correspondent of the *Draper's Record*, Feb. 12th, says: "The second annual Cycle Show was opened in Edinburgh on Saturday afternoon by Treasurer McRae, hatter, Princess street, Edinburgh. One of the most handsomely decorated stands in the show was that of Messrs. Cranston & Elliot (Limited), who are showing cycles made in Canada. I understand that Messrs. Cranston & Elliot do a very fair trade in cycles, but I am rather inclined to think it is rather too risky a trade for the general run of drapers to enter upon, as things are so very much cut." In Canada there has been a disposition on the part of dry goods houses to handle bicycles, but we have not heard of large profits made in the trade, nor are prospects for the future considered very bright.

Since the death of the late Robert Simpson, chief proprietor of the second largest departmental store in Toronto, several offers have been made to the executors to purchase the business. These offers have been under consideration for some time: that made by the H. H. Fudger syndicate has been accepted, and the papers were signed on Wednesday. The shares of the old company will be transferred along with the goods on the first of March to the new proprietors, who are Messrs. H. H. Fudger, J. W. Flavelle, A. E. Ames, J. B. Campbell and A. R. Parsons. The last two were directors of the present Robert Simpson Co., Limited, and have been connected with the business for a number of years. The new business will be continued under the same name, but the capital stock, now $500,000, will be increased. Mr. H. H. Fudger will be president and manager, and we understand will devote nearly the whole of his time and attention to the business.

FOR GROCERS AND PROVISION DEALERS.

Baltimore canned-goods packers are again putting up peaches with fictitious California labels and without their own names and addresses, as required by the Maryland State law, for neglect of which two of them were fined not long ago.

The death-knell of the once promising sorghum sugar industry in Kansas, upon which the United States Government spent almost $250,000 in experiments, was sounded at Fort Scott, Kan., on Feb. 1st, when the last piece of sugar machinery in the State was sold to Nebraska men for shipment to that State.

The exports of tea from India from April 1, when the season begins, up to December 31st last have been officially reported as 121,140,000 lbs., as against 117,390,000 lbs. for the corresponding period in 1896. The exports from Ceylon for the whole of last year, January to December inclusive, have been officially reported as 99,000,000 lbs., as against 91,750,000 lbs. for 1896.

Canadian flour millers are paying more attention to the markets of the West Indies. De Costo & Co.'s Bridgetown, Barbadoes, W.I., circular of February 5th, has the following on breadstuffs and provision markets there: "Breadstuffs and Provisions.—There is yet no improvement to note in the demand; but as the reaping of the sugar crop will be fairly well forward in another fortnight or three weeks, we anticipate that a general increase in the consumption will soon take place."

"I am not wealthy," he said, "but if the devotion of a true and tender heart goes for anything with you, Miss Clara——" "It goes well enough with me, Mr. Spoonbill," interrupted the fair girl, with a pensive look on her face; "but how will it go with the grocer?" Aye, there's the rub. How is it with you, Mr. Man? Have you provided for the grocer, not to speak of the butcher and the milkman, against the time when you depart to that country from whose bourne no traveler returns. Mrs. Man has asked us as a favor to herself to put the case to you in this way, and not to mention her in the matter. That is, moralizes T.I.P., get your life insured, *toute suite*.

Messrs. Wisner & Co. in their circular dated Shanghai, Jan. 21st. say: "Black Teas.—Only a small business has been reported during the past month, prices have ruled on about the former basis. The experiment is likely to be tried during the coming season in one of the Hankow districts of preparing a small quantity of leaf by machinery; a company for this purpose has been started, the capital is understood to be entirely subscribed by native tea men; the working, however, will be under foreign supervision. Green Teas.—The business in country kinds during the interval has been trifling, and the market may be considered closed. Pingsueys.—Again we have to report large shipments on 'native account;' some 14,000 boxes are reported disposed of in this way, but probably this number does not represent the entire business.

It is said that parties in Owen Sound talk of establishing a creamery on a large scale. The *Times* says: "The scheme is to establish from 16 to 20 separator stations, each with a capacity for separating 12,000 pounds of milk in from three to four hours. These separators will be established on both sides of the railway stations, about four or five miles distant, and farmers can easily take the milk to the separators and carry back the sweet milk with them for feeding purposes. The radius covered by the scheme contemplated will be about sixty miles, and will be one of the most beneficial industries that the farmers in this section can possibly have. Dairying, one of the most profitable branches of the farming business, will be thus given the prominence which it deserves and be greatly stimulated by the facilities which will be afforded. The capacity of the proposed creamery will be from 8,000 to 10,000 pounds per day, and its location will be of the greatest, importance to the community in which it is established.

A little controversy on the subject of the affairs of the Mazawattee Tea Company appears in a recent number of the London *Investors' Review*. Commenting on something that journal had written respecting the company's report, a correspondent gives some particulars about the company's success, and its reserve of £24,000. Says this letter, "I can see no reason in investing the reserve separately while it can be usefully employed in the business. It seems to me rather a farce to imagine you are better off by having £24,000 consols in a cupboard while you have £382,000 goodwill figuring as an asset on the other side." What the *Investors' Review* has to say to this, follows: "When most of the capital of any company is represented by goodwill and trade marks a day must sometime come when this capital will be wanted and not found unless profits are meanwhile accumulated to replace it. For money paid on account of goodwill and money clean gone out of a business cannot possibly be capital in a company and available for it."

INSURANCE MATTERS.

The *Moniteur des Assurances* publishes a statement of new life business transacted during 1897 by the 17 existing French life offices. The total amount subscribed amounts to £13,531,900, an increase of £896,426 on the new business of 1896. These figures are gradually approaching the totals attained prior to 1893, when a general increase of rates and reduction of commission took place. Meanwhile the American offices and a few English ones have been reaping a rich harvest in France.

Anxiety as to fire insurance protection is shown in the letter received a few days ago by the Toronto board from the board of trade at Kaslo, asking that the Underwriters' Association will lower its rates for that British Columbia town. It seems that the rate is six per cent., but the buildings are wood. Nevertheless Kaslo thinks herself entitled to a substantial reduction. "The reservoir has a capacity of 300,000 gallons, and a constant supply of 500 gallons per minute. There are 600 feet of fire hose and 400 feet may arrive in a day or so."

The Ocean Guarantee and Accident Insurance Co., which has the accident risk for Ottawa, has asked that city to cancel the policy, on the ground that the company is losing money. This is a remarkable proposition. If the company in its anxiety to do business has underbid other companies and finds a loss imminent, who is to blame but itself? Surely it is an undignified thing for a large concern to come forward under these circumstances and say: "Please relieve us from the consequences of our own imprudence." It would have a better effect upon public confidence if the "Ocean" were to bear the loss and say nothing about it.

The great fire in Melbourne, Australia, of which we gave some figures last month, was a very serious one. According to latest accounts, many of the British offices lose quite as much by it as by the disastrous Cripplegate one, says the *Scottish Critic*, of Glasgow. More than three years' premiums from Melbourne business have been swept away by it, and it is stated that some of the Australian offices may never be able to get over the disaster. Some of the Melbourne newspapers have been adducing the fire as an argument against municipal insurance, for which there has been some agitation there as elsewhere recently, and they make the following suggestion: "If municipal insurance had been in effect here the city council would have been compelled to rush off to London with a £750,000 loan." The Melbourne *Punch*—apparently a satirical journal, not odd in this connection—defends the scheme in a vein of banter, of surprise, of cleverness if you will, but certainly not of logic. As the first-named paper says, the other Melbourne papers have the best of it.

BOOKS RECEIVED.

The Klondyke Official Guide.—This book has been looked forward to with interest for a long time, and now that we have it in hand, with its 153 pages of reference, narrative, description and advice, we think it will prove a very serviceable manual. Apart from the uncommon personality of the man who prepares the book and has written a large part of it—Mr. William Ogilvie, Dominion land surveyor and explorer—there are other elements of interest and value. Not that the work partakes at all of the character of some recent American literature about the Klondyke—collections of Wild West fables, spread-eagle adventures and discoveries, improbable enterprises and impossible results—for we have here official statements and the calm relations of a man who states facts and leaves the embellishment of them to others. The first portion of the book gives the recent history of the Yukon District from the annual report of the Minister of the Interior for 1895. Then Mr. Ogilvie describes his trip down the great river in 1887 and 1888, devoting pages to such subjects as the agricultural capabilities of the Yukon Basin, its timber, metals and minerals, its fauna and flora; next, pages 99 to 130, a sketch of the different routes, viz., *via* Prince Albert, *via* Edmonton, the Carriboo and Cassiar route, the Stikine route, the Taku route and routes by the White Pass—named after that admirable and much lamented Canadian, Hon. Thomas White—the Dalton route and the James and Hudson Bay route; last are given particulars and recommendations as to necessary outfit for miner or explorer, and finally, the mining regulations. Paper and typography are clean and distinct, while the numerous illustrations, from photographs by the compiler and others, are of extreme interest as affording summer and winter views of a large portion of this fabled district. True, the letterpress is a trifle tame to those who have heard Mr. Ogilvie relate his adventures (a rarity, and a great treat); but the facts are there and wonderful facts some of them are. The book is to be had, with a large map of the Dominion west of Manitoba, drawn under the direction of W. T. Jennings, C.E., at the book stores for 50 cents.

ANSWERS TO ENQUIRERS.

J. B., Brantford.—A very proper resolution that of yours. Do not delay the execution of it. Assuming that you are not a person of large means and that you are married, we should say take a straight life policy. If your means and circumstances permit, you had better take an endowment policy. Should your age be under 40, say a twenty-year endowment; if 50 or 55 take a shorter term. Either of the companies you name is sound.

Seaforth.—(1) You have not read your Monetary Times with the usual care; we did have a report of the annual meeting of the company—see our issue of January 21st, page 970. (2) The story about a talked-of increase in the dividend over 8 per cent. finds explanation in the proceedings of that meeting of the company. (3) The rental paid it by the Great North-Western Telegraph Company is unaltered.

P. D., Duluth, Minnesota, writes to ask: (1) "Have the Canadian banks to guarantee their circulation by Government deposit? If so, to what amount?" (2) "Has the Government a system of bank inspection? If so, what is it?" [We reply (1) that the Canadian banks make deposit with the Dominion Government of a fund to secure their note circulation. This fund amounted at the close of December last to $1,883,067, against a note circulation of $37,995,000. (2) There is no system of Government bank inspection in Canada.]

L. C., Barrie.—Not for a number of years. The Bank of London suspended August, 1887. It had $940,000 deposits; $220,000 circulation. The available assets were $299,000.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, February 24th, 1898, compared with those of the previous week:

Clearings.	Feb. 24th, 1898.	Feb. 17th, 1898.
Montreal	$16,361,264	$16,002,973
Toronto	7,740,388	9,062,524
Winnipeg	1,306,215	1,186,546
Halifax	1,034,731	1,012,538
Hamilton	592,441	652,507
St. John	498,424	491,457
	$27,531,463	$28,408,545

Aggregate balances this week, $4,306,677; last week, $4,686,887

—It is significant of the growth of tobacco cultivation in Western Ontario, that we hear of a meeting of the Association of Tobacco Growers, of South Essex, to the number of 150, at Ruthven, in that county, on Wednesday, of last week. Mr. L. C. Palmer, the president, was in the chair, and Wm. O. McNutt was secretary. After a number of addresses and a general discussion, a resolution was carried by a unanimous standing vote, which we condense, as under:—"That while the Government has met the wishes of tobacco growers by putting 10 cents per pound customs duty, and while we have better soil and climate for growing cigar tobaccos than many of the cigar leaf sections of the Northern States of the Union, we 'pray the Dominion Government to open the doors of *all* tobacco factories to us for a market, by imposing a uniform excise duty and placing the advantage we now have over the foreign tobacco in the excise department at the customs with the present import duty, giving both plug and cigar manufacturers one license, one factory, and a uniform excise revenue.'"

—In his annual address to the members of the Positivist Society of London, a few weeks ago, Mr. Frederic Harrison referred to the ruinous war raging in the fields of industry in Britain. He said it was heart-rending to those who regarded trade unionism as an indispensable institution of healthy industry to see a powerful trade union drained of its savings and brought to a collapse by a prolonged and obstinate conflict, of which he could see no issue. It was the more melancholy in that the conflict was precipitated by oppressive action on the part of the men themselves (who demanded reduced hours without reduced wages) by strikes against selected firms. The inexorable logic of events had proved the demand thus made to have been, economically speaking, ill-timed, and a blunder of the first magnitude.

—A welcome economy is suggested by the fact communicated to an Ottawa newspaper, that there have recently been enquiries from parties in the States, as to what price sawdust can be purchased at. This has had the effect of awakening the lumbermen to the fact that this product, which has been hitherto wasted, is gaining in value in the commercial world. And it is said that Ottawa millowners are displaying a desire to save the sawdust, and will take steps to do so, even without being influenced by the act prohibiting them from throwing it into the river. Mr. J. R. Booth and Messrs. Bronson & Weston are having plans made for equipping their mills with conveyances to take out the sawdust. The Hull Lumber Company already has such appliances.

—A more satisfactory year is shown by the report of the Economical Mutual Fire Insurance Company for 1897 than in the year preceding. The fire losses were $10,000 less and the reserve is proportionately increased. Besides this, the character of the company's risks is changed for the better, almost half the $13,000,000 which it has at risk being in the Isolated branch of the business as distinguished from the mercantile and hazardous. The balance of assets, apart from premium notes (which show $190,000 net), is some $90,000, of which sum $29,000 is in cash, $35,000 in mortgages, and $18,000 in real estate. The Government deposit now amounts to $33,410. Patrons of the Economical get, we believe, cheap insurance and offer satisfactory security.

—The following changes have taken place in the staff of the Commercial Bank of Windsor. A branch of the bank is expected to be opened at Bear River, in Digby county, N.S., on 1st March next. We are informed that Mr. F. D. Sloan, formerly agent at Berwick, will have charge of Bear River office. His successor at Berwick is Mr. H. E. Mosher.

—To fill the office of vice-president of the Quebec Bank, vacan through the death of Mr. Wm. Withall quite recently, Mr. John Theodore Ross has been chosen.

Correspondence.

INSOLVENCY ACT.

Editor MONETARY TIMES.

SIR,—In an issue of THE MONETARY TIMES, of a few weeks back, I see it stated that under the old bankruptcy law, a large number of solvent traders declared themselves as bankrupt, in order to fraudulently compromise with their creditors, at various discounts, in order to increase their wealth.

That an insolvent debtor may receive the sympathy of his creditors and be freed on a payment of 50 cents, whilst with good management 75 cents on the dollar is ultimately obtained, can readily be believed; or even without any sympathy, the creditors may realize the fact, that if they take the affairs out of the debtors hands, they will realize next to nothing and accept 25 cents, although they are morally certain he will make 50 cents on the estate.

In this way the insolvent may gain, but to state that a solvent man will willingly declare himself a bankrupt to make a slight gain, when the value of his loss of credit will many times outweigh any possible gain is not true, generally, although such isolated cases may exist.

The tendency of most business men is to keep staving off too long the declaration of insolvency, not to rush headlong into it, as your article would imply. It would not be good to put a hard and fast line as to what dividend should be paid before a debtor can obtain his discharge. That should be a question for the Bankruptcy Court to decide, on the merits of each particular case. There are instances in which the honest trader may only be able to pay 50 cents, whereas the reckless trader, who was, say, in precisely the same circumstances, may, by largely increasing his liabilities, be able to pay 75 cents, notwithstanding the fact that he has largely increased his deficiency, which is distributed over a large number of creditors.

The affairs of an insolvent debtor should be left, as much as possible, in the hands of a to-be-enacted majority of the creditors as to number and to value, for the creditors will obtain a settlement at the minimum of expense. The court itself would be appealed to, when the debtor endeavored to obtain some unfair advantage, or when the creditors were unreasonable in their demands.

I remain, yours truly,
S. W. SHAW.

Calgary, Alberta, Feb. 8th, 1898.

—In this city the other day there was a fire that consumed property estimated at $400,000. We regarded it as a public calamity, although the loss itself was confined to a few individuals. Property of the people to the value of thirty times as much is burned up along the shores of Lake Winnipeg, and nothing is thought about it. We submit the time has come when we should think about it, and think about it most seriously. The people themselves cannot protect their forests: our system of government and administration vests that duty in a department at Ottawa, and it is a duty that ought not to be neglected.—Winnipeg *Free Press*.

—Monday's St. John *Telegraph*, Feb. 7, refers to the presence at the Dufferin hotel of J. B. Dawson and Geo. A. Dixon, of Charlottetown. The former is a son of Mayor Dawson, of Charlottetown, and both are members of a Charlottetown party who are going to the Klondyke. The men have purchased a carload of dogs, and will meet at Calgary before proceeding to the golden region. Among the party is a P.E.I. man who has been there and made his pile, and is going back for more. Mr. Dixon at one time carried on a tailoring business in New Glasgow.

—A Missal, a Book of Hours, and a Psalter, which had been in the possession of Viscount Arbuthnot's family for 400 years, were recently sold at auction in London for $6,000. The Missal is the only one extant, according to the Scottish use. The manuscripts were written and decorated by his vicar for Sir Robert Arbuthnot between 1482 and 1491.

TORONTO MARKETS.

Toronto, Feb. 24th, 1898.

DAIRY PRODUCTS.—There are light deliveries of dairy butter at present. Any good butter freely brings 16c. per lb. A curious feature of the market is the absence of bakers' butter. For this description dealers quote 14c. per lb. At this time last year there was a surplus of poor butter, and sales were made at a range of 4 to 10c. per lb. There are fair deliveries of creamery. The supply is very uneven, and the market suffers in consequence. On some days the trade is in need of stocks, and on others, the market is in a state of glut. This is a poor market for tub butter: grocers and restauranters prefer the pound prints. The export trade is quiet. Dealers look for the usual large production in the second week of March. There is little doing in cheese, save at reduced prices. Some dealers who are carrying large stocks are actively canvassing the trade. Local consumption is fair. Some of the authorities are looking for a slight advance in prices preceding the new make. On Friday of last week supplies of new-laid eggs were plentiful, and some traders becoming frightened sold down to 16½c. per dozen. The cold weather restored the market, until the present week opened at 20c., but since Monday the situation has eased off until 18c. is quoted. The market is dependent upon weather conditions, and warmer weather is sure to be followed by freedom in supplies. There is only a small supply of pickled eggs held here, which dealers are quoting at 15½c. per dozen.

FLOUR AND FEED.—Trade is dull. The movement this week has been far from active. In Montreal there is a reported difference in the opinions of two large milling firms. Values are steady at last week's quotations.

GRAIN.—The wheat market has been subject to violent fluctuations. Prices close about 3c. per bushel in advance of last week's figures. At the moment, however, the market is dull and the feeling weaker. Receipts at country points are more free, and with good sleighing must continue so. Farmers will probably make an effort to market their grain before the usual breaking up of the roads in the spring. It is estimated that there still remains 33 1-3 per cent. of the Ontario crop in the hands of growers and merchants. There is an export enquiry for wheat, peas, oats, and buckwheat. Rye is firm and wanted. Peas are higher.

GREEN FRUITS.—For oranges there is an active demand: the quality is good and prices not at all high. The principal supply is from California, although a few Valencias are still offered. In marmalade oranges trade is active. Dealers report that in few seasons has there been such a good trade. Sales to manufacturers and for domestic purposes have been large. Supplies of lemons are short, but as the demand is limited, this occasions no anxiety: the quality is good. Bananas are in good demand in New York, where the weather is warm. As a consequence, values are not in keeping with the conditions here. The local apple trade is quiet and without change. There is a fair demand for cooking apples.

HIDES AND SKINS.—Little change has taken place in the hide market. Merchants are still paying 9½c. for No. 1 Toronto inspected hides. There is little in the situation that is pleasant to either merchants or tanners. The value of hides to tanners will depreciate during the next several weeks, as offerings during March are the poorest of the year. It may be that reductions in price will take place to offset this depreciation, for if these are not made it means a virtual gain in prices. At present cured hides, No. 1, Toronto inspected, are quoted at 9¼c., which, of course, means a loss to handlers. There is little in the attempt which has been made to decry hide values. The position is a strong one, even if local competition be eliminated. A report from Chicago, February 23, says: "Market was steady. Business was quiet; still tanners were reported as making more enquiries, and prices were fairly well maintained, closing at 11 to 11¼c. for native steers; 9¾c. for light Texas; 10 to 10¼c. for heavy do., 10 to 10¼c. for butt brands; 9½c. for branded cows; 9 to 9¼c. for Colorados; 10 5-8c. for heavy native cows, and 11c. for light do."

HOPS.—The choicest qualities of hops are wanted, but transactions recently reported are not in these descriptions. Foreign hops are strong, and German hops range from 28 to 36c. in price. For good Canadian hops 15c. is bid and bids of 14c. recently made were not accepted. Growers still have some supplies on hand, but their views are very strong. It is said that 75 per cent. of the crop has been taken up. British Columbia hops are not a factor in this market, as the crop was a small one this year, and was exported, for the most part, to Great Britain.

PROVISIONS.—The receipts of dressed hogs this week were large, but car lots from the country were not freely offered. It is thought deliveries will be slack for a week or ten days, and then an improvement is looked for. Packers think that there remains a fair quantity of hogs in the country yet to come forward, and state they will all be needed, particularly hogs that are suited for export purposes. Sales of mess pork are not heavy. There is an active demand for long clear bacon. The outlook for the provision trade is bright. The enquiry from the West is a strong stimulus to the local trade. For dressed hogs dealers quote: Light Western hogs, $6.20; light northern hogs, $6.25 to $6.30, and heavy hogs, $6 per cwt.

WOOL.—Trade is quiet. From the mills there is good demand. Values remain firm. We elsewhere refer at length to the situation, and the prospects for the next clip. An advice from London, Eng., February 10, says: "In the wool trade during the past week there were large enquiries for merinos, but business was small on account of merchants preferring to hold off for the advance which is expected shortly, owing to the smallness of the supplies."

MONTREAL MARKETS.

MONTREAL, 23rd Feb., 1898.

ASHES.—The amount of trading being done in this commodity is very limited, and the average of weekly receipts for some time past does not exceed 25 brls. We quote:—First quality pots at $3.45 to 3.50; seconds, $3.15 to 3.20; pearls, about $4.75 nominally.

CEMENTS AND FIREBRICKS.—The extremely wintry weather, and the heavy snow of Sunday, has not been conducive to activity in the cement line, and actual transactions are few. Stocks, however, are light, and with the strong front shown by manufacturers in Europe, there is no weakening in quotations, which are $2.1 to 2.20 for British, and $1.95 to 2.05 for Bel gian. Firebricks are moving in moderate lots at $17.00 to 22.00 as to brand.

Dairy Produce.—The cheese market shows no improvement whatever in that article, and business has been practically at a standstill for some weeks, so that it is hard to establish any definite quotations. Some holders profess to quote 7¾c. as a fair figure for fine Western, but others say nothing like that could be obtained. For butter there is rather better enquiry, and some scarcity of good rolls is reported. We quote fine creamery 18 to 19c., fine dairy 16 to 17c., rolls 14 to 16c. per lb. For fresh laid eggs there is a good demand at 20 to 21c., No. 1 candled 15 to 16c., and limed 14 to 16c. per dozen.

Dry Goods.—While the heavy snow storm of Sunday and Monday last has interfered with business to some extent, the despatch of spring goods is being actively prosecuted, and the millinery openings next week are expected to attract a goodly number of general dry goods buyers from various directions. Remittances have been somewhat affected by the snow blockade, but no recent failures of consequence have transpired. City retail business is quiet.

Fish.—The demand for fish has been really limited considering the season, and such sales as have been made quite moderate in size. Of pickled salmon there is a scarcity, and in this line prices are firm, but prices of pickled fish generally tend to easiness. We quote:—Green cod, No. 1, $3.25 to 3 50; No. 1, large, $4 to 4.25; dry cod, $3.25 to 3.75; No. 1 herrings, $4.25 to 4.50; N. S. salmon, $12 to 13.00; B. C. ditto, $11.00 to 11.50; sea trout, $6 50 to 7.50; haddies, 6 to 6½c.; bloaters, $1 to 1.25 per box; boneless cod, 4½ to 5c. per lb.; whitefish, $4.75 to 5.00 per barrel.

Furs.—The heavy snow storms, and consequent difficulty of traffic in interior points, still affect offerings, which are of a limited character. As regards prices there is nothing new. We quote:—Mink, large dark, $1.50; small, do., $1.00 to 1.25; marten, $1.75 to 2.25; fisher, $4.50 to 7.00; lynx, $1.00 to 2.00; otter, $1.00 to 12.00 for dark; pale, $5.00 to 7.00; red fox, large, $1.30 to 1.50; small, $1.00; cross fox, $3.00 to 6.00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00;, large, $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7c. to 10c. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

Groceries.—The feature of the week as regards prices is the marked advance in sugars, the refineries having put quotations up a full eighth of a cent yesterday. This makes an advance of 3-16c. within a fortnight, and present factory prices are, for standard granulated, 4 7-16c.; Austrian, 4½c.; yellows, from 3 11-16c. to 4c. per lb. An improved demand is reported from jobbing sources. While there is no special improvement in the enquiry for teas, some moderate trading is going on in low grade Japans and Congous, of which there are quite small supplies now here, owing to the action of the Customs authorities, recently noted, in examining closely into the quality of these goods now being brought forward. The demand for coffees is not brisk, and prices are easy. Rice moves slowly, but prices are steady. We quote:—Standard B., $3.50 to 3.75; Patna, $5 to 5.50; Carolina, $7 to 7.75 In currants, the market is practically bare of good Provincials in brls.; a fair wholesale lot recently changed hands at 5⅝c. net, but the transaction could not be duplicated, it is said, at a quarter cent advance. Dried apples are firmer, Western holders asking 5½c. f.o.b., in quantity. For gallon apples, packers quote $2.65, with few available at that.

Hides and Tallow.—Calfskins have again advanced this week, and the dealers are now paying 10c. for No. 1, and 8c. for No. 2. Supplies are beginning to come in fairly, but there is good demand for all offering. Beef hides are still being bought at 9½c. for No. 1, as the general quotation, but sales to tanners of cured do not average more than 9¾ to 10c. Receipts have fallen off of late, and there is no stock of any account held Lambskins steady at 95c. to $1 each. In tallow there is no activity, butchers only get 1c. to 1½c. per lb. for their rough stock, and rendered is hard to move at 3 to 3½c. per lb.

Leather.—The local enquiry is not specially active, but fair transactions in sole and dongolas continue to be reported. The English market is favorable to the export of sole, and liberal shipments continue to go forward. Values in all lines remain very firm. We quote:—Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 26 to 28c.; No. 2 do., 22 to 24c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 20 to 21c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; bufted cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 13 to 13½c.: polished buff, 11 to 13c.; glove grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

Metals and Hardware.—In these lines of merchandise the movement is a moderate one, though without special activity. In pig iron we hear of the sale of a car lot of Summerlee at $20.50, but this is a very exceptional figure. Bars are quiet. Some good import orders for tin plates are reported on Lower Province account, and the market is steady. In Canadas there is not much doing. Pig lead is easier, and can be bought in fair quantity at $3 50, but tin and copper are quotably firmer. We quote:—Summerlee pig iron $18 00 to 18.50; Carron, No. 1, $18; No. 3, $17.25; Ayrsome, No. 1, $17.00; No 3, $16 50; Shotts, $17.25 to 17.50; Carnbroe, $17.00, ex-store; Siemens pig No. 1, none; No. 2 Siemens, none; Ferrona, No. 1, $15.00 to 16.00; Hamilton No. 1, $16.00 to 16.50; No. 2, ditto, $15.50 to 16.00; machinery scrap, $14.00 to 15.00; common ditto, $12.00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do., I.X., $3.90 to 4.00; P. D. Crown, I. C., $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2 90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24 $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, etc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1.50; three-sixteenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.50 to 3.55; sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50 sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 16 to 16¼c. for L. & F.; Straits, 15½ to 16c.; bar tin, 16½ to 17c; ingot copper, 12¼ to 12½c.; sheet zinc, $5 to $5.25. Silesian spelter, $4.75; Veille Montagne spelter, $4.50 to 4.75; American spelter, $4.50; antimony, 8 to 9c.

Oils, Paints, Glass, Etc. — The market has developed no new features whatever since last writing. Business continues satisfactory in character, and general firmness prevails in all lines, notably linseed oil and turpentine. Stocks of glass, too, are in comparatively small compass, and there is no inclination to concede on quotations. We quote:—Turpentine one to four barrels, 51c.; five to nine barrels., 50c., net thirty days. Linseed oil, raw, one to four barrels., 46c.; five to nine barrels, 45c.; boiled, one to four barrels, 49c.; five to nine brls., 48c., net 30 days; olive oil, machinery, 90c.; Nfld cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c. genuine red do., 4¼c.; No. 1 red lead, 4c; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00. Paris green, 50 and 100 lb. drums, 15c.; 25 lb. drums, 15½c.; 1 lb. cartons, 16c.; pound tins, 16½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

Wool.—Reports from all woolen manufacturing neighborhoods continue to indicate much activity among the mills, but the wool dealers are hardly selling as much raw wool as might be expected. The shoddy mills are, however, reported to be very busy, being hardly able to keep up with orders, and woolen manufacturers are apparently using more of this stuff than ever. The cargo of Cape wool, now some time overdue at New York for this market, has been heard from, the vessel having had to put into Barbadoes for repairs. She carries some 1,100 bales, part of which has already been sold at from 15 to 16½c. Other lines steady at last quotations.

FARMERS' LOAN AND SAVINGS COMPANY.

OFFER BY THE FORMER PRESIDENT.

At the meeting of the creditors of the Farmers' Loan and Savings Company, held in the Confederation Life Building on Monday afternoon last, Mr. J. W. Langmuir, the liquidator, read the following letter addressed to him, from Hon. William Mulock:

Toronto, Feb. 21, 1898.

Dear Sir,—With the very greatest regret I realize from your recently-published report that the condition of the affairs of the Farmers' Loan and Savings Company, as indicated in the report of the interim liquidator, is fully confirmed, and that serious loss will accrue to many interested in the company. I had not the faintest idea that the company was in other than a perfectly sound financial position until about the end of October, 1897, when one of the directors called upon me when I happened to be in Toronto and informed me that the board was considering the question of declaring a dividend, that from information which he had the previous day received he doubted the correctness of the company's recent financial statements, and was of opinions that if his apprehensions were well founded the company was in embarrassed circumstances. I at once stated, and he quite concurred in the view, that the first step was to ascertain if the information was correct, and in the meantime I urged that no dividend should be declared. I further suggested that in order to confirm the truth, the matter should be laid before some gentlemen not connected with the management or the directors, with the request that he would interview the manager, and, if possible, learn the facts. This suggestion was also fully approved of, and for that purpose we both agreed upon Mr. E. B. Osler, who personally, and on behalf of others, had a very large financial interest in the company. Thereupon I proceeded at once to Mr. E. B. Osler's office, laid the case before him, and requested him to make the fullest possible enquiry without delay. This he did, and in the course of about a week he reported to me that the company's affairs were in a very unsatisfactory condition.

At this stage the real position of the company was not fully established, but enough appeared to indicate that the proper course was liquidation, in order to safeguard all interests and to administer the estate justly, without preference to any creditor. Thus in due time followed the liquidation proceedings, and first the report of the interim liquidator and now yours, establishing, as it appears to do, the fact that for several years past the company has not been in a position to declare a dividend. I can only repeat what I have mentioned in my communication read before the Master on the occasion of the appointment of a liquidator, that I am absolutely satisfied that the directors did not for one moment question the accuracy of the annual statements or the statement from time to time submitted to them, on the faith of which dividends were paid: but at all times fully believed that the dividends so paid had been earned. Whether or not the bona-fides of the board exonerate them from legal liability is one question, but there remains the fact established by your report that dividends were declared and paid which the real circumstances of the company did not warrant. In this situation the question of responsibility of the directors becomes a legal one, and whilst it would not be proper for me to prejudice the rights of other directors, yet, speaking for myself, I desire to state that whether I was or was not warranted in law in relying upon the reports of the manager and auditors in assenting to the dividends paid, I have determined to invite you at once to take the opinion of a judge upon my liability as a director up to the date of my having sent in my resignation, and the extent thereof. I will facilitate in every way in my power the disposition of the question, and I will waive any right to appeal, and to the extent of my means I will promptly pay all that may be awarded against me.

I also desire to say that if my legal liability does not absorb all my means, I undertake to set apart a sum of twenty-five thousand dollars ($25,000), if I am still able to do so, which I will pay over to a committee, to be named by the judge, with instructions to distribute the same to those widows and others not in business, and not possessed of other sufficient means, who have lost by this disaster, and who acquired their stock during my occupancy of the office of president of the company.

I am also willing, should you think it in the general interests, without any question of liability being decided by the judge, to pay a lump sum, which, without prejudice, I am willing to state at a larger sum than I am advised my total liability can be placed at, namely, one hundred and fifty thousand dollars ($150,000), which sum, if accepted, is to be taken as a discharge of all liabilities of every kind in relation to the matter, and if this sum is accepted I am willing to make a Widows' Fund, as above mentioned, up to the sum of fifty thousand dollars ($50,000).

In thus writing you, I desire it to be fully understood that in this unfortunate matter I have no desire or intention other than to do my duty to the full.

W. MULOCK.

J. W. Langmuir, Esq.,
Liquidator of Farmers' Loan and Savings Company, Toronto.

Meetings.

CANADA PERMANENT LOAN AND SAVINGS COMPANY.

The forty-third annual general meeting of the shareholders of the company was held on Tuesday, the 22nd instant, in the company's office building, Toronto street, Toronto, the president, J. Herbert Mason, Esq., in the chair.

The secretary, Mr. George H. Smith, having been appointed secretary to the meeting, read the report of the directors for the year 1897, as follows:

REPORT.

The board of directors beg to lay before the shareholders of the Canada Permanent Loan and Savings Company the forty-third annual report of its transactions.

The revenue of the company for the past year amounted to $625,827.82. After providing therefrom for interest on borrowed capital, expenses of management, commissions, and for all known losses, the directors declared two half-yearly dividends of three per cent. each upon the paid-up capital stock; after which there remained surplus profits amounting to $51,071.37.

It is with much satisfaction that the directors are able to record a much greater degree of prosperity in agricultural and commercial affairs than existed at this time last year. Consequent on these improved conditions, and more especially as a result of the abundant harvest of 1897, and the higher prices received for farm products, maturing instalments of principal, as well as interest, on mortgage loans, were paid with more than usual promptness. Many accounts which, owing to adverse circumstances in previous years, had fallen into arrear, were paid or placed in a satisfactory condition. Farming lands in Ontario, as well as in Manitoba and the North-West, have proven more readily salable than for several years before. With another such year as 1897, very little property of this description will remain on the company's hands.

An independent and exhaustive examination of mortgagors' accounts in the company's books has recently been made, and the directors are pleased to be able to inform the shareholders that with comparatively few exceptions, the state of these accounts is most satisfactory. Not only is interest kept well paid up, but in a large number the principal sum advanced has been reduced by repayments.

Having in view the severe depression in the market value of real estate, a careful re-inspection of securities in default has been made. In a number of cases the directors have deemed it advisable, in anticipation, and as a prudential measure, to materially reduce the sums at which these properties appear in the company's books. To effect this they have appropriated the surplus profits of the year, together with a portion of the funds reserved to provide against such exceptional depreciations as at present exist. Although these reductions are believed to be amply sufficient, a further sum has been applied to form a contingent account, with a view to meet any possible loss not now foreseen. The reserve fund remains at $1,150,000, more than 44 per cent. of the paid-up capital, and the contingent fund stands at $102,491.21.

The limited demand for loans on first-class securities, and the low rates of interest obtainable, did not warrant the directors in offering to continue the rates of interest borne by maturing debentures, and in consequence some of these were paid off. Those renewed, and the new money received, were all at three and one-half per cent. per annum. Accounts with depositors show a small increase.

The outlook for the immediate future is encouraging. If the tide of prosperity, indications of which are now visible, continues to flow as generally expected, real estate values will doubtless be favorably affected, there will be a more active demand for money, and our company, with its extended ramifications and effective staff, is in a position to promptly take advantage of it.

A member of the board, Mr. Henry Cawthra, having gone abroad, with the expectation of making a prolonged stay, sent in his resignation. His place as a director has been filled by the election of a qualified shareholder, Mr. W. E. Wellington, a gentleman who is well acquainted with the agricultural resources and requirements of the provinces in which the funds of the company are invested.

All of which is respectfully submitted,

J. Herbert Mason,
President.

Toronto, Feb. 9th, 1898.

Geo. H. Smith, Secretary.

We, the undersigned, beg to report that we have made the usual thorough examination of the books of the Canada Permanent Loan and Savings Company for the year ending 31st December, 1897, and hereby certify that the above statements are strictly correct and in accordance therewith.

J. E. Berkeley Smith,
Henry Barber, F.C.A.
Auditors.

Toronto, Feb. 7th, 1898.

The president said:

Gentlemen,—In the few words I desire to say before moving the adoption of the directors' report, I purpose to confine my remarks to the several topics referred to therein.

The revenue derived from investments amounted, as stated in the report, to $625,827, about 5½ per cent. upon the capital employed. The total losses sustained on the realization of securities during the year was $34,083, leaving for distribution a balance of $591,744, as appears in the profit and loss account. The net profits, after providing for all fixed charges, losses and expenses, amounted to nearly eight per cent. upon the paid-up capital stock, a result which, considering the low rate of interest prevailing, is, I think, very satisfactory. You will be pleased to notice that the cost of management was some $4,000 less than in the preceding year.

Unmistakable evidence of the great improvement in agricultural, commercial and industrial affairs in the past year is afforded by the phenomenal increase in exports, as shown by the customs returns, by the increased business of railways, banks, and in manufacturing and mining industries, as well as in the trade and commerce of the Dominion generally. Our own experience likewise bears witness to this fact. We issued more than two thousand receipts for payments on mortgages more than in 1890. Maturing obligations were better met than for several preceding years.

The revival of business prosperity has always, sooner or later, a beneficial effect upon the market value of landed property. The demand for farming lands in Manitoba has much improved. During the latter part of the year about one-half of the lands on our hands in the North-West were disposed of. In Ontario, sales have been more readily effected, but the improvement in value is not so marked. Town property is more slowly and indirectly affected, but the returns for rentals have considerably increased, and there are few vacancies. For many years there have not been more favorable opportunities afforded to immigrants and home investors to acquire Ontario improved agricultural lands, and city and town property, than exist at the present time.

A special examination into the state of our borrowers' accounts was instituted by the directors in the latter part of the year. In addition to the usual examination made by our auditors, schedules were prepared by and under their direction, at the two branches as well as at the head office, showing the sum originally advanced, the amount now at debit, and the increase or decrease of each individual account in the company's ledgers. These schedules were placed in the hands of a committee of four directors, two of whom spent a large portion of every day for several weeks in making careful examination of them, scrutinizing each account and the security held therefor, when it appeared in any wise doubtful, and calling upon the superintendent, inspectors and other officers, for any information they desired. It will be gratifying to the shareholders to know that the directors are perfectly satisfied with the result of this investigation. The committee report that they found interest to be generally well paid up, that there are no accumulations of unpaid interest in the books of the company, no interest having been charged on any account where there existed reasonable doubt of its being paid. A large proportion of the accounts show not only that interest has been paid, but also that the principal sum advanced has been considerably reduced, thereby improving the security. The committee also report that the officers in charge were thoroughly conversant with the condition of each account, and with the security held therefor, and that throughout their long and minute enquiry they did not find one account which had been overlooked or neglected. The state of our customers' accounts is conclusive evidence that the revenue out of which interest, expenses and dividends have been paid is not a mere book-keeping estimate, but has been actually earned, and either received in cash or stands charged on good active mortgage loans.

Owing to the steadily diminishing value of nearly every description of landed property during the last seven years, the duty of repeated re-examination and re-valuation of securities has become one of the first importance. To effect this, a large staff of inspectors has become necessary. For some time it was difficult to realize that such a general shrinkage in values could take place as to absorb the margin of security that for so many years we had found to be sufficient to protect the company's interests. Our practice has been to make provision for any exceptional cases of this kind, out of the surplus revenue of the current year. The present severe and long-continued depression led the directors to the conclusion that the time had come when larger deductions should be made, and they decided to use for that purpose, for the first time in the company's history, a portion, say three hundred thousand dollars of the amount specially reserved in former years, to meet such an adverse contingency if it should arise. The earning power of the company has not been diminished by these reductions, no interest having been charged against these properties. The reserve fund still stands at $1,150,000, and is protected by a contingent fund of $102,000. Should values improve as expected, some of these reductions for estimated deficiencies may prove to have been unnecessary.

Our experience as to the depreciation in the value of landed property has not been peculiar to ourselves. It is the experience, in a greater or less degree, of all corporations and of all individuals whose business is based on real estate, or who have had transactions in it. For many years it was considered one of the most stable of securities, and doubtless will be so again. Nor is this state of things confined to Canada, but is even to a greater extent felt elsewhere. As prudent business men, your directors resolved to face the situation, and to anticipate possible future loss by reducing or wiping out all doubtful assets. In adopting this course, instead of treating them as good, however strong their conviction, that in time, by not charging interest, applying rentals on account, etc., they would prove to be so, the directors may fairly expect to receive the commendation of their fellow-shareholders, and of the investing public generally.

In the first half of the year there was so little demand for money that we declined to receive large sums which were offered to the company for investment. The general improvement creates greater opportunities for the employment of capital, and a more active demand for loans.

I have pleasure in again acknowledging the faithful and influential assistance of our respected agents in Great Britain, in maintaining the high standing of the company in the Motherland, and also the efficient labors of the officers and staff at the head and branch offices.

Near the close of the year our venerable vice-president, Mr. Hooper, in consequence of advanced age, he having entered his ninetieth year, felt it necessary to retire from that office. Mr. Hooper has been a member of the board for nearly forty years, and still remains a director. Mr. W. G. Gooderham was elected vice-president in Mr. Hooper's place.

Before concluding, I beg leave to say that if any shareholder present desires any further information, I shall be pleased to give it, so far as I may be able.

I beg to move:

"That the report of the directors for the year 1897 be received and adopted, and that it be printed with the audited statements of profit and loss, and assets and liabilities, for distribution to the shareholders."

The motion was seconded by the vice-president, Mr. Wm. G. Gooderham, who said:

"I have much pleasure in seconding the resolution. In doing so, I wish to say that I think the statements just presented to the shareholders, and the full information given by the president with regard to the increased receipts for interest and principal, and to the improved selling value of property, must be considered most gratifying.

"As a member of the investigating committee, I beg to say the examination of the company's affairs, to which you have made reference, has impressed upon the minds of the committee the fact that the affairs of the company are perfectly safe in the hands of the gentlemen who form our staff. I refer particularly to the inspection staff, to the members of which, whenever any enquiry was made, the details of every account appeared to be right at their finger-ends, they evincing no hesitation about giving the fullest information concerning any account or any security as to which the committee desired information. We were surprised to find how well maturing interest was paid and in how many cases the principal sum had been reduced by repayments. I feel that this state of affairs is one upon which the board and the shareholders are entitled to congratulate themselves.

"I note your kind remarks with regard to the retirement of Mr. Hooper. It was with feelings of deep regret that the board heard of his intention of resigning the vice-presidency, which honor has been conferred on me. I regret it has not fallen into abler hands. We all hope that Mr. Hooper may long be spared to associate himself with this company.

"I do not know that anything further remains to be said by me, but I have much pleasure in seconding the adoption of the report."

The motion was unanimously carried.

The report of the directors was unanimously adopted, as also were votes of thanks to the president, directors, officers and agents of the company.

The retiring directors, Messrs. Edward Hooper, W. G. Gooderham, W. D. Matthews and G. W. Monk, were unanimously re-elected.

At a subsequent meeting of the board, Messrs. J. Herbert Mason and W. G. Gooderham were respectively re-elected to the offices of president and vice-president.

WESTERN CANADA LOAN AND SAVINGS CO.

The thirty-fifth annual general meeting of the shareholders of the Western Canada Loan and Savings Company was held on Monday, Feb. 21, 1898, at 11 o'clock a.m., at the company's offices, the president, Hon. Senator Allan, in the chair. The following report was submitted:

REPORT.

The directors have pleasure in presenting to the shareholders the thirty-fifth annual report.

After deducting cost of management, interest on debentures, and all other charges, the net profits of the company amount to $106,402.09. Out of this sum two half-yearly dividends, at the rate of six per cent. per annum, have been paid, and the balance, $14,120.47, carried to the contingent account.

The repayments of principal and interest falling due during the year have been most satisfactory, amounting in actual cash to $435,605 on account of principal money, and $466,168 on account of interest.

The money intrusted to the company for investment is $4,433,928.53, as against $4,441,961.81 last year. The Canadian debentures have been increased by $115,600. The sterling debentures have been decreased by $27,485, and the deposits have been reduced by $97,758.

A large number of sterling bonds became due during the year, and with the exception of the above-mentioned amount all have been renewed or replaced with money at 3½ per cent. per annum.

The directors are gratified to note that so much of the deposit money is being replaced by Canadian debentures. The saving on interest paid on borrowed money this year, and in the expenses of management, has been very considerable.

In view of the possibly unfavorable effect which the late failure of one of our loan companies may have upon the general credit of Canadian securities in the British market, the directors have lately had some correspondence with our excellent debenture agents in Scotland in reference to the best means of strengthening the confidence of the investors in the bonds of this company; and considering the large amount of money borrowed in Great Britain, it has been agreed that it would tend to the ultimate advantage of the company if its affairs could be periodically reported upon by a representative from Great Britain. We have therefore arranged that a representative of the firm of Messrs. Lindsay, Jamieson & Haldane, of Edinburgh, should make a report of the position of the company as at the present time, and a member of that firm will shortly visit Canada with a view of making such report to the British debenture holders.

The balance sheet and profit and loss account, together with the auditors' report, and letter thereon, are submitted herewith.

G. W. ALLAN.
President.

WALTER S. LEE, Managing Director.

Toronto, 10th Feb., 1898.

To the shareholders of the Western Canada Loan and Savings Company:

We beg to report that we have completed the audit of the books of the Western Canada Loan and Savings Company, and a detailed inspection of the securities (with the exception of the business of the Manitoba branch, which has been audited and inspected by the local auditor, and certify that the above statements of assets and liabilities, and profit and loss, are correct, and show the true position of the company's affairs. The bank balances and cash are certified correct.

W. R. HARRIS,
A. E. OSLER,
Auditors.

The president and shareholders of the Western Canada Loan and Savings Company, Toronto:

In view of the current comments, through the press and otherwise, upon the duties of auditors of loan companies and the work performed by them, we deem it advisable to lay before you, in detail, as fully as possible, the method adopted and the work performed by us in connection with the audit of the books of your company, and would ask for suggestions from you, if in your opinion further scrutiny be necessary. Authority for making all loans is required either by the production of the minutes of the board, authorizing same, or the authority of the president or vice-president, indicated on the application form. Vouchers for payments of amounts charged to mortgage accounts and for payments of insurance premiums, taxes, etc., are seen and stamped by us. Before the annual statement is prepared each individual mortgage, bond or other security, is seen by us and compared with the amount at which it is taken as an asset, and initialled. Vouchers for all moneys disbursed are examined and stamped by us. All coupons for payment of interest are seen and stamped, as are all bonds paid or replaced by renewals. Totals of cash receipts and disbursements, as shown by cash book, are checked, and balance on hand verified. The posting of entries of all kinds from the cash books and journals to the ledgers, are called over and checked by us. At the end of each year the balances of all ledgers are brought forward and compared. The figures composing the annual statement are prepared from the general ledger, and subsidiary books are fully gone into, and balance in banks and cash on hand verified.

Yours faithfully,
(Signed), W. R. HARRIS,
A. E. OSLER,
Auditors.

The president then said:

The report, with the accompanying figures, which was sent out to every shareholder, and which is now before the meeting, will be found, I think, to contain a very clear statement of the business transacted during the past twelve-month, the results of that business, and the satisfactory position of the company as shown by the statement of assets and liabilities, and the profit and loss account.

The shareholders will observe that the repayments on our mortgage loans, both principal and interest, during the past year, have been most satisfactory. This is doubtless due in a great measure to the returning prosperity of the country, and to the abundant harvest, both in Ontario and Manitoba.

The special feature which I alluded to at our last annual meeting, of only declaring a dividend upon the actual earnings, or what might be described as the cash income of the company, has continued to be most carefully observed, as the only sound basis upon which a dividend can be properly declared. In connection with this subject I am sure it will be satisfactory to the shareholders to know that a large proportion of the interest in arrear at that time, and therefore not reckoned as divisible profits, has since been paid off, and on some of the properties which had fallen into our hands, chiefly in Manitoba, we have more than realized the amount of the debt.

Of course, our experience in common with other companies which have gone through periods of depression, as well as prosperity, has not been always equally fortunate. It has been impossible, while exercising the greatest care in loaning our moneys, always to foresee the unexpected changes which at different periods have injuriously affected the value of real estate. In such instances, however, and where there is no prospect of immediate improvement, we adopt what we think is the true policy, of selling for what we can get, and removing such doubtful cases from our books.

The shareholders will have observed that we have written off the sum of $56,175,30 from our contingent fund this year. This has been applied to wipe off all losses sustained in the sale of property consequent upon the depreciation in real estate. A large proportion of this amount was applied to the wiping off of the loss on some paper mills at Napanee, which we have lately sold, and I am glad to be able to say that, with one exception, we have not now on our books a single mill or manufactory of any description, the exception alluded to being a flour mill in Manitoba, and this account ranks as one of the best in our Manitoba ledger.

As it is very possible that many of the shareholders may never see or read the yearly returns made by the loan companies to the Government, and which are published every year, and as the directors are desirous that all the shareholders should be in possession of the fullest information in regard to the affairs of this company, I may here mention that the two items which will always be found in these reports, viz.: (1) Property which has fallen into the hands of the company by foreclosure, or by quit claim deed, and, (2) That which we hold through the exercise of powers of sale contained in the mortgages are represented, the first by $250,200.85 and the second by $812,433.88.

Many of the properties under these two heads are bringing in a considerable revenue to the company, many of them we shall have to dispose of at a loss; while, if the present improved condition of things continues, very many of them will doubtless realize the full amount of the debt. In any case, the policy of the company will be to bring these properties to sale as rapidly as possible, and any losses incurred will be written off at once. We are also receiving a very considerable amount of rent from properties over which we have not exercised the power of sale or foreclosure, and the total value of which may probably aggregate $251,207. As I have said, these properties are bringing in a large amount of rental, and by the exercise of care and judgment, in allowing reasonable time, and taking advantage of the proper opportunity, the amounts due upon the greater part of them will be realized, and but few are likely to be disposed of at any very serious loss. Indeed, I think that the returning prosperity of the country and the consequent improvement in real estate will soon enable the directors to reduce the amount of property now held by the company to comparatively small proportions.

The shareholders will be pleased to know that, while the volume of business has not decreased, our working expenses have been reduced by $4,081; and also that while the amount of borrowed money is practically the same as last year, we have reduced the interest paid by some $7,261.

Another item in the report which I think is of interest, is, that we have increased the amount of our Canadian bonds by $115,600, and one-third of our borrowed money is now being obtained in Canada, and at actually a lower rate than in Great Britain: and as "a prophet has seldom honor in his own country!" it is the more gratifying that some of our best-known and leading financial corporations have lately shown their confidence in the company by investing to a very considerable amount in our currency bonds.

Our deposit account, it will be noticed, has been reduced by $97,758; and, as mentioned in the report, a considerable proportion of the amount withdrawn by depositors has been re-invested by them in the company's currency bonds. It is our policy, as far as possible, to effect a still further reduction of the amount held on deposit, and we hope that a large number of depositors may be induced to place their money in the company's currency debentures.

In regard to our sterling bonds: Of the

large number which came due during the year, all with the exception of $27,485 have either been renewed or replaced by new bonds at 3½ per cent. per annum.

The recent lamentable failure of one of our loan companies may—and doubtless will, for a time at least—have an unfavorable effect upon the credit and standing of this class of Canadian investments in the estimation of investors in Great Britain; and it is therefore very desirable that all reasonable means should be taken to reassure those who may place their money for investment in any properly managed company in Canada of the perfect safety of such investments.

This leads me to speak of the new departure which we are taking, as mentioned in the report, and which I cannot but believe will thoroughly commend itself to all our shareholders, viz.: that in addition to our usual yearly audit, we propose having an entirely independent report made by a Scottish accountant of eminence on the position and standing of the company. This step has been determined upon after correspondence with our Edinburgh agents, and has been more readily adopted, because the directors fully recognize that, as the larger proportion of our borrowed money is drawn from Great Britain, our debenture holders there are entitled to the fullest information they may desire as to the position of the company's affairs. The firm which has been chosen to make this report is one of the highest standing, and they expect their report will be ready for issue within a short time after the arrival of the member of the firm now on his way to Canada.

In looking forward to the business prospects of the present year, I think they are in many respects most hopeful and encouraging. There is unquestionably a greater demand for farm lands in Ontario, and better prices are obtained, while in Manitoba the outlook is most satisfactory. I do not desire to lay undue stress upon the probable effects of the wonderful developments which are taking place in the great mineral wealth of the Dominion: but I think we shall all agree that it must bring in an immense accession to our population, and very largely increase the trade and business and general prosperity of Canada.

I cannot close these brief remarks without alluding to the care and vigilance which our managing director has exercised in the conduct of the company's business. We all know that in these times the manager of a large loan company does not lie on a bed of roses; and, while claiming for the board of directors that they have all given their most careful and anxious attention to the business of the company, I know they will join very heartily with me in expressing their appreciation of the value of Mr. Lee's services. I desire also to express the strong sense which we entertain of the energetic, and at the same time judicious, conduct of the company's affairs in Manitoba by our local manager, Mr. Fisher, which has made the business of the Winnipeg branch most satisfactory and successful.

In our home office we are fortunate in being faithfully and intelligently served by our able staff; and our auditors have discharged their duties with their usual ability and thoroughness. Lastly, I desire to record our hearty appreciation of the care and consideration for the interests of the company which our agents, Messrs. Bell, Cowan & Co., have so invariably shown, as well as for the advantage we have received from their valuable counsel in connection with the debenture business.

Scrutineers having been appointed, a ballot was taken, and the retiring directors, the Hon. Senator Allan, Messrs. George F. Galt and Thomas H. Lee, were re-elected. These gentlemen, with Messrs. George Gooderham, Alfred Gooderham, George W. Lewis, and Walter S. Lee, form the board.

At a subsequent meeting held by the directors, the Hon. George W. Allan and George Gooderham, Esq., were re-elected president and vice-president, respectively.

PEOPLE'S LOAN AND DEPOSIT COMPANY.

The annual general meeting of shareholders in the People's Loan and Deposit Company was held at the company's office, Toronto, on Monday, 14th February, 1898, the president, Hon. J. C. Aikins, in the chair. The following report was submitted and adopted. It is the twenty-third annual report and statement:

REPORT.

The directors beg to submit herewith the report for the year ending December 31st, 1897, together with the balance sheet duly audited.

Debentures, Dec. 31st, 1896		$290,358 87
Debentures, Dec. 31st, 1897		234,583 62
Reduction		$55,775 25
Deposits, Dec. 31st, 1897	$107,047 00	
Deposits, Dec. 31st, 1896	98,382 59	
Increase		8,664 41
Net reduction		$47,110 84

Debentures have been paid during the year, amounting to $101,389.90; issued and renewed, $46,358.38. Sterling debentures, amounting to £6,450 ($31,390) matured and were paid, and the balance remaining unpaid is £550 ($2,676.66), which is payable one and two years hence. This is the full indebtedness in respect of sterling debentures. To meet the payment of debentures, advances on mortgages amounting to $28,000 were obtained. This is shown as a separate liability in the statement.

The deposits have increased $8,664.41 during the year, which manifests continued confidence in the management and stability of the company.

Properties amounting to $34,599.46 were sold during the year: the losses on which were $7,881.96. In addition to this, over $10,000 has been written off real estate and mortgage accounts. The percentage of loss on city property sold, was comparatively small.

The gross revenue for the year amounts to $49,787.12. From this have been deducted charges for taxes, improvements, repairs, insurances, etc., amounting to $27,092.53. The directors still believe that the safest and best course to pursue is to deduct these charges from the income, and not to increase the assets. But while these deductions are made from year to year, the company is not prevented from collecting the same, if the properties realize sufficient, or if recovery can be made from the mortgagors.

The collections from rents and interest for the year amount to $49,554.20, which is nearly five per cent. on the securities.

The number of vacant properties during the past year has been considerably less than for the previous one: and in consequence $2,000 more has been received in rents. In order to accomplish this result, a large amount had to be expended in repairs and improvements.

Mr. F. W. Walker, one of the directors elected at the last annual meeting, resigned his position shortly afterwards, and the vacancy has not been filled.

Respectfully submitted,

J. C. Aikins,
President.

Toronto, January 25th, 1898.

We, the undersigned, beg to report that we have made a thorough examination of the books of the People's Loan and Deposit Company for the year ending 31st December, 1897, and of the vouchers and securities, and hereby certify that the above statements are strictly correct and in accordance with the same.

(Signed),
Robert Sewell,
Edward B. Freeland,
Auditors.

Toronto, January 25th, 1898.

MANUFACTURERS' LIFE INSURANCE COMPANY.

The annual meeting of the shareholders and policy-holders of the Manufacturers' Life Insurance Company was held in the company's general offices, Jordan street, Toronto, on Feb. 18th, when the following report was presented:

REPORT.

The directors take pleasure in herewith submitting to the policy-holders and shareholders the eleventh annual report of the Manufacturers' Life Insurance Company.

During the year 1,739 applications were received for $2,980,219 of insurance, of which 1,599 were accepted, and policies issued thereon for $2,693,219—one hundred and ten for $205,000 being declined as not being up to the standard, and thirty for $82,000 being held in abeyance for further information.

The insurance in force has now reached the sum of $11,867,229, on which premiums were paid in cash amounting to $397,758, being an increase over the previous year's premium of $29,185.15. The income from interest and rents was $50,517.47, making a total cash income of $448,275.47, an increase over the previous year of $34,988.10.

The death claims falling in during the year amounted to $98,021, of which $5,300 was re-insured in other companies, making the net death loss $92,721, and of this amount $22,000 represented deaths resulting from accidents.

The total payments to policyholders for death claims, dividends, matured endowments and surrender values were $165,037.39, which, with $163,808.87 paid for re-insurance premiums, expenses, and dividends to stockholders, amounts to a total disbursement of $328,846.26. Deducting this from the total income we have $119,429.21 to be added to the reserve or assurance funds, bringing the total assets up to $1,306,446.38.

The certificates of the auditors and auditing committee of the board, which are shown on another page of the report, certify to the regular monthly audit of the company's affairs, and to the examination of the securities.

The directors acknowledge the care and ability of the company's officers, office staff and field representatives, which are demonstrated by the results of the year's operations.

George Gooderham,
President.
S. F McKinnon,
Vice-President.

The following are a few excerpts from the address of the president. Mr. George Gooderham, in moving the adoption of the report:

"In moving the adoption of the report it is my privilege to again congratulate the policyholders and stockholders of the Manufacturers' Life Insurance Company on another year of progress, as shown by the increases in income, assets, and insurance in force.

"We have now passed our tenth full year, and, as the shortest term for which any of our tontine policies run is ten years, we have reached the period when some of these are maturing and others entitled to dividends. For this reason the payments to policyholders for the year 1897 have more than doubled those of any previous year, amounting to $165,037.39, of which $82,762.65 was for death claims, and $82,274.64 for matured endowments, profits and surrender values.

The decline in the ruling rate of interest during the last year or two has been so marked that it is no longer possible to secure desirable investments at the rates formerly obtained. Your directors have therefore thought it prudent to adopt a conservative course, and have not only placed the premium rates on the Hm. 4 per cent. basis, but, in estimating the company's reserve liabilities, have made the valuations of a large part of the business now on the books on the same basis, though the Government standard would permit us to estimate that the investments will yield 4½ per cent net. By using the Government standard of valuation we could of course show a larger surplus over and above liabilities, but we think security should be the first consideration in life insurance, and we are confident that our policyholders and stockholders will agree that this conservative action is in the right direction."

The usual votes of thanks were passed, and in replying for the officers of the company, the general manager, Mr. J. F. Junkin, said, that the very substantial progress made during 1897 was not exceptional, but was only a continuation of the record of recent years as demonstrated by the following figures, showing the growth of the society in the association during the last three years:

	Insurance in force.	Income.	Assets.
1894	$ 9,555,300	$ 306,731	$ 821,321
1897	11,867,229	448,275	1,306,446
Increase	$ 2,311,929	$141,544	$485,125
Percentage of increase	24	46	59

The following is a summary of the financial statement:

Receipts.

Dec. 31st, 1897.	
Premium income	$397,766 45
Interest income	50,517 47
	$448,283 92

Expenditures.

Paid to policyholders for death claims, endowments, surrender values and profits	$165,037 39
Expenses, taxes, dividends and re-insurance premiums	163,808 87
Added to reserve fund	119,437 66
	$448,283 92

Assets.

Goverment bonds and debentures	$ 244,126 15
Mortgages	730,304 44
Real estate	18,066 12
Loans on policies	64,775 80
Cash in banks and other assets	249,173 87
	$1,306,446 38

Liabilities.

Reserve fund (hm. 4 p.c. and 4½ p.c.)	$ 1,109,097 00
Other liabilities	20,983 23
	$1,130,080 23
Surplus	176,366 15
	$1,306,446 38
Surplus as above	$ 176,366 15
Uncalled capital	493,680 00
Total surplus for security of policyholders	$ 670,046 15
Policies for life assurance were issued, assuring	2,747,253 00
The total assurance in force at the 31st of December, 1897, amounted to	$11,867,229 00

The whole of the members of the board of directors were re-elected, and the following gentlemen were added: Sir Wm. Hingston, Montreal, and Messrs. Hugh John Macdonald and Wm. Whyte, Winnipeg.

At a meeting of the directors immediately afterwards, Mr. George Gooderham was elected president and Mr. S. F. McKinnon and Sir Wm. Hingston, vice-presidents.

MILLERS AND MANUFACTURERS INSURANCE CO.

STOCK AND MUTUAL.

ESTABLISHED 1885.

The general annual meeting was held in the company's offices, 32 Church street, Toronto, on Friday, 18th February, 1898. The president, Mr. Jas. Goldie, occupied the chair; the manager, Mr. Hugh Scott, acting as secretary.

REPORT.

Your directors beg to submit the thirteenth general statement of the business of the company, comprising revenue account and profit and loss account for the past year, and the balance sheet, showing the liabilities and assets on the 31st December, 1897.

The total number of policies in force at the end of the year was 577, covering at risk, after deducting re-insurance, the sum of $1,440,445.

By referring to the profit and loss account, it will be seen that the sum at the debit of this account on 31st December was $74,711.36, and after deducting re-insurance reserve, $11,236.22, the balance remaining to carry forward to the credit of this account was $63,475.14

In view of the foregoing results a bonus dividend of 10 per cent. has been declared to policy-holders.

The retiring directors this year are: Jas. Goldie, W. H. Storey and Hugh Scott.

All of which is respectfully submitted.

Hugh Scott, Managing Director.
Jas. Goldie, President.

I hereby certify that I have audited the books and examined the vouchers and securities of the company for the year ending 31st December, 1897, and find the same correct, carefully kept, and properly set forth in the above statements.

Wm. A. Wilson,
Auditor.

Toronto, 13th January, 1898.

The President, in moving the adoption of the report, said: On examining the statements now before you it occurred to me to glance through the original prospectus that we issued on 27th March, 1885, and see how our expectations, as then set forth, had materialized. In it we stated: "The rates of premium it is proposed to charge will be a cash payment one quarter (25 per cent.) less than the now exacted rates, and an undertaking to be given for a similar sum. It is expected this cash premium will be largely in excess of the losses, and the surplus, after providing a reserve fund, will be apportioned among the assurers, and allowed as a rebate or dividend off the cash premium payable at the end of each year on the renewal of the policy, thus giving insurance at cost." The results of my examination demonstrated that our policy-holders have saved on the cost of their insurance the sum of $158,659, and in addition thereto, dividends have been declared to them amounting to $28,214, making the very substantial saving, by placing their insurance with this company, of $186,873. Such marked results are very gratifying to me, particularly so, as they more than verify the hopefulness expressed in our prospectus, and have greatly exceeded my most sanguine expectations.

The report was adopted, the retiring directors unanimously re-elected, and at a subsequent meeting of the directors Jas. Goldie was re-elected president and J. L. Spink vice-president.

J. M. COURTNEY, *Dep'y Min. of Fin.*

QUEEN CITY FIRE INSURANCE COMPANY.

ESTABLISHED 1871.

Report of the directors to the twenty-seventh ordinary general meeting, held at the offices of the company, Church street, Toronto, on Saturday, the 19th day of February, 1898.

REPORT.

The directors have much pleasure in submitting to the shareholders the revenue account and profit and Loss account for the past year, and the balance sheet, showing liabilities and assets on 31st December, 1897.

The number of policies in force at the close of the year was 2,807, covering at risk, after deducting re-insurance, the sum of $3,382,170.

By referring to the profit and loss account, it will be seen that the total sum at the debit of this account on 31st December, was $60,987.62, out of which has been appropriated the regular shareholders' dividend, equal to twenty-five per cent. on the original paid-up capital, leaving a balance at the credit of this account to cover re-insurance reserve, etc., of $58,487.62.

In accordance with the Act of Incorporation, all the directors retire and are eligible for re-election.

THOS. WALMSLEY, Vice-Pres. and Secy.
HUGH SCOTT, President.
W. I. SCOTT, Asst. Secretary.

HENRY WM. EDDIS, F.C.A.,
Auditor.

Toronto, February 1st, 1898.

The President, in moving the adoption of the report drew attention to the profit and loss account of this company, as the balance at its credit is one of the safeguards that has been built up in the interests of shareholders and policy-holders alike, to meet any possible conflagration contingency that might occur. This accumulated fund now has in itself a ratio of 1.72 per cent. to our gross liabilities or amount atrisk.

The wisdom of fostering this account was demonstrated when this city was in 1895 visited by a series of conflagrations unprecedented in its history, and in each of them this company had its full lines, notwithstanding which only twelve per cent. at the credit of this account had to be encroached upon to settle all our losses on that occasion.

In addition, however, to this safe-guard, we have a "stone wall" in our rest or reserve fund, which alone has a ratio of 2.21 per cent. to our gross liabilities; these together making the very large ratio of 3.93 per cent., which is a much larger ratio, exclusive of capital, than that of any other fire insurance company, including capital, doing business in the Dominion.

The adoption of the report, seconded by the vice-president, was carried.

Moved by Hon. Justice Maclennan, seconded by J. G. Scott, "That a bonus dividend of five per cent. on the paid-up capital be paid to shareholders, in addition to the regular dividend for the past year, 1897." Carried.

The old board was unanimously re-elected, and is now constituted as follows: — Hugh Scott, president; Thos. Walmsley, vice-president and secretary; Hon. Justice Maclennan, J. G. Scott, Master of Titles; J. D. Chipman, M.P.P.; W. Ireland Scott, assistant secretary.

BRITISH AMERICA ASSURANCE COMPANY.

The annual meeting of the shareholders of the British America Assurance Company was held in the company's offices, Nos. 18, 20, and 22 Front street east, Toronto, on Friday, the 18th February.

The president, Hon. George A. Cox, occupied the chair.

Mr. P. H. Sims was appointed to act as secretary, and read the following report, which, on motion, was adopted:

REPORT.

In presenting the sixty-fourth annual financial statement of the company, the directors have pleasure in calling attention to the following results of the year's business.

The balance of income over expenditure, as shown by the revenue account, is $100,832.74.

There has been a net appreciation in the market values of securities of $14,147.93.

The reserve fund has been increased from $528,883.84 to $591,364.51, after providing $52,500 for two half-yearly dividends, at the rate of seven per cent. per annum.

The estimated liability on current policies is $511,982.86, an amount more than ample, according to the company's past experience, to run off all existing risks, and after providing for this there is a net surplus over capital and all liabilities of $79,381.65.

In all departments a decrease is shown in loss ratios as compared with those of the previous year.

The directors express their appreciation of the efficient services of the officers, special agents and representatives of the company during the past year.

All of which is respectfully submitted.

P. H. SIMS,
Secretary.

J. J. KENNY,
Vice-Pres. and Managing Director.

To the president and directors of the British America Assurance Company:

Gentlemen,—We, the undersigned, having examined the securities and vouchers, and audited the books of the British America Assurance Company, Toronto, certify that we have found them correct, and that the annexed balance sheet is a statement of the company's affairs to 31st December, 1897.

R. F. WALTON,
J. M. MARTIN, F.C.A.
Auditors.

Toronto, Ont., 4th February, 1898.

The following gentlemen were elected to serve as directors for the ensuing year: Hon. Geo. A. Cox, J. J. Kenny, Hon. S. C. Wood, S. F. McKinnon. Thos. Long, John Hoskin, Q.C., LL.D., H. M. Pellatt, R. Jaffray, A. Myers.

At a meeting held subsequently, Hon. Geo. A .Cox was elected president, and Mr. J. J. Kenny, vice-president.

LANDED BANKING AND LOAN COMPANY.

The twenty-first general annual meeting of the shareholders of the Landed Banking and Loan Company was held in the company's office, Hamilton, Wednesday, Feb. 16th, at noon, the following shareholders being present: Rev. George A. Forneret, John Waldie, Samuel Barker, Matthew Leggat, Rev. J. B. Hamilton, George H. Bull, W. H. Evans, William Marshall, Henry McLaren, J. D. Wilson, Edward Martin, Q.C., J. J. Mason, W. F. Findlay, W. W. Osborne, R. AE. Kennedy, E. J. Palmer.

On motion, the president, Matthew Leggat, acted as chairman, and the treasurer, C. W. Cartwright, as secretary.

The secretary read the notice convening the meeting, also minutes of the meeting held the previous year, which were confirmed.

The annual report of the board of directors, of which the following is a copy, was then presented:

REPORT.

The directors beg to submit to the shareholders the twenty-first annual report of the company's affairs, together with the profit and loss account and balance sheet for the year ending Dec. 31, 1897, duly certified by the auditors appointed by the shareholders.

The net profits for the year, after deducting all charges, amount to............ ... .$	45,184 73
Added to which is the balance carried forward from last year.	2,637 57
	$47.822 30

Which amount has been appropriated as follows, namely:

Two half-yearly dividends at the rate of 6 per cent. per annum, amounting with the income tax, to...... ....$	41,757 53
Carried forward to next year....	6,064 77
	$47,822 30

The assets of the company show a gratifying increase, being $24,608.56 in excess of those in former report.

The reserve fund as at December 31, 1897, is $160,000.

Debentures, both currency and sterling, have largely increased, and now aggregate close on $700,000, while savings deposits are less. This is, however, accounted for by many of the Canadian depositors accepting debentures payable at fixed dates.

Interest rates obtainable on loans have for the year been somewhat lower, but a saving in interest has been effected on money placed on deposit with the company and on its debentures.

The abundant crops, with better prices to the farmers, have resulted in mortgage instalments being satisfactorily met.

A very careful examination of the securities of the company has recently been made by the president and vice-president, and full provision made for all losses known or anticipated.

The officers of the company have performed their several duties to the satisfaction of the directors, and acknowledgment is again made of the valuable services rendered by the agents in Scotland, Messrs. McAndrew, Wright and Murray.

All of which is respectfully submitted.

MATTHEW LEGGAT,
President.

Hamilton, Feb. 4, 1898.

C. W. CARTWRIGHT, treasurer.

We, the undersigned, have audited the books of the Landed Banking and Loan Company for the year ending Dec. 31. 1897, and certify that the foregoing statements are in conformity therewith.

We have also examined the securities held by the company, and found them correctly set forth in the securities book. The expenditures have been duly vouched for.

W. F. FINDLAY, F.C.A.,
WM. MARSHALL,
Auditors.

Hamilton, Feb. 4. 1898.

The adoption of the report was moved by Matthew Leggat, seconded by John Waldie, and was carried unanimously.

Election of Directors.—On motion, the following were re-elected directors for the ensuing year: Samuel Barker, Thomas Bain, M.P., R. AE. Kennedy, M. Leggat, Henry McLaren, J. J. Mason, and John Waldie.

W. F. Findlay, F.C.A., and William Marshall were re-appointed auditors for the ensuing year.

The usual vote of thanks to the auditors, directors, treasurer and staff having been passed, the meeting adiourned.

At a subsequent meeting of the directors, Matthew Leggat was re-elected president, and John Waldie, vice-president.

AGRICULTURAL SAVINGS AND LOAN COMPANY.

The twenty-sixth annual general meeting of the shareholders of the Agricultural Savings and Loan Company was held at their offices in London on Thursday, the 17th February, at 2 o'clock p.m.

The following shareholders were present: Messrs. T. H. Smallman, A. R. Magee, Wm. Ellis, W. Patrick, P. Birtwistle, G. F. Jewell, Andrew Dale, Thomas McCormick, R. Bayly, Q.C., W. C. L. Gill, A. Parfitt, D. Regan, Major Thomas Beattie, M.P., and others.

The twenty-sixth annual report, as follows, was then taken as read:

REPORT.

The directors have much pleasure in presenting to the shareholders the twenty-sixth annual report of the business of the company.

The profits of the year (including $3,489.63 brought forward from last year), amount to $52,269 19: and, after providing for interest on borrowed capital, for cost of management, losses and anticipated losses, two half-yearly dividends of three per cent. each, amounting with the shareholders' income tax thereon to $38,538.30, have been paid), leaving a net surplus of $13,730.89, of which $10,000 have been placed to reserve fund, and $3,730.89 carried forward at the credit of profit and loss account to next year.

The re-payments on mortgages during the year have been satisfactory, the amount of interest in arrears being less than for some years past.

The demand for money has been fair, the tendency, however, being to slightly lower rates.

The books, vouchers and securities of the company have received the usual careful audit by the company's auditors, as set forth in their certificate appended hereto.

All of which is respectfully submitted.

D. REGAN,
President.

London, January 31st, 1898.

entry in the company's ledgers, and we have examined the company's securities and find them in order.

Geo. F. Jewell, F.C.A.
Andrew Dale,
Auditors.

London, Ontario, Jan. 31st, 1898.

The president, Mr. D. Regan, in moving the adoption of the report, said:

It affords me great pleasure in moving the adoption of the report to be able to congratulate the stockholders on the very satisfactory result of the year's business. As stated in the report, the profits of the year have been sufficient to pay the usual half-yearly dividends of three per cent each, together with the income tax thereon, to provide for all known and anticipated losses, and leave a surplus of $13,730.89, of which $10,000 has been added to the reserve fund, which now amounts to $160,000, being over 25 per cent. on the paid-up capital stock of the company, and to carry forward at the credit of profit and loss account to next year of $3,730.89.

The few properties on hand are rented to pay a fair rate of interest, but all such rents instead of being taken into the profits of the company are applied in reduction of the amount chargeable against those properties.

All loans that were considered at all close have, during the past year, been re-inspected by a competent valuator, and what your directors deemed to be ample provision has been made for every anticipated loss.

Notwithstanding the very keen competition for loans, the business of the company has been well maintained, and shows a substantial increase in total assets over the previous year.

Owing to the rapid accumulation of funds in the hands of the various loaning institutions, and the consequent competition for loans, there has been a marked decline in the rate of interest obtainable on good security; this will in some measure be offset by the much lower rate paid on borrowed capital, and also, we hope and believe, by fewer losses on real estate in the future.

For the past five years the country has been passing through a period of marked depression, on which there has been a decided shrinkage in values of all classes of real estate. It must therefore be highly satisfactory to the stockholders, depositors and debenture-holders of this company that during those five years of agricultural depression and financial stringency your directors have been able from the earnings of the company to pay the usual dividends, to provide for every loss, and to increase the reserve fund by the handsome sum of $50,000.

The abundant harvest of the past season, and the decided advance in the prices of all kinds of farm products, have enabled borrowers to meet their payments more promptly than for many years past, and the improved outlook for the future is already felt in the better demand for farm lands, and in the upward tendency of prices.

The unfortunate embarrassment of one of the companies doing business in Toronto has caused some little uneasiness lest it might affect the credit of all loan companies who place their debentures on the British market. There is certainly no cause for alarm: the well-managed companies that have come not only safely but prosperously through a long period of depression, who have year after year increased their business and strengthened their position by adding substantial sums to their reserves, and the great bulk of whose mortgages, unlike those of the Toronto company referred to, are placed on the best farm lands in Western Ontario, offers to investors as safe security as any obtainable, and that fact is fully recognized by Canadian capitalists, who are placing large sums in the debentures of such companies.

There has been a considerable increase in the sterling debentures, due in a great measure to the energy and zeal of our Scottish agents, Messrs. Forbes, Dallas & Co., of Edinburgh, Scotland.

Mr. Thomas McCormick, in seconding the adoption of the report, said that after carefully considering the reports of a number of loan companies, while a great many were very good, he thought the one issued by this company was a little better, the size of our company being taken into consideration, and this was also the opinion of others with whom he had conversed. Although somewhat doubtful at first of the ability to place $10,000 to the reserve fund, yet after carefully considering all the doubtful loans, he personally had come to the conclusion that the directors were fully justified in doing so, and that the balance carried forward was intended only to provide against any losses which might accrue in the future, because all anticipated losses were, in his opinion, and the opinion of the directors, fully provided for.

The report was carried unanimously, and the retiring directors, Messrs. D. Regan, Thomas McCormick, W. J. Reid, T. H. Smallman and Major Thomas Beattie, M.P., were re-elected for the ensuing year.

Messrs. George F. Jewell, F.C.A., and Andrew Dale were re-elected auditors.

At a subsequent meeting of the directors Mr. Daniel Regan was re-elected president, and Mr. W. J. Reid, vice-president.

C. P. Butler, Manager.

Extended Insurance

Is granted by the Unconditional Accumulative Policy of the Confederation Life Ass'n. Under this provision the full amount of the policy is, in the event of the non-payment of the third or any subsequent premium, extended as a term insurance, and the policyholder is held fully covered for the full face value of the policy for a term of years definitely stated therein.

Paid-up and Cash Values are also guaranteed.

Rates and full information sent on application to the Head Office, Toronto, or to any of the Association's Agents.

LONDON MUTUAL FIRE INSURANCE COMPANY.

The thirty-eighth annual meeting of the London Mutual Fire Insurance Company was held in the Company's offices, London, Ont., on 2nd inst., with the president, Capt. T. E. Robson, in the chair, Mr. D. C. Macdonald acting as secretary.

The various reports were read, showing that 1897 had been the most successful year in the history of the company. The board of directors congratulated the members on the business done in the face of the keenest competition. The total number of policies issued in the year was 16,821, of which 14,883 covered farm and dwelling property, and 1,938 were on general risks. The farm business covered property to the amount of $16,515,919.33, and the general risks $2,168,780.81, a total of $18,684,700.14. The losses for the year amounted to $132,603.18, or an increase of $5,836.01 over 1896, due to the fact that the inspectors added nearly a month's losses to the general result on account of more closely than usual getting in their reports on later losses, and from the fact of the great conflagration in the County of Russell, by which the company was a severe sufferer. Having, however received its baptism of fire in the big Ottawa Valley in 1870, and again in North Ontario and Victoria bush fires of 1882, the company was well provided against any contingency and occurrence of this kind, and after all came out of the ordeal with unscorched wings. Although this was the thirty-eighth annual report of the company, it was about the 40th year of its existence. In its early days it made very little progress; owing to this fact, its methods and plans were not properly appreciated, but since 1860, when the late Alexander Macdonald, father of the present manager, took control of the company, extending its benefits to all parts of the province, the London Mutual has become a household word in every township and hamlet in the province for fair and honorable dealing. This was evidenced from the fact that the company's business was nearly, if not quite as much, as all other farmers' companies combined, and it would always be the aim and desire of the board to deserve the reputation so long enjoyed. The expenses of the company outside of the official expenditure were somewhat higher than usual, owing to the changes referred to in the matter of inspection, and they would be reduced from this time out. It had to be borne in mind that a large business necessarily required a large outlay, and the board did not regard it in any way as money thrown away, when the company gained experience. Some twenty years ago legislation occurred in the matter of insurance, and among other things a set of conditions was adopted by a committee of the House of Assembly. The conditions known as statutory conditions were very little understood by those connected with insurance, and so vague and uncertain in their meaning that recourse had often been had to lawsuits, with every varying success, the judges being apparently as much at sea as the authors of the conditions named, and all insurance companies had found them oppressive and expensive. Legislative amendments were promised from time to time, and it was fully expected before this that changes in the interest of the public as well as in the interest of the companies, would be made and large legal expenses saved. A year ago it was promised that amendments would be made during last session, but when that time came, it was found that our worthy rulers were too much engaged in political fights for "the loaves and fishes" of office to attend to any matters of practical utility. Now, however, when the turmoils of the fight will be ended, it was reasonably hoped that the Legislature at the next session will enact a reasonable and just insurance law, making the conditions of the policies that "they who run may read." The agents of the company, as a general thing, had worked as if they had the interest of the company at heart. Three directors now retire by rotation; they are Angus Campbell, J. W. Cameron and Joseph H. Marshall, who, however, are eligible for re-election.

(Signed), JOHN OVERELL.

London, 2nd February, 1898.

Capt. Robson moved the adoption of the reports, and in doing so, he spoke of the rapid increase in the business of the company from the year of its inception until the present, making it the leading institution of its kind in Canada. Mr. Angus Campbell, vice-president, of Appin, seconded the adoption of the reports, and with several members expressed satisfaction at the splendid showing made for 1897. The London Mutual was the best managed company in the Dominion. The motion was carried unanimously. The election of directors was next proceeded with, Messrs. A. Cameron, G. Roche and R. Boston being appointed scrutineers. Mr. John Morgan moved and Mr. C. C. Hodgins seconded the re-election of the retiring directors. Messrs. J. W. Cameron, Angus Camphell and Joseph H. Marshall. This motion was also carried unanimously, and Messrs. Cameron, Campbell and Marshall expressed their thanks for the confidence placed in them. Mr. Campbell moved a hearty vote of thanks to the agents of the company for their labors during the year. Mr. D. C. Macdonald, manager, paid a high compliment to the agents, who, he said, were superior to those of any other company doing business in Canada. Messrs. Butterfield, Denike, Roche and Morgan replied. Warden Elson also made a few remarks, and after a vote of thanks to the scrutineers, the meeting adjourned. At a subsequent meeting of the board of directors, Capt. Robson was re-elected president, Mr. Angus Campbell, vice-president, and Mr. D. C. Macdonald, manager.

IRON WORKS IN CAPE BRETON.

In view of the project of the Nova Scotia Steel Company of Canada to erect furnaces in Cape Breton, the municipal council of that county has passed the following resolution:

"That the district of Louisburg is hereby authorized to appeal to the Local Government for a bill authorizing the said district to grant the Nova Scotia Steel Company, Limited, or any company that will erect blast furnaces at Louisburg, exemption from taxation for any period of years the ratepayers of said district may see proper. (The property so exempt to be a charge on the district of Louisburg.) Also, for any concession that said district may see proper to give said company. A majority of the ratepayers' signatures to be affixed to a petition accompanying the said bill."

This seems to mean that the ratepayers will pay the county taxes that would otherwise fall on the steel company, if it went into operation. It also resolved in favor of similar exemption to "any person, persons or companies who shall develop any deposits of limestone or iron, and be in a position, bona fide, to work the same."

The North Sydney *Herald* says that Mr. Harvey Graham, of the Steel Works at New Glasgow, has been in that county for some days gathering information with a view to recommending a suitable location for the proposed iron smelting works. He has examined Louisburg, Sydney, North Sydney and South Bar. He has made arrangements with the G.M.A. for a quantity of coal to be sent to Ferrona to test its suitableness for smelting purposes. It is understood that the Dominion Coal Company favors Louisburg, which means a good deal.

—There is a tobacco store in the Haymarket, London, which has been conducted in the same building without change, and by the same family, son succeeding father, since the reign of Charles II.

A Handsome Catalogue

"The Steele, Briggs Seed Co., Limited, have issued their annual catalogue in the shape of a very handsome volume of over 100 pages. The covers are beautiful, front and back, both bearing exquisite floral designs. The front page contains pictures of sweet peas and of the new pink Roamer rose, while the back has two magnificent pictures of two new giant orchid flowering, Italian cannas, the Italia and the Anstria. The contents of the volume are as interesting and as up-to-date as usual, and contain some tempting offers."—Toronto Globe, Feb'y 9, 1898.

Money in Insurance
WHEN SECURED

ON THE COMPOUND INVESTMENT PLAN OF THE
NORTH AMERICAN LIFE ASSURANCE COMPANY

The special provisions of this advantageous plan of insurance are:

(1) The return as a mortuary dividend of all premiums paid beyond the 10th year, together with the face of the policy should death occur within the investment period selected.

(2) The loan to the insured if desired of all premiums beyond the 10th year, and should death occur after that and within the investment period selected, the full face value of the policy is payable, premium loans, if any, being cancelled.

The North American has a larger ratio of assets to liabilities and net surplus to liabilities than any other Canadian Company.

Pamphlets explanatory of the Compound Investment and other attractive plans of Insurance furnished on application to

DECISIONS IN COMMERCIAL LAW.

PETRIE V MACHAN.—The defendant instructed plaintiff by contract in writing, to sell a certain sawmill in terms, as follows: "Please enter in your descriptive catalogue of machinery for sale, the . . . . to net me $1,000. I hereby authorize you to sell" (setting out terms). "I retain to myself the right of selling, or of exchanging, or of otherwise disposing of said goods in whole or in part, without your assistance, but agree in such case to pay you 10 per cent. commission on the above amount . . . . same commission to apply in case of withdrawal of offer." The defendant afterwards gave the machinery to a brother who sold it for $350. Held, reversing the judgment of Division Court in the High Court of Justice, Ontario, that the plaintiff was entitled to $100 commission, and that his claim was within the jurisdiction of the Division Court.

KIMBERLEY WATERWORKS CO. V. DE BEERS CONSOLIDATED MINES.—The defendants made an agreement to purchase all the water required for their mines from the plaintiff's company, subject to this proviso expressed in the contract "provided that nothing herein contained shall prevent (the defendant company), from using any water obtained by it from the mines or its wells or reservoirs." A municipal corporation gave the defendants a supply of water gratis. The Judicial Committee of the Privy Council held, that this amounted to a breach of the agreement, and was not within the above proviso.

QUEBEC BOARD OF HEALTH.

Good work, and necessary work, is being done by the Board of Health, of the Province of Quebec, in the collection of vital statistics, and in the registration of the prevalence of certain diseases, such as zymotic. About four years ago, says the *Montreal Medical Journal*, the president of the board undertook that such statistics should be compiled at no expense to the Province beyond a few hundred dollars to pay the statistician. So in default of any official registrars he interested the bishops, who secured the services of the parish priests in registering not only births and marriages, but deaths and the causes of death. These last are, however, but imperfectly recorded in the rural districts. For example, in the County of Charlevoix, out of 406 deaths recorded last year, 228 were from "unknown or unspecified diseases." Dr. E. P Lachapelle, the president, has reorganized the board, and developed not only chemical but bacteriological departments. Many hundreds of samples of dry blood-drops have been sent into Quebec or Montreal to be examined by Dr. Wyatt Johnston's method of dry blood-drop diagnosis of typhoid fever. The use of disinfectants has also been inculcated Excellent work in these directions has been done during 1896 and 1897 at a total cost of only $10,500. An interesting table shows that Quebec Province had a birth rate in 1895 and 1896 of 39.3 per 1,000 and 38.5 per 1,000, and a death rate of 20.4 and 18.5, making the surplus of births over deaths between 19 and 20 per 1,000—a larger surplus by nearly one-half than France, Germany, Austria, Italy or the British Islands. "The French of Quebec," says the *Journal*, "are increasing in numbers at the rate of 22 per 1,000; the French, in France, are dwindling at the rate of 0.4 per 1,000. At this rate, it is questionable whether Quebec will not have to return the compliment [of the seventeenth century] and prepare to repopulate L'ancienne France."

Mercantile Summary.

In Winnipeg the Law and Order League decided to enter actions against 26 hotelkeepers for infractions of the liquor license law.

The C.P.R. Telegraph Company are stringing a fifth wire from Revelstoke to Vancouver, to accommodate the rapidly increasing business of the Kootenay towns.

A man held in very general esteem was Mr. H. D. Mitchell, manager at Glencoe branch of the Traders Bank. He died suddenly of apoplexy one night last week.

An order has been made by Judge Bain, at Winnipeg, authorizing the liquidator of the Commercial Bank of Manitoba to pay the final dividend due to the creditors.

Power has been given by Ontario Letters Patent to John E. Botsford, G. C. Meisel and others, of Port Huron, Mich., to form the Midland Elevator Company, capital stock, $180,000, and to operate in grain in the County of Lambton.

The Ætna Life *News* observes that "a successful agent will take more pains to hold an existing patron than to secure a new one. A satisfied policy-holder is a continuous advertisement for his company." And to the man who insured him he is a thing of beauty and a joy for ever.

For many years Mr. H. A. Budden, of Montreal, has been vice-president and managing director of the Intercolonial Coal Co., of Pictou, N.S. He now wishes to retire from that dual office by reason of advancing years and impaired health. His resignation has been accepted with regret, and Mr. W. J. Nelson, the secretary of the company, will, we understand, have charge of the Montreal office.

The Goldie & McCulloch Company, of Galt, report an active business. They have the contract to fit up a flouring mill in the North-West of 300 barrels per day capacity, with boilers, engines and rolls. And they have just shipped six boilers, each sixteen feet long, for an establishment in the Crow's Nest Pass. They are building an addition to their already very extensive premises. They have now something over 300 men on the roll.

The Ontario Instructor in Road-making has been visiting and lecturing in the province of Quebec, and his lectures are having a good effect. Many are stirred up on the subject of better roads. In fact so many counties have availed themselves of the Government's offer to provide aid for road-making machines, that no less than eighty of them had been purchased. The greatest demand had come, one of the ministers says, from the Montreal district and the Eastern Townships, yet the Quebec district was also awakening.

The reproach of Kingston among shipping men has long been the delays occasioned to vessels because of the lack of capacity at that point for storing and handling grain. This reproach will be removed this year. The Montreal Transportation Co. is putting up an 800,000 bushel elevator there, to be ready in April, and there are two others building of 250,000 and 500,000 bushels capacity respectively. It will now be in order for Montreal to provide additional capacity for handling and storing grain, if the expectations are realized as to the grain carrying to be done next spring by the Parry Sound and Canada Atlantic short route. This will take grain from Parry Sound which now has an elevator with a capacity of 1,000,000 bushels, to Coteau Landing, where a 500,000 bushel elevator is being put up. The grain will then be transferred to barges and taken to Montreal for export.

Publishes each issue ESSAYS ON ACCOUNTING PRACTICE IN LEADING ESTABLISHMENTS in various industries; SHORT ARTICLES ESPECIALLY ADAPTED to the wants of BEGINNERS in office work; REVIEWS AND CRITICISMS of books on accounting and business subjects, written in a way to correctly describe the works; LETTERS OF EXPERIENCE from ACCOUNTANTS AND OFFICE MEN; QUESTIONS AND ANSWERS of interest to subscribers; NOTICES OF MEETINGS and BRIEF REPORTS OF PROCEEDINGS of leading ACCOUNTANTS' AND BUSINESS MEN'S ASSOCIATIONS; ILLUSTRATED DESCRIPTIONS of the BEST and NEWEST devices for OFFICE EQUIPMENT; brief EDITORIAL LEADERS ON TOPICS OF THE MONTH of interest in accounting and office circles; PORTRAITS OF EMINENT ACCOUNTANTS, with BIOGRAPHICAL SKETCHES; ACCOUNTING MISCELLANY, etc.

Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers,
262 West Broadway, New York.

Mercantile Summary.

It would appear that the end of the New England cotton mills' strike is near. The new Bedford strikers have issued an appeal to other workmen for financial aid.

The aggregate receipts of thirty-three railways in the United Kingdom, mileage 19,163 miles, for six weeks to 18th February, amounted to £8,944,604, an increase of £332,123 upon those of the corresponding period last year.

A general merchant of some 20 years' standing at Edmundston, N.B., J. A. Bernier, is reported to be offering 50 cents on the dollar. He has been reported slow for several years past, through overstocking.

The working of a plan of ventilation of rooms devised by Dr. Castaing, principal physician of the French armies, is highly commended. It consists in the use of double windows, with openings at the bottom of one and at the top of the opposite one, through which the air comes in freely without anyone feeling it. The system is said to possess simplicity, efficiency and cheapness.

Some time ago an action was brought by J. Demers against the Quebec Government for cancelling a contract for printing the official Gazette, etc., of that province, amounting to $85,000. It was shown that after securing the contract the plaintiff had gone to some expense in purchasing paper, etc., and Judge Larue, in rendering judgment, allowed $9,325 as damages, being the amount of profits which would have been made on the contract from July 1, 1897, to July 1, 1898, interest and costs.

The Government at Ottawa has been repeatedly interviewed by licensed victuallers and brewers, and is said to be decidedly uncomfortable over the plebiscite question. Last week a deputation consisting of Messrs. Dawes, of the Dawes Brewery Company, Lachine; Hooper, of the Dow Brewing Company, Montreal; O'Keefe, of the O'Keefe Brewing Company, Toronto; Robt. Davis, of the Dominion Brewery; Labatt and McCarthy, of Prescott. In their view the whole matter of prohibition should be put squarely before the people, and not the mere question whether the voter is in favor or not of prohibition. There is the question of compensation, for instance.

One of the sufferers by the recent big fire in Winnipeg was A. G. Morgan, who did a very considerable boot and shoe trade. Owing to his heavy loss his creditors have agreed to write off a portion of their claims.——Blake & Ramsay, publishers at Wellington, B.C., have had their assets sold by auction under power of a chattel mortgage.——In the same place, John L. McKay, grocer, finds that he cannot meet his bills. Recently a judgment of $759 has been recorded against him, and it is probable that he may assign.

The customs authorities have broken up a dangerous gang of Syrian smugglers, who have been carrying on business for the past two years, and have defrauded the Canadian customs of $15,000. For the past six months the hardware firms of the city have found their business suffering from the competition of a number of Syrian peddlers, who were going about selling notions and hardware at prices far below what the regular dealers could afford to sell them at. The only explanation of the matter that appeared at all possible was that the goods were being smuggled in from the United States. Officers were placed on the case, and found that the goods were smuggled across from Richmond, Vt., to Sutton, Que., whence they were shipped to Montreal. A number of arrests have been made, and the trial began this week. At the headquarters of the gang in Montreal about $3,000 worth of goods were seized.

Halifax papers of last week say that the rolling mills of the Londonderry Iron and Steel Company, which it was rumored were about to be removed to Halifax or St. John, are likely to change hands at an early date. The prospective purchasers being experienced and practical mill men, who will run the mill to its fullest capacity and furnish bar iron made from puddled bar made largely from local brown ore iron. They will also make the cheaper grades of bar iron to supply the general trade. They also intend, so the story goes, to again roll as a specialty the same class of iron which in the early days of the Canada Steel Co. had a world-wide reputation. The Londonderry Iron Company is preparing to sell at once its present stock of bar iron in order to make room for the improvements to be made by the new prospective buyers, who will also put up a large storage house for their new stocks of iron. We trust the movement here outlined may prove true, for the cessation of these extensive works would mean a great deal to the county of Colchester.

The rush for the Klondyke, as it is called, is not fanciful, but a very real rush. The C.P.R. authorities made the statement on Saturday last that two thousand six hundred people left Pacific coast points for the Yukon country from February 12 to 19. From January 6 to February 19, the number going north was nearly ten thousand, and coming south 600. Groups of men, principally young and stalwart, are being formed into Klondyke parties to start this month or next. We hear of such parties in Sarnia, Petrolia, Paris and Prescott. An Ottawa party, among whom is Kodak Cameron, as his chums at Toronto University called him, and a number of the many Edwards from that vicinity. Another group includes Mons. Dubray, of Paris, France, and some Cardinal and Prescott people, both parties going via the Stikine-Teslin route. A Toronto party, which purposes to start March 24th, takes provisions for fifteen months. Their outfit includes a catamaran steam barge, 18 feet long and 9 feet wide, with 8 inches draft, having a stern paddle wheel, a portable sawmill, a forge, a sand pump. They will ship their freight, five tons altogether, from Vancouver to Dyea. From there they will go over the Chilcoot Pass to Lake Lindeman, and sail up the Stewart River as far as possible. They expect to get a lot of gold-dust from the streams which flow into the Stewart River. Mr. C. M. Merritt, formerly of the Imperial Bank, with a small party of friends, is to start for the Yukon this week.

Mercantile Summary.

An American connection of the Canadian Bank of Commerce is the Northwestern National Bank of Chicago. This bank is to be the agent of the former, and as soon as the Dawson City branch is opened will issue drafts and letters of credit thereon. Some arrangement has been made, it is said, between the Canadian Government and the Bank of Commerce so that the latter will issue drafts against gold deposited. After receiving the gold, the bank will send it to the coast under an escort of mounted police, provided by the Government.

From Sherbrooke we hear of the failure of T. G. Ballantyne, grocer, which is supposed to be largely due to the suspension of his main suppliers, Caverhill, Hughes & Co., of Montreal. Mr. B. was in business some years ago in Brampton, Ont., where he proved unsuccessful. His present liabilities are about $5,000.——An unexpected failure is that of J. S. R. Page, for some years the leading general dealer at St. Isidore, Que., and heretofore supposed to be in quite snug shape. The particulars are not yet ascertained.

In the spring of 1890 Shouldice & Hopkins, general storekeepers, Chatsworth, dissolved partnership, J. J. Hopkins continuing the business. He did a nice trade, but unfortunately, it has been sadly neglected for a considerable time, and now he is compelled to assign.——Lawrence O'Connor bought the bankrupt stock of McEwan & Co., at Sudbury, in January, 1896, but has already made an assignment, owing to insufficient capital.——A bailiff has sold the grocery and tin business of John S. Vickery, at Woodville, after six months' unsuccessful efforts on John's part to establish a successful trade.

Besides the dry goods failures, noted elsewhere, the following changes and disasters are also reported from Montreal. Robert Webster, tobacconist, who also put up jams and jellies, under the style of the Webster Manufacturing Co., has assigned.——V. Sarno, who came from Italy some few years ago, and tried to establish an uptown trade in jewelry and "articles de vertu," has voluntarily assigned.——H. C. Gregoire, crockery and fancy goods, lately assigned, has settled liabilities of $6,000 at 50 per cent.——P. Gareau, a machinist by trade, started a small grocery business a year ago, for which he was unfitted, and he now figures as an insolvent.——A meeting of the creditors of Ross Bros. & Co., shipchandlers, has been called. The business at one time was quite an important one, but with the displacement of sailing ships by steam vessels of yearly growing size, their business steadily declined, and of late years has become of limited dimensions.——J. C. Gaudry, a grocer of eight years' standing, has gone under, and will be wound up. He owes about $2,000.——Moise Henrichon, dealing in coal, hay, etc., has consented to assign, and his indebtedness is put at $6,000.——C. Bazinet, a produce trader on the Bonsecours market, has assigned, owing $3,032.——Lionais & Son, who started in a general auctioneering business, about a year ago, have already come to the end of their tether, and are reported to owe some $11,200.

TENDERS FOR STOCK

In the Estate of
JOANNA HAMMETT, DECEASED.

Tenders addressed to the undersigned solicitors for the Executors of Joanna Hammett, deceased, will be received up to

Saturday, March 19th, 1898

for the purchase of 100 shares of paid up stock in the British Mortgage Loan Company of Ontario. Par value $100 per share. Dividend 6% per annum, payable half yearly. Paid-up capital to December 31st, 1897, $316,504.68. In 1897, in addition to a 6% dividend, the company transferred over 3% on the paid-up capital to the reserve fund, making the total reserve $100,000.

Tenders will be received for the whole or part of this stock. Sale is made to wind up this estate and will be subject to an upset price fixed by the Executors.

Interest on par value of stock at 6% from January 1st, 1898, to date of transfer, to be added to price offered to cover the portion of dividend accrued.

WOODS & COUGHLIN,
Solicitors for Executors, STRATFORD, ONT.

Mercantile Summary.

Mr. W. Gow, of Blake & Co., obtained an order yesterday, making the Trusts Corporation of Ontario permanent liquidators of the insolvent Toronto Junction Foundry Company, upon filing a bond of $1,000.

The liabilities in the case of Tester & Co., wholesale confectioners, Montreal, lately assigned, figure up to $40,000 indirect, and $24,000 direct. Nothing definite has yet been decided upon, with regard to the disposal of the estate.

In April, 1891, Fred. Boldt succeeded Albert Roberts as a furniture dealer at Williamsford. He has just assigned. No doubt he has realized that he had been better to continue his farming occupation.——Another assignment is that of Rettenmier Bros., general storekeepers at Duart, after they had been in business about eight years. Their disposition was to trade beyond their means, but lately, when too late, they curtailed very much.

For ten years or more, A. S. Wickware has done a small grocery business in Smith's Falls, but never made much progress. He is now obliged to assign. He had been slow pay, and under chattel mortgage for some time past. Other small failures in Eastern Ontario are those of Miss C. McMaster, hotel-keeper, Alexandria; T. H. Kirk, confectioner, etc., Perth, and R. W. Dickinson, implement agent at Kemptville.

On Tuesday night last the through service per Intercolonial Railway, between Montreal and Halifax, was opened. The first through train from Montreal was composed of six cars—sleeper, two first-class, one second-class, express and mail, baggage—and it carried 62 passengers, 13 of whom had berths in the sleeper. The Government system of railways entered the list of rate-cutting railways by issuing a circular announcing the following rates, return tickets being good for a week: Montreal to St. Hyacinthe, $1; Montreal to St. Hyacinthe and return, $1.70; Montreal to Quebec or Levis, $1.60; Montreal to Quebec or Levis and return, $2.70.

Some further troubles are reported among Montreal retailers of dry goods. Thomas Masse has made a voluntary abandonment of his estate. He has been in business only a few years, and only a year or so ago he made a compromise of 80 cents on liabilities of about $15,000.——A. Sanft, a Hebrew dealer in Kosher meat, who has acted as a sort of financial agent for a number of small dealers among his co-religionists, and also of late done a jobbing business in cheap dry goods and peddlers' supplies, has made an assignment, and owes some $12,000.——J. R. Paquin, heretofore regarded as one of the most substantial of the retailers in a moderate way, on St. Laurence Main street, is reported embarrassed. He is said to owe about $26,000, and a demand of assignment was issued against him, but he is trying to arrange a settlement.—Paquette & Michaud, who lately failed, made an offer of 50 cents, spread over three years, which was declined, and the estate will be closed out. Liabilities are shown at $31,500 ordinary, and $24,000 privileged, with assets of $28,000. A year ago they claimed quite a fair surplus.

A branch of the business of Turner, Beeton & Co., Victoria, of which the premier of British Columbia is senior partner, is being opened in Jones' block, Vancouver, which premises is to be fitted up and filled with a general stock. The Vancouver *World* understands that Mr. D. B. Draper, of New Westminster, is to be given charge of the branch.

On Wednesday the creditors of W. Graydon, of Mono Road, met in this city. His statement showed liabilities $8,594.84; assets: stock, $5,326.06; cash, $32.46; accounts, $1,540.46; total, $7,397.78; deficiency, $1,196.88. An offer of 50 cents on the dollar was made, and not accepted, the meeting adjourning for a day.

After being many years in business, James Calhoun & Son, general storekeepers at Dundalk, assigned seven years ago. The stock was then bought by W. H. Calhoun at 65 per cent., but he has since found it difficult at times to meet his bills. A few days ago a meeting of his creditors was held here, and his statement showed that he owed $9,000, and had nominal assets of half this sum. He has been well spoken of among the trade, and it is probable that he will be able to arrange a compromise which will enable him to continue the business.——In August, 1896, J. J. Sutor, stave manufacturer at Arkona, was burnt out. Then he moved to Sylvan: now he assigns.

It is about seventeen years since Doering Bros. started business as general dealers in Waterloo. At that time the firm was composed of three brothers, but now Frederick is the sole owner. At one time they did a large trade, and as late as a year ago he claimed a surplus of $11,000. Last Monday at a meeting of his creditors, held in Toronto, his statement showed a deficit of $7,000 on liabilities of $19,000. A creditor asked for an explanation of the difference between the statement made one year ago and the present one. The insolvents gave as the principal cause of the deficit the underselling by a Berlin departmental store. Creditors refused his offer of 35 per cent., and allowed him one week to increase it to a reasonable amount.——In the fall of 1886 Stanley E. Barrett opened a grocery store in Aylmer, with a stock of $1,000. About a year ago he increased his expenses considerably, which leads to an assignment.

Late Nova Scotia failures are chronicled as follows: A Halifax grocer named Solomon Walters has assigned, making preferences of $3,384 to local creditors, to cover which the assets will be barely sufficient. The unsecured liabilities are small.——The Cape Breton Copper Company, of Sydney, was incorporated in 1893, with head office in Boston, and an authorized capital of $1,000,000. Their assignment is reported.——Another company with a pretentious name, the Acadia Gold Reduction Company, of Lunenburg, incorporated under New Jersey State laws, but apparently never fully organized, is embarrassed, and a winding-up order has been applied for. The liabilities are quite small.——Salter & Elliott, general dealers, Pugwash, have suspended. Their affairs have not been progressing favorably for some time. A mortgage of $1,850, and bill of sale for $2,100 on stock, were recently registered.——K. Sutherland, a small trader at Earltown, is insolvent.

GODERICH ratepayers voted by a large majority to adopt the by-law under which the town takes $50,000 stock in a grain elevator company.

IN our issue of 18th ult. it was stated that $5,000 of Berlin debentures had been sold to W. H. Brouse. This was incorrect, as the bonds were awarded to Messrs. G. A. Stimson & Co., of Toronto, whose offer was the highest.

THE customs collections at Montreal for February show a considerable increase over the previous February, the figures being, February, 1897, $678,315; February, 1898, $565,040. The excise collections, too, were greater, being $220,819, where, in February, 1897, they were $160,181.

CRUDE rubber has gone up greatly in price, and as a consequence Canadian makers of rubber goods have agreed to put up their prices of manufactured articles 10 per cent. on and after March 1st. The American rubber works made an advance of 10 per cent. at the close of last year.

A TENDENCY, even now observable, among a number of Toronto commercial and other businesses to remove to the neighborhood of the new court-house, has induced Messrs. Muntz & Beatty, general insurance agents, to remove their offices from Toronto street to the Temple Building on Bay street.

THE experimental shipment of 30 tons of copper ore from the Van Anda mine on Texada Island, in October last, to Vivian & Sons, Swansea, has given very satisfactory results. The gross returns of this shipment, according to a B. C. paper, gave £241 15s. 10d., averaging $40 per ton, the copper going about 17½ per cent.

AT Ottawa on Wednesday last Mr. Sifton informed the House that he understood the United States relief expedition for the Yukon had been abandoned. There had been correspondence in regard to the application to allow a force of militia to accompany the expedition, but he deemed it inexpedient in the public interest to bring down the documents at the present time.

THEY are getting floating craft on the Kootenay Lakes comparable in size to the monster boats which ferry railway cars across Detroit river. One has just been built by Elliott & Hale for the Canadian Pacific Railway Company, The boat is 200 feet long by 38 feet wide, and is capable of carrying 1,000 tons. On it are three tracks, and each will take five freight cars. The B. C. papers call her a "scow," so we presume she is to be towed, and has no engines.

THERE were suspicions that the municipal accounts of New Glasgow, N.S., were not all straight, and Mr. F. D. Laurie, who was elected in a civic contest there not long ago promised that he would have an investigation made. He was as good as his word, and an expert was secured from Halifax. This expert has found various discrepancies. According to the figures given by the town clerk to the electors, the debt of New Glasgow outside of sewers was $7,000, but the expert finds it $12,000. The other discrepancies were of a lesser amount, but the accountant has not finished his audit. Mr. A. M. Fraser, the town clerk, who is under suspicion—the Moncton *Times* says under arrest—in connection with these irregularities, has occupied that position for twenty years or more, and is one of the prominent men of the place.

A SPECIAL general meeting of shareholders in the Provincial Trust Company of Ontario was held yesterday at its offices in Toronto, when the gentlemen whose names follow were added to the board of directors: A. T. Wood, M.P., Alex. Bruce, Q.C., and John Knox, of Knox, Morgan & Co., Hamilton; J. H. Shenstone, secretary-treasurer Massey-Harris Co. This company, whose capital is a million dollars, half of which is already subscribed, has opened an office in Toronto, and is ready for business It has a strong stock list, including well-known capitalists in Toronto, Brockville, Cornwall, Ottawa, Georgetown, in addition to those named above. Sir Richard Cartwright is president, Messrs. S. F. McKinnon and James Scott being vice-presidents. The directors have chosen as their manager, Mr. William Beith, who has been years connected with the Ontario Bank, and is experienced in financial affairs. From the influential character of those connected with it the Provincial Trust Company is likely to do a very considerable business.

QUEBEC MINING ASSOCIATION.

On Tuesday evening last was held the annual meeting of the Quebec Mining Association in the Windsor Hotel. Mr. Drummond, the president, was in the chair, and members or delegates were present from Sherbrooke, Toronto, Thetford, Boston, London, Rossland, Chicago, New York, Edmonton, Macleod, Dawson City, Windsor, N.S., Halifax, Westville, Kingston, Radnor, Michipicoten, Black Lake, Buckingham. Mr. Bell, the secretary, read a report giving approximately the mining product of the Province of Quebec during the past year. The values of the products were as follows: Asbestos, $500,000; asbestic, $150,000; mica, $125,000; copper pyrites, $131,730; copper, $2,000; chromate, $32,770; gold (prospecting), $1,000; graphite, $2,000; feldspar, $5,000; silver and lead (bi-products of mica), $5,300; ochre, $12,400; phosphate, $6,084; charcoal pig iron, $201,400; iron ore, $41,220; slate, $50,000; flagstones, $7,000; lime, $140,000; bricks, $600,000; cement, $22,000; from prospecting, $30,000; total, $2,064,000.

In view of the proposed establishment of a strong united organization of the mining men of all the provinces, and the Quebec association having served its purpose as a provincial protective body, it was proposed to dissolve the association, and that the membership be transferred to the new body to be organized. This motion was made by Mr. Bell, the secretary, but was objected to by Mr. J. E. Hardman, and an adjournment carried. It was announced that last year's students' prizes had been awarded as follows:—First, Mr. J. W. Wells, of Kingston; equal second prizes, Messrs. H. N. Thompson and Mr. W. M. Ogilvie, of McGill University. The prizes amounted in full to fifty dollars, and were again offered this year, with the addition of a valuable gold medal presented for the purpose by Mr. James King.

FOR BIMETALLISTS.

During the last political campaign an ardent Populist, with the proverbial long-flowing beard, was delivering a speech somewhere in the wilds of Kansas. During the course of his remarks he said: "Fellow-citizens, it is necessary for the welfare of our country that silver should be kept at its face value. If the Government marks a dollar a dollar, it follows that it must be worth one hundred cents." A voice coming from the rear of the crowd interrupted him, saying: "Excuse me, Mr. Speaker, may I ask a question?" "Certainly, sir," replied the Populist, "a dozen if you like." "Then, Mr. Speaker, I should like to know if the Government marked your whiskers hay, would a mule eat them?"—San Francisco *Argonaut*.

Debentures.

THE IMPERIAL
LIFE ASSURANCE CO. OF CANADA . . . .

Head Office, TORONTO, Canada.

Capital, - - $1,000,000

PRESIDENT,
The HON. SIR OLIVER MOWAT,
Ex-Minister of Justice of Canada, Lieutenant-Governor of Ontario.

VICE-PRESIDENT,
J. W. FLAVELLE, Esq.,
Managing Director The Wm. Davies Co.
Director Canadian Bank of Commerce.

The Toronto Globe, in referring to the first three months' business of the Company, said:

"it was generally known by those in the business that this new aspirant had secured a fair share of the new insurances taken out in the last three months, but it will be a surprise to nearly all to hear that the applications received amounted to over one million and a quarter of dollars, of which more than one million were approved and policies issued. This phenomenal record—for such it really is for a new company—compares favorably with the business of the older and progressive life insurance companies of the Dominion, and considered in the light of the character of the business, gauged by the large average amounts of premiums and policies, it is quite safe to say that the record is unparalleled in our country."

F. G. COX, Managing Director.
THOS. BRADSHAW, F.I.A.
Secretary and Actuary

THE SITUATION.

If the Klondyke railway contract is not a matter of urgency, it is wholly wanting in justification. The fate of the contract depending upon a vote of Parliament, a vote should have been asked for at the earliest possible moment. This course has not been followed, but instead, there has been an adjournment of Parliament on an issue which was unconnected with the work of legislation at Ottawa. Instead of the pressure of urgency being brought to bear on the House of Commons, there has been a pause in the work for a whole week, during which the preliminaries of construction, and the financial arrangement necessary to carry out the work were paralyzed. The paralysis will continue until the fate of the contract is settled. This is not the way to expedite, or to justify the contract; and it may be that the Government finds in it defects which it is necessary to cure. If anybody believes in the *bona fides* of Mr. Hamilton Smith's offer to build two railways for a grant of land much less than Messrs. Mackenzie and Mann expect to get for one, he will find himself in face of a stumbling block which few would care to pass. But if Mr. Smith's offer is to be ruled out, the necessity of passing upon the provisional contract is at least as urgent as the making of it was. Amendments in the bargain have been suggested, and it seems clear that there is plenty of margin for making amendments. The contractors have got nothing, and will get nothing till ratification comes, and ratification of the contract, in its original shape, seems to be in the last degree problematical; for though a party majority in the House should assent, the Senate cannot be depended on to concur. Attempts to bulldoze the Senate would, in any case be unwise, and, in the present instance, would be sure to increase any majority which there would otherwise be against the contract.

Between the C.P.R. and the Grand Trunk the rate war blazes with additional fierceness as the days pass on. In the meantime the railway interests, especially the stockholders, alone stand to lose, while the rest of the public gains in reduced fares. What chiefly interests the general public is to know how it will all end. Should the quarrel bring about a combination, in some such subtle form as to defy the inhibition of the law, as often happens at the end of similar contests, the public will suffer. The Klondyke business was the real original bone of contention; and it may be large enough to justify considerable reductions from the previous scale of charges. After the initial stage of the fight had been passed, the more aggressive policy came from the C.P.R. Its Canadian rival did not at once deliver blow for blow, but now its settled policy is to come down to whatever the C.P.R. may set. This is the defensive attitude, and it leaves the course of the fight, at every round, to the volition of the enemy. The aim evidently is to get off with the least possible sacrifice; but calculations to that end are difficult to make, and often impossible to enforce. Neither company can afford to carry the fight to a finish, for that would mean bankruptcy for one at least of the combatants; and bankruptcy would prove the father of some sort of reconstruction through which the vanquished might become, and probably would become, a stronger opponent than before.

So far as the Grand Trunk Railway's Klondyke passengers depend upon getting their outfits at Seattle, that road is at a disadvantage, for all goods bought in the United States will have to pay duty on entering the northern gold region of Canada. This will give the C.P.R. a decided advantage, which nothing but a rival road through Canadian territory could take from it. This may have a marked effect on rate-cutting on Yukon traffic. The C.P.R. could afford to charge more than American roads by the greater part of the duty on miners' supplies, and still be able to compete with its rivals, the customs duty being in its favor.

As a result of the Ontario elections, one party, on the day after the fight, claimed a majority of three, and the other a majority of one, only one election to come off. Since then they have made slight alterations in their claims. If either of them gives the correct figure, or if the truth be between the two, neither party has a decisive or even a working majority. True, the Draper Government managed to live for some time on a majority of one; but this is an experience which cannot be relied on as a certain basis of a future Government. On the present occasion, the majority, if assured majority there be, is apparently on the side of the Government; and if when all the hazards of recount are over this should prove to be the position of parties, the Government would be justified in holding on till the House meets, when a test vote can be taken. In the meantime, the shock of the Ontario elections will be felt at Ottawa; all the more on account of the open alliance of the two Governments. The state of parties in Ontario, as revealed in the elections, will not help to obtain parliamentary confirmation of the Klondyke Railway contract. If there was any disposition to withhold the necessary vote of indemnity, in the Senate, it may now take the form of a distinct resolution. The result of the elections emphasizes the mistake made by the House of Commons in adjourning to take part in the contest; and the reaction may be felt in a way that was not anticipated. The want of a decisive working majority, on either side, is to be deplored. It is barely possible that a reliable majority may be evolved out of the existing materials; but it is probable that another election will become necessary to get over what may practically prove to be the result of a drawn battle.

A new security for the continuance of the bonding system, between Canada and the United States, comes with the use by the Wabash Railway Company of the Grand Trunk track, in Canada, for the conveyance of its trains. The tendency to extend and make greater use of the bonding system on both sides is sure to continue. On the road to the Klondyke, the alternative of the bonding system is to throw the great bulk of the business into an exclusive Canadian route. American eyes are sharp enough to see this, and American intelligence may be relied on to remove obstacles which have in the past been in the way of the traffic between the Pacific Ocean and the Klondyke. It is not surprising, perhaps, that the present moment should be chosen by free talkers, in congress, to threaten, once more, the abrogation of the bonding system. This somewhat random talk can scarcely be taken as serious.

Perhaps General Johnson of the United States army is correct in saying that, if the commission now examining into the cause of the explosion of the warship "Maine," in the harbor of Havana, should report that the catastrophe is due to the malice of some fiend, operating with some agent under the vessel, public feeling in the Republic would compel war with Spain at once. But though such a result would be likely to occur, it is not at all certain that in striking Spain the real culprit would be hit. An attempt was made the other day to assassinate the King of Greece; it would be manifestly unjust to hold a whole people guilty of the dastardly act. An assassin killed President Lincoln, uttering words which assumed to express the feeling of the South; but the South was not privy to, and did not condone the act. If half a dozen persons, having no connection with the Spanish Government, and in no way representing Spanish feelings or designs, could be proved to have blown up the "Maine," would that be a reason for going to war with the nation to which the culprits belonged? It is just possible that this question may have to be answered; and the present outlook is that it would be answered in the affirmative. Passion does not reason, least of all national passion, justly aroused. At present the outlook is uncertain, but is not reassuring.

Victoria withdraws her grant from the Colonial Institute, on the ground that she finds no adequate advantage in the connection. By this she forfeits her right of displaying her products in the Institute building. It is certain that the United States are profiting by such exhibitions, which they are preparing to extend both in Mexico and South America.

Newfoundland, through its Government, is moving in the Legislature to transfer the Government railways, telegraphs, coal areas, dock and "a large section of land" to a private person. In all such cases, great caution is necessary, for the public resources, once alienated, can seldom or never be recovered. The supposed advantage of the transfer is that it will lead to a great "development of the timber and mineral wealth" of the island. It seems a pity that Newfoundland should feel herself under the necessity of getting rid at once of many of her most valuable possessions—coal areas, railways, telegraphs, timber lands. Financial stress may excuse much, but such wholesale surrender of public resources can hardly be regarded otherwise than as deplorable. As we are as yet without the details of the transaction, it is impossible exactly to appreciate the situation.

Mr. Sifton, in describing the Stikine-Teslin railway as the complement of the proposed Edmonton road, recognizes the claims of the latter, which are being pressed on the Government from several quarters. The Edmonton route is, beyond doubt, the one which a vast majority of Canadians would prefer; but, in point of time, it is clear that it can come only after a road from or near the Pacific Ocean has been built. In the meantime something could be done for the Edmonton route. The trail which exists, and which was used by more than only one party of mining adventurers last year, including women, can be improved into something like what goes by the name of a wagon road. It would be a makeshift, no doubt, but would be useful; it would have the advantage of going over the rich Peace River country, a sight of which would invite settlers, whose occupation would, in the end, prove of more value to the country than the exertions of the gold seekers.

YUKON CUSTOMS REGULATIONS.

The newly issued customs regulations of Canada, which govern the Yukon country, permit the free entry of suitable "wearing apparel, articles of personal adornment, toilet articles, and similar personal effects," when accompanied by their owners and in actual use by them. Goods intended for sale are not included in the free list, unless they have been purchased in, or are the produce of, Canada, and then they must be accompanied by a certificate of a Canadian customs officer showing that they have been "shipped duty free from a port in British Columbia;" but to entitle such goods to this certificate, the shipment must have been made in a vessel entitled to engage in the coasting trade of Canada. These certificates may be issued by Canadian customs officers at Dyea, Skagway or Wrangel, who have personally seen the goods transferred from the vessel and inspected her manifest to satisfy themselves that the goods have not been cleared from British Columbia in bond. All foreign goods entering the Yukon country are subject to the same rates of duties as they would pay at any other Canadian port. Americans who have gone to British Columbia to obtain outfits for the Yukon are protesting against the restrictions which their own Government have been opposing to their passage to the Yukon, restrictions which they say will, if not removed, ultimately ruin the trade of Puget Sound.

WHERE WE BUY OUR COTTONS.

There has always been keen competition in the Canadian market between American and British cotton goods producers. The trade returns for the year, as compiled by the United States Government, show that in 1897 there was a considerable falling off in the exports of cotton goods from that country to Canada and Newfoundland. While the exports of domestic cottons (colored and uncolored) to all countries from the United States amounted in 1897 to 285,684,151 yards, as compared with 281,211,521 yards the previous year, the shipments to British North America were only 14,378,247 yards, as against 35,519,380 yards in 1896. The customs' classification notes that of "other manufactures of cottons" the exports in 1897 were valued at $1,537,471, as against $1,360,567 in the previous twelve months.

The explanation of this declining trade that first suggests itself is the discrimination of 12½ per cent. to which American goods are subjected, as compared with competing fabrics from the United Kingdom, under our Act of last year. Although the difference in customs duties gives an advantage to British manufacturers, there is little in the trade returns to show that it has had the effect of increasing the exports of the latter to Canada. In 1897, the cotton piece goods imported into the Dominion from the United Kingdom were valued at £457,196 as against £455,678. The trade apparently lost by the United States, has evidently not fallen into the hands of the British. Our imports of printed goods from the United States have always formed a large part of our aggregate purchases of cotton fabrics, and it is in this particular line that within recent years Canadian manufacturers have made most headway. The statistics of Canadian trade with the United States have always been difficult to interpret unless the events of the periods under consideration are closely watched. It is, as a rule, of more importance to study industrial conditions in the United States than in Canada, when explaining the trade in manufactured goods between the two countries. This country has been and remains the favored ground for the disposal of surplus stocks by the manufacturers of the Eastern States, and the enormous imports of 1896 were brought into this country during severe industrial depression which existed in the New England cotton districts.

For some months vigorous attempts have been made on the part of American agents to unload several large blocks of cotton goods in Canada, and several transactions in shirtings at very low figures were recently reported. It is probable that this movement will be short-lived, as reports indicate that the effect of the prolonged strikes at a number of the New England mills is daily becoming more apparent in the condition of stocks and the increasing reserve of sellers with regard to forward engagements. In Eastern coarse yarn brown goods, in the finer grades of bleached cottons and in wide sheetings, these features are particularly noticeable, and in all these the outlook favors an advancing market. Printed fabrics have recently been steady with a better movement, while ginghams are in good condition.

When the discrimination against the United States and in favor of Great Britain is increased next July to 25 per cent., there must, of necessity, be a material increase in the imports of British goods. In the print trade the consequences will be watched with special interest. The patterns in both British and American textile centres, coming from a common source, Paris, are somewhat similar, and yet there is a marked difference in the fabrics of the two countries. The New England manufacturer has established a reputation for fancy cloths that can be sold at low prices, while the mill owner of Old England puts his best efforts into the production of good plain cloths. The tastes of the Canadian and American people are very much alike, and if the British manufacturers desire to control this market they would do well to study the methods of their competitors on this side of the Atlantic.

The textile manufacturers of Great Britain are, however, notoriously slow in adapting themselves to changing conditions in the colonies and foreign countries. As a prominent London, Eng., drapery journal recently remarked, their attitude is somewhat like this: "Here are our goods, excellent in style and quality (our style and quality), and you may take them or leave them, and our terms of payment are so-and-so, and cannot be varied, and we do not care to sell small parcels, it must be grosses or nothing." With the depression that exists in the India cloth markets, and being crowded as they are by the competition of Germany in foreign countries, the British manufacturers are paying more than ordinary attention, at present, to the trade of the colonies. Their best efforts should be directed towards studying colonial tastes and requirements, and not in an effort to bring the colonists to their way of thinking.

SPRING MILLINERY.

Never in the history of the trade were the wholesale millinery houses crowded as they are during the present "Opening" week. The cut railway rates on the C.P.R. and G.T.R., and the prospects of an active season, have resulted in an unusually good attendance at the Canadian centres of fashion. All the visitors are happy in the consciousness of the fact that 1898 is to be a "milliner's season," or in other words, that there is such a multiplicity of ideas, and so rich are the designs, that crude and unskilled hands will be lost in an attempt to trim headgear for the coming season.

Medium size hats appear to have the preference. Turban effects are popular, while tam crowns are also favorites. Straw braids are shown, but the open patterns have not maintained the position held in former seasons. A shredded wheat pattern in silk is used with good effect in making crowns. On the whole, it may be said that there is nothing radically new in shapes; the crowns may be a trifle larger, while the brims are scarcely as broad as last season. Pretty leghorn effects are seen in all the warehouses.

In trimming hats, as well as the fronts of blouses and the necks of dresses, pelisse goods are leaders. This fabric is formed by gathering or drawing in the material, which gives a honeycomb appearance. It is constructed of different textiles, from the delicate chiffon to the fairly heavy silk. Pelisse is used in one and two tones of color, and on some of the trimmed models is twisted on the crown or brim often in the shape of a fan-like ornament. A large quantity of veiling material is used in producing color effects, and coarse silk nets promise to be of great service in the milliners' art. Fine laces are not without their admirers, those of French manufacture standing first in popularity.

The selection in ribbons was never so good as now, nor were designs and shades ever more delicate and pretty. The brilliant coloring of last year is gone. The newest feature is a ribbon of gauzy and light silk texture. Weavings of white on colored chiffon or gauze grounds, as may be imagined, are very attractive to those who admire the delicate. The only ribbons of pronounced appearance are those with the bayadere effect, the design consisting of stripes running across the ribbon in contrast to the Roman patterns. It is true some plaids are still seen, but they are apparently giving way to small checks, and the newest of these show the favorite delicate tints.

It is to be a flower season, so say the authorities. The New York buyers, early in the season rushed after feathers, but the representatives of Toronto and Montreal houses found little to encourage them in following this lead. Foliage, in the construction of which, by the way, great improvement has been made during recent years, must be counted in an enumeration of the specialties. Grasses are likely to be popular. Flowers in yellow, the popular coque de roche and turquoise blue appear to be in the best taste. Heather and the small flowers find an appropriate place on many of the season's hats.

THE MUTUAL RESERVE FUND AND THE MASSACHUSETTS BENEFIT.

The Massachusetts Benefit Life Association had a most prosperous year in 1895, after it took in the Canadian Mutual Aid of Toronto. But it disappeared from view in 1897, and its remains are now in process of distribution. The widows and orphans left over will get, it is supposed, about fifty cents in the dollar, though the Canadian claimants may get more. Many thousands of widows and orphans, however, who became such after the failure, will get nothing but disappointment, and a bitter memory of what "might have been," for all the hard cash saved up and paid in.

The Mutual Reserve Fund Life Association, of New York, which also took in a Canadian assessment association (the Provincial Provident Association of St. Thomas) seems to be in imminent danger of going the same way as the Boston concern, greatly to the loss of many thousands more. To show the analogy we quote the figures available, giving the total insurance in force in both associations during the last four years, and showing the "drop out" during the last year, in each case:

BUSINESS IN FORCE.

MASS. BENEFIT, BOSTON.		MUTUAL RESERVE, NEW YORK.	
Dec. 31.		Dec. 31.	
1893	$105,381,605	1894	$293,366,616
1894	106,889,455	1895	308,659 371
1895	112,568,780	1896	325,026,061
1896	93,957,600	1897	301,567,101
Drop	$8,611,180	Drop	$23,458,960

And this after having put in new blood amounting to $56,234,785, making a total lapse of no less than $79,693,745 in 1897, as previously shown.

Another instructive comparison can be made as to the new business written during the last four years, which stands as follows:

NEW BUSINESS WRITTEN.

MASS. BENEFIT, BOSTON.		MUTUAL RESERVE, NEW YORK.	
1893	$14,271,750	1894	$66 408,225
1894	16,217,900	1895	59,738 790
1895	20,121,350	1896	73,026,330
1896	14,900,720	1897	56,234,785
Drop	$5,220,630	Drop	$16,791,545

The New York Association had nearly three times as much business on the books in 1896 as the late lamented Boston assessor had in 1895. It has lost nearly as much of that business the past twelve months, in proportion, as the Massachusetts Benefit lost when its figures were raised in 1896. And very similar is the result of the past year as to the new business of the Mutual Reserve, even before it levied this tremendous 1898 assessment. What the effect of the last rise will be on the institution during 1897 may not be fully known for a year to come. But with such a close likeness to the figures of the late Boston association (with such a good character as Boston had for solidity in its institutions, when compared with New York City), it is difficult to see, just now, how disastrous the result is going to be. Will the Mutual Reserve pull through the year? If so, in what shape is it likely to be when it gets through? With a depleted income, in so far as the healthy old members drop out, and with a growing death-loss, owing to all the uninsurable and likely-to-die-soon staying in, what will next year's assessment be upon those who are alive and remain? These are questions very difficult to answer with any satisfaction to the thousands of people whose nervous systems have been so shocked by the recent thunder-clap.

"Oh, but," one old gentleman of 73 says, "they surely cannot call for more next year than the rate they give opposite age 74, viz., $130.56, can they?" We answer, certainly they can. That rate, though $43.53 higher than the boasted "natural premium" due to age 74, may prove insufficient, owing to this year's heavy "adverse selection." And what then? If the 1898 losses come to $230 instead of $130.56, who is to put in the additional hundred dollars? Most certainly the survivors, if there are any left.

In THE MONETARY TIMES of Aug. 9, 1895, we commented upon the "humble pie" this great assessing institution was compelled to eat that year, through rating up its members by seven years. And we find a short paragraph of that article worth quoting just here, as follows:

"In 1888 our worthy mayor, Warring Kennedy, made a speech at the annual meeting in which "he and the gentlemen around him felt almost *intoxicated with pleasure* in listening to the glowing reports which had been presented from the various departments, based upon incontrovertible data." Incontrovertible!

What a mighty change from the 1888 intoxication to the sobering off in 1898—from paying $376.90 then to whacking up $1,425 for assessments this year, upon $15,000 insurance, as a Toronto gentleman has to do, so we are informed. Suppose the whole society in Toronto were composed of ten men holding $15,000 each and five healthy ones drop out in 1898, leaving five sickly ones, each of them seventy years of age, and who all live and pay three years and then die. Their aggregate payments would be $7,125 and $7,764 and $8,461. This would make a total of only $23,350 toward the $75,000. Deficiency $51,650 to fall on the healthy contributions from elsewhere. Increase the supposed ten to ten thousand, and the result would be the same if the healthy half should drop out.

The trouble with the assessment plan is that the heavy assessments, which are sure to come after fifteen or twenty years, drive out nearly all healthy lives and leave scarce any but uninsurables, and then the end must quickly come. It may be a matter of years or only of months, and the only safe, as well as conscientious thing to do is to never enter upon a scheme so delusive, so wicked, and so costly in the end. If Messrs. Warring Kennedy, J. D. Wells, D. E. Cameron and Mr. Wm. Wilson could only come down with a few millions of money, after the example set by Hon. William Mulock, to compensate the present victims of the 1888 intoxication, nothing more than simple justice would be done to those who have been so terribly misled.

The following table shows the rates used by the Mutual Reserve. In 1881-82-83 the net cost is shown in the first column, with $2 added for expenses. The 1885-91-96 rates include $3 for expenses. The last column gives the yearly increasing rates now levied on old men upon their attained ages:—

Age.	In 1881-2-3.	In 1885.	In 1891.	In 1896.	Age.	Now.
30	$ 8 03	$14 24	$14 22	$14 52	67	$ 72 18
40	9 28	16 20	16 20	19 44	70	93 00
50	11 33	21 37	21 36	30 90	75	141 54
55	15 92	27 76	32 46	43 02	78	181 25
60	20 50	38 00	43 68	63 00	80	216 71

ENGLISH TRADE WITH FRANCE.

The trade of France, the total of which, inward and outward, amounts to $1,500,000,000 or $1,600,000,000 per annum., is very widely distributed. Of the total of last year, $800,715,000 was imports and $735,122,000 exports. Looking over the list of countries with which French trade is mainly done, it is seen that the United Kingdom is her best customer, buying more than Belgium, Germany and Switzerland together. A very large share of the aggregate, not less than 40 per cent. is done with England, the imports from which country into France were last year $97,780,000, and the exports to which reached the large sum of $235,721,000.

The exports of France to England were one-eighth larger in 1897 than in the previous year, the increase being from $206,665,000 to $235,720,000, and the ratio of increase grows greater year by year. Silk goods, woolens, wines, butter, artificial flowers, feathers, dressed skins, eggs, timber, spirits and raw sugar are the principal items in the list. What goods France mainly buys from England are coal, chemicals, machinery, woolens, cotton yarn, ships, carriages, wool, copper, etc., etc., and her purchases of these were less in 1897 than in 1896, with the exception of the two items first named.

France's import trade for the year shows an increase from eight principal countries, and a decline from three, which latter are England, Spain and Argentina. There were increased imports from the United States, viz., from $62,749,000, in 1896, to $87,380,000, wheat and cotton being the items of increase. Imports from Germany were $61,696,000, and from Belgium $57,032,000, which are practically the same figures as in the previous year. Imports from Russia were enlarged to $44,031,400, by larger purchases of cereals, oil seed and nuts. The import of Spanish wine fell off in a noticeable way. France's export of woolen manufactures reached the large total of $58,505,000.

Canada's trade with France hardly merits mention in the same category with these countries, so trifling is it. We sent her $690,000 worth of goods last year, and imported from her $2,601,000 worth. And of the exports Ontario and Nova Scotia sent far more to her than did Quebec, which is supposed to be our French province of the Dominion.

MINING INTELLIGENCE.

What used to be known in Nova Scotia as the Palgrave gold mine has been since 1887 unworked, its affairs having got into liquidation. When Mr. Palgrave died the mine was offered for sale. In November last a syndicate bought it; among the parties being Senator McKeen and G. A. Pyke, Halifax; J. E. Burchell, Sydney, and the McMillan Bros., of Isaac's Harbor. The shafts had to be pumped out and new machinery put in place. Late in January, 1898, twenty-five men were put to work in the mine, a narrow lead, but very rich. In eighteen days the first clean-up was announced. Only 185 tons were crushed, giving nearly one and a half ounces to the ton. The brick of gold from this mine, deposited last week at the Peoples Bank of Halifax, weighed 263 ounces and was valued at $5,000. It was the result of 18 days' work at the mine of the Hurricane Point Gold Mining Company, of Isaac's Harbor, Guysboro county, the new name of the Palgrave mine. There is mineral wealth in Nova Scotia, and her sons do not need to go to the Klondyke regions.

A telegram received this week by Frank Oliver, M.P., from Edmonton, states that 400 sleighs had left that point during the past week, destined for Dawson City by way of the Peace River Pass.

The following description of an Essex County party bound for the Yukon Gold Fields by way of the Edmonton all-Canadian route is condensed from a lengthy item in the Amherstburg *Echo* of last week. The party consists of twenty persons from Leamington, Kingsville, Essex Centre, Tilbury and thereabout; they left last week by train and expect to be two months reaching their destination on the Pelly river, and to be gone for at least eighteen months. Here is their proposed itinerary. From Edmonton the party will go by trail to the head waters of the Pelly River, crossing the Assiniboine to the west end of Little Slave Lake, then to Fort St. John on Peace River, up the west fork of the Nelson to the junction of the Liard River, following the Liard to the junction of the Dease, thence north to Lake St. Francis, up Lake St. Francis to the junction of the Pelly and McMillan rivers, where they will prospect. The party are taking with them 1,500 lbs. of provisions and supplies for each man, which it is thought will last them for one year. They go via the C.P.R. to Edmonton, and after leaving that town they will have to make a journey of 900 miles on foot. Three of the party are in Edmonton buying sixty horses. These will be needed to draw the supplies on sleighs for nearly 1,000 miles. This party is going out for the Peninsular Gold Mining and Development Company, and is under the command of Major Johnson. A farewell supper was given them by the Leamington people, and some 250 persons assembled at the station to see them off.

A generous tribute was paid some days ago by the Rossland *Miner* to the policy of the War Eagle Mining Company on the news becoming public of its resolve to sink a shaft to the 2,000-foot level. It will be hailed with delight by everyone interested in this camp. Said that journal: "The magnitude of the undertaking eclipses anything hitherto attempted in mining operations in Western Canada. . . . They certainly deserve to profit handsomely on the heavy investment that they have made here. Since the preliminary expenditure of nearly $1,000,000 for the purchase of the mine, the company has made a very considerable outlay in labor, machinery and general supplies. For months past more than 100 men have been on the pay roll at the mine, which in itself has been a heavy financial drain. In the meantime, however, the property has been systematically, thoroughly and extensively developed."

It is stated in the Victoria *Times* of 23rd ult. that a very large amount of work is being done in the mining districts of Vancouver Island. The number of prospectors and miners at work along the west coast is double what it was last year. Night and day shifts are being worked on the Tyee and the Leonora mines, in which British capital is invested.

In the British Columbia Legislature last week, Hon. Col. Baker introduced the Coal Mines Regulation Amendment Act, 1898. It repeals section 12 of the old Act, and in lieu thereof enacts that anyone who contravenes or fails to comply with a provision of the Act with respect to employing women, girls, boys, Chinamen, or children, or to the attendance of boys at school or to the registering of boys and male young persons or of women and children, or to the employment of persons about any engine, windlass, or gin, he shall be guilty of an offence against this Act; and the owner, agent or manager shall be culpable, unless he prove that he had taken all reasonable means of publishing and to the best of his power enforcing the provisions.

The 700-foot level has nearly been reached in the Le Roi mine at Rossland, and the sinking of shafts shows good ore to exist deep down. Work is going on in all the levels of the mine from the 100 feet down.

At the War Eagle some work is being done in the big ore chute recently discovered in the east extension of the 375-foot level, and nominal shipments continue. The winze is deepened to the 700-foot level.

NOVA SCOTIA MINES.

An interesting report just issued is that of the Nova Scotia Department of Mines. Its returns are for the year ended with September, 1897. There are voluminous tables in the pamphlet, which give the production for the year and various other particulars. The output both of coal and gold is increasing in the Province. The twelve coal mines, of which a list is given, produced in the twelve months 2,320,916 tons coal, as compared with 2,235,472 tons for 1896, a gain of 85,444 tons.

In the account of Nova Scotia's gold mines, the returns of thirty-four mines are given. At these mines 76,559 tons of "stuff" were crushed in 1896-7 yielding 26,595 oz., 6 dwts., 21 grs., but additional returns brought it up to 26,963 ozs., 14 dwts., 2 grs., worth say $512,000. No year since 1889 (which produced 26,540 ounces) has approached this yield. Twelve millions of dollars is the estimated value of gold produced in the thirty-four years from 1862 to 1896 as given in a table of yield of provincial districts. This table shows the total yield of gold in that time to have been 638,322 ozs., 12 dwts, 19 grs.; the number of tons crushed being 980,882, and the average yield per ton 13 dwts. If a value of $19 per oz. be assumed, it would make the yield worth so far $12,128,130. This showing is sufficient to attract more attention to Nova Scotia as a gold mining region than she receives.

THE RUSH TO THE YUKON.

In reading the newspapers of British Columbian cities one gets a clear idea of the steady influx of people bound for the Klondyke gold regions. If it is not as startling intelligence as some of the telegrams sent from Puget Sound, it is still encouraging. For example, the Vancouver *World* of 23rd February gives a list of 31 passengers to sail next day on the steamer "Thistle" for "the north," 36 by the "Danube," 14 by the "Tees." In the cases of all these steamers there are large freights. On board the "Thistle" the crew and carpenters were busy building berths for passengers and kennels for the numerous dogs. Among the party were Olaf Olesen and J. Keating and six others, bound to Dawson, *via* Skagway. They have in view besides mining and dredging for Klondyke gold the establishment of an electric light and power plant. Mr. R. Menaugh, who has been for eight years past electrician of the Electric Light Company, at Victoria, will be the chief electrician. The steamer "Umatilla" arrived from San Francisco on the 23rd with a host of prospective miners bound to Klondyke. "She had 102 booked direct to Alaskan points, besides about fifty who intend remaining in this city a short time to make their preparations for the journey, the majority of those booked direct will also remain here and purchase their supplies and outfits before the 'Cottage City,' the next vessel of the Pacific Coast Steamship Co., sails northward." The "Umatilla" brought 97 tons of freight for local merchants. Yesterday, says the Vancouver *News* of 24th ult., no less than 35 gold-seekers, who are leaving for the Klondyke this week, were outfitted at one store on Cordova street; among them being persons from South Africa, Boston, and Portland, Oregon.

It requires as much time to get away from a persistent agent as it does to say good-by to an affectionate woman.—*Atchison Globe.*

ANOTHER ACTUARIAL CONGRESS.

The Congress of Actuaries held in Brussels in 1895, attended by European, American and Australian representatives, was an event of more than usual interest. And its deliberations were regarded by financial and professional men so highly that the sale of the volume in which they were recorded has exhausted the edition, rendering a new edition desirable and likely. We now learn that a second International Congress of Actuaries is to be held in London, on May 16th-20th of this year, and that it is likely to be attended by actuaries from all over the world—members of the Institute of Actuaries, London; of the Faculty of Actuaries, Scotland; of the Actuarial Society of America and actuarial institutions in other countries. Not these alone, but government actuaries and statisticians of the council of the Royal Statistical Society, and distinguished men in the scientific world are expected to be present.

The secretary, Mr. Israel C. Pierson, of New York, is able to make an announcement of an uncommon kind respecting this gathering. Among the vice-presidents will be two members of the British Cabinet, one each from France, Germany, Belgium, Austria and Spain, the prime minister of Holland, Lord Rosebery, Sir John Lubbock and, probably, Mr. John Hay, United States Ambassador. Nor will life assurance alone be discussed. The circular describing the affair tells us that there will be papers and discussions on many scientific and practical questions "which will be of great value to all who are interested in the actuarial side of life insurance in the broadest as well as the mere technical sense." The proceedings, papers and discussions will be published after the congress in one volume.

AN ASSESSMENT COLLAPSE.

The danger of relying upon cheap methods of life insurance has received illustration lately in what examination made known of the affairs of a co-operative concern called the United Life Insurance Association, which began business twelve years ago, the organizer of it being Mortimer A Frisbie and the president ex-sheriff Peter Bowe, headquarters New York. It had issued some 12,500 certificates, and by the New York Insurance Report of 1896 owed $106,000 in "contingent mortuary liabilities." In the month of August, 1896, it went into the hands of Bernard S. McKean, receiver, owing $188,000 in death claims. Its assets consisted of furniture and cash, aggregating $1,084. In going over the books, however, the receiver found that the assessments had been consistently "pinched"—that is, the policy-holders were required to pay less than the claims they were assessed to pay really called for. The purpose of this probably was to keep the policy-holders in good humor and under the impression that they were getting cheap insurance, with the hope that the deficiency might be made up after a time by a rush of premiums and a decline in death rate.

An actuary was engaged to tell each policy-holder the difference between what he was required to pay and what he ought to have been asked to pay. These differences vary in amount from 12 cents to $1,000. Many of them run well up into the hundreds. So on Friday last, according to the New York *Times*, notices were sent out to some 4,300 holders of policies, asking them, under authority of a judge's order, to make good the deficiencies in their payments within thirty days. Mr. McKean thinks he will collect about 50 per cent. of the claims, and will thus be enabled to pay a fairly good dividend to the heirs of deceased policy-holders, whose claims are 57 in number, ranging from $1,000 to $10,000 each.

NEW WESTMINSTER BOARD OF TRADE.

On Wednesday, 16th February, the New Westminster Board of Trade held its annual meeting, Judge Bole, president, in the chair. There had been four general meetings and sixteen council meetings during the year, and the membership is now 73. After a discussion of the views of the lumbermen's meeting, D. Robson moved, D. S. Curtis seconded, and there was carried *nem. con.*, a resolution that in view of the United States tariff on lumber and shingles "the Dominion Government ought to provide a remedy by which the lumber industry of British Columbia may be relieved from the disabilities under which it exists, and which threaten to retard its operations." A committee of three was appointed to look into the matter of obtaining better postal and telegraphic service, and another to look after improvement of navigation on the Fraser River. General meetings of the board are to be held in future, on the third Wednesday of each month.

The election of officers was then proceeded with, and resulted as follows:

President.—G. D. Brymner.
Vice-president.—Judge Bole.
Secretary-treasurer.—D. Robson.
Members of Council.—Jas. Cunningham, T. J. Trapp, R. F. Anderson, J. G. Scott, Jno. Peck, M. Sinclair, D. J. Munn, L. A. Lewis, Jas. Johnson, J. E. Phillips, G. W. Booth, T. S. Annandale, Jno. McNab, J. W. Creighton and D. S. Curtis.

Board of Arbitration.—Jno. Hendry, Geo. Kennedy, Peter Grant and Jos. Reichenbach.

TORONTO FINANCIAL CORPORATION.

The recent difficulties of the Toronto Financial Corporation reveal grave errors in the law regulating loan companies. This unfortunate concern was incorporated by an Act of the Ontario Legislature in 1873. For twenty years the charter had remained dormant, and was revived only in the autumn of 1893. The conditions of finance had altered in a marked degree during the period that had elapsed between the granting of the charter and its application to business; the policy of legislation had changed to meet the new circumstances, and had gradually grown more restrictive. The original idea appears to have been that the Toronto Financial Corporation should carry on a brokerage business. The objects of the company, as set forth in the Act of incorporation, are as follows:

"The company may acquire, hold and dispose of stocks, bonds, debentures and municipal securities, and the obligations of corporate companies and Government stocks or debentures, and may buy and sell debts secured by mortgage or pledge of freehold or leasehold lands, and may advance or loan money on such securities."

Mr. J. K. Kerr, who secured control of the charter in 1893, desired to use it for a special purpose, and in order to accomplish his end made application for an Order-in-Council altering the scope of the company's powers. Without any desire to imply that Mr. Kerr by any improper means secured from the Ontario administration the amendments which were necessary to carry out his designs, we think it needful to protest strongly against the use of Orders-in-Council in this way. They must always leave room for the suggestion that special favors are granted to privileged individuals, and tend to destroy the uniformity in provisions which is essential to a sound system of conducting loan companies. Important changes were made in the conditions of the original charter, as will be seen by a recital of the section above given in its amended form explaining the objects of the company. It was made to read as follows:—

"The company may acquire, hold, and dispose of stocks, bonds, debentures and municipal securities, and the obligations of corporate companies, and Government stocks or debentures, and may buy and sell debts secured by mortgage or pledge of freehold or leasehold lands, or other real or personal securities or obligations, and may advance or lend money on such securities or obligations." The company was enabled to advance money by way of loan or otherwise for such periods as it deemed expedient, on the security of real estate or on the public securities of Canada or of the provinces, or of school debentures, and to acquire by purchase any security upon which it is authorized to lend. Such real estate as was "necessary for the transaction of its business," not to exceed a yearly value of $20,000, could be held for a period of seven years before sale or forfeiture. The capital stock authorized was raised from $200,000 to $2,000,000, and the company had authority to receive deposits.

The first work of the Toronto Financial Corporation in its rejuvenated form was to acquire the real estate of Mr. J. K. Kerr, and this appears to have been the main reason for the company's career as commenced in 1893. Mr. Kerr valued his holdings of land at $349,000 over and above the encumbrances. From this amount $104,000 was deducted and upon this basis Mr. Kerr's real estate became the property of the corporation of which he was president. This sum of $245,000 was applied in the purchase of stock with the exception of $55,000 which was placed to his credit in the books of the company. The amount to the credit of the president of the company was afterwards reduced to $27,000 by a transaction in which Mr. Kerr took back West Toronto Junction real estate valued at $28,000. The amount now standing to Mr. Kerr's credit is $31,800.

It is unnecessary to discuss at length the steps which led to the failure of a company, the peculiar nature of whose assets we have indicated above. If real estate in Toronto and vicinity had increased in value, the company would have had fair chances of success. The books show the office management to have been honest and as capable as the circumstances in connection with the inception of the company permitted. The public never showed any great desire to deposit money with the corporation, although it opened a number of branch offices in Ontario, and early in the year 1897 began to display a marked lack of confidence in the company's ability to meet its obligations. This may be shown by an account of the deposits held in the different months of the year. They were as follows:

1897.		1897.	
January	$101,000	July	$63,544
February	95 022	August	62,536
March	79,388	September	60,940
April	78,049	October	58,686
May	74,190	November	54 255
June	69,418	December	53,490

In twelve months nearly half the deposits of the company had been withdrawn. In January, 1898, the amount on deposit, exclusive of that at the credit of Mr. Kerr and family, was $35,031. In addition to the covenants contained in the mortgages on the company's property this forms practically the total liability. The depositors are not many, numbering scarcely more than 250, and of these only about 25 had more than $100 each on deposit, while a very few are credited with more than $1,000 on deposit. The assets are mainly Toronto properties, for the most part centrally situated; the equities are placed at a value of $196,539. But it is difficult, or rather impossible to dispose of this real estate at anything like its "valuation" at present. Mr. Kerr's liability as a contributor on unpaid stock and a guarantor of the mortgages amounts to nearly $400,000. We understand that efforts are being made to secure a settlement from the creditors. The Master has ordered a meeting of creditors for March 25th, when a permanent liquidator will be appointed.

WESTERN ASSURANCE COMPANY.

An improvement is shown in the business of the Western for the year 1897, notwithstanding its severe loss of $60,000 in the Windsor, Nova Scotia, great fire. With total premium and interest earnings, less re-insurance, of $2,283,632, its fire and marine losses were $1,377,233, and expenses $756,553, leaving $149,846 at the credit of revenue account. Where $5,752 was last year written off for depreciation of securities, $18,318 is this year added for appreciation of the same. There is therefore $68,226 to add to reserve fund after paying a dividend of ten per cent. Putting aside $775,600 as the amount necessary to run off or reinsure outstanding risks, there remains a net surplus of $379,472. Doing business over all Canada and most of the United States; subject to the conflagration and other risks which exist in so large a territory, and having to suffer from the irregularities in rates which from time to time prevail over large areas of the adjoining Republic, the Western has done well to make so good a showing in the business of last year.

BRITISH AMERICA ASSURANCE COMPANY.

A decreased loss ratio is shown in all departments of the company's business compared with the previous year, and the balance of income over expenditure shown by revenue account is $100,832. This is no extreme profit upon a business whose income for twelve months was $1,470,000, yet it is considerably better than the previous twelve months, when the total income was $1,525,705. And it enables the net surplus to be increased to $79,381 at the close of last year. The reserve fund, $591,364, less the amount required to cover outstanding liability on outstanding risks, $511,982, leaves the surplus as above stated. Where fire losses absorbed 58.55 per cent. of the premiums ($665,036 out of $1,307,725), the marine losses which were $198,832, absorbed 78.85 per cent. of the premiums from marine business. The usual dividend of seven per cent. is declared, which absorbed $52,500. Compared with the results of the business of 1896, there is cause for satisfaction in the present showing.

MANUFACTURERS' LIFE COMPANY.

In its eleventh year this company is able to show very creditable returns of progress and standing, whether compared with 1896 or with any of several years preceding. Looking back at the figures of 1896, we find that the succeeding year shows increases of $29,000 in premiums, $34,000 in total income and $105,000 in assets. The reserves, now exceeding a million dollars, were added to by $112,000 last year: and while the new business of 1897 was not equal to its immediate predecessor, the aggregate insurance in force is larger, being now very nearly $12,000,000. These are handsome figures, and Mr. Junkin, the manager, is justified in taking some pride in them. The company's outgo in 1897 was large, because in that year some of the endowment policies matured and in others dividends fell to be paid. Indeed, the sum distributed in this way for endowments, profits and surrender values, was almost exactly the same as the sum paid for death claims, the amount being slightly over $82,000 each. The directors are to be congratulated on their having reduced from 4½ to 4 per cent. the basis on which they calculate reserves, as well as premium rates. The president very properly says that in life assurance security should be the first consideration. We notice the addition to the board of Sir William Hingston, the well-known Montreal physician, and Messrs. Hugh John Macdonald and William Whyte, of Winnipeg.

IMPERIAL LIFE ASSURANCE COMPANY.

Much interest has been taken, especially in Ontario, in the first general meeting of this company, because of some circumstances connected with its founding which were unusual, and because of the eminence of some of its directors; also because of the unusual success which attended its push for business. It will probably be remembered that the stock of the company was paid up at a premium of 25 per cent., thus securing a fund out of which to pay the organization expenses and to overcome the apparent loss which a life company would otherwise show in the early stage of its existence. An uncommonly clean showing is thus possible. It is creditable besides that credit has not been taken for certain assets, such as commuted commissions and agents' balances, and that one-third, instead of the customary ten per cent., has been deducted from deferred and outstanding premiums. In some other respects, mentioned in detail in the report, a disposition is shown by the management to give the utmost security possible to the policy-holders.

To have secured in three months assurance to the amount of almost a million and a quarter of dollars is an achievement to be proud of, scattered as it is over six provinces of the Dominion. It is a tribute to the energy of agents and the management. But this very success will render difficult the maintenance of an equal ratio of success in policy-writing during the present year, for other companies are not likely to submit without a struggle to see business taken from under their noses by a new competitor. The company has taken the forward step of calculating its reserve on a 3½ per cent. basis, which is in the prudent direction pursued by other live companies in view of the declining rate of interest on investments. The Imperial is able to show assets of $336,000, and a net surplus of $47,821, a very noteworthy showing thus early in its career. It has a strong list of shareholders and directors, and gives evidence of being conducted not only with great energy, but with commendable intelligence and prudence.

GUELPH AND ONTARIO INVESTMENT SOCIETY.

We had occasion to remark twelve months ago the good percentage of earnings made by this company as well as the satisfactory way in which interest had been paid by its borrowers. Again this year the like may be said, for earnings are larger, enabling over $8,000 to be carried to contingent account after payment of 8 per cent. to shareholders, a rate of dividend now exceeded, we believe, by only one Ontario loan company. The amount of real estate on the hands of the company is $50,411, which is slightly less than last year, and the report states that arrears on mortgages are at the present time less than for a number of years. A point made by the vice-president in his address at the annual meeting is worthy of notice. Speaking of the earnings and of the fact that they were moneys "earned and collected during the past year," Mr. Melvin urged that considering the difference in the earning power of money now and in, say 1890, the 8 per cent. paid now is equal to 10 per cent. at the earlier date. The company gives evidence of competent and careful management.

GORE DISTRICT MUTUAL FIRE INSURANCE CO.

This long-established mutual has had another good year's business, and the expressions at the annual meeting showed that its results were regarded by the members as satisfactory. Discussion arose upon the point whether surplus profits should continue to be added to a reserve, for the maintenance of which the company has legal authority, or whether they should be applied in reduction of premiums. The point was left in abeyance for the present. Details as to causes of fires, which are customarily supplied by the inspector of this company, show only 20 out of a total of 170 which were undiscovered. January was the month in which fires were most destructive; $15,555 out of the aggregate of $56,725 having taken place in that month. The lightest months were June, July, August and December. Defective chimneys, stove-pipes, stoves and furnaces were the most prolific causes of fires, 20 in all were from these causes: next to these lightning, 17, and incendiaries, 13; lamps and coal oil lamps, 11; matches, 9; boilers, furnaces and forges, 5; spontaneous combustion, 3. We observe that electric lamps and electric wires are credited with four fires.

HAND-IN-HAND INSURANCE COMPANY.

Having reached its twenty-fifth year, the president of the Hand-in-Hand felt justified in reminding those present at the meeting, of the satisfactory career of the company, which has never passed the usual ten per cent. dividend, year by year, and has now a contingent account of over $50,000. This fund is equivalent to 2.33 per cent. of the gross liabilities, a good showing, indeed, when compared with the average of companies in the Blue Book. This exhibit is the result of conservative management, which lays more stress upon profitable results than upon a large volume of business. Claims for losses were under 25 per cent. of the fire premiums, which were $53,663 on a business of $2,175,000 at risk under 1,476 policies. The balance at credit of revenue account in the company's plate-glass branch is increased to $14,608.

FIRE INSURANCE EXCHANGE CORPORATION.

This stock and mutual company exhibits a larger business for 1897 and has increased its surplus over all liabilities. The ratio of fire loss was low, which tends to demonstrate the value of careful selection of risks and frequent inspection of them. A patriotic note was sounded by the president in his address at the meeting. He called attention to the attention now drawn to Canada by the growing development of her unsurpassed mineral wealth. This uncommon activity means increased employment to a variety of classes of the population. Northwest Ontario's riches being gradually but surely unfolded must be of advantage to the whole province and incidentally to the province at large and to its commercial institutions.

WITH THE DRY GOODS MERCHANT.

There has been a wonderful development in recent years of the manufacture in Canada of women's capes and jackets. The different firms engaged in this work are operating on autumn goods and promise an unusually complete selection of goods.

The orders placed in Chemnitz, Saxony, for fancy hose are so numerous that manufacturers find it difficult to satisfy all demands. The wages of the workingmen have advanced to an unexpected point and prices for embroidering are nearly double what they were before the demand for fancy hose commenced.

The Toronto stores are bright with new dress goods for the spring season of 1898. It is questionable policy to open up the new materials so early in the season. In all probability, there yet remains cold weather in store for us before the winter of 1897-8 has spent its force, and every effort should be directed to selling off the heavy goods now in stock.

Regarding styles in silk dress goods for the fall, the *Dry Goods Economist* says the impression prevails that the fashion will lead to stripes, and patterns are being prepared. There are some indications that black pekin stripes will be wanted as well in plain satin on gros grain as in richer goods with boyaux effects. So far the demand manifests itself only timidly, but as it emanates from generally well-informed quarters it deserves attention.

From Great Britain report comes that Canadians are purchasing very liberally in anticipation of an active season's trade. The *Drapers' Record*, Feb. 19th, says: "Very few shipments have been made to the States by woolen houses during the past fortnight, but Canadian consignments have been heavy and in excess of New York takings. Large consignments of linens for Canada, exceeding 118,000 yards, left the Mersey the week before last. For New York the quantity was one million three hundred thousand yards. Last week 97,000 yards were shipped to Canada, and to New York 1,143,000 yards."

Our Montreal correspondent, writing on Wednesday night, says that as was expected, the attendance at the Montreal millinery openings has been the largest for some years, and all houses in this line express satisfaction with the business they are now doing. The cheap railway fares prevailing have doubtless helped to swell the number of visitors from close-at-hand points, but the dry goods people are also benefiting from the influx, and report that they have had buyers in their warehouses within the last few days from the Lower Provinces, from west of Toronto, as far west as to Winnipeg, and even a few from Vaucouver

From Belfast the *Drapers' Record*, Feb. 18th, receives the following account of trade; "The increased activity in the market for bleached and finished linens has been fully sustained. Orders from the Cross-Channel houses are much more satisfactory, both in number and amount, and the improvement bids fair to continue. Makers-up are ordering with considerable freedom. The demand from the United States continues fairly satisfactory so far as quantity is concerned, but the cheaper qualities are especially chosen. Continental business is gradually improving, and is at least equal to the amount done during the corresponding week of last year. Australasia is gradually taking a better place among our markets, and a steady business is being done with the Dominion of Canada. Local stocks are moderate and prices firm.

FOR GROCERS AND PROVISION DEALERS.

The brewers are looking after their interests at Ottawa, in view of the proposed plebiscite.

Rumor says that the Ogilvie Milling Company contemplate building a steel tank storage plant in Winnipeg of 500,000 bushels' capacity.

Sir Henri Joly has agreed to the request of the Winnipeg Grain Exchange to make the legal weight of flax seed 56 pounds per bushel so as to agree with the generally accepted commercial usage.

The Fleshers' Protection Association of Glasgow has intimated that in the future its members will not purchase cattle carried on vessels which carry cattle between the United States and Glasgow and Liverpool for co-operative societies.

There is a fair market for oranges. The quantity of Sicily and Sorrento is very limited, as the market is much higher in Europe than here; especially Russia and Germany are paying more than can possibly be obtained on this side of the Atlantic.

Recently the fisheries inspector for Ontario has reported to the department the result of an enquiry into the fisheries along the River St. Clair and the Canadian shores of Lake Huron. He calls attention to the rumor that the American Government is about to abolish the use of seines in their waters, as being far too destructive to the fish, and suggests that possibly Canada would do well to follow the same course.

Advices by mail under date of the 8th instant from Patras report a stock of currants in Greece of about 16,000 tons—about 13,000 tons available for export. Contrary to a report received in this market several weeks ago, it is said the largest part of this stock is of good quality fruit; in fact, about 4,500 tons is of a decidedly higher growth than ever reaches this market. Latest cable advices from Greece note an unchanged market, but with an easier tendency; advices from London indicate a dull but firm market.

Messrs. Smith, Baker & Co. have compiled an interesting table of the exports of teas from Yokohama and Hiogo for the season of 1897-98, showing the following: To New York, steamer or sail and railroad, 9,362,748 pounds; New York by sail, 122,266; New York *via* Suez Canal, 2,524,930; San Francisco, 5,086,137; Chicago and West, 15,907,971; Canada, 8,655,741; England, etc., 46,525; total 41,706,318. Corresponding period 1896: New York, steamer or sail and railroad, 6,883,392 pounds; New York by sail, 235,979; New York *via* Suez Canal, 5,964,637; San Francisco, 4,714,618; Chicago and West, 13,807,297; Canada, 10,484,902; England, etc., 423,274; total, 42,514,099. Corresponding period 1895: New York, steamer or sail and railroad, 9,280,137 pounds; New York by sail, 77,547; New York *via* Suez Canal, 3,771,072; San Francisco, 4,193,879; Chicago and West, 21,423,518; Canada, 9,255,146; England, etc., 291,376; total, 48,292,675.

HARDWARE AND METALS.

Last year's business was the largest ever done by the Detroit Stove Works. Their annual meeting (the 64th) was held last week, when Wm. Tefft Barbour was elected president and W. G. Hendry, vice-president.

The New York Car Works of Buffalo, capitalized at $2,000,000, have secured an option of fifty-two acres of ground at New Castle, Pa., for $70,000, and will begin the erection of a large plant to give employment to 3,500 men.

According to the bulletin of the American Iron and Steel Association, the production of pig iron in the United States amounted last year to 9,652,680 tons, as compared with 8,623,130 tons in 1896, thus showing an increase of 1,029,550 tons, or nearly 12 per cent.

According to the returns issued by the Association of German Iron and Steel Masters, the total output of pig iron in Germany (including Luxembourg) during 1897 amounted to 6,889,067 tons, as compared with 6,360,982 tons in 1896—an increase of 8.30 per cent.

The E. P. Allis Company, of Milwaukee, has received a contract to furnish a 700,000 horse power plant for the Metropolitan Street Railway Company, of New York. The order amounts to about $500,000, and the equipment will comprise one of the largest electric power plants in existence.

The iron trade circular of the Messrs. Rylands, London, England, has the following to say about American iron: "The American iron and steel makers appear determined to build for themselves an export business and are facing the British manufacturers in all their markets. We now hear of a consignment of nearly 2,000 tons of steel rails for Calcutta, and a consignment of 500 tons of Alabama iron despatched from Pensacola to Kobe and Yokohama, Japan. It is not so many years since we were exporting crude iron largely to the United States:

but that country now meets all its own requirements, and is able to send a little to us."

In the topical discussions which have taken place in the recent meetings of different hardware associations in the United States no subject has received more consideration than credits. The hard times of the past three or four years have been a great leveler of values to their legitimate standard, and the same cause has proved a valuable adjuster of the credit system on a basis of correct methods. It would be almost impossible, says the Chicago *Journal of Commerce*, to conduct the business of this country without a credit system, yet it has been almost out of the question for retail merchants to transact a successful trade with it, on the loose methods which have prevailed during the past few years.

Another blow has been given to the cast iron pipe trust by Judges Taft and Lurton in the United States Court of Appeals. The final decision rendered holds that the contract of the cast iron pipe manufacturers in the combination, even if the prices were reasonable and the only purpose in sight was to prevent competition that would ruin the industry, was void at common law because it was an attempt at monopoly and in restraint of the freedom of trade. The opinion was held that the prices, however, were not reasonable, and the trade restrained was the sale of pipe across State lines, becoming inter-state commerce. The judgment reverses the decree of the Circuit Court and instructs that court to enter a decree enjoining the six defendant companies from continuing to do business under their contract or in any way maintaining the same.

A good deal of attention is just now being directed to the number of orders for tramway extension and renewal in Great Britain which are passing into the hands of foreign firms. Firms in the United States, Belgium and Germany, according to the *Iron and Steel Trades Journal*, have been securing orders which it is considered our own manufacturers ought to have been able to supply. The Hull corporation has just placed the order for its tram rails with the Societe des Acieries d'Angleur, of Angleur, Belgium. The tender of the Belgian firm was much below that of any of the quotations sent in by English firms. A similar state of affairs prevails at Glasgow, where the Bochum Union, of Bochum, Germany, quoted considerably less than any British concern.

INSURANCE MATTERS.

The city council of Nanaimo, B.C., has repealed the fire insurance $200 tax by-law. It has also reduced the banker's tax from $300 a year to $75 for each six months, and the tax on loan and investment societies from $50 for each six months to $12.50.

More about the humbugging so-called fire insurance companies of which we recently wrote comes from the West. The St. Louis *Herald* has it that the Great Western Insurance Company of London, England, is operating extensively through the western states. By offering farmers a liberal reduction in rates, the concern has managed to do a large business. Two men with a wagon load of literature and policies have been soliciting business.

Most of the marine insurance companies have advanced their rates for the south-western Alaska trade, according to the Vancouver *World* of 23rd February. The rate on freight aboard steamers of the approved class has been made 1 per cent. below deck and 3 per cent. above. The former rate was 1 per cent. below and 2 per cent. above. The new rate on freight on barges or dismantled ships, which are ranked as barges, has been set forward to 5 per cent. below deck and 7 per cent. above, with perhaps as high as 10 per cent. above.

A list of British offices doing fire business on the Pacific Coast is given by an insurance exchange; on the American coast, that is, of California, Oregon and Washington States. It is said that the old country companies rank thus in the order of premiums: Offices, the Palatine, with premiums for $300,000; London and Lancashire, $285,500; Liverpool, London and Globe, $285,000; Royal, $267,000; Commercial Union, $228,000; North British and Mercantile, $267,000; Manchester, $201,500. Total foreign companies' premiums were nearly $3,900,000, so that these companies have done a third of it. The losses were about 47 per cent.

The hearing of the action taken by the receiver of the United Life Assessment Society, of New York, referred to elsewhere, is thus pungently referred to by the *Commercial Advertiser* of that city: "The indebtedness of the company has simply been divided among the policy-holders, whose property is liable to attachment for the amount. It is a serious blow to them, as assessment insurance is chiefly used by the poor and people of moderate means. This is the second case of the kind on record, and the settling of this precedent is likely to injure assessment insurance very seriously. 'Old line' insurance costs, but its policy-holders are not subject to assessments on worthless policies.'

We observe in the columns of the St. John *Sun* a lengthy letter from Mr. Alfred Manley, manager for the Mutual Reserve Fund Life Association in that city, and in the Halifax *Chronicle* one equally lengthy from the pen of Mr. W. J. Murray, who is Maritime manager for the Mutual Reserve. The subject of both these letters is the same: the iniquity of THE MONETARY TIMES, which has dared to question the adequacy of the methods of their company, and is therefore "a willing tool" of old-line life companies, and writes "misleading stuff" in which it is guilty of "garbling and distorting," and defends the iniquitous features of the old-line system. THE MONETARY TIMES office publishes and sells pamphlets in which the delusiveness of assessment life assurance is shown up, and Mr. Manley does not like these "miserable penny-a-lines," these "malicious sheets" which prevent his getting policy-holders. But his rage is perhaps greatest against the St. John agents of the Confederation Life and the Provident Savings Life, whom he promises to slay or maim by letter or pamphlet very soon. He is about to "thrust as well as parry." Very good, if his thrust is no more deadly than his parry they need not wear chain armor. In the meanwhile we await the promised pamphlet, or whatever it is to be.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, March 3rd, 1898, compared with those of the previous week:

CLEARINGS.	March 3rd, 1898.	Feb. 24th, 1898.
Montreal	$13,881,950	$16,361,264
Toronto	8,969,558	7,740,388
Winnipeg	1,566,141	1,306,215
Halifax	981,824	1,034,731
Hamilton	660,621	592,441
St. John	425,800	498,424
	$26,485,894	$27,533,463

Aggregate balances this week, $4,359,418; last week, $4,306,677.

BOOKS RECEIVED.

AMERICAN STATISTICAL ASSOCIATION, Quarterly Publications; Boston.—The last issue is No. 40 of the new series, vol. V. It contains a paper on "Farm Ownership and Tenancy in the United States," by Edward Atkinson and L. G. Powers; and among the works reviewed are "An Enquiry into Poverty," "Family Food Budgets," "Municipal Electric Lighting," etc.

A RECORD, NOT A PROSPECTUS.—This is the title of an annual little brochure issued by the Bradstreet Company. It describes credit ratings in the light of failure statistics, and considers causes affecting the commercial death rate.

—Writing last week of the feeling in the lumber trade and the prospects for spring, a New Brunswick contemporary reminds its readers that while it is true that British stocks of spruce lumber are still too large and consumption not active, whence low prices for spring may be looked for, it is still true that the high price of Baltic lumber has led to a larger demand for spruce as a substitute, the latter having been sold at a cheaper rate. Spruce may come up in price again, for it is extremely low at present; indeed, some shippers late last year, who had to pay high frieghts, have lost money on sales made and stand to lose more as prices now are. But in the meantime prospects are not cheering; there is an entire absence of business, for the reason that English buyers are not making contracts.

—A delegation of the St. John Board of Trade had an interview with the New Brunswick Government, and asked that the Ontario Creditors' Relief Act should be enacted for that province. This Act removes preferences secured by confessions of judgment and similar processes, and puts all on the same footing. The Government gave no decisive answer, but promised to look into the matter.

—On Tuesday last, March 1st, the half-yearly report of the Bank of British North America was presented at the meeting. It showed a net profit of £39,435. The report was adopted, and a dividend of 25 shillings per share declared, making a five per cent. distribution for the year. A sum of £10,000 was placed to the reserve, and £3,727. carried forward.

—A surplus of $72,405 undivided profits, composed of rest and contingent fund, is shown by the statement of the Real Estate Loan Company of Canada (Limited). The Board consists of John Smart, Port Hope, president; William Cooke, Toronto, vice-president; Dr. M. H. Aikins, Burnamthorpe; and Rev. Dr. Moffat and Hugh M Toronto.

DISSATISFIED POLICY-HOLDERS.

At a meeting of the policy-holders of the Mutual Reserve Fund Life Association, held at 203 Broadway, last week, says the New York *Times*, the following resolutions were adopted:

Resolved: That we hereby form the Policy-holders' Association of the Mutual Reserve Fund Life Association, in the interest of all policy-holders, wherever situated, who favor an honest and economical management of the Mutual Reserve Fund Life Association; that the officers and directors of the said Policy-holders' Association, other than the secretary, serve without compensation; that the dues be $1 on each $1,000 of insurance, payable at the time of entrance, and yearly thereafter, and are to be used in paying counsel, accountants' fees, clerk hire, advertising, and other necessary expenses in preserving the interests of policy-holders in the Mutual Reserve Fund Life Association; that the officers of the Policy-holders' Association shall consist of president, two vice-presidents, a secretary and a treasurer, who, with one additional director for each 100 members, shall constitute a board of directors, empowered to do all things necessary to conserve the interests of policy-holders in the Mutual Reserve Fund Life Association; subject to the control and supervision of the courts; that said officers and directors shall be elected annually after February 23, 1899, by the members of the Policy-holders' Association; that the following officers and directors are hereby elected by the policy-holders present at this meeting, to serve until Feb. 24, 1899, and until their successors are elected: President, Francis B. Thurber; First Vice-president, Albert G. Wheeler; Second Vice-president, John B. Romaine; Secretary, Hylton Swan; Treasurer, William Fellowes Morgan; and that they are hereby constituted an executive committee, empowered to fill any vacancy.

Resolved: That we do not wish to antagonize the management of the Mutual Reserve Fund Life Association, provided investigation shall prove that it is honest, just, and economical; but, in the language of the last annual report: "The Mutual Reserve, as its name implies, is a mutual company; it belongs to the members; the members are the Mutual Reserve. To that membership the management is responsible; with the membership rests the power; in the hands of the membership is the future of the association.

"Owing to their scattered nature and lack of concert, we believe the rights of members have suffered. We propose to concentrate them, and through concerted action to bring them to bear to accomplish what is just and reasonable. We appeal to every policy-holder to join to this end. In union there is strength. If a large number should join, it is probable membership fees can be reduced, especially after the first year, and as soon as possible this will be done; but we may have to employ expensive counsel and make a vigorous fight to secure reform in the management, and we ask policy-holders to contribute the means to make an effective effort to maintain the rights of all. We propose to ascertain what these rights are, and exhaust all lawful means to maintain them."

—The will of an old London merchant which has just been published shows him to have been something of a wag, for he had made a list of all his "bad debts" and left them as legacies distributed among his friends, one particularly favored person getting over $5,000 worth.

—New York departmental stores have an effective way of fighting each other when prices are cut too low. Not long ago one of them commenced selling the Standard Dictionary at $12. A rival put the price at $9.98. Number one cut to $8.88. The rival came to $6.98, a dollar or so less than the two houses were paying for the books apiece in 1,000 lots, but a fight was on, and blood was hot. Number one then hit a brilliant idea. "We soon mustered about forty salesmen and saleswomen from our forces, and armed them with $7 each. They were instructed to attend the dictionary sale. Within two hours we had bought a whole wagonload of our competitor's books, one by one, at $6.98—dollars and cents below cost. At 11 a.m. that day the sale was stopped, we having secured all the books sold at the very low price, except about twenty. Our competitors got onto the game, and restored the price to regular business."

Commercial.

TORONTO MARKETS.

Thursday, March 3rd, 1898.

DAIRY PRODUCE.—For dairy butter there has been a much better market. Large rolls are selling at 17 to 18c. per lb., with scarcely large enough offerings to meet the needs of the local trade. Creamery is firmer, and the feeling is generally improved. Merchants quote tubs at 20c. and prints, 21 to 22c. per lb. Some of the dealers look upon this strength as of but a temporary nature. There has been a better local jobbing trade in cheese, as the result of a recent cut in price of ½c. per lb. Many of the country merchants have exhausted stocks laid in in the autumn, and are now buyers. The mild weather has made shipments by freight possible. The supply of fresh eggs continues to increase, and prices are dropping. New-laid are quoted 16c., with round lots selling down as low as 15½c. per dozen. Large buyers are looking for lower prices soon. But the whole situation is of course dependent upon weather conditions. Stocks of limed and held fresh are about exhausted, and with fresh eggs in such abundance there is little cause for dissatisfaction on this account.

GRAIN.—Wheat is dull, and prices have declined 2c. per bushel during the week, a slow movement taking place at the lower quotations. There seems to be a halt in the markets of the United Kingdom, if not a disposition to revise previous crop estimates in view of the large arrivals from other countries than America. The "war scare" has not affected the markets one way or the other. In the event of a passage at arms between the United States and Spain, there could hardly be a blockade in the export movement of produce, since the great bulk of it is carried in foreign vessels, which would not be affected by such conditions. It might be found expedient to make use of Canadian ports, shipping grain by railway to St. John or Halifax, and from there sending it forward by neutral vessels to Great Britain. Local receipts of grain have been good. The roads are reported in excellent condition in most parts of the province. Election day was an off-day for the grain buyers, few deliveries coming forward. Barley is steady and unchanged. Rye remains in firm demand for both local and export requirements. Corn is in demand at 40c. Peas are active, having sold up to 57c. and 58c. Buckwheat remains without change at 36 to 37c. per bushel. A 1,344,000 bushel decrease in the visible supply of wheat, as compared with last week, was more than expected, although the bulls had talked of 1,000,000 bushels; 962,000 bushels increase in corn and 111,000 bushels increase in oats were about as expected.

VISIBLE SUPPLY.

Visible supply in the United States and Canada:

	Feb. 26, '98. Bush.	Feb. 27, '97. Bush.
Wheat	34,088,000	43,797,000
Corn	40,870,000	26,408,000
Oats	13,473,000	13,897,000
Rye	3,660,000	3,582,000
Barley	2,165,000	3,315,000

GREEN FRUITS.—Trade is moderately good. There are few oranges offered here from across the Atlantic. A good demand from Russia and Germany for oranges has been experienced, and values are relatively higher in Europe than America. There are a few Florida oranges of good quality (free from frost) in the market. The other kinds receive little attention. But the price is too high for consumers, and the principal demand is confined to Californias. Telegraphic advices from the Pacific coast are to the effect that shipments are decreasing, and that holders there are less anxious to sell. In view of the moderate consuming demand and present liberal supplies no improvement in the spot market seems to be expected in the East. Local dealers quote: Washington Navels, 96s, 112s, $3.25; 150s, $3.50; 176s, $3.25 per box; Washington Navels, 126s, $3.40; 200s, 216s, $3 per box; California seedlings, 126s, 150s, 176s, 200s, 216s, 226s, 250s, $2.50 to $2.75 per box; Bitter or Marmalade oranges, $2.75 to $3 per box; Blood oranges, 80s, $2.75 per half box. Lemons are less active this week. There is a better movement in bananas, and the season will soon be fully open, March and April usually proving good months for this trade.

GROCERIES.—Trade is very quiet at the moment. Staples are moving out but slowly. Sugars are not in active request. There is some little activity in the Lenten supplies. Canned vegetables are firm; peas and corn selling up to 90c per dozen.

HIDES AND SKINS.—At last there has been a "let-up" in the situation, and the tension at which the market has been held is somewhat relieved. On Monday green hides were put down ½c. per lb., merchants now paying Toronto butchers 9c. for cowhides, and 9½c. for steers. As cured cowhides are reported sold this week at 9c., it will be seen that there is still no margin in handling hides even at the decline in buying prices. The competition is, however, mainly confined to Toronto butchers, and green country hides, No. 1 Toronto inspected were reported purchased for 8½c. From Chicago, March 1, comes this: "There was a fairly firm tone to the market, as tanners were showing increased interest: prices were without change at 11 to 11¼c. for native steers; 9 3-4 to 10c. for light Texas; 10 to 10¼c. for heavy do.; 10c. for butt brands; 9½c. for branded cows; 9 to 9¼c. for Colorados; 10 5-8c. for heavy native cows and 11c. for light do.

Leather.—The first two months of the year have not been without their bright features. A number of tanning firms report the business as fully up to the movement in the same months last year. There are no large accumulations of splits here, although tanners are unanimous in reporting that within the past several years there has been a falling off in the call for this stock. The season for splits will scarcely open for six weeks yet, and until that time the trade must be satisfied to jog along at a moderate rate. Grain leathers are moving fairly well. For colored leathers there has been somewhat less enquiry this year than last.

Provisions.—Local receipts of dressed hogs have been very large since our last report. It is reported that offerings last week were the largest of any week during the present season. Advices point to large spring offerings. The hogs coming forward are, for the most part, light weights. Some of them are far lighter than packers desire, running so low as 75 lbs., and are quite unfit for packing purposes. The only explanation for the marketing of these hogs is that feed must be running short. Peas have sold up to 58c. per bushel, and both buckwheat and corn have been used in its place. There is a strong demand for provisions, especially long clear bacon; while smoked meats are in fair request.

MONTREAL MARKETS.

Montreal, 2nd March, 1898.

Ashes.—The situation is unchanged. We have seen an English letter from a prominent English firm, which states that the demand over there is very quiet, and there is certainly little doing here. We quote first quality pots at $3.45 to 3.50: seconds, $3.15 to 3.20; pearls, about $4.75 per cental.

Cements and Firebricks.—Little movement is reported in cements, and the enquiry for quotations for spring delivery is very limited. The market in both Britain and Belgium is reported a very firm one, at the advanced quotations lately noted. For present delivery from store, figures are: for British, $2 10 to 2.20; Belgian $1.95 to 2.05. Firebricks are moving in small lots at $17.00 to 22.00 per thousand.

Dairy Products.—The cheese market is still marked by inactivity, and it seems a hard thing for buyers and sellers to get together, 7½c. per lb. being the outside idea of the former for fine makes, while holders decline to take less than 7¾c. In the demand for butter there is some improvement, and values show some stiffening; fall made creamery of good quality is firm at 19c., while for new-made 19½ to 20½c. is quoted, with increasing receipts of the latter. Good roll butter is in demand at 16 to 16½c., and good dairy makes quote at 16 to 17½c. per pound. New-laid eggs sell fairly at 20 to 21c., No. 1 limed and candled at 15 to 16c. per dozen.

Dry Goods.—With the fine bright weather now prevailing, general country orders show improvement, and general collections also show a betterment, owing to the more settled state of country roads. The 4th inst. is a fair-sized day for payments in this line, and it is calculated that a good average of customers' paper will be retired. City retail trade cannot be reported in a very satisfactory shape, and several more failures are reported of men of moderate calibre, further evidence, it is generally allowed, of the growing attraction of the departmental store. The attendance at the millinery openings is the largest for years; all the millinery houses and most of the dry goods houses are busy.

Fish.—Matters are quiet in this line, the demand may be called somewhat slow and prices barely steady. We quote:—Green cod, No. 1, $3.25 to 3 50; No. 1, large, $4 to 4.25; dry cod, $3.25 to 3.75; No. 1 herrings, $4.25 to 4.50; N. S. salmon, $12 to 13.00; B. C. ditto, $11.00 to 11.50; sea trout, $6 50 to 7.50; haddies, 6 to 6½c.; bloaters, $1 to 1.25 per box; boneless cod, 4½ to 5c. per lb.; whitefish, $4.75 to 5.00 per barrel.

Furs.—Some buyers report rather better receipts of mink, fox and rats this week, but all of them agree that the total offerings so far this season have been much smaller than usual. Quotations are without change; some revision is possible after the London March sales, which begin on the 14th inst. We quote:—Mink, large dark. $1.50; small, do., $1.00 to 1.25; marten, $1.75 to 2.25; fisher, $4.50 to 7.00; lynx, $1.00 to 2.00; otter, $1.00 to 12.00 for dark; pale, $5.00 to 7.00; red fox, large, $1.30 to 1.50; small, $1.00; cross fox, $3 00 to 6.00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large, $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7c. to 10c. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

Groceries.—Travelers are again on the move pretty freely, and business may be called good. Teas are in a little better request, and local transactions are reported aggregating a few hundred pkgs., principally low to medium-grade Japans and Congous. A transaction is also reported covering some 1,700 half chests of Japans, controlled by a Montreal house, but in store at Hamilton, which have been shipped to Chicago. This deal is reported to be due to the withdrawal of the ten per cent. duty by the United States on teas coming from Canada, but this point lacks confirmation. Sugars are moving fairly; factory prices are 4⅜c. for standard granulated in quantity; Austrian granulated, 4 to 4½c. as to quality; yellows, 3⅝ to 4c. Cable advices from the island quote Barbadoes molasses now at 7c. first cost, but there is no stock available yet, nor any cargo orders placed yet. On spot, quotations are firmly held. This is the month during which prices are generally arranged for the yearly supply of rice by the milling company; no fresh contracts have been apparently made as yet, but there is some expectation that slightly lower figures may be made. With regard to canned vegetables there is a feeling in some quarters that values may ease off a little; country buyers are not disposed to accept the present high figures, which are to some extent due to speculation, and there is some disposition to humor them. Sicily filberts are scarce, and firmer at 7½ to 7¾c. in lots.

Hides.—The market is unaltered since a week ago. The advance in calfskins to 10c per lb. for No. 1 is maintained and hides are firm at 9½c. for No. 1, though the quality is generally poor, the grub being now about at its worst. Receipts are small, however, Lent being now current, and stocks on hand are decidedly limited. Quite a few English-killed hides are being brought in for the making of belting leather, and it is claimed can be laid down at the tannery fully as cheaply as Canadian hides. Lambskins continue to be quoted at $1 each.

Hops.—While there is no special activity in the demand the market shows firmness at 15 to 18c. for Canadians, as to quality; yearlings, 7 to 9c. per lb.

Leather.—The market continues very firm. Exports of sole have been very large of late, and one large house is said to have handled £21,000 of English money the past month. Some tanners are declining further orders from that quarter at present, as they will want all their stock for local wants. Some moderate business is reported in glove, buff and pebbled leathers, all at firm prices. We quote:—Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 26 to 28c.; No. 2 do., 22 to 24c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 20 to 21c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; bufted cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 13 to 13½c.: polished buff, 11 to 13c.; glove grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

Metals and Hardware.—A moderate movement is reported at generally steady prices. A few fair sales of No. 1 Hamilton iron have gone through at $16 50, but Scotch brands seem quite neglected, in fact stocks of the latter are confined to but a few tons in two hands. Last cabled quotation for Glasgow warrants is 46s. 5d. Domestic bars are still quoted at $1.40, mill price, for lots, but as there is no combination in this line, the figure might be shaded. There is no marked enquiry for plates of any kind, but values hold steady. Tin shows some further signs of stiffening. We quote:—Summerlee pig iron $18 00 to 18.50; Carron, No. 1, $18; No. 3, $17.25; Ayrsome, No. 1, $17.00; No. 3, $16 50; Shotts, $17.25 to 17.50; Carnbroe, $17.00, ex-store; Siemens pig No. 1, none; No. 2 Siemens, none; Ferrona, No. 1, $15.00 to 16.00; Hamilton No. 1, $16.00 to 16.50; No. 2, ditto, $15.50 to 16.00; machinery scrap, $14.00 to 15.00; common ditto, $12.00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do, I.X., $3.90 to 4.00; P. D. Crown, I. C., $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2 90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, etc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1.50; three-sixteenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.50 to 3.55; sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 16 to 16½c. for L. & F.; Straits, 15½ to 16c.; bar tin, 16½ to 17c.; ingot copper, 12¼ to 12½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.50 to 4.75; American spelter, $4.50; antimony, 8 to 9c.

Oils, Paints, Glass, Etc.—Business cnotinues to be reported good in these lines. As regards values the only change reported is a further advance of a cent. in turpentine, which was forecast in a recent issue. We quote:—Turpentine one to four barrels, 52c.; five to nine barrels., 51c., net thirty days. Linseed oil, raw, one to four barrels., 46c.; five to nine barrels, 45c.; boiled, one to four barrels, 49c.; five to nine brls., 48c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c. genuine red do., 4¼c.; No. 1 red lead, 4c.; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00. Paris green, 50 and 100 lb. drums, 15c.; 25 lb. drums, 15½c.; 1 lb. cartons, 16c.; pound tins, 16½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3 10.

Wool.—The long overdue cargo of Cape wool for this market is now being discharged at New York, and will be forwarded here by rail. Business continues much as last reported, and quotations are steady at last figures.

LAND MORTGAGE COMPANIES' ASSOCIATION OF THE PROVINCE OF ONTARIO.

The annual meeting of the association was held in the board-room of the Canada Permanent Loan and Savings Company, Toronto, on Thursday, 20th January, 1898. It was resolved that the minutes of last annual meeting be taken as read and confirmed. The chairman then called on the secretary to read the eleventh annual report of the executive committee of the association for the year ending 31st December, 1897.

MEMBERSHIP.

The membership in the association has been reduced during the year by the resignation of one of its members and the closing of another, and now comprises thirty-four companies, representing an aggregate paid-up capital of $25,775,267, and assets, as at 31st December, 1896, amounting to $97,148,610.

LEGISLATION.

In the matter of provincial legislation affecting land mortgage companies, the past year has been the most important one since the formation of this association. In the last annual report, reference was made to a bill about to be introduced by the Ontario Government at the next session of the Legislature to consolidate and amend the various Acts relating to building societies, but it was not then contemplated that the measure would be so far-reaching as the one entitled "An Act to consolidate and amend the law respecting building societies and other loan corporations." In addition to amending and consolidating existing provincial laws respecting these societies and corporations, the Act provides for the formation of new ones and for bringing all corporations authorized to lend money on real estate, whether organized under Provincial, Dominion or Imperial charters, under the Act by requiring them to take out a certificate or license, and to pay certain fees, before being authorized to do business in the province. The bill, as originally introduced, contained many objectionable features, some of which the committee, through the association's solicitor and by representations made to the Government by deputations and by interviews, were able to get struck out or amended.

The committee took advantage of the opportunity to secure some needed amendments to the law, which had been recommended as necessary in their former reports, such as the premium to be paid on partly paid-up shares where the reserve has been reduced since the shares were issued (see sub-sec. 2 of sec. 15), the limitation and in certain events, the prohibition of loaning to shareholders upon the security of their stock (see sub-sec. 2 of sec. 19), extending the time to 12 years in which to sell real estate acquired in satisfaction of any debt, and providing that no forfeiture of the security to her Majesty shall take effect until the expiration of at least six months after notice in writing has been served on the company concerned (see sub-sec. 5 of sec. 17).

At the outset the committee made an effort to have the bill laid over until the next session of the Legislature, to give time for proper consideration of its details, but were unsuccessful. They also endeavored to secure separate Acts for the companies having permanent paid-up capital, such as those forming this association, and the building and loan associations issuing terminating shares, but in this they were also not successful. Objection was taken by the committee to the scale of fees for incorporation or registry under the Act, which the committee contended were greatly in excess of the necessary expense of operating the Act. This contention is fully borne out by a return to the House of Assembly which shows that ninety-five companies registering under the Act last year paid fees amounting to $10,588.88, whilst the expense incurred by the department in working the Act amounted to only $1,146, the surplus being carried to the casual revenues of the province. This method of taxing the companies the committee consider to be unjust, inasmuch as loan and land corporations are already taxed under the Municipal Act on any real property owned and on the dividends paid to their shareholders. This excessive and uncalled-for taxation tends to prevent lower rates of interest for loans and is eventually paid by the borrowers.

It is greatly to be regretted that the splendid record so long maintained by Canadian land mortgage companies has been broken during he past year through the failure of a company to meet its liabilities, and consequently the enforced liquidation of its affairs under the Winding-up Act. This unfortunate state of affairs was brought about, it is reported, through the departure by the company's directors and officers from well understood business methods and usages, which ought to, and it is hoped do prevail in the management of the companies forming this association. It is believed that, as soon as the causes leading up to the suspension becomes known, the temporary depression it has caused in the market value of stock in land mortgage companies will rapidly pass away.

In view of the possibility of a perfectly solvent company requiring temporary assistance to meet its maturing obligations (assuming, of course, that the condition of its affairs is such as warrants assistance being given) the executive committee have had under consideration the legal right the companies possess under their respective charters and rules or by-laws, separately or collectively, to make advances for that purpose. In order to remove any doubt on this point, the executive have obtained through the association's solicitor, the opinion of one of the foremost legal authorities in the province on the rights and obligations of financial corporations, and they are pleased to be able to report that there is no legal objection to this being done, the powers now possessed by the companies in the association being clearly sufficient. Copies of the counsel's opinion may be had on application to the secretary-treasurer.

All of which is respectfully submitted.

J. Herbert Mason, President.

Toronto, January 19th, 1898.

The president, Mr. Mason, in moving the resolution for the adoption of the report, said:

Gentlemen,—The events referred to in the report of the executive committee, though few, are important.

The Provincial Secretary, the Honorable J. M. Gibson, is entitled to credit for the labor he has taken to consolidate the various statutes relating to land mortgage companies and building societies. Partly due to the action of your committee, the Loan Corporations Act contains many provisions which command general approval. It is to be regretted, however, that the measure could not have been adopted without imposing upon the companies affected a new and gratuitous tax. No value is given, and no excuse can be offered for the fees enforced, excepting the cost of working the act, which the sums received exceed by nearly nine times. In levying this tax, as well as by giving the municipalities in which the head office of a company happens to be, the right to assess the dividends paid to shareholders who are scattered over the province and elsewhere, instead of assessing them in the municipality where they reside, the Government of Ontario has shown scant consideration for loan companies and their customers, as well as for the municipalities where the shareholders live. There is no good reason why loan companies should not be treated as to assessment in the same manner as the chartered banks. Legislators representing country districts seem to forget that the burden of these taxes falls on the borrower, many of whom are their own constituents, for the benefit of a few of the cities—but such is unquestionably the case.

A few months ago I believed, and would not have hesitated to assert, that it is almost impossible for the capital of a depositor or bond-holder in any Ontario land mortgage company to be imperilled; and with ordinary good management, and even with ordinary weak or indifferent management, I am still of that opinion. And I can confidently point to an unbroken record of more than forty years in support of my contention. Can any other class of banking, financial or commercial corporations claim a similar record? Recent events, however, have demonstrated that the strictest legal limitations of the borrowing and lending powers of loan corporations cannot ensure immunity from disastrous insolvency, if directors and officers fail to discharge their respective duties prudently, honestly and efficiently. Success cannot be assured, nor failure averted, by legislative enactments, however restrictive, nor by requiring minute and vexatious returns, if capable, experienced and careful men do not direct and watch over a company's affairs.

Land mortgage companies deal with securities of the most stable character, less liable to unfavorable contingencies than most others, but experience shows that no class of property is free from fluctuation in value. There is always room for the exercise of good judgment, and it behooves shareholders and directors to see that those who enjoy their confidence are worthy of it.

The date fixed by our by-laws for holding the annual meeting of the association is one of the busiest for loan company managers in the whole year. Besides this, the sessions of both Dominion and Provincial Legislatures are generally held at this period, and little or no time is left to consider and prepare any measures suggested by the members of the association at their annual meeting. The autumn seems to me a more suitable time. I would suggest that notice of proposing a change of date for holding the annual meeting be given at this meeting, and that the executive committee be requested to prepare a by-law on the subject and submit the same to a special meeting to be called for the purpose of considering the proposed change.

It has also been suggested that it would be desirable to amend the constitution by providing for the appointment of a second vice-president, which I think is well worthy of your consideration. I move, seconded by the vice-president, Mr. Bullen, that the report of the executive committee and the secretary-treasurer's statement be received and adopted, and be printed for distribution among the members of the association. Mr. Bullen, of London, seconded the motion, which on being put to the meeting, was carried unanimously.

Mr. C. Ferrie, representing the Hamilton Provident and Loan Society, gave notice that at the next meeting of the association he will introduce a motion to amend Article 3 of the By-Laws, to change the date of the annual meeting from the third Thursday in the month of January, as provided in said article, and that the executive committee be authorized to prepare a by-law fixing the date. The usual honorarium was voted to the secretary-treasurer.

It was moved by Mr. Walter S. Lee, seconded by Mr. A. M. Cosby, and Resolved: That there be added to the executive officers of the association a second vice-president, and that the Hon. Geo. A. Cox be elected to fill that position. Moved by the Hon. S. C. Wood, and seconded by the Hon. Geo. A. Cox, that the retiring officers and executive committee be re-elected for the ensuing year. Carried unanimously.

The meeting then adjourned.

R. H. Tomlinson,
Secretary-Treasurer.

Twenty-four companies, having their headquarters in Brantford, London, Stratford, Hamilton, Port Hope, St. Thomas, St. Catharines, and Toronto, had representatives at the meeting.

HOME SAVINGS AND LOAN CO., LIMITED.

The nineteenth annual general meeting of the shareholders was held in the company's office, No. 78 Church street, Toronto, on Thursday, February 17th, 1898, at 12 o'clock noon.

The president, the Hon. Frank Smith, occupied the chair, and the manager, Mr. James Mason, acted as secretary.

The secretary read the notice calling the meeting. The minutes of the last annual general meeting, held 18th February, 1897, were, upon motion to that effect, taken as read, and were confirmed.

REPORT.

The directors beg to submit the nineteenth annual report. with accompanying financial statement, duly audited, showing the result of the company's business for the year ended 31st December, 1897, and its position on that day.

Early in the year a reduction took place in the rates of interest obtainable on "loans on collaterals," a further lowering of rates followed, and this continued during the remainder of the year.

After paying and providing for two half-yearly dividends, at the rate of seven per cent. per annum, and paying all expenses, including salaries, printing, advertising, auditors' fees and all commissions on loans, and providing for directors' compensation, there remained a net profit of $6,564.05. To this is to be added $118.16, balance profit and loss account, making in all $6,682.21. Of this sum $5,000 is added to the contingent account, and the balance, $1,682.21, placed at the credit of profit and loss account.

The reserve fund stands at $200,000, being equal to the paid-up capital, and the contingent account is $30,000.

Very little change has taken place in the amount on deposit. Loans on collaterals decreased somewhat, and mortgage loans increased.

All of which is respectfully submitted.

FRANK SMITH,
President.

Toronto, February 3rd, 1898.

STATEMENT OF ASSETS AND LIABILITIES, 31ST DECEMBER, 1897.

Assets.

Loans on collaterals of stocks, bonds and debentures		$1,075,952 52

JAMES MASON, Manager.

We hereby certify that we carefully examined the books, receipts and vouchers of the Home Savings and Loan Company, Limited, for the year ending 31st December, 1897, also the securities and cash on hand, and found the same correct and in accordance with the above statements.

J. M. SULLIVAN,
J. G. HALL,
Auditors.

To the president and directors of the Home Savings and Loan Company, Limited:
Toronto, Feb. 7th, 1898.

The adoption of the annual report and statement was moved by the president, seconded by the vice-president, Mr. Eugene O'Keefe, and carried.

It was moved by Mr. Thomas R. Wood, and seconded by Mr. Thos. Long. "That the thanks of the shareholders be and are hereby tendered to the president, vice-president and directors, for their careful attention to the affairs of the company during the past year." Carried.

Moved by Mr. M. O'Connor, seconded by Mr. H. C. Hammond, "That the thanks of the shareholders are due and are hereby given to the manager and other officers of the company for the efficient manner in which they performed their respective duties during the past year." Carried.

Moved by Mr. A. J. Somerville, seconded by Mr. James Gunn, "That Messrs. John M. Sullivan and John G. Hall be the auditors of the company for the ensuing year: and that they each be paid the sum of $400 for their services." Carried.

Moved by Mr. J. J. Foy, Q.C., seconded by Mr. Edward Stock, "That the poll be now opened for the election of directors, and that the same be closed whenever five minutes shall have elapsed without a vote having been tendered; and that Messrs. C. C. Baines and R. B. Street be the scrutineers to take the vote; and that they report the result to this meeting." Carried.

The election was then proceeded with, the result of the ballot being the unanimous re-election of all the retiring directors, as follows: Hon. Sir Frank Smith and Messrs. Eugene O'Keefe, Wm. T. Kiely, John Foy and Edward Stock.

On motion of Mr. E. O'Keefe, seconded by Mr. C. C. Baines, that the president do leave the chair, and that the same be taken by Mr. Thos. R. Wood. Carried.

It was moved by Mr. H. C. Hammond, seconded by Mr. A. J. Somerville, and carried, "That the thanks of the meeting be and are hereby tendered the Hon. Sir Frank Smith for his conduct in the chair."

The meeting then adjourned.

At a meeting of the new board, held immediately after the close of the above, the Hon. Sir Frank Smith was re-elected president, and Mr. Eugene O'Keefe re-elected vice-president of the company.

GUELPH AND ONTARIO INVESTMENT AND SAVINGS SOCIETY.

The twenty-second annual meeting of the shareholders of this society was held at the society's office, corner Market Square and Wyndham street, Guelph, on Wednesday, February 16th, 1898, the president, A. B. Petrie, Esq., in the chair.

Among the shareholders present were: Messrs. A. W. Alexander, John M. Bond, A. J. Brewster, Thomas Day, T. J. Day, Geo. D. Forbes, James Forrest, Rev. James Harris, William Hunter, H. Howitt, M.D., James Innes, ex-M.P., J. W. Kilgour, John Kitching, jr., Robert Melvin, J. E. McElderry, W. A. McLean, John McKinnon, William McLachlan, James P. Phin, John Phin, William Patterson, George Shortreed, Robert Torrance, D.D.

The secretary, Mr. J. E. McElderry, read the annual report and financial statement.

REPORT.

The directors of the Guelph and Ontario Investment and Savings Society present to the shareholders their report for the year ended December 31st, 1897.

After paying all costs of management, municipal tax on dividends, interest on deposits and debentures, etc., etc., the net profits, including $19,025.91, less $2,011.03 deducted therefrom to cover losses on property, making the balance carried forward from last year $17,014.88, together with $125.80 premium on stock, amount to $59,370.76. This sum has been appropriated as follows:

Dividend No. 42, paid July 2, 1897, 8 per cent. per annum	$16,941 90
Dividend No. 43, paid Jan. 3, 1898, 8 per cent. per annum	16,960 00
Carried to reserve fund	125 80
Carried to contingent fund	25,343 06

The reserve fund amounts to $155,125.80, the contingent fund $25,343.06, and the total assets of the society are $1,672,761.47.

During the year applications for loans, amounting to $401,419.67, were received, and from these investments on mortgage security, to the amount of $236,954.67, were selected and granted, and $164,465 declined.

The value of real estate held by the society is $50,411.48. This sum includes all properties remaining unsold, which have come into possession of the society by foreclosure, failure to obtain purchasers under power of sale, or otherwise. The directors have thought it advisable to add the surplus earnings of the year, amounting to $8,328.18, to the contingent fund, making it now $25,343.06, which we feel sure will more than meet any loss that may be made in the disposal of these properties.

During the year the interest on our investments has been promptly paid, and arrears on mortgages are much less than for a number of years.

The officers of the society continue to discharge their duties to the satisfaction of the board.

As usual, the books and accounts have been carefully examined every month, and the auditors' report is presented herewith.

All of which is respectfully submitted.

A. B. PETRIE, President.

FINANCIAL STATEMENT FOR THE YEAR ENDING 31ST DECEMBER, 1897.

PROFIT AND LOSS.

To Dividend No. 42	$ 16,941 90
Dividend No. 43	16,960 00
Interest on deposits	13,761 66
Interest on debentures	21,419 89
Commissions	578 66
Cost of management, including directors' fees, auditors' and inspector's salaries	8,814 22
Municipal and income taxes	745 35

Contingent fund..	25,343 06
	$621,428 86

J. E. McElderry, Secretary.

We have audited the books and vouchers of the Guelph and Ontario Investment and Savings Society monthly during 1897, and have found them correct. We have also examined the mortgages, and calculated the value and earnings of each one separately, checked the savings bank balances, proved the bank balances, and certify that the foregoing balance sheet is a correct statement of the society's affairs to 31st December, 1897.

A. J. Brewster,
J. W. Kilgour,
Auditors.

Guelph, January 26th, 1898.

The president, Mr. A. B. Petrie, in moving the adoption of the report and financial statement, said:

Gentlemen,—With the report which is today presented to you I am sure you will be much pleased, the result of the year's business as shown thereby being very satisfactory indeed. We are now reaping the result of the careful management which has in the past been given to the business of the company, and the strict watchfulness over the class of securities on which your money has been advanced. We are thus free from the difficulties with which other companies find themselves surrounded, and which in some cases have been brought about by want of foresight on the part of the management.

You will observe that the amount of property which we have on hand is only about $1,000 less than a year ago. We might have disposed of more during the past year than we did, but the directors thought it better not to sacrifice properties in view of the favorable prospect for an advance in prices, and particularly as those which we have are yielding us a fair rate of interest. The contingent fund of $25,343.06 the board consider is more than ample to pay all losses, and, while we might have made a larger addition to the reserve fund this year, it was thought better to place the surplus earnings of $8,328.18 to the contingent fund, as it is earning just the same interest as the reserve. The $125.80 placed to reserve was premium on stock which was paid up during the year.

Your directors have continued to exercise the same great care over the securities as in past years, and one of the safeguards taken by them is to get a repayment on principal money of mortgages every year, and when we say that payments have been better met than in other years we also include these repayments on principal.

The decline in the rate of interest on mortgages has been largely met by the lower rates paid on deposits and debentures, so that the earning power of the capital is very nearly as great as ever.

The manager and office staff have performed their duties to the entire satisfaction of the board, and of all who have had business dealings with the company. The inspector has performed his duties most satisfactorily, and his services in inspecting and re-valuing properties have been very efficient. The work of the auditors, which has been somewhat increased during the year, has been done well and thoroughly.

You will all be glad to know that Mr. Stirton is now feeling better than he was a year ago, and has kept in close touch with the company's business, nothing transpiring with which he has not been fully acquainted. He desired me to say how much he appreciated the kindness of the shareholders in their expressions conveyed to him by resolution at last general meeting, and the presentation to the company of his portrait.

The vice-president, Mr. Melvin, seconded the adoption of the report and financial statement, and said:

Gentlemen,—In rising to second the adoption of the report, I may say that having spoken so often upon the business of the Guelph & Ontario Company, I have felt that I should leave the plain statement of its affairs to yourselves, without comment, but as time went on I thought it well, in these times when there is so much doubt and distrust with regard to financial institutions, to apply a test to our business, and to give you the result, which I shall endeavor to do, and from which you will see that every statement made in the report is fully borne out. The statement which I have had prepared will show that we were enabled to pay and did pay our dividends and all our liabilities, not out of supposed earnings, but out of actual earnings. I find that, taking the amount of money which we actually received during 1897 for interest which fell due in that year and overdue interest at the end of 1896, and deducting from it the dividends paid to shareholders, the interest paid to depositors and debenture-holders, and making provision for interest accrued but not due on deposits and debentures, we have a large surplus of money actually collected, and to this surplus is to be added the interest earned and unpaid during 1897. It is clear, therefore, that while we have paid you the handsome dividend of eight per cent., we have not paid one farthing but what we have actually earned and collected during the past year. I desire to make it plain to you that I have been dealing with interest which fell due during the year and the amount unpaid from last year. The item of earnings includes the interest accrued and not due, as well as all other profits, and we are therefore enabled to pay all the items I have mentioned and carry a large surplus to contingent fund.

I think I am safe in saying that you have a statement before you to-day that very few companies in Canada can lay before shareholders. If you take into consideration the difference between the earning power of money now and six or eight years ago, you will find that the eight per cent. dividend which we are paying you is about equal to a ten per cent. dividend now. We pay the highest dividend of all the companies in Ontario except one, which pays nine per cent., and the great majority of the companies are paying only six; and while the selling worth of the stock of most companies has greatly diminished, there is but little difference in the price of ours. I think we should feel highly pleased with our splendid standing, and I hope that in years to come the same measure of success may attend us.

The motion for the adoption of the report and financial statement was carried unanimously.

Moved by Mr. T. J. Day, seconded by Mr. A. W. Alexander, that Messrs. A. J. Brewster and J. W. Kilgour be auditors for the current year, and that their salaries be $200 and $180 respectively, for the past year as well as for the current year. Carried.

The scrutineers, Messrs. A. W. Alexander and W. A. McLean, reported the following gentlemen elected as directors, viz.: Messrs. A. B. Petrie, Robert Melvin, D. Stirton, John Phin, George D. Forbes, Henry Howitt, M.D., James P. Phin, John M. Bond, James Innes, ex-M.P.

Moved by Mr. J. W. Kilgour, seconded by Mr. George Shortreed, that the thanks of this meeting be tendered the scrutineers for their services, and that their report be received. Carried.

Moved by Mr. W. A. McLean, seconded by Rev. Dr. Torrance, that a vote of thanks be tendered the president, vice-president, directors, manager and other officers of the society for their services during the past year. Carried.

In accordance with notice of motion given by Rev. Dr. Torrance at last annual meeting, a resolution was introduced and passed unanimously, fixing the salaries of the president and vice-president and the directors' fees.

At a subsequent meeting of the board Mr. A. B. Petrie was re-elected president, and Mr. Robert Melvin vice-president.

IMPERIAL LIFE ASSURANCE CO., OF CANADA.

The annual general meeting of this company was held at its head office in Toronto, Ontario, on Wednesday, Feb. 23, 1898.

Those present were: Hon. Sir O. Mowat, president; J. W. Flavelle, vice-president; Sir Mackenzie Bowell, J. H. Plummer, Hon. George A. Cox, H. N. Baird, J. J. Kenny, A. E. Ames, S. G. Beatty, R. K. Connell, E. R. Wood, C. C. Baines, Dr. J. L. Davidson, E. T. Malone, F. G. Cox and others.

The president, Hon. Sir O. Mowat, took the chair, and the secretary of the company, Mr. T. Bradshaw, acted as secretary of the meeting.

The annual report and financial statement were submitted as follows:

REPORT.

The directors have pleasure in reporting to the members the result of the first three months' operations of the company. The Dominion Insurance Act requires all life insurance companies transacting business in this country to furnish a statement of their affairs as at the 31st December in each year, so that the report now presented is only for a part of a year.

(1) BALANCE SHEET.

Your directors have had the balance sheet herewith submitted prepared in the same form as that required by the Government for the annual report of the Superintendent of Insurance, and it will be observed that there are no assets included which are not strictly of the character allowed by the Insurance Department. There is, however, an important difference between the statement and the requirements of the Government, viz., that, for the reasons hereafter noted, the directors, in the interest of the policy-holders, have adopted for the valuation of the company's assurances and annuities a 3½ per cent. interest rate, instead of the less onerous rate of 4½ per cent.

(2) ORGANIZATION.

In order to provide for the necessarily heavy expenses of organization, and for the apparent loss which a life insurance company must show in the first few months of the company's existence, your directors issued the capital stock at a premium of 25 per cent., amounting on $250,000 of capital paid-up, to $62,500. The wisdom of this procedure will, your directors feel assured, be evident to all interested, from the strong financial statement now presented, a statement which they think is perhaps without a parallel.

The company has been fortunate in securing the services, as district managers and agents, of men well and favorably known in their respective communities, and as a result is now strongly represented in the Provinces of Nova Scotia, New Brunswick, Prince Edward Island, Ontario, Manitoba, British Columbia and the North-west Territories, and satisfactory arrangements are nearly complete for the representation of the company in the Province of Quebec.

(3) NEW BUSINESS.

The number of applications received and acted upon was as follows:

370	accepted, and policies issued, assuring..	$1,185,725
34	declined and postponed, representing ..	98,500
Total..404		$1,284,225

The amount of business transacted exceeded the most sanguine expectations of the directors, and will compare most favorably with that of the old established and most progressive life insurance institutions in Canada, in the same period of time, and largely exceeds the business secured during the whole of 1896, by some of the Canadian, British and United States companies in Canada.

The character of the business is attested by the relatively high average amount of the policies issued. The average amount of the policies of all Canadian companies, at the close of 1896, was $1,582; and of the Canadian policies of all British and United States companies, $1,986, and $1,884 respectively, whereas the average of the policies of your company is $3,205, or double the amount of the average policy of the combined Canadian companies.

(4) INCOME.

The annuity and assurance premiums amounted to......	$35,969 75
Interest and profit on investments..	10,987 34
Making a total of..........	$46,957 09

In examining the Government reports, it cannot be found that any Canadian life insurance company, in its first statement, some of which cover a complete twelve months' business, showed such a substantial income as that reported above.

If to the amount of cash received for assurance premiums (excluding annuity considerations), $32,399.90, there be added the premiums outstanding at the end of the year, $6,764.40, and the sum of $5,929.45, the amount of deferred premiums, we have a total premium revenue, as the result of three months' business, of $45,093.75.

(5) DISBURSEMENTS.

In the accounts for this year all preliminary expenses connected with the establishment and organization of the company appear, and our members will be pleased to see that these have been fully provided for and wholly wiped out without impairing the capital of the company.

Notwithstanding the well-known fact, confirmed by the Government reports on insurance, that the first year's business of a life insurance company (owing to the large initial expense for printing, advertising, books, stationery, traveling, legal and other expenses) is comparatively costly, it is gratifying to be able to state that the business already placed on the books of the company has been secured at a lower rate of expense than the rate of expense on new business of most of the old-established companies.

(6) ASSETS.

The total funds of the company amount to $336,247.89, of which $316,964.14 is invested in Government inscribed stocks and first-class debentures and mortgages, yielding a remunerative rate of interest. The balance is represented by cash in bank and at head office, outstanding and deferred premiums, etc. The amount of outstanding premiums is but 15 per cent. of the entire premium revenue, and represents policies issued in the latter part of December, and sent to the agents too late to collect the premiums and remit for them before the close of the year.

(7) LIABILITIES TO POLICY-HOLDERS.

The Insurance Act requires all life insurance companies to compute the reserves on their policies according to the Institute of Actuaries Hm. Table of Mortality, with interest at not more than 4½ per cent., The reserves on "The Imperial's" policies have been calculated and are held on the same table of mortality, but with interest at 3½ per cent., and those on its life annuity contracts on the basis of the latest mortality experience of Government life annuitants in Great Britain, with interest at the same rate. In addition to this stringent valuation, the company has made additions to these reserves, (1) to cover the immediate payment of death claims, and (2) for suspended or deferred mortality. It is believed that no other company in Canada has adopted as the basis for the valuation of the whole of its business such a high standard as 3½ per cent., nor is it known that any other company here has made provision in its reserves for the important items of the immediate payment of death claims, and for suspended or deferred mortality. The adoption of these important principles has been determined upon, with a view to making the policy-holders' security as strong as it is possible to make it.

(8) CONCLUSION.

The paid-up capital of the company, amounting to $250,000, the amount held by the company for reserves under its policies, viz., $38,426, and its substantial surplus, $47,821.89, form a strong guarantee to policy-holders. When to these is added the uncalled capital remaining of the one million dollars subscribed, held by prominent and wealthy shareholders throughout the Dominion, it will be seen that the company offers the amplest possible security to its assured.

The directors believe that the important principles and rules which have been adopted in the conduct of the business, namely, careful selection of risks; vigilance and skill on the part of the medical examiners, and the chief medical referee; the safe and remunerative investment of funds; the employment of active, intelligent and honorable agents, whose efforts are aided and supported by capable management at the head office; the holding, as assets, securities of an unquestionable character; and the maintenance of the reserves on a conservative basis, must build up the company on a sound and permanent foundation.

No doubt a measure of the success of the company is due to the simple and straightforward policy contract issued by it. Objectionable and technical clauses found in many life insurance contracts have been omitted, and the policy adopted is perhaps one of the simplest life insurance contracts issued by any company.

A complete audit of the books, documents, securities and statements of the company has been made by gentlemen of extended experience as auditors, and their report is appended to the financial statements.

The company's district managers and agents deserve special commendation for the satisfactory business they have secured in the short time that they have been with the company, and you are to be congratulated upon the evident enthusiasm with which they have entered upon the business of the year 1898.

THOS. BRADSHAW, Secretary.
O. MOWAT, President.

F. G. COX, Managing Director.
T. BRADSHAW, Secy. and Actuary.

We have examined the above statements of receipts and disbursements, and of assets and liabilities, with the books and vouchers of the company, and certify the same to be correct. We have also examined each of the securities held at the head office of the company, and the evidences of the Dominion Government Deposit, and the cash and bank balances, and find the same to be correct and in accordance with the above statements.

JOHN MACKAY,
E. J. HENDERSON,
Auditors.

Hon. Sir Oliver Mowat, the president, moved the adoption of the report in a brief address, dwelling upon the importance of life assurance to the individual, and remarking the sound methods pursued by this company.

This was seconded by the vice-president, Mr. J. W. Flavelle, and carried.

Sir Mackenzie Bowell moved, and Hon. Senator Cox seconded, a resolution of thanks to the company's representatives.

The scrutineers then reported the gentlemen whose names follow, elected as directors for the ensuing year:

Hon. Sir O. Mowat, Joseph W. Flavelle, Hon. Sir Mackenzie Bowell, Hon. J. D. Edgar, Hon. William Harty, Hon. S. C. Wood, J. J. Kenny, J. H. Plummer, A. E. Ames, Hugh N. Baird, F. R. Eccles, M.D., A. E. Kemp, William MacKenzie, W. Y. Soper, F. G. Cox.

At a subsequent meeting of the board, Hon. Sir O. Mowat was re-elected president, and Messrs. J. W. Flavelle and A. E. Ames, first and second vice-presidents, respectively.

WESTERN ASSURANCE COMPANY.

The annual meeting of shareholders was held at the company's offices, Toronto, on Friday, 25th February, 1898. The president, Hon. Geo. A. Cox, occupied the chair.

The following, being the forty-seventh annual report of the directors, with accompanying financial statement, was then read by the secretary, and, on motion, adopted, viz.:

REPORT.

The directors beg to submit herewith a statement of the results of the transactions of the company for the year 1897, together with the assets and liabilities at the 31st December last, and the auditors' report thereon.

The balance at the credit of Revenue account is $149,845.05, and there has been a gain of $18,381.16 in the value of securities, as compared with their market price a year ago.

Two half-yearly dividends, at the rate of ten per cent. per annum have been declared out of the year's earnings, and $68,226.21 added to the reserve fund.

The amount of the estimated liability upon risks now on the company's books is $775,661.51, and a net surplus is shown over capital and all liabilities of $379,472.91.

GEO. A. COX, President.

Toronto, 18th February, 1898.

GEO. A. COX,
President.
J. J. KENNY,
Vice-president and Managing Director.
Western Assurance Company's Offices,
Toronto Feb. 18th, 1898.

AUDITORS' REPORT.

To the President and Directors of the Western Assurance Company:

Gentlemen,—We hereby certify that we have audited the books of the company for the year ending December 31st, 1897, and have examined the vouchers and securities in connection therewith, and find the same carefully kept, correct, and properly set forth in the above statement.

JOHN M. MARTIN, F.C.A.,
R. F. WALTON,
Auditors.

Toronto, February 17th, 1898.

The election of directors for the ensuing year was then proceeded with, and resulted in the unanimous re-election of the following gentlemen, viz.: Hon. Geo. A. Cox, Hon. S. C. Wood, Messrs. Robert Beaty, G. R. R. Cockburn, Geo. McMurrich, H. N. Baird, W. R. Brock, J. K. Osborne and J. J. Kenny.

At a meeting of the board of directors held subsequently, Hon. Geo. A. Cox was re-elected president and Mr. J. J. Kenny, vice-president for the ensuing year.

HAND-IN-HAND INSURANCE COMPANY.

MUTUAL AND STOCK.

FOUNDED 1873.

The twenty-fifth general ordinary meeting of the members and shareholders was held at the offices of the company, Queen City Chambers, Church street, Toronto, on Saturday, 19th day of February, 1898, when the following report was submitted.

REPORT.

The directors beg to submit to the members and shareholders the revenue account for the past year, and the balance sheet, showing liabilities and assets on 31st December, 1897.

The number of policies in force at the close of the year was 1,476, covering at risk, after deducting reinsurance, the sum of $2,175,834.

The total revenue from the fire branch was $55,352.60, and after deducting all expenses and claims for fire losses, the balance to carry forward was $10,490.60.

The balance now standing at the credit of revenue account of the Plate Glass Branch is $14,608.22.

In view of the foregoing results, the usual two per cent. dividend on the capital of the company, being equal to ten per cent. on the paid-up portion thereof, was declared.

The retiring directors this year are: Hon. Justice Maclennan and J. D. Chipman.

All of which is respectfully submitted.

HUGH SCOTT, Vice-President and Sec.
L. W. SMITH, D.C.L., President.

HENRY WM. EDDIS, F.C.A.,
Auditor.

Toronto, February 1st, 1898.

The president, in moving the adoption of the report said:

The report and statements just read are very satisfactory, more particularly so when we take into consideration that the total fire losses in Canada during the past year, 1897, exceeded those of 1896 by $1,632,570, and also find the Dominion superintendent, in his last published report for 1896, stating:

"Thus it appears that for every $100 of income there has been spent $101.16, viz., for losses, $64.48; for general expenses, $32.91; and for dividends to shareholders, $3.77. Hence, also, for every $100 of premium received there has been paid out $66 62 for losses, $34 01 for expenses, and $3.90 for dividends to shareholders—$104 53."

Although we do not present in our statements a large volume of figures, it is gratifying to be able to state, that since the company was founded in 1873, we have shown satisfactory annual results, and never had to omit the yearly ten per cent. dividend to our shareholders.

Our contingent or rest fund alone now shows a ratio of 2.33 per cent. to our gross liabilities, or amount at risk, a much larger ratio than that of the companies published in the "Insurance Blue Book," the average of which, to their total assets, including capital is 1.46 per cent.

The conservative policy that has invariably been pursued by the management in aiming for results rather than for a large volume of business, through which such satisfactory annual exhibits have been attained, will, I feel confident, commend itself to you, as it does to myself.

The report was adopted, the retiring directors unanimously re-elected, and at a subsequent meeting of the board, L. W. Smith, Q.C., D.C.L., was elected president and Hugh Scott, vice-president. The board is now constituted as follows: L. W. Smith, Q.C., D.C.L, president; Hugh Scott, vice-president and secretary; Hon. Justice Maclennan, Thomas Flynn, Thomas Walmsley, J. W. Chipman, M.P.P., Joseph Walmsley, assistant-secretary.

FIRE INSURANCE EXCHANGE CORPORATION.

STOCK AND MUTUAL.

ESTABLISHED 1886.

The annual meeting was held at the offices of the corporation, 32 Church Street, Toronto, on Monday, 21st February, 1898, the president, Frederick Wyld, in the chair, the manager acting as secretary, when the following report was submitted.

REPORT.

Your directors beg to submit the eleventh general statement of the business of the corporation, comprising revenue and profit and loss accounts for the past year, and the balance sheet showing liabilities and assets on 31st December, 1897.

The number of policies in force at the close of the year was 511, covering, after deducting re-insurance, the sum of $1,281,755.46.

The revenue for the past year amounted to $24,631.31 and after deducting re-insurance and all expenses, including claims for fire losses, the balance remaining to carry over was $9,941.44.

By referring to the profit and loss account, it will be seen that the surplus over all liabilities, including re-insurance reserve, amounts to $14,176.84.

In view of the foregoing results a dividend equal to ten per cent. per annum on the paid-up capital was declared.

The retiring directors this year are:—Frederick Wyld, Andrew Darling, R. W. Elliot and A. T. Wood, M.P.

All of which is respectfully submitted.

HUGH SCOTT, Manager and Sec'y.
FREDERICK WYLD, President.

I hereby certify that I have audited the books and examined the vouchers and securities of the corporation for the year ending 31st December, 1897, and find the same correct, carefully kept, and properly set forth in the above statements.

HENRY WM. EDDIS, F.C.A.,
Auditor.

Toronto, January 30th, 1898.

The president, in moving the adoption of the report, said:

The report which we have just heard read by the manager is so clear and concise that it does not appear to me to require any explanations or additions thereto.

Although the volume of business is not so large as I could wish, still I must remind you that satisfactory results is the standard we aim at, in preference to presenting you with a mass of swollen figures without corresponding advantages.

We can congratulate ourselves on the low ratio of losses we have sustained, due to our more conservative methods and system of carefully selecting risks, combined with frequent inspection, and the adoption of other safeguards.

It is now dawning upon the people of Canada and of other countries that this Dominion from the Atlantic to the Pacific, and from the most southerly parts of British Columbia to the Arctic circle, contains the greatest area of auriferous and other mineral lands under one flag in the world. The rapid development of this great heritage now taking place is already giving profitable employment to thousands, which in turn is reflecting advantages to the farmer, the manufacturer, the merchant, and the mechanical and laboring classes, the future of which activity can scarcely be over-estimated. And in connection with this I venture to say that North-West Ontario is going to play no inconsiderable part in this great development, so that it is not unreasonable to assume that Toronto and this province will share in the impetus to business generally, and this corporation may reasonably hope for a substantial increase during the year we have entered upon.

The report was adopted, the retiring directors were unanimously re-elected, and at a subsequent meeting of the board Frederick Wyld was re-elected president and Robert Elliot vice-president.

EXCELSIOR LIFE INSURANCE COMPANY, OF ONTARIO, LIMITED.

On Tuesday afternoon, February 15th, the annual meeting of this company was held at its handsome new office premises, opposite the general post-office, Toronto. There was a good attendance of shareholders.

Mr. E. F. Clarke, M.P., the president, occupied the chair. The annual report showed that the position and future prospects of the company were all that could be desired.

Applications for $789,901 new insurance were secured during the past year, of which $718,860 was accepted and policies issued. The total insurance now in force is $2,805,347.15. The death claims were $11,062, or $2,090 less than the preceding year, the death rate being the remarkably low one of 3.76. The receipts from premiums and interest were $81,504.52. The net surplus available for distribution is $4,590.31. During the year $32,027.16 was added to the reserve, which now amounts to $178,729.23. The total assets for security of policy-holders amount to $534,219.70. Government and municipal debentures amounting to $59,551 were purchased and deposited at Ottawa, and a Dominion license obtained. The Excelsior occupies the unique position of having a deposit with the Dominion and Ontario Governments, and is under the direct supervision of the officials of both. This fact, coupled with the excellent security and admirable plans of the company, will make it easy work for its representatives to secure business.

That the investments of the company have been judiciously made is evidenced by the fact that no losses have as yet been sustained; and the directors take pleasure in stating that the present value of securities purchased during the year is considerably in excess of the amount paid therefor.

This is the first occasion on which the directors have had the pleasure of meeting the shareholders since the procurement of a Dominion License, and they are pleased to report that desirable representatives have been secured to take charge of the company's interests in the Provinces of Nova Scotia, New Brunswick and Manitoba, from which sources a fair business is confidently expected during the ensuing years. The procurement of necessary authority in those Provinces, and the opening up of operations therein entailed considerable expense.

The directors have perfected the monthly payment branch of the business, and have successfully introduced it in some cities and larger towns. That the industrial classes find the system to exactly meet their requirements is demonstrated by the substantial amount of business written during the short time that has elapsed since its introduction. The lease of the company's old office premises expired on December 1st. The present premises, which are more commodious and suitable for our rapidly increasing business, were secured on most advantageous terms.

The auditors continue to make periodical audits of the company's affairs, and at the close of the year verified the cash in hand and in the bank. They also examined each mortgage and other security held by the company. Mr. Grant, one of the auditors, we regret to say, was through illness unable to complete the audit with Mr. H. Barber, F.C.A. His place was therefore taken by Mr. A. C. Neff, C.A. Appended are financial and other statements giving full details of the company's business, which are duly certified by the

Every House

Office, Store, and Public Building of any kind in Canada would be finished with our

Embossed Metallic Plates

For Ceilings and Walls

150 Designs to choose from.

If every one realized how much better they are than any other style of interior decoration.

They are highly artistic—may be decorated to sui any taste—are durable, fire-proof and hygienic—can't crack or drop off—can be easily cleaned, and sell at a most moderate price.

They can be put on over plaster if necessary, but in new buildings plaster is not required with them.

Everything that can be said is in their favor. It will pay you to decide for the metal finish and send for our Catalogue.

ESTABLISHED 1885.

HEAD OFFICE:

Queen City Chambers, Church St., Toronto.

DIRECTORS:

AS. GOLDIE, Pres. J. L. SPINK, Vice-Pres
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

Extended Insurance

Is granted by the Unconditional Accumulative Policy of the Confederation Life Ass'n. Under this provision the full amount of the policy is, in the event of the non-payment of the third or any subsequent premium, extended as a term insurance, and the policyholder is held fully covered for the full face value of the policy for a term of years definitely stated therein.

Paid-up and Cash Values are also guaranteed.

Rates and full information sent on application to the Head Office, Toronto, or to any of the Association's Agents.

WINNIPEG BOARD OF TRADE.

EXTRACTS FROM THE PRESIDENT'S ADDRESS.

The statement recently made in the east, that the Winnipeg Board of Trade was opposed to an insolvency law is not correct. The committees appointed to consider the question have always reported in favor of the principle, but against the details of the bills presented to Parliament. The Province of Manitoba is happy in the possession of an Assignment Act, at once satisfactory and practicable, and while I agree that a law applicable to all the provinces alike would be most desirable, I would recommend continued caution by this board when asked to pass upon bills now pending before Parliament or anything that may appear in the future. Simplicity, economy and equity should be the cardinal principles of a Bankruptcy Act, all of which we enjoy under provincial legislation. As the law now stands in Manitoba, an assignment is the natural outcome of an insolvent condition, and as an assignment cannot be preceded by undue preferences, either voluntary by the debtor or by process by the creditors, and as the law is simple and inexpensive in operation and equitable in application, it is plain the condition of our province cannot be very much improved by an Act of Insolvency: still Canada should have a law common to all the provinces, and when a bill is introduced bearing the stamp of justice to all classes the Winnipeg Board of Trade will gladly support it.

* * * * * * * *

NEW BOARDS OF TRADE.

We have been glad to assist during the year in the organization of local boards of trade in some of the Western towns. Local trade organizations are very useful, and I hope every trading centre of importance in the country will see its necessity. Those of us who have had experience in smaller towns know the local jealousies and differences which grow up to the great prejudice of the best interests of the town. When business men meet together as a trade organization they learn to know one another better and appreciate one another more. Their minds enlarge; they learn to give and take, and finally, when they are quite sure the motives of their neighbors are as pure as their own, they are willing to co-operate and pull together for the common good.

* * * * * * * *

Records of the Department of the Interior show that up to last year 83,634,838 feet of lumber, 11,327,300 shingles, and 3,657,100 laths were cut and manufactured from lands surrounding the southern portion of Lake Winnipeg. This trade was chiefly in the early eighties along the Red River, as far as the international boundary line, and in spite of difficult navigation, but which was then much better than at present. There is still uncut in close proximity to the lake, over 150,000,000 feet of good merchandisable timber, notwithstanding that $12,000,000 worth has been destroyed by fire during the past fifteen years. I am surely right when I say that if this timber was made accessible by the improvement of St. Andrew's Rapids, the whole province would be benefited, to say nothing of the development of an important industry within the borders of our own province.

* * * * * * * *

These evidences are encouraging, but they should not delude us into the false notion that everything is right and nothing is wrong in the country. I have stated that we are improving our methods, but we have still much to learn. Credits are too cheap in the country. They are not as bad as they were, but they are still bad, and the people most responsible are the banks and wholesale houses, but I suppose they are victims and slaves of a system. I notice that a convention of boards of trade will soon be held in Ottawa for the purpose of considering insolvency legislation. If that body would enlarge the scope of discussion and resolve that terms of credit should be reduced to thirty days, or at the most sixty days, and if wholesale houses would act on this resolution, we would have less use for an Insolvency Act. I am glad to say there are other facts in connection with our development which are a truer indication of our condition and are a more satisfactory guarantee of the future. All classes in the country are improving their methods. Farmers are learning that success will come only with good farming, and that wheat alone is a mistaken policy. Business men are learning that indifferent methods are as sure of failure as slip-shod farming. Our present condition is not the result of a single year's crop: the country has been gradually pulling itself together for five years. During that period our export cattle trade, including the Territories, has grown from less than a quarter of a million to over two and a quarter millions. Five years ago we were importing hogs: last year we exported from Manitoba, dressed and on foot, 12,500, besides slaughtering 25,000 in Winnipeg, and Government statistics inform us that there are 75,000 still in the country.

RARE AND EXPENSIVE DRUGS.

Saffron would strike an ordinary observer as decidedly expensive at 56 shillings a pound, until told that it is composed of the central small portions only of the flowers of a crocus, 70,000 of which it takes to yield the material for one pound. Otto of roses sells at £28 odd per pound, and it takes 10,000 pounds, or nearly five tons—of roses to obtain one pound of the oil. Aconitine, extracted from the root of monkshood, is said to be the very strongest poison extant, the dose being 1-600th of a grain. It is sold at the rate of £27 per ounce. Turning from the vegetable to the animal world in search of rare drugs, the writer refers to the musk of the Asiatic deer, which at £6 to £7 an ounce must be a prize to the wily hunter. In some of the tropical seas a floating sweet-smelling mass of ambergris is met with, worth at present £5 10s. per ounce, or £88 per pound, in the market. The ambergris is said to be the "diseased biliary product" of the whale. Another peculiar animal product in use as a drug is a solution of the pure venom of the rattlesnake, given occasionally in malignant scarlet fever; while less strong, if perhaps hardly less repulsive, is powdered cockroach, which in six-grain doses has been prescribed, with good effects, it is said, for dropsy.—Chambers' Journal.

MONEY POWER AND RECENT HISTORY.

Here is a view of the management of great loans between the nations of the world which may or may not be accurate. We find it in the *Review of Reviews*, American edition, written by Albert D. Shaw, the editor: "The financial plan by which it is proposed that England should lend China a great sum of money is interesting on several accounts. The money of course will be supplied primarily by the great international banking houses of Europe, which will take up a new issue of British consols at the ruling low rate of interest, presumably 2½ per cent. England will take the proceeds of this issue off consols, and turn the amount over to China at, say, 4 per cent. With Chinese sources of revenue under the control of English officials like Sir Robert Hart, the regular payment of interest and of instalments on the loan will be reasonably certain, and the profit accruing to the British Government from the difference in the rate of interest would in any case form a sinking fund which in the course of a reasonable term of years would pay off the consols and leave the Chinese loan a matter of clear profit. The matter has peculiar interest, from the fact that the arrangement is supposed to have been worked out chiefly by the great bankers who are neither English, French, nor German in their real allegiance, but must be regarded as a law unto themselves and a separate power, gradually but steadily strengthening their grip upon the destiny of nations.

"It was this huge, mysterious money power that enabled the continental governments, led by Russia, to circumvent England and place the Chinese loan at the close of the Japanese war. And now it is the same hidden but potent force that declines to allow the continental powers to make the present Chinese loan, but ordains that England shall make it. The issues of the recent Turco-Greek war were decided, unquestionably, by this coalition of European bankers, who improved the opportunity to gain a better hold upon the revenues both of Turkey and of Greece, and cleared up millions of profit out of the hideous conflict between Moslem and Christian. Their influence has slaughtered the Armenians and wrought the discomfiture of Greece. The hand of this coalition of European bankers has been constantly felt in the affairs of Spain and Cuba. Their method is to secure control of great issues of public securities at heavy discounts, bearing high rates of interest, and then so to manipulate diplomacy and the course of international politics as ultimately to make certain the payment in full of interest and principal."

BELL TELEPHONE COMPANY.

The annual meeting of the Bell Telephone Company was held in Montreal last week.

The eighteenth annual report, which was read by Mr. C. P. Sclater, the secretary-treasurer, was in part as follows: The total number of sets of instruments now earning rental is 30,445. The company now owns and operates 349 exchanges and 261 agencies. Thirty-five miles of poles and 703 miles of wire have been added to the long-distance system in 1897; the long-distance lines, now owned and operated by the company, comprise 16,567 miles of wire on 6,095 miles of poles. During the year 983 subscribers were added.

Under authority of the shareholders, $66,500 bonds have been sold during the year, the premium thereon being 10 per cent. The directors have charged to contingent fund $150,000, that amount having been expended during the year on construction rendered necessary by the introduction of trolley and other strong current wires, but which they say has not increased the earning power of the plant.

The revenue account for the year ending December 31, 1897, is as follows:

Receipts.

Exchanges..	$ 862,319 29
Long-distance lines	229,917 98
Private lines..	12,619 01
Miscellaneous	80,828 93
	$1,185,685 21

The expenses were, for operating, $825,038.94; legal, $7,725.51; insurance, $23,733.68; bond interest, $45,683.30; miscellaneous, $3,752.21. Total, $905,933.64. Net revenue for 1897 was $279,761.57; less dividends (line), January, 1898, $253,440, leaves $26,311.57. To this add balance of revenue from 1896, and there results a sum of $82,364.17 to carry forward to 1898.

The following board of directors was elected: Messrs. C. F. Sise, Robert Mackay, John E. Hudson, Robert Archer, Wm. R. Driver, Hugh Paton, Charles Cassils, Thomas Sherwin.

—A pamphlet has been issued under the authority of the Government, in which the writer, Mr. W. A. Charlton, gives some information about the Hudson Bay country. In speaking of the timber found north of the height of land, he states that there is a considerable growth of poplar, white wood, birch, cedar, balsam, ash, spruce and small pine. He also uses strong expressions and large figures in dealing with the whale fishery of Hudsons Bay, and the salmon also.

DECISIONS IN COMMERCIAL LAW.

A judgment was given by the Recorder, at Montreal, this week, in regard to the interpretation of a market by-law. Wholesale butchers are prohibited by the by-law from selling less than a whole carcass of meat. One Bickerdike, sold 2,000 lbs. of meat, which was to be made up of cut carcasses. The validity of the sale was attacked. The defence maintained that the quantity sold was greater than a carcass and therefore the sale was legal. The Recorder held that the by-law expressly prohibited the sale of cut carcasses, but as the sale was for a large quantity, and made in good faith, only a nominal fine of $1 and costs was imposed.

FENWICK V. ROBERTSON.—Judgment given by Rose, J., in the High Court of Justice on a special case stated for the opinion of the court. By policy dated May 22nd, 1883, Kenneth N. Fenwick (deceased), then married, insured his life for $5,000 for the benefit of his wife. His wife died June 19, 1895, and he married again March 2nd, 1896. After the death of his second wife he surrendered the policy and received instead a paid-up policy for $1,187, and expressed to be "on the life of himself for the benefit of his wife." On June 26th, 1895, the deceased married his third wife, the plaintiff. The deceased died on January 21st, 1896, without making any alteration in or declaration as to the policy, but left a will whereby he devised and bequeathed all his property to his executors in trust, inter alia, "to apply the moneys payable in respect of my life insurance policies on my life or in or towards payment of the mortgages on my real estate." The amount payable in respect of mortgages at his death was about $18,500, and, irrespective of the policy in question, there were at his death policies upon his life payable to his executors securing about $13,000. Held, that section 7 of R.S.O., 1887, ch. 136, applies to a policy for the benefit of his wife only, or for the benefit of the wife and children, or for the benefit of the wife or children; and that the will did not affect a reapportionment of the insurance moneys, by relieving the estate, bequeathed to wife and children, from payment of the mortgages. Judgment therefore for plaintiff upon the special case declaring her entitled to the moneys.

BANQUE D'HOCHELAGA V. MARITIME RAILWAY NEWS CO.—It was held in the Supreme Court, Nova Scotia, on appeal, that the service on one or more partners was good service on all partners, although the firm had been dissolved, if plaintiffs had no knowledge of the dissolution.

RECENT failures have been reported from Nova Scotia, as follows: J. E. Sancton, long in business in a moderate way, as a jeweler, at Bridgetown, has been obliged to assign, and owes about $3,000, $1,500 being covered by preferences. Assets are calculated at $2,000.——At Truro, the firm of D. Nelson & Son have for some years been doing a general business, largely in the handling of bankrupt stocks, which has not panned out satisfactorily, and their assignment is now reported.——Albert Johnson, a Halifax builder, is reported insolvent, with moderate liabilities, due altogether locally.——C. M. Fowler & Co., furniture dealers at Parrsboro', have assigned, making preferences in favor of the Windsor Furniture Co., who are the principal creditors.

18 King St. West, Toronto

Mercantile Summary.

CONSIDERABLE excitement is reported in Megantic, Quebec, over the discovery of gold on the banks of the Bullard Brook. The discovery was made late last fall, and as the spring approaches the interest in the find increases.

A MEETING of the creditors of Caverhill, Hughes & Co., wholesale grocers, Montreal, is to be held this week, when the disposal of the estate will be discussed. The liabilities are said to foot up to some $145,000, the St. Lawrence Sugar Refining Company heading the list, with a claim of some $16,000.

A VOLUNTARY assignment has been made by the cigar manufacturing firm of Tasse, Wood & Co., of Montreal. They had at one time an excellent North-west and British Columbia trade, but were reported to have made some unfavorable speculations in leaf tobacco several years ago, and latterly the partners have not apparently been agreeing.

THERE have been no new failures in the Montreal retail dry goods trade since last issue, but Valiquette & Valiquette, already reported insolvent, have arranged a settlement at 65 cents on the dollar, on liabilities of about $50,000, and are resuming business as A. Valiquette & Co., the head salesman and the book-keeper being admitted to an interest.——J. R. Paquin, reported last week as in trouble, tried to arrange a compromise at 60 cents, but in view of the facts, creditors insisted on an assignment, being much dissatisfied with his showing as compared with statements recently made.——Mrs. S. Richardson, milliner, is being closed out, an offer of 20 per cent., on liabilities of $1,900, being declined.

AN unexpected failure in the city of Quebec is that of E. C. Barrow, money broker and coal dealer, upon whom a demand of assignment has been made by the Quebec Bank. Mr. B. has been some 25 years in business, with the exception of a short interval, when he was local manager of La Banque du Peuple, and has always stood well hitherto. His liabilities are reported at about $15,000.——Owing to complications with the above, Luke Kerwin, tobacconist, has also been asked to assign by the Quebec Bank. His liabilities, apart from those in connection with the Barrow failure, are small.

NEW BRUNSWICK furnishes its quota to the weekly failure list, as follows: Antoine Cormier, of Lozier Settlement, began a small general business in 1896, selling an interest he had in a farm for $600, which constituted his business capital. He has bought his experience quick, being now in the sheriff's hands, and he proposes a 20 cent. settlement.——N. Marquis, general store, liquors, etc., Edmundston, has assigned to the sheriff. He has been over twenty years in business, and did very fairly until he went into lumbering, which he did not understand. This led to his failure in 1894, when he compromised at 50 cents, since which time he apparently has not been able to pull up.——T. N. Burpee, for the last two years running a planing mill at Fredericton, is reported to have left the town, owing some $3,000.

Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers,
262 West Broadway, New York.

Mercantile Summarv.

The Montreal Grain Elevating Company is seeking incorporation. The applicants are Andrew Allan, Hugh McLennan, Thos. A. Crane, Alexander Paterson, Alexander MacDougall, all of Montreal. The capital is $300,000.

In regard to the lumber trade, the Fredricton *Gleaner* says: Nearly all of the operators on the Tobique have completed their work for the season. The estimated cut on this river is 27,000,000. It is also estimated that the cut on the Upper St. John this year will total 100,000,000.

Application for incorporation is made by the Gould Cold Storage Co. (capital $75,000). The applicants are: John Dillon, J. B. Clearihue, Robert Cowans, Thomas Briggs Brown, Ovid Miner Gould, Charles Henry Gould, librarian, and others, of Montreal, and John Andrew Macmaster, of Westmount.

Parties in Granby, Cote des Neiges, Westmount, etc., are applying to be incorporated as the Greig Manufacturing Company, of Montreal, to make and deal in spices, etc. H. C. Telfer, C. Climie and others ask incorporation as the Telfer & Climie Company, capital $30,000, to deal in horses.

Business is moving in British Columbia. Imports by Victoria merchants were very heavy during February; here are the figures: Free, $115,839, as compared with $47,930 in January, an increase of $67,909; dutiable imports, $260,113, as against $174,936 in January, an increase of $185,177.

"Klondyke orders," it would seem, are always large orders, for Klondyke business is not upon a small scale. We hear of an Ontario cigar-making firm who have made shipments, first of 150,000 cigars, and now of 350,000. These are goods worth $40 to $60 per 1,000, and were purchased by a firm who are establishing a business in Dawson City, and will be shipped in bond direct to Dawson via San Francisco.

Not unnaturally, the Chinese merchants of Victoria are up in arms upon the advocacy by Mr. Maxwell, M.P., and other anti-Chinese agitators of an increase in the head tax on Asiatic immigrants from $50 to $500. At a mass meeting held ten days ago, in the Benevolent Society's hall, several of the leading men of Chinatown expressed themselves upon the subject. Representations will be made, it was announced, to Li Hung Chang.

The statement made on page 1,164 of last issue, that the New York Car Works, of Buffalo, had secured an option of ground at New Castle, Pa., and will begin the erection of a large plant to give employment to 3,500 men, is denied by the company, in a letter bearing date 8th instant, saying that it is "without foundation," and "evidently put on foot by several parties in Pittsburg and New Castle, presumably on account of some real estate speculations in which they were interested." The paragraph was copied by us from either the *Iron Trade Review* of Cleveland, or the Chicago *Journal of Commerce.*

The propriety of abolishing several of the city markets is mooted in Montreal. The revenue from the different markets in 1897 was placed at $77,599. The total spent on the markets is placed at $25,805. In addition to this sum, however, was an expenditure of $32,000 interest at four per cent. on the $800,000 invested in the markets, etc. To these two amounts must be added additional expenses for repairs, which make the total expenditure upon the markets more than the total revenue. Upon the revenue and amounts spent upon the different markets being analyzed it was found that the only markets which paid were the Bonsecours and St. Lawrence.

The following item from an American journal is significant as showing how steel freight cars for railways are coming in to replace wooden ones: The Schoen Pressed Steel Company, of Pittsburg, Pa., has now on its books orders for 1,190 steel cars, to be delivered by June 1st this year. Of these 400 are for the Pittsburg, Bessemer & Lake Erie road, and 100 for the Pittsburg & Lake Erie line. The latest orders were for 450 cars for the Pittsburg & Western railway. Each car is designed to carry a coal load of 90,000 pounds, and an ore load of 110,000 pounds. The sides will be quarter-inch plates, the bottoms and angles much thicker. The 200 cars ordered for the Pennsylvania lines will each weigh 35,000 pounds, and will carry 100,000 lbs. of coal and 110,000 lbs. of iron ore each.

A merchant at Riviere Blanche, Que., J. D. Levasseur, recently noted as in difficulties, has made a proposal of compromise at the rate of 35 cents on the dollar, but creditors think 70 cents a more reasonable offer, and on this basis would grant him a settlement. He owes $6,400.——G. E. Perre has been for several years farming and carrying on a small store at Cape Chat, on the Gaspe coast, but not successfully, and he has approached his creditors, asking them to accept 35 cents, on liabilities of $1,700.——A demand having been made upon Cyprien Dionne, general dealer at Fraserville, Que., he has made an assignment of his estate. He had once a capital of $1,000.——A second failure is also reported in the same town, that of A. Theriault & Co., general merchants. Mr. T. failed in 1892, and not securing his discharge, resumed business in the name of his wife, only to compromise liabilities of $7,000 in 1895 at 50 cents, and now he is again in trouble.——J. A. Blondin, general store, St. Maurice, Que., having failed to arrange a compromise at 25 cents, has assigned. It was only last year he settled at 70 cents through the kindness of creditors. Liabilities are small, only about $2,000.

WHOLESALE TRADE ONLY SUPPLIED

Mercantile Summary.

A 10,000 spindle cotton mill, which was erected in Montgomery, Ala., during the past year by general subscription among citizens, has been formally put in operation with considerable ceremony.

In ten years the receipts of barley at Buffalo have increased from less than 1,000,000 to nearly 17,000,000 bushels per annum. This makes Buffalo the centre of the barley trade in the east.

The machinery from the Yarmouth, Nova Scotia, woolen mill has been removed to the Oxford, N.S., Manufacturing Co.'s premises, and will be used in the mill. The Yarmouth mill has been permanently closed.

The stock, shop furniture, fixtures, and book debts of George Craig & Co., departmental store, Winnipeg, aggregating $47,643.55, were offered for sale on Tuesday last by the official assignees, and bought by Mr. Craig, at fifty cents on the dollar.

It is reported, says the Boston *Cotton and Wool Reporter*, that the agents of McFadden Bros., of Philadelphia, one of the world's greatest cotton firms, have been instructed to stop buying cotton. Enquiries are said to have brought the answer that it was because of the Cuban complications. This has caused a terrible flurry among the Texas cotton men.

A Philadelphia man tells the *Chicago Record* that the output of umbrellas in the United States has reached an average of 40,000 daily, or 12,000,000 a year, and is increasing very rapidly, because people are beginning to recognize the superiority of American goods over the imported article. Philadelphia is the largest place of manufacture, and produces about one-half the umbrellas made in the country.

At a meeting at Richmond, Que., was formed the Richmond and Drummond Counties Cheese and Butter Board of Trade. Twenty-two factories were represented, estimated to be capable of boarding 1,000 boxes of cheese per week. The following officers were elected: S. Wintle, Cleveland, president; James Miller, Ulverton, vice-president; R. G. Dunbar, Melboro, secretary and treasurer.

Among the subjects of discussion at the fortieth annual meeting of the Canadian Press Asociation, now being held in Ottawa, not the least interesting is that of "the Newspaper and the Courts," introduced yesterday by Hewitt Bostock, M.P., of British Columbia, John King, Q.C., and others. Among the New-Yorkers who took part in person or by correspondence were Mr. Frank A. Munsey, Mr. Roy V. Somerville, Mr. F. J. Gibson, secretary of the Sphinx Club, the last-named of whom chose for his subject, "The Publisher's Duty to Advertisers." A live topic, handled by a live man, was "How a Newspaper can Assist in Developing its District," by W. S. Fisher, former president of the St. John Board of Trade. Messrs. John A. Phillips, of the Montreal *Gazette*, and John Lewis, of the Toronto *Globe*, were among those who furnished papers for the meeting.

THE
Ledyard Gold Mines Co'y,
LIMITED.

The Annual General Meeting of the Shareholders of "The Ledyard Gold Mines Co., (Limited)," will be held at the Head Office of the Company, 57 Colborne Street (Room 3), Toronto, on **Tuesday, the 22nd March, 1898,** at 3 p.m., to receive the report of the Directors for the past year, to elect Directors for the ensuing year, and for all general purposes relating to the management of the Company's affairs.

THOS. H. YEOMAN, Secretary.

Toronto, March 9, 1898.

Mercantile Summary.

"We have one of the finest water systems in Canada, a first-class electric light plant under way, and Parrsboro is the only town in the Province that owns its own electric light system."—*Parrsboro Leader.*

Mr. Hamilton Smith, about whose business connections there has been so much discussion in the Canadian Parliament, represents a syndicate composed of the directors of the Exploration Company whose office is at No. 11 Cornhill. He is quite well known in business circles in London.

The smelting operations of the Hall Mines, Limited, in British Columbia, resulted as under for the four weeks ending 26th Feb., 1898. There were 22 days' 15 hours' smelting, during which 5,436 tons of ore were smelted, yielding 321 tons of matte, containing (approximately) 125 tons copper, 77,020 ounces silver, and 402 ounces gold.

In noting the granting of a charter under which the two tea houses of J. W. Cowan and Ramsay & Co., of Toronto, will be amalgamated under the name of the Cowan-Ramsay Company, Limited, the Aylmer *Express* notes that Mr. W. J. Youell, of that place, is one of the stockholders in the new company, and will devote his time to it.

The departmental store system has received a serious blow in Winnipeg by the failure of George Craig & Co., and the *Free Press* thinks the costly experiment will not be renewed for some time. It is thought likely that Mr. Craig will continue in business at the old stand, but if so he will confine his attention to the dry goods trade, the groceries and carpets departments being omitted.

Architects in Winnipeg are by no means idle. One is making plans for a jubilee wing to the general hospital; another designing a building for the Winnipeg Coffee and Lodging House Association. Among finished plans are those for a two-story block of stores and offices opposite the Queen's Hotel. In two weeks' time, says the *Free Press*, important developments may be expected in the building line.

According to the *Inland Sentinel*, Messrs. A. A. Fox and J. T. Lowe, of San Louis Obispo, are the advance guard of a party of Californians who will be going up into the Peace River district in the course of a few weeks. They told the *Sentinel* man that they were in town figuring on outfits, and if prices were satisfactory would purchase their supplies here. They stated that the Klondyke fever in California passes comprehension.

A short time before he left Hamilton for California, C. R. Smith, the late secretary of the board of trade of that city, was waited upon by a committee of the members of the board, who presented him with a well-filled purse of gold and a complimentary address. This address was signed by nearly one hundred of the most prominent business and professional men of Hamilton, and is good evidence of the estimation in which Mr. Smith was held in that city.

At a mass meeting of the citizens of Calgary, held a week ago, a resolution was passed and sent to Ottawa calling on the Government to build a wagon road to Yukon from Peace River. It is felt in the West that the country is sufficiently well known between Peace River and Pelly Banks to require no Government exploration. A telegram of March 5th states, a man has already set out by dog train to blaze a trail the whole distance, under contract to the Edmonton board of trade and town council.

We learn that the Toronto Electric Motor Co. and the Thompson Electric Co., of Hamilton, have amalgamated under the name of "Toronto Electric Co., Limited," to take effect on the 15th of this month. The Hamilton factory is to be moved to Toronto, and the company will occupy their new buildings by the first of May. The new shops, 107 Adelaid St. West, will be of the most modern type, with traveling cranes, and everything to make them most complete. With this change, the new company should be in a position to do the heaviest work in power apparatus, also arc light and incandescent light work of every kind.

Word comes from Montreal of a mining transaction concerned in which are a number of Montreal capitalists. The Big Three Mining Company, embracing the Mascot, the Southern Belle, and the Snowshoe, has been reorganized with A. F. Gault as president. The following is the directorate: A. F. Gault, H. C. Miner, Leslie Gault, C. E. Smith, and Hon. Senator Villeneuve. Mr. O. G. Leebree is vice-president, and Mr. J. P. Graves, managing director. The new management have re-engaged Mr. W. Y. Williams, and propose to do a lot of development work.

The General Mining Association of the Province of Quebec concluded its annual meeting in Montreal on Saturday, when the following officers were elected for the ensuing year: President, Mr. George E. Drummond, Montreal. Vice-presidents, Messrs. James King, Montreal; H. A. Budden, Montreal; W. A. Allan, Ottawa; John E. Hardman, Montreal. Treasurer, Mr. A. W. Stevenson, Montreal Secretary, Mr. B. T. A. Bell, Ottawa. Council, Messrs. George R. Smith, Thetford Mines; John J. Penhale, Black Lake; R. T. Hopper, J. Stevenson Brown, W. T. Bonner and T. J. Drummond, Montreal; C. H. Carrier, Levis; H. W. de Courtney and Milton L. Hersey, Montreal.

The annual meeting of the Canada Paper Company was held in Montreal on Tuesday last, when the report and statement of the year's business for 1897 were submitted and found satisfactory. The following gentlemen were unanimously elected directors for the current year: Messrs. Andrew Allan, John MacFarlane, Hugh McLennan, H. Montagu Allan, Hugh A. Allan, W. D. Gillean and Chas. R. Hosmer. The board elected Mr. John MacFarlane president; Mr. Andrew Allan, vice-president; W. D. Gillean, assistant managing director, and Mr. John G. Young, secretary-treasurer.

A man prominent in the industrial world of Canada, and deservedly so, W. H. Storey, of Acton, passed away a week ago, after a long illness. It is 36 or 38 years since the deceased gentleman went to live in Acton, and fully thirty years since he established the well-known glove works there, which have grown to such extent and importance. Mr. Storey was a man of energy and public spirit. He was the first reeve of Acton, where his death will long be lamented, and a prominent man in the Ontario Manufacturers' Association, whose president he had been. He was also a director of the Manufacturers' Life Assurance Company and of the Wellington Mutual Fire Insurance Company, both of which companies were represented at his funeral, the day of which was a day of general mourning in Acton.

Mercantile Summary.

We observe the mention in Manitoba papers of a new industry in Brandon, namely, the Brandon Felt Factory, which is turning out felt boots and shoes, sleeping-bags, rugs and comforters "made from pure Manitoba wools."

A Vancouver paper gives a list of twelve steamers leaving that city during March for northern points. The names are as under: "Tees," "Princess Louise," "Coquitlam," "Transfer," "Amur," "Islander," "Centennial," "Pakshan," "Cleveland," "Danube."

Letters patent have been issued incorporating Isaac Butler, William Magee and others, of Hamilton, and T. W. Butler, of Toronto, under the name of the Hamilton Tar Distilling Co., Limited, to distill tar and make carbolic acid, benzol-naphtha, etc. Capital $10,000. Also the Wellington Lime Co., Limited, to buy or lease quarries and lands.

The active preparations which the Ontario Wind Engine and Pump Co., of Toronto, have made in the extension of their premises near the King street subway augur well for an increased trade. This company makes a specialty of windmills for pumping water and driving machinery. Wood and iron pumps for railway, village and farm use are also manufactured.

The Intercolonial Coal Company held its annual meeting in Montreal last week, when it was shown that the company's sales of coal and coke, for the year ended 31st December, 1897, amounted to 186,654 tons. The following directors were elected for the ensuing year, viz., Messrs. James P. Cleghorn, H. S. MacDougall, W. M. Ramsay, Thomas Wilson, E. Goff Penny, M.P., A. W. Hooper, R. MacD. Paterson, Charles Fergie and Wm. J. Nelson. Mr. Cleghorn is president; Mr. C. Fergie, vice-president.

The net earnings of the Pennsylvania Railway united system show a surplus, after payment of fixed charges and dividends, amounting to $5,217,000, compared with $1,141,000 for the previous year; which is a remarkable evidence of recovery in the fundamental industries of the United States. Henry Clews' latest circular says that this statement is accepted on the street as a conclusive demonstration of the reality and extent of the revival of industrial activity. The railroads generally continue the high rate of increase in gross earnings that has been reported for the last eight months.

There were not many failures throughout Canada during the week, nor was the amount of money involved large in those which did occur. William Barrand, who ran a small tailoring business at Wingham, has made an assignment.——In November last Thos. Reid opened a grocery store at London, putting in a stock of $400, on which he paid $240. He has just assigned.——Another failure in the same city is that of Hy. Beaton, dealer in hats and caps. He is offering to compromise liabilities of $2,000 at fifty cents on the dollar. He has a stock worth $2,500.——In January, 1896, Jos. A. Ferguson opened up a general store business at Barrie, but failed to make it go. Last November he raised some funds by giving a chattel mortgage on his stock and now assigns.——From Belleville comes the report that J. Brasier, hat merchant, has assigned to a Toronto wholesale house which it is understood has been carrying him along for some time. This business was formerly conducted by Lazier & Myers, whom he succeeded in the spring of 1888. A few years afterwards he compromised with creditors at 50 per cent.——For about eight years John A. Younie has conducted a dry goods business in Galt, and not long since was looked upon as a prosperous merchant, but latterly his health has been poor, so that he has not been able to pay proper attention to his affairs. In order to obtain some relief from business troubles he has abandoned his estate to an assignee. Liabilities amount to about $6,000; assets are, stock $5,500.——Daniel O'Connor, lumber dealer, at Sudbury, has assigned.——A week ago we mentioned here that Doering Bros., Waterloo, were seeking a compromise, but failing in this they have made an assignment.——P. T. Timms, stationer and picture dealer, went to Bracebridge from Toronto two years ago, and evidently has been unsuccessful, for we now hear of his assignment.——A liquor merchant at Woodstock, named L. G. Gurnett, who operated under the name of Gurnett & Co., has assigned.

FOR SALE OR TO LET

The best dry goods stand in Pembroke; with or without fixtures; or will be sold cheap; building 28 x 60 ft.; plate-glass window, 9 x 12 ft.; two doors, centre stairs to second flat; office at landing overlooking both flats; grand opportunity for two young men to start business; advertiser would assist responsible parties with a little capital; millinery show room and dressmaking rooms in connection; also tailoring rooms; responsible parties need only reply. BOX 193, Pembroke; Robert Russell & Co.

LA BANQUE DU PEUPLE.

On Monday last, a meeting of stockholders of this failed bank was held in Montreal. Not many were present; but a few depositors added to the gathering. Mr. Jaques Grenier occupied the chair, and Mr. Ovide Dufresne, the cashier, acted as secretary. At the request of the president, Mr. Dufresne read a statement of La Banque du Peuple, 28th February, 1898. This showed total assets of $2,611,862, but of this sum $1,051,393 consisted of overdue debts, the value of which is quite problematical, and $733,598 real estate. There is about $108,000 in cash, one-fourth of which is held for redemption of the circulation, $50,055 in mortgages and $312,454 the bank premises.

The liabilities are $1,866,461, namely: $1,839,515 due depositors; $19,533 circulation; $5,439; unclaimed dividends, $1,974. This, the cashier added, showed an apparent surplus of $745,000 against a capital of $1,200,000, and leaving a deficit of $455,000.

The chairman announced that they had a year from May next to close up the affairs of the bank, yet it was evident that the stockholders had little chance of getting anything.

Debentures.

Municipal Debentures **bought and sold**, also Government and Railway Bonds. Securities suitable for Investment by Trustees and Insurance Companies and for Deposit with the Government, always on hand.

Cheap Steam

is easy enough if only the necessary amount is produced to do your work. Save continual waste into the air. Your cost of fuel is lessened 20% to 30% by the HEINTZ Steam Trap—the simplest made. No levers, floats, air valves, grinding joints—only a sealed metal tube, holding the manufacturers' secret, expanding and contracting with one degree of heat—211° to 212°—and this operates the valve. Smallest size discharges one gallon of water per minute. The largest 240 gallons, and not a puff of steam. Lasts a lifetime. Thirty days' trial free.

Booklet tells why you should use the Heintz. By mail for the asking.

LIFE ASSURANCE CO.
OF CANADA . . . .

Head Office, TORONTO, Canada.

Capital, - - $1,000,000

PRESIDENT,

The HON. SIR OLIVER MOWAT,
Ex-Minister of Justice of Canada, Lieutenant-Governor of Ontario.

VICE-PRESIDENT,

J. W. FLAVELLE, Esq.,
Managing Director The Wm. Davies Co.
Director Canadian Bank of Commerce.

The Toronto Globe, in referring to the first three months' business of the Company, said:

"It was generally known by those in the business that this new aspirant had secured a fair share of the new insurances taken out in the last three months, but it will be a surprise to nearly all to hear that the applications received amounted to over one million and a quarter of dollars, of which more than one million were approved and policies issued. This phenomenal record—for such it really is for a new company—compares favorably with the business of the older and progressive life insurance companies of the Dominion, and considered in the light of the character of the business, gauged by the large average amounts of premiums and policies, it is quite safe to say that the record is unparalleled in our country."

THE SITUATION.

Unless it receives the signature of the President, or is by him allowed to take effect without his veto, the Senate bill—dealt with at length in a separate article—containing the objectionable conditions regarding the privilege of Canadians to pass goods in bond at Port Wrangel will not become law. That it will become law there is little reason to fear. The United States has a right to make regulations for the navigation by Canada of the part of the Stikine which runs within American territory, and such regulations usually fall to be made by the Secretary of the Treasury. In this respect, the usual course is being followed. On the recommendation of the Secretary of the Treasury, a bill has been brought into Congress conferring on him the necessary authority to make regulations for this purpose. By the Treaty of Washington such regulations are not to be inconsistent with our right of free navigation. In this spirit we may expect the regulations to be framed; and if this be done Canada will have no ground of complaint.

At Ottawa the debate on the Klondyke railway contract still goes on in the House. The Opposition amendment, which looks to the rejection of the contract, while advocating other means of communication with the Klondyke, in spite of some individual revolts in the Liberal ranks, is not likely to carry. As has been evident from the first, the fate of the provisional contract depends upon the Senate. One of the difficulties of the situation is that the Government cannot consider any other offer to build the road until this is disposed of. The Senate, which is not so restricted, may take steps to ascertain whether Mr. Hamilton Smith's offer is one that can be relied upon, and frame its policy on the ascertained facts.

A sinister omen is the appearance in the ante-chambers of the Federal Government of a noted speculator, backed by a show of respectable clerical aid, whose mission is to saddle on the country the load of the untoward speculations of certain colonizing companies. These companies grabbed at the public lands, often under pretences fairer than their real objects; and having failed in their speculation they want the Government to buy back the lands they clutched. If there are any back payments to be made, the utmost which the Government could, in fairness do, would be to take back at the original price as much land as would complete the payment for what was retained by the companies.

Spain and the United States are both preparing for war as fast as they can. Spain is purchasing war vessels, and the United States Congress has unanimously voted $50,000,000 for defence. If war should come it will scarcely be because either country desires it, but will more likely be the effect of a punctilium, in which one or the other will be under the conviction that its honor is engaged to strike a blow. Of a war between these two countries there could only be one end: the numbers and wealth of the Republic must, in the long run, prevail; but victory might be purchased at a heavy cost. In the beginning Spain might, and probably would, get some advantages, but they would in the end be dearly paid for.

After bringing 206 reindeer from Siberia, to be used in the Klondyke Relief Expedition, Secretary Alger, of the United States War Department, with whom it originated, has definitely abandoned the undertaking. This conclusion may be taken as a tacit admission that later information shows that the danger of starvation, once great according to former estimates, no longer exists. Many miners, menaced with starvation, left the territory; exaggeration counted for much; the fact that no fervent appeals for aid assailed the United States Government must have had its effect in forecasting the state of things in the Klondyke, before new supplies, in quantity, can be got in. The fiasco is notable; but excess of precaution is better than neglect, in the face of danger from possible starvation.

A Washington correspondent of the New York *Times* says that different constructions are put upon the Treaty of St. Petersburg, 1825, by Great Britain and the United States. This treaty defines the boundary between Alaska and Canada. One part of the boundary is formed by "the summit level of the mountains which extend in a direction parallel to the coast from the 56th degree of north latitude to the point of intersection of the 141st degree of west longitude," whenever it is not more than ten leagues from the ocean, and whenever it is more, the distance from the ocean is ten leagues. The British contention is that the ocean or open sea is outside of the numerous islands which fringe the main shore, while the Americans contend that salt water, wherever found, constitutes the ocean. The British interpretation places the head of the Lynn Canal, Dyea and Skaguay in British territory, while the American makes the summit of the White Pass ten miles within the United States. In the St. Lawrence River salt water goes up to Three Rivers; but the United States agreed with our Government, for the purposes of the Reciprocity Treaty, that the Gulf of St. Lawrence, as part of the ocean, is hundreds of miles away east.

On the question of accommodation in the Toronto Railway Company's cars, it is not unlikely that both the company and some individuals who have refused to pay fares, because they did not get seats, have put themselves in the wrong. The city's engineer, exercising authority vested in him, made a regulation that, on full cars, half as many passengers as there are seats for may be allowed to stand. If this regulation was valid, as presumably it was, only two-thirds of the passengers were entitled to seats, so long as it remained in force. One regulation made by the engineer could be superseded by another, if done in proper form. It was scarcely reasonable that one-third of the passengers on full cars should not be entitled to seats; and there may be good reason for altering that regulation. But until it is altered, in due form, it is not allowable to refuse to pay fares. If individuals put themselves in the wrong by refusal, the company not the less did so by taking fares from more than one-third as many as could find seats. This was constantly done, from six to seven o'clock, on King street. The company, through its manager, wishes the city to tell how the evil of overcrowding cars can be remedied. The universal answer is "put on more cars." To that suggestion comes, by way of answer, a cry of danger. What is the distance of time now at which the cars are permitted to follow one another, and what is the limit of safety? In New York it is three-quarters of a minute. Is any regular distance of time at all enforced in Toronto?

Prussian statistics show that State railways there are run at good profit. The revenue from the roads left a surplus of $15,175,180 last year; the increase in the earning capacity during the year was 5.19 per cent. per kilometer. The railways were built by private companies, and the Government is reaping a large profit out of the purchase. The State bonds given in payment bear 3½ per cent. interest, and the net earnings of the roads in 1896-7 was 7.15 per cent., leaving a profit to the State of 3.65 per cent. on the investment. Between the rate at which the Government can borrow and that which the companies would have to pay would probably be a considerable margin.

THE STIKINE QUESTION AND THE BONDING SYSTEM.

In a bill for extending the Homestead laws to Alaska and providing for the right of railways into that district, the Senate of the United States put several conditions on which, and on which alone, Canada may have the privilege of bonding at Fort Wrangel. One condition is that Canada shall grant no exclusive privilege of transporting goods or passengers through British Columbia or the North-West Territory, which are destined for other ports in Alaska (the Klondyke?). Condition No. 2 is that the privilege shall be granted by Canada "to responsible persons or corporations operating transportation lines in British Columbia or the North-West Territory of making direct communication with transportation lines in Alaska." Condition No. 3 requires Canada practically to make a present of the duty payable on American miners' outfit, provisions and clothing to the extent of 1,000 lbs. in weight on their entering our Alaskan territory. Condition No. 4 requires Canada to remove "all unequal restrictions as to the issue of miners' licenses to all citizens of the United States operating, or intending to operate in British Columbia or the North-West Territory." Condition No. 5 reads, "that fishing vessels of the United States having authority under the laws of the United States to touch and trade at any port or ports, place or places in the British Dominions of North America, shall have the privilege of entering such port or ports, place or places, for the purpose of purchasing bait and other supplies and outfits in the same manner and under the same regulations as may exist therein applicable to trading vessels of the most favored nations, and of trans-shipping their catch to be transported in bond through said Dominion without payment of duties in the same manner as other merchandise destined for the United States may be thus transported." A motion to strike out condition 5 was negatived on a vote of 34 against 16.

The above conditions are offered in the form and apparently in the spirit of legislative reciprocity. On a proper occasion Canada might be willing to consider some of them, if offered, in the form of equivalents, in formal negotiations; but there are others of a nature which precludes their being considered at all. The occasion on which these conditions are sought to be imposed was not one which Canada can recognize as fitting. Canada and the United States have each reciprocally obtained by the Treaty of Washington a right to navigate that part of the Stikine River which runs through the territory of the other. Each country is specifically given the right, for its own protection, to make regulations under which this reciprocal right is to be enjoyed. That does not justify either country in making the right of navigation subject to any conditions other than such as are necessary for the protection of the revenue and to ensure it against the abuse of the right by the other party. Now the conditions proposed are not of this nature. They say, in effect, that Canada shall not have the privilege of bonding goods at Fort Wrangel unless she consents to do a number of things which are in no way incident to our right to navigate the Stikine. The offer of legislative reciprocity, allowable enough under proper circumstances, is here entirely misplaced. We have the right freely to navigate the river and to reasonable facilities in the enjoyment of that right. If it be a question whether we have a right to the enjoyment, at Fort Wrangel, of the bonding system, that is a question which must be settled on its merits. If we have not the right, and the United States is not willing to grant the privilege, we shall be driven to the alternative of adopting a route to the Klondyke wholly through our own territory; and for this, it is evident, Parliament is ready to make the necessary provision. If we do this, the United States Senate tells us we shall not be allowed the enjoyment of the bonding privilege at Fort Wrangel. A little reflection would have shown that, after we get an all Canadian route, the want of the bonding privilege at Fort Wrangel would cease to be felt; and that, as we have the remedy in our own hands, we are not likely to consent to unreasonable conditions. It is difficult to believe that the President will give effect to this bill.

That Canada would permit American miners to bring large supplies of goods into our country without paying the duties which all other foreigners must pay is a demand for which we can imagine no acceptable equivalent, even if equivalents were offered in a reasonable or liberal spirit. That we should grant to Americans licenses to work our mines on conditions, which, as a rule, they refuse to all foreigners, is a curious exemplification of reciprocity; and if some reciprocity has been offered to us in Alaska mining, the privilege was not asked for by, and is of no value to Canada.

It is possible that on the offer of a reasonable equivalent, in a regular negotiation for the settlement of all outstanding difficulties between Canada and the United States, condition No. 5 of the United States Senate bill might, in part, be granted. The trans-shipment of fish under bond might, in that event, be allowed; but fishing vessels, it is to be feared, could not with safety to the revenue be treated as trading vessels. There would be no objection to giving them the treatment of the most favored fishing vessels; but to fishing vessels, the most favored nation treatment of trading vessels is not applicable, the two categories being distinct. The world has not yet seen the clause of a treaty which accords to fishing vessels the most favored treatment which belongs exclusively to the mercantile marine. And the reason is, that fishing vessels are industrial, not commercial; and that as they are small and can get into all ports or nooks, they might, if allowed to trade, do to a large extent the illicit trade of the smuggler, against which it would be practically impossible to guard.

On the general subject of the reciprocal bonding privilege between Canada and the United States, this country may now make itself easy; the menace of abolishing the system is not likely to be much heard in the future. The Treasury Department at Washington has published a statement, which shows that during the last year no less than 5,351,350 tons of domestic merchandise passed under bond through Canada, from one State to another, and that the benefit of this traffic extended to more than forty States. To carry this merchandise, 443,875 cars were required. So long as the notion prevailed that the bonding system existed principally for the benefit of Canada, threats to abolish it were heard from time to time. It is now shown that abolition would mean a severe, not to say a deadly, blow to the commerce of the Republic.

EXPORT SUGGESTIONS.

The drain upon the population of the European countries incident to the settlement of America, Australasia and South Africa, was bound to work a revolution in the methods of agriculture. Agrarian movements, especially in Europe, are notoriously slow, and it is little cause for remark that only recently the farmers of Norway, Sweden, Russia and other countries, finding it impossible to secure sufficient human help to do their harvesting by hand, have begun to use self-binding machines. In the revision of tariffs that took place last summer in Norway and Russia, the farming interests were considered paramount. While in the former country increased duties were laid on the imports of live animals, salted beef and bacon, fresh apples, wheat flour, rolled oats and dried apples, a proposal to raise the duty on agricultural machinery failed. The Canadian manufacturers are in a position to compete in neutral markets with those of any country in agricultural implements. An official test made at the Government school near Christiana, Norway, resulted in second and third prizes going to Canadian machines. There were seven competitors, and the first award was carried off by a Chicago firm.

We understand that active preparations are being made by Montreal milling concerns for several large shipments of flour to Australia. It is expected they will go forward, *via* Vancouver, within the next 30 days. It is reported that two cargoes being sent forward by the Lake of the Woods Milling Company are to be consigned to parties in Sydney, N.S.W. As Mr. Larke, Canadian commercial agent in Australia, has pointed out, statistics indicate that the Australian breadstuffs are in sufficient supply to carry the colony into the next harvest. Manitoba flour, on account of its superior strength, commands a superior position, and a conservative estimate places it at a value of 10 shillings per ton over the domestic product. Experiments are being made in an attempt to grow Manitoba wheat in Australia, but it is too soon to tell whether the climate and soil will affect the quality of the wheat and detract from the strength of the flour. Meanwhile Canadians appear to be obtaining some advantage from a trade in flour with Australians.

WEST INDIA TRADE.

Some weeks ago a correspondent of THE MONETARY TIMES in Halifax, mentioned the suggestion made in some of the English papers that the British West Indies become an integral part of the Dominion of Canada. The suggestion does not seem to have aroused much interest among Canadians, and there has, perhaps, not been time to hear what the West Indians think about it. The view of our correspondent was, that inasmuch as Canada has no tropical country, we need the West Indies "as a fitting complement to our northern zone." The discussion lends interest to an advice of 1st March, from Halifax, about Canadian trade with the West Indies. We are told that "the 'Duart Castle,' which steamer sailed for the Windward Islands last week, carried twenty-two carloads of western produce, including eighteen hundred barrels of flour. This is a very encouraging feature in the revival of western exports to the West Indian Islands; but I do not hesitate to tell the people of this country and the Government, that a relapse similar to that of 1894 will overtake our trade, unless some one with expert knowledge is sent through the West India Islands to see that our Canadian products get fair play against the ever active New York agents."

The man who writes thus has been years in the West India trade, and ought to be well informed on the general subject. The report of the Royal Commission on the West Indies shows a condition of affairs in those islands by no means encouraging. And we know that the feeling among prominent West Indians is one of despondency. The belief grows that they are being abandoned by the mother country. Shall we see their hearts as well as their trade go to the United States? Is it not worth while in Canada to make an effort to secure a larger share of both inward and outward trade with this population of 1,700,000, whose imports amount to $38,000,000 and exports to $30,000,000 annually? Our correspondent gives it as his opinion that "a competent man following up this new business to the West Indies can, in my judgment, do more to extend a profitable export trade than in any other direction." That our readers may see the proportions of Canada's trade with the West Indies and its recent fluctuations we append the figures of our import and export to those islands for several years:

Year.	Exports.	Imports.	Total.
1878..............	$3,414,147	$1,033,849	$4,397,096
1881..............	3,147,369	3,815,147	6,962,516
1885..............	2,535,283	3,162,774	5,698,057
1888..............	2.601,486	3,268,663	5,870,149
1890..............	2,719.141	3,089,048	5,808,189
1892..............	3,546,559	4,092,287	7,638,846
1894..............	3,443,761	3,677,411	7,121,172
1895..............	3,725,426	4,794,020	8,681,622
1896..............	2 810,817	1,896,426	4,707,243
1897..............	2,643,360	1,678,870	4,322,230

A little calculation based on these figures shows that where in 1878, of the total trade of the West India Islands 6¾ per cent. was done with Canada, the proportion rose in 1892 to 11.23, and in 1895 as high as 12¾ per cent., but fell in 1896 below 7 per cent., while last year it was only 6⅓ per cent. Our trade with those islands was done in the following proportions with the different groups according to nationality:

Country.	Imports.	Exports.	Total.
British West Indias....	$1,069,043	$1,445,449	$2,514,492
" Guiana........	102,700	271,457	374,157
Danish West Indies....	12,096	49,575	61,671
Dutch "	1,011	1,700	2,711
French "	5,606	11,224	16,830
Spanish "	535,000	1,135,412	1,670,412
	$1,725,456	$2,914,817	$4,640,273

A LOAN COMPANY EXAMINED.

Writing the other day on the subject of Ontario loan companies, we stated that one of them had secured the services of a well-known firm of Scotch auditors to look into its affairs, and that the representative of the firm in question was then in Toronto. The report of this gentleman, made after examination of the offices and books of that company at both Toronto and Winnipeg, has now been made known. It is as follows:—

TORONTO, 2nd March, 1898.

At the request of the directors of the Western Canada Loan and Savings Company, we have visited Toronto and Winnipeg, and made an examination of the company's affairs, with the view, mainly, of reporting as to the sufficiency of the security afforded by the company to its debenture-holders and depositors, and we have to report as follows:—

1. SYSTEM OF BOOK-KEEPING.—For the purposes of the company's business the system in use is as complete as could be desired—information on any point connected with the accounts can readily be got from the books.

2. REVENUE.—We have satisfied ourselves that the revenue account is made up on proper principles and that it may be relied on as correct.

3. BALANCE SHEET.—Detailed lists of the assets are kept. These we have gone over with care, and it appears to us that the balance sheet, as published in the annual report, gives a true representation of the company's affairs, and that the assets afford good and sufficient security to the debenture-holders and depositors for the amount of their advances, without taking into account the uncalled capital of £308,219.

We may add that full information was given to us on all points on which we desired explanations, and that we were pleased with what we saw of the management, both at the head office and Winnipeg.

LINDSAY, JAMIESON & HALDANE,
Chartered Accountants, Edinburgh.

It will be observed that this is a prudent report; it does not waste words, nor does it needlessly puff anything or anybody. Being sent hither mainly to learn whether the security offered by this company to its debenture holders and depositors is sufficient, the accountant states that in his opinion it is "good and sufficient," and gives his reasons why he so concludes. The report of Mr. More upon this company will have a good effect in reassuring creditors in Britain who receive it, as to the soundness of this particular company, which is one of the largest; and it will do something towards satisfying those whose minds may have been disturbed by the Farmers' Loan Co. fiasco.

THE COVENANT MUTUAL LIFE ASSOCIATION.

MORE HEAVY ASSESSMENTS.

"It never rains but it pours." This adage appears to be quite well illustrated by the deluge of increases in assessments now being made upon holders of certificates in all the leading assessment societies of any considerable age. In our issue of Feb. 11th, the bulge in the Mutual Reserve Fund's call on its oldest members was set forth, and also in last week's issue, and now it appears that several other of the largest societies are compelled to do the same or cease business. It usually means make a heavy assessment and wind up. It certainly did mean that last year, in the case of a very large, and apparently very strong Boston association. Last week we showed how much alike the experience of the Mutual Reserve Fund was, the past year, to that of the defunct Massachusetts Benefit Life during its last year above ground. The indications are that grave consideration should now be given to the question of putting up any more money than can be avoided, in keeping alive any Mutual Reserve certificate that is not pretty sure to become a death claim within a very short time. And precisely the same is now too plainly true in the case of the Covenant Mutual Life Association, of Galesburg, Illinois, which was recently doing such a flourishing cheap assessment business in this Dominion. It issued 1,443 new certificates in Canada in 1892, and 1,371 in 1893, but in 1896 could get only 149, and probably in 1897 still fewer. The following is a statement from the Blue-book:—

Year.	New Certificates.	Total in Force.
December 31st, 1892	$2,043,875	$4,576,875
" 1893	1,783,625	4 655,125
" 1894	1,193,250	4,437,000
" 1895	958,375	4,123,000
" 1896	205,000	3,647,125
Amount dropped—	$1,838,875	$1,008,000
Add the 1894-5-6 new certificates		3 356,625
Disappeared in three years		$3,364,625

Of which amount only $120,345 went in death losses, showing a net lapse in three years of $3,244,280.

In the above five years the new business put on foots up	$6,184,125
Add what was in force Dec. 31st, 1891	3,173,500
Total amount to be accounted for	$9,357,625
Amount in force on Dec. 31st, 1896	3,647,125
Disappeared in the five years	$5,710 500

The Covenant Mutual's whole business in force at Galesburg during the past five years has the same sickly look as the Massachusetts Benefit presented, and as that of the Mutual Reserve Fund now presents. Here is how the figures appear, when placed side by side, as the charts give them:

Mass. Benefit		Mutual Reserve		Covenant Mutual	
Year.	Amount.	Year.	Amount.	Year.	Amount
1893	$105,381,605	1894	$293,366,166	1893	$101,705,250
1894	106,889,455	1895	308,659,371	1894	98,440,375
1895	112,568,780	1896	325,026,061	1895	92,810,750
1896	93,957,600	1897	301,567,101	1896	87,420,375
Drop—	$ 8,611,180	Drop—	$23,458,960	Drop—	$14,284,875

During the three years, 1894 to 1896, covered by the Covenant's $14,284,875 of drop in total insurance, it wrote $51,563,125 of new insurance, so that the whole of this has disappeared along with the drop in total amount, making a loss of $65,848,000 of business. The cash down cost of doing this losing business is shown for the three years to have been $991,786. A very much worse state of things is likely to be revealed when the figures for 1897 and 1898 come to hand. No figures are given in its report of the last annual meeting, held January 19th, 1898, at Galesburg, as to the amount now in force. The assets show a most serious decline during the twelve months. A year ago they were $1,534,735, and now are only $998,258.

According to the Hamilton *Daily Times*, an indignation meeting of the subjects of call in this concern was recently held in the I.O.O.F. Hall in that city. One of the victims stated his experience of calls in about the following shape, when put in tabular form, by years:

1885	$32 40	1890	$ 55 40
1886	35 40	1895	62 10
1887	45 90	1898	124 20

Another party writes us that his payments have risen from $4.55 bi-monthly, or $27.30, some nine years ago, to $41.76, and then three years ago a second rise to $65.10, and now he is assessed $84.48 for 1898. He is an old man and out of health, but is also nearly out of money, and feels the nearly quadrupling of what he was led to expect, as a decided imposition. Furthermore, he has received a circular letter from the association urging him to abandon the assessment plan, which so many society people—Workmen, Foresters, Templars, Woodmen, Knights, etc.—deem the acme of perfection. It wants him to take what it calls a Whole Life Policy (with three capital letters, observe), which "contains many advantages which cannot be had from any other in the world." This "Whole Life Contract provides a level premium through life," so the wily agent asserts in his circular describing it, but this is contradicted by the policy itself. It would take a Philadelphia lawyer to go through the cumbrous FOURTEEN CLAUSES of the document and tell what they mean, but clause 13 is clear enough. It plainly intimates that the Toronto agent has signed his name to a falsehood in calling it a "level premium contract" in his imitation type-written letter. Clause

18 provides that "should the Covenant Mutual require additional funds to pay its losses, a call upon its members may be made for such sums as may be required, and must be paid within thirty days of the date of such call," think of that; "or may be charged against his policy, and deducted from it in the event of his death." Observe the quotation marks.

A level premium policy, forsooth! Who ever heard of a level premium policy being subject to a call, at the pleasure of one party to the contract, for double or quadruple the level premium, or for "such sums as may be required?" The holder of the policy might have half its whole face charged up against it, at the pleasure of the company, by the mere formality of an obscurely worded "call," and the poor widow or orphans would have a nice time disputing the legality of the deduction. Now just look at the way the wily angler at Galesburg, Illinois, gilds and baits this ugly fish-hook with a dash of poetic fervor. This clause, he says, "presents to the applicant a *never failing spring of safety, equity and inducement*." The italics are not ours. The writer of that sentence must have been drinking at the same spring as the Toronto gentlemen drank at in New York, when they "felt *almost intoxicated with pleasure* in listening to the glowing reports" of the then prospering Mutual Reserve, "based upon incontrovertible data."

The Covenant Mutual seems to be persistently violating the Dominion Statute which says: "The words ASSESSMENT SYSTEM shall be printed in large type . . . in every circular and advertisement issued or used in Canada." We have been shown nine circular advertisements recently issued from the Toronto office, and only one of them makes any pretence of complying with the law. Let some one send those advertisements to Wm. Fitzgerald, Esq., Superintendent of Insurance, Ottawa, and he will be bound to refuse a further license, and probably none too soon. The law also prohibits an assessment society from issuing endowments or annuities, but this fine-print circular describing that "never-failing-spring-of-inducement" policy, plainly offers both, or would make the reader believe so. The young man of 25 can have $10,000 of insurance at a level premium of $140.40 (the strongest stock company in the world charges $159.70 without profits), and is promised $3,000 "cash surrender value" if he lives out his expectancy of 38 years, leaving the entire cost to him only "$5.58 per annum for each $1,000." The thing is most absurd, even if the promise of $3,000 is not a violation of the statute.

Our recommendation is that no healthy man should lead his neighbors or the public astray by paying another dollar to any society or body offering so-called life insurance on the assessment plan, no matter what the inducement. It is a delusion from ground floor to roof, and is doomed to failure in the end, no matter by what pet name it may be called. Two and two always make four, and not six or seven. Just so surely, every heavy assessment drives out healthy lives and fastens bad ones in with a death-grip that strangles the life out of the poor remains. The strange thing, and past comprehension, is that men of conscience in other matters, and who know the truth, not only conceal it, but belong to several societies conducted on this deluding system. They even induce their best friends to join, and to profit by the sin of leading other people astray, until the crash comes. And then for the expected bread there is nought but the bitter herbs of disappointment. When the end comes who is to blame for the result? Business reader, with a conscience, think it out. When you see your duty, be a man and do it fearlessly.

A YEAR'S MINERAL PRODUCTION.

Canada is essentially an agricultural country. But although our staple products are from the farmer's hand, the miner is not without claims to recognition. It would, indeed, be strange if a country with such an expanse of territory as that of Canada, adjoining the great mineral-producing United States, did not possess important mineral deposits. Coal, gold, building materials, silver, copper and nickel are the principal products, constituting about 80 per cent. of the total output.

The summary of mineral production recently made by the Geological Survey of Canada shows that in 1897 the principal non-metallic substances mined were 3,876,201 tons (2,000 pounds) of coal, value, $7,286,257; 25,262 tons of asbestos and asbestic, value, $324,700; 78,811 tons of coke, value, $209,920; 239,691 tons of gypsum, value, $244,531. In addition there were smaller quantities of chromite, ochres, baryta, moulding sand and phosphate. The production of petroleum reached 709,857 barrels, valued at $1,011,546. The total value of structural materials and clay products amounted in value to $4,445,108, and all other non-metallic products to $10,097,831. Greater interest is taken by the public in the metallic minerals, of which we give a list:

METALLIC.	Quantity. (*a*)	Value. (*a*)
Copper (fine, in ore, etc.) (*b*), lbs.	13,300,802	$1,501,660
Gold	......	6,190,000
Iron ore, tons	71,451	178,716
Lead (fine, in ore, etc.) (*c*), lbs.	39,018,219	1,396,853
Mercury, lbs.	688	324
Nickel (fine, in ore, etc.) (*d*), lbs.	3,997,647	1,399,176
Platinum	......	6,600
Silver (fine, in ore, etc.) (*e*), ozs.	5,558,466	3,322,905
Total metallic	......	$13,996,234
NON-METALLIC.		
Asbestos and asbestic, tons	25,262	$324,700
Chromite, tons	2,637	32,474
Coal, tons	3,876.201	7,286,257
Coke (*f*), tons	78,811	209,920
Felspar, tons	1,275	3,506
Fire clay, tons	1,923	5,759
*Grindstones, tons	......	40,000
Gypsum, tons	239,691	244,531
*Limestones for flux, tons	......	40,000
*Mica	......	75,000
Mineral pigments—		
Baryta, tons	571	3,060
Ochres, tons	3,905	23,560
*Mineral water, gal.	......	140,000
Moulding sand, tons	5,485	10,931
Natural gas (*g*)	......	325,873
Petroleum (*h*), brls.	709,857	1,011,546
Phosphate (apatite), tons	908	3,984
Pyrites, tons	38,910	116,730
*Salt, tons	......	190,000
Sundry minerals, partly estimated, including actinolite, graphite, manganese, soapstone and tripolite	......	10,000
Total non-metallic	......	10,097,831
Structural materials and clay products	......	4,445,108
Total non-metallic	......	$14,542,939
Total metallic	......	13,996,234
Estimated value of mineral products not returned	......	250,000
1897. Total	......	$28,789,173

---

* Partly estimated.

(*a*) Quantity or value of product marketed. The ton used is that of 2,000 lbs.

(*b*) Copper contents of ore, matte, etc., at 11.29 cents per lb.

(*c*) Lead contents of ores, etc., at 3.58 cents per lb.

(*d*) Nickel contents of ore, matte, etc., at 35 cents per lb.

(*e*) Silver contents of ore, at 59.79 cents per oz.

(*f*) Oven coke, all the production of Nova Scotia and British Columbia.

(*g*) Gross return from sale of gas.

Canadians may feel proud of the record established in 1897, which compares well with that of previous years:

1897	Total value	$28,789,173
1896	" "	22,609,825
1894	" "	19,933,857
1892	" "	16,628,417
1890	" "	16,763,353
1888	" "	12,479,550
1886	" "	10,221,255

THE FEBRUARY FIRE LOSS.

The fire loss of the United States and Canada during the month of February proved unusually heavy. As compiled from the daily records of the *N.Y. Journal and Bulletin of Commerce* it amounted to $12,629,300. It became apparent early in the month that the underwriters were suffering an abnormal loss, and the great increase will be seen from the following comparison :—

	1896.	1897.	1898.
January..........	$11,040,000	$12,049,700	$ 9.472,500
February	9,730,100	8,676,750	12,629,300
Totals......	$20,770,100	$20,726,450	$22,101,800

There were nearly two hundred fires during February of a greater destructiveness than $10,000 each. Several heavy losses were made in Canada during the month, the principal fire taking place at Winnipeg, where a loss of $400,000 was incurred by the Main street fire. In a number of instances the loss of property might have been evaded by the possession of fire extinguishing appliances in the village of Waterford, Ont., for instance, although on several occasions the business houses have been almost wiped out by flames, no adequate provision has yet been made to prevent similar disasters in the future. It is difficult to account for the stupidity or the neglect of men who occupy municipal offices, and leave lives and property unprotected in this way. Not only the small villages, but some of the cities and towns, are buying dear experience. The New York *Journal and Bulletin* says: "The principal loss during the month was at Pittsburg, which has poor fire protection, and will continue to have serious losses until its citizens wake up to the state of affairs. In fact, Pittsburg may at any time suffer from a serious conflagration. The city requires better engines, more good quality hose, water towers, and a fireboat. The obsolete system of locked alarm boxes in the business section of that city should at once be abolished. Pittsburg needs fewer newspaper interviews about fire protection, and more actual apparatus; *i.e.*, performances, not promises."

ABATTOIRS AND THE EXPORT OF DEAD MEATS.

The Canadian contribution to the meat supply of the United Kingdom is not as large as it should be, and the question naturally arises, would a change in the methods of trade lead to better results Cattle drovers in this country have long maintained that the only trade which can be carried on between Canada and the Mother Country in beef is by way of the exportation of live cattle. The voyage hence to Britain is a long one, and so variable and uncertain is the supply from domestic and foreign sources, that when Canadian supplies arrive on the other side of the Atlantic, market conditions are often very different from those at the time of shipment. In the case of cattle, they can be held until a favorable opportunity for sale occurs; dressed meat, however, even with the most improved cold storage facilities, must deteriorate in value by the frequent handling which is entailed in holding the cargo for a better turn in the market.

Although the question is still a debatable one, there is every appearance of a final decision in favor of the advocates of a trade in dressed meats. There are none to gainsay the enormous expense involved in shipping live stock by rail and water from Ontario and the North-West—the principal sources of cattle supply in Canada—to Great Britain. As purveyors it should be our object to please the meat consumers of the British Isles. At present, as a result of the long enforced standing, the kidneys of the cattle are not allowed their normal action, and the complaint is constant that the tallow from Canadian cattle is discolored and of inferior value. The cattle are often injured by the close quarters in which they are packed, and the bruises detract not only from the appearance of the meat, but from its value as a healthful food product.

The trans-Atlantic voyage is disastrous to life. It is pleasing to note, however, that the trade from North America is conducted on a much better basis than that of South America. During 1897, in the former case while 254,247 cattle were shipped, 618 were lost, and 1,312 sheep died out of a total of 173,219 exported; in the South American trade, 2,523 cattle out of a total of 26,777, and 3,839 sheep out of 105,202 exported were lost. The main cause of this destruction was the use of unsuitable ships, many of them badly ventilated, and others too "light" for the purpose. Even in a journal which is supposed to consider questions from a purely commercial point of view, it may not be out of place to point out that each of the losses recorded represents a horrible amount of animal suffering, as it may be safely assumed that the causes which have led to the death of one animal must have occasioned great suffering to the many who are in an almost similar position.

The exportation of dressed beef is to-day much more feasible than it ever was before. Not only have shippers the assistance of adequate cold storage facilities while the beef is in transit, but improvement in plant has made killing in large abattoirs more efficient and economical. With the New Year a company commenced operations in Toronto with the object of killing cattle for the trade of Great Britain and the Dominion. The plant is complete, the management capable, and the venture should succeed. Shipments have been made with success to the Maritime Provinces, as well as to different points in Ontario.

It is not an unimportant feature of the dressed meat trade that the by-products are kept at home. The hides and skins are available as materials for the production of leather. Those who complain that a country which confines itself to the exportation of agricultural products is constantly draining the soil of its fertility without a chance of replacing the lost energy in the natural way, may derive some consolation from the fact that the blood of the animals is utilized in the manufacture of fertilizers. There is absolutely no waste in the modern abattoir. It possesses all the advantage which a large business has over a smaller one, and must overcome the initial difficulties of a new organization and finally succeed.

HAMILTON PROVIDENT AND LOAN SOCIETY.

The business of 1897 in the case of this company bears a close resemblance, in its figures and its results, to that of the previous year. Expenses of management were less in several particulars; the item of inspection of land shows, however, no lessening, but an increase, with which no fault need be found, for it is probably an expenditure in a wise direction. Gross earnings were practically the same as in 1896. The aggregate of new loans, however, was a good deal smaller than in the preceding twelve months, which the report explains by saying that by reason of low rates and the comparative scarcity of first-class loans, the directors preferred to let funds lie in bank rather than lend them. Thus the society shows about double the usual amount of cash on hand or in bank. Repayment of loans were found very satisfactory, and arrears on mortgages are lower than for years. Borrowed capital, especially deposits, is reduced somewhat, and the rate of interest paid for it also reduced. Having received six per cent. dividend, and after writing off a good sum for actual and possible losses, $21,600 being added to contingent fund, shareholders of the Hamilton Provident have some reason for satisfaction.

WELLINGTON MUTUAL FIRE INSURANCE COMPANY.

A somewhat increased number of policies, covering a slightly reduced aggregate at risk, is shown by the report of the Wellington Mutual for 1897. This results from the cancellation of certain risks, a number of which have since burned, and from the reduction of certain lines formerly carried, a policy which is evidently in the direction of caution. The loss by fire was less in total amount than in the previous year, although the number of fires was greater. Fewer incendiary fires are noted, but the "unknown" causes still form a large proportion of the whole. We have referred in a previous issue to the loss by death of Mr. Charles Davidson, so long managing director of the company. His son, Mr. John Davidson, has been appointed in his place. A by-law authorizing the directors to take steps to form a reserve fund was carried at the annual meeting. One of the directors, Mr. Storey, of Acton, the well known manufacturer, has passed away since the annual report was submitted.

PROVIDENT SAVINGS LIFE SOCIETY.

This life assurance company reports an encouraging business in the Dominion, its methods and rates commending it to an increasing number of applicants. The recent examination of the company by the New York Insurance Department resulted in a strong endorsement of the company's present methods and management. Mr. Scott, the new president, put extraordinary energy into his administration last year, when the new business written was the largest the society had ever done. The amount was $25,100,000, an increase over 1896 of about $11,000,000. This year, so far, shows an increase of $1,500,000 in January and February. Then the insurance in force shows an increase in 1897, the gain being about $5,000,000, making a total in force in round numbers of $85,000,000. The company's income during the year was $2,523,700, a gain of about $500,000, not including premiums due and in course of collection. The company's assets are $2,332,670, and even after the considerable addition to the reserve fund, owing to the large business done by the company, it still has a surplus of $429,923.

—The sixty-fourth meeting of the New England Cotton Manufacturers' Association will be held in Boston, probably on the 27th or 28th of this month.

FEDERAL LIFE ASSURANCE COMPANY.

This company has reached its sixteenth annual meeting, and its report shows some new features. A large aggregate of its assurances on the renewable term plan, not less than seven millions, we are told, have been replaced by higher premium policies, which has resulted in an addition to premium, income and reserve. These policies, it seems, are upon a greater number of lives and in smaller amounts than before; the number of assurants being 6,255 at the close of 1897, as compared with 5,784 at its beginning. The new business of 1897 shows 1,571 applications for $2,104,000 accepted, which is an increase in both number and amount over the new business of 1896. There were claims on forty-four lives, to the amount of $122,826; less reinsurance of $23,000, equals $99,826. Besides this, the payments to policy-holders included a matured endowment of $2,000 and cash dividends or dividends applied in the reduction of premiums, $41,246, making the total $164,072. Having done business so long in various provinces, with a provincial charter and under a Dominion license, the authorities of the company have now resolved to apply for a special Act of incorporation.

TORONTO TRADE FIGURES.

An increase of seventeen per cent. over the corresponding month of last year is observable, in comparing the total inward and outward foreign trade of Toronto, February, 1898, with February, 1897. The increase was from $1,576,536 of imports and $400,576 of exports, to $1,919,571 and $465,248 respectively. In imports the increase was in all descriptions of dry goods, in metals, in books, paper, drugs, fruits, leather, glassware, jewelry and oils. Decreases were few and trivial. We append a comparison of principal items:

PRINCIPAL IMPORTS.

	Feb., 1898.	Feb., 1897.
Cotton and manufactures of........	$156,547	$141,816
Fancy goods, laces, etc.	83,721	67,859
Hats, and bonnets..................	85,523	77,497
Silk and manufactures of	112,578	62,677
Woolen manufactures..............	244,310	191,683
Total dry goods	$682,679	$541,532
Brass and manufactures of........	$ 5,836	$ 6,808

Free goods, such as the raw materials for various manufactures, showed a considerably increased purchase. Wool, hides and skins, india rubber, broom corn, jute, fur skins, all show increase, as also do coffee and coal. Settlers' effects are likewise on the increase.

The exports, while larger in the aggregate, were smaller in all branches except field products. Among these last, wheat and flour were large items, barley a small one.

FODDER CHEESE.

Some weeks ago we took occasion to express the opinion that serious injury would be done to the trade if the dairymen this year made fodder cheese. The question has since that time been brought prominently before the trade. At a recent meeting of the Montreal Butter and Cheese Association the following resolution was unanimously adopted:—

"Whereas, the price of finest cheese to-day being lower than it has been at this season for the past twenty years, and the market being in a most stagnant state, it would appear that there is an over-production of this article; and

"Whereas, the make of fodder cheese is at all times hurtful to the trade, its inferior quality reducing the consumption, and so tending to depress the market, thus depreciating the value of the finer qualities and heavy make of full grass cheese; therefore, in view of these facts, be it

"Resolved, that in the wisdom and opinion of this association, no hay or fodder cheese should be made this spring, and that farmers should consider well the advisability of increasing the make of butter and limiting the production of cheese."

An authority in the trade tells us that cheese at nine cents per pound yields the dairymen the same profit as butter at 19 cents per pound. If this estimate be accurate, there should be little to encourage the manufacture of cheese before the arrival of the grass season. Toronto merchants place the price of cheese at 7½ cents and butter at 19 cents at the factory. The dairy butter market is in an even relatively better position, choice qualities being quoted at 17 to 19 cents. No dairyman who has at heart the real interests of the industry, and values the importance of maintaining the good name of Canada in foreign markets, will encourage the making of cheese that has in the past, and must always, bring discredit upon the cheese trade of this country. But unfortunately there are many who are not actuated by these motives. Perhaps these men may abstain from this deplorable practice this spring, since it is almost certain to bring with it serious loss to the individuals who indulge in it.

FOR GROCERS AND PROVISION DEALERS.

Pork packers in Ontario report having received large orders for British Columbia trade.

Initial shipments of butter from Calgary, Alberta Territory, have led to repeat orders, and give excellent prospects of an active trade.

In Montreal, dried fruits are quiet, but abroad it is reported that Valencia raisins are firmer, owing to large buying of low and medium grades for purposes of distillation.

The removal of the American duty on teas going into that country from Canada is now definitely confirmed, and this, it is held, cannot fail to enhance values of Canadian stocks held.

The Winnipeg *Commercial* tells us that a robbery of wheat is reported from Cypress River, by boring an augur hole, tapping a wheat bin, through which the wheat was run into a sleigh. Loaded cars of wheat were also operated on in the same way.

The members of the Vancouver Retail Grocers' Association have held their first regular meeting last night, and the following officers were elected: President, G. W. Weeks; vice-president, Thos. Duke; secretary, F. W. Welsh; treasurer, W. D. Muir; executive committee, G. W. Hobson, C. S. Philp, J. G. Hutchinson and Geo. Wagg.

A Nova Scotia paper says: "Over in P.E.I. one factory alone handles 50,000 hogs a year, not one of which is imported. Mr. Wm. Reud, an extensive farmer in Canning, N.S., is in receipt of a letter from a wealthy pork packer in Dublin, Ireland, offering to take $5,000 stock in a $20,000 pork factory if established in his neighborhood or other suitable locality."

A highly reprehensible practice has, says a correspondent of the Manchester *Guardian*, been introduced in the finishing of cotton flannelettes and waste twill sheets, which is justly causing the condemnation of respectable merchants. A piece of flannelette weighing when manufactured, say, 37 pounds, is filled by means of magnesium sulphate (Epsom salts) held in suspense or in solution by a compound of glycerine and castor oil up to a weight of 46 pounds. The proportion of adulterant added is thus nine pounds, or nearly one-quarter. The effect of this adulteration is to make the material much more substantial in the handling, though somewhat harder than before, and to lead the buyer to believe that it is much cheaper than the pure article. In reality it is much dearer, and unhealthy, besides.

ABOUT DRY GOODS.

Canadians are said to be placing orders for worsteds freely in British textile centres.

The probable value of the silk manufacture in the United States is $120,000,000, to which may be added the imports of 1897, valued at $25,000,000, making a total consumption in that country of silk manufactures at $145,000,000. As will be seen, about 17 per cent. of the domestic consumption consists of imported goods.

Great care has been paid abroad of late to the manufacture of fabric gloves, and some of the new makes of satine-thread gloves imitate suede in the most marvellous manner, not only as far as general finish goes, but in texture. For these and other thread gloves, as well as jersey silk gloves, the assortment of colors is the same as for kid, namely, different tints of tan, cream and gray, also white and black. They are generally fastened by large-sized pearl buttons or have openwork elastic wrists, the long ones being of the mousquetaire shape.

Our Montreal correspondent tells us that the so-called cut in domestic cotton fabrics has been given too much prominence by the daily newspapers. He says that as a matter of fact, as regards sheetings and pillow cottons the Dominion Cotton Company has done no more than bring down its prices to the level established by the Merchants' Cotton Company in September, 1897. Furthermore, he adds, while prices of canton flannels have been revised, it is a question whether the quality has not been reduced to correspond with the reduction in price.

Lace veils, says the *Dry Goods Economist*, promise to be largely worn this season. They are, however, considered principally as hat veils; for smart toques and capotes preference will be given to tulle. The tint that will carry the day for lace veils is belè, but not to the exclusion of cream, white and black. Cotton lace for veils is provided for the low-class trade, but fashion only recognizes embroidered silk net and Brussels application. Machine-worked and hand-worked net can be offered at prices so reasonable as to come within easy reach of all women who aim at being well dressed.

"New Spring Goods" are the words which attract most attention in the windows of dry goods stores these days. The window dresser of a large King street store has produced a pretty effect by accompanying each separate piece of black dress goods shown—which, by the way, is carefully draped to show its beauty—with a pair of white gloves. Over each display of light material suitable for waists has been thrown a fancy belt to match. Whipcords are said, by the authorities, to have good prospects for the coming season, and certainly they have a very pretty appearance.

We have frequently pointed out the evils that result from the sale of bankrupt stocks, and suggested that some united action be taken towards relieving the merchants of the district in which the unfortunate dealer has carried on business from the baneful effects of a slaughter sale. At a recent meeting, the members of the Retail Dry Goods Merchants' Association decided to inform the wholesale trade that it was their desire that bankrupt stocks should be sold in lots instead of in bulk, so as to avoid ruinous competition for other merchants in general and specially for those in the immediate vicinity of the insolvent. There is plenty of room for those who have the best interests of the trade at heart to exercise their talents in this direction.

From the silk circular of Chabrieres, Morel & Co., dated Lyons, February 9th, 1898: "We confirm our advices of December 30th. As stated then, the year ended under a favorable aspect, and hopes were entertained for the continuation of a steady, and even brisk, demand. It is still too soon to know whether these hopes are to be realized, but during the month of January there was not so large a flow of business as expected; in fact, notwithstanding the great activity of looms, manufacturers and throwsters have bought but little beyond immediate wants. Such an attitude indicates that owing to the large purchases effected during the last six months in all descriptions, supplies in the hands of buyers are yet sufficient; moreover, the exports from the East for Europe, amounting so far this season to 70,000 bales, against 58,000 bales last year, corroborate this surmise."

INSURANCE MATTERS.

At the first of this year, the New York Life Insurance Company, which is doing business in more than a dozen different countries, has in Russia, France, Great Britain and Canada over $100,000,000 foreign insurance in force. Nearly one-fourth of this sum is held in Canada, while Russia represents about the same amount.

Mr. George D. Eldridge, vice-president and actuary of the Mutual Reserve Fund Life Association, is quoted by the New York *Evening Post*, as saying among other things: "There are old line companies, however, that are furnishing insurance just as cheap as we are or ever expect to." This, says an exchange, is a frank acknowledgement, and is true.

The little town of Nasso, in Sweden, has a female contingent, one hundred and fifty strong, in its fire brigade. The water supply of the village consists simply of four great tubs, and it is the duty of the women "firemen" to keep these full in case of fire. They stand in two continuous lines from the tubs to a lake some distance away, one line passing the full buckets and the other sending them back.

The name Dougall has been a familiar one for nearly a half century to the many thousands of readers of the Montreal *Witness* throughout Canada, and held in high esteem. As is well known, Mr. John Redpath Dougall, M.A., is the present publisher. Recently he was appointed to the vacancy on the directorate of the Sun Life Assurance Company caused by the death of the late Mr. Wm. J. Withall.

President Patton, of Princeton, does not claim to be a life insurance expert, but in his recent address to the Life Underwriters' Association, of New York, he brought some hard Jersey sense to bear on two propositions. "Do not," said he, "urge your applicant to take more insurance than he can carry." This is sound advice. There is a temptation to load a man up with more than his income will warrant by making terms apparently easy. Such insurance is usually temporary at the best, and is sure to involve trouble and dissatisfaction in the end. It is also one of the most fruitful causes of lapse.—*Insurance Age.*

The names of those present at the annual meeting of the Hartford Board of Trade shows pretty plainly the prominence of the insurance men of that city in financial and business circles. Among those present we find the familiar names of Jacob L. Greene, president of the Conn. Mutual; Mr. J. B. Batterson, of the Travelers; President Clark, of the Ætna; President Browne, of the Connecticut; President Nichols, of the National; President Whiting, of the Orient, and Vice-President Kimball and Vice-President Holcombe, of the Phœnix Mutual. The former president of the board, Hon. J. M. Allen, of the Steam Boiler Co., who has served ten years and was tendered re-election, declined, and was succeeded by Mr. Charles E. Gross.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, March 10th, 1898; compared with those of the previous week:

CLEARINGS.	Mar. 10th, 1898.	Mar. 3rd, 1898.
Montreal	$14,693,894	$13,881,950
Toronto	9,401,158	8,969,558
Winnipeg	1,426,793	1,566,141
Halifax	1,226,837	981,824
Hamilton	705,320	660,621
St. John	537,961	425,800
	$27,991,963	$26,485,894

Aggregate balances this week, $4,130,216; last week, $4,359,418.

—The gold fever spares no class, it seems. Usually it is considered that the French Canadian farmer is among the most contented of men, unapt to be led far away from his home by either enterprise or speculation. Yet it is reported by a member of the Quebec Legislature, Mr. Chenevert, of Berthier County, on the north shore of the St. Lawrence, not far from Montreal, that well-to-do farmers in his county, are selling all their property to pay their fare to the Klondyke. The same reports of a foolish fever for gold come from other parts of Quebec. Because of this wild impulse, which would doubtless lead to much suffering, the General Colonization Society has arranged for a series of lectures in the Monument National, in Montreal, the special object of which will be to prove to the working classes, specially to those who have some means, that farming on the colonization lands offers a far safer investment than adventure in the gold fields. This is a prudent step, but lectures appear to be needed elsewhere than in Montreal.

Electric railways bid fair to be a most important interest in the near future. Mention is made in the last issue of the *Electrical News* of an undertaking of the sort, which is attracting world-wide attention. It is the conversion of the overhead railway of New York city from steam to electric power, which will involve an estimated outlay of at least seven million dollars. Four of the largest manufacturing companies, namely, the General Electric, Westinghouse, Walker and Sprague, are now figuring on the proposition, which is calling into requisition the skill of the most talented engineers in the United States.

—A week ago the City and District Savings Bank advanced its rate of interest on call loans from 4 per cent. to 4½. And since then the example has been followed by other banks. The brokers are not pleased, but can probably afford to grin and bear it. The unusual conditions and warlike appearances in various parts of the world, the plentiful talk of war, the railway fight in Canada, the Klondyke boom—all these tend to make stocks feverish and to keep up the temperature of dashing speculators.

—We understand that Mr. W. W. L. Chipman, so long the secretary of the Canadian Bankers' Association, has received the appointment of assistant inspector of the Molsons Bank. The gentleman chosen to succeed Mr. Chipman in the secretaryship of the association is Mr. Arthur Weir, of Montreal, who is known as a writer on banking and other subjects.

HAMILTON PROVIDENT & LOAN SOCIETY.

The twenty-sixth annual meeting of the shareholders of the Hamilton Provident and Loan Society was held at the society's head office, Hamilton, at 11 o'clock on Monday, 7th March. Among those present were: W. H. Evans (Toronto), E. B. O'Reilly, M.D., P. D. Crerar, A. T. Wood, M.P., George Rutherford, George H. Gillespie, W. H. Glassco, T. H. Macpherson, M.P., William Gibson, M.P., James Webster (Toronto), John Crerar, James Wilson, C. Ferrie, D. M. Cameron, Alexander Turner, George LeRiche, W. F. Findlay, John Eastwood.

The president George H. Gillespie, was in the chair, and C. Ferrie, treasurer, acted as secretary.

The secretary read the report and annual statements, as follows:

REPORT.

The directors herewith submit their twenty-sixth annual report for the information and approval of the shareholders:

The amount loaned during the year amounted to $461,346.31, while the amount re-paid on loans amounted to $741,133.42.

The net profits of the year, after paying and providing for all due and accrued interest on borrowed capital, paying cost of management and other charges, amount to $88,663.68, out of which two half-yearly dividends, at the rate of 6 per cent. per annum, were paid, together with the personal property tax, and the balance, $21,658.68, carried to the contingent fund.

After writing off all losses on properties sold during the year, and making provision for possible shrinkage in the value of securities, the contingent fund now stands at $47,398.21, showing an increase during the year of $6,072.54, and the reserve fund stands at $300,000.

The borrowed capital amounts to $2,184,177.46, being a little less than a year ago, but we have the satisfaction of reporting a very marked decrease in the amount of interest paid on borrowed capital. The rate on all debentures renewed has been lowered and no new money accepted, except at reduced rates.

The repayments on account of principal and interest, both in Ontario and Manitoba, have been very satisfactory, and the arrears owing on mortgages are now less than for a great many previous years. We have found loans offering on first-class security unusually scarce during the year, and the rates abnormally low; therefore we have not been able to keep our funds employed as well as we could wish; but rather than lower our present high standard of securities, we have preferred to hold our funds, hoping for an improvement in the near future.

The books, accounts and securities have been duly audited and examined by the auditors, whose certificate is appended hereto.

All of which is respectfully submitted.

GEORGE H. GILLESPIE,
President.

Hamilton, Canada, Feb. 9, 1898.

FINANCIAL STATEMENT FOR THE YEAR ENDING DECEMBER 31ST, 1897.

ASSETS AND LIABILITIES.

C. FERRIE, Treasurer.

Jan. 25, 1898.

We hereby certify that we have examined the books, accounts and vouchers of the Hamilton Provident and Loan Society, and have found the same correct. We have also examined the securities (excepting those relating to Manitoba loans), and find them in perfect order, and correct, as set forth in the above statement.

W. F. FINDLAY, F.C.A.
MAITLAND YOUNG,
Auditors.

Hamilton, Feb. 9, 1898.

I hereby certify that I have examined the securities and vouchers and audited the books of the Hamilton Provident and Loan Society for the year ending the 31st December, 1897, as kept in their Brandon office, and have found them correct.

H. L. ADOLPH, Auditor.

Brandon, Man., 12th Jan., 1898.

On motion of the president, seconded by the vice-president, the report was adopted.

The following gentlemen were re-elected directors: Geo. H. Gillespie, T. H. Macpherson, M.P., Alex Turner, A. T. Wood, M.P., William Gibson, M.P., Walter R. Macdonald, W. H. Glassco, Geo. Rutherford.

At a meeting of the directors held after the annual meeting, Geo. H. Gillespie was re-elected president, and A. T. Wood. M.P., vice-president.

WELLINGTON MUTUAL FIRE INSURANCE COMPANY.

The annual meeting of the Wellington Mutual Fire Insurance Company was held, according to advertisement, in the office of the company, Guelph, on Tuesday, the 8th day of February, at 2 p.m. The president, James Goldie, was moved to the chair.

Moved, seconded and carried, that the minutes of the last annual meeting be taken as read.

REPORT.

The president then called on the assistant secretary to read the report as follows:

Gentlemen,—Your directors beg to lay before you the 58th annual report of the affairs of the company for the year ending December 31st, 1897.

The number of policies issued during the year was 2.241, and the number in force on the 31st of December, 1897, was 5,451, insuring $5,369,518.57. These figures show a small decrease as compared with 1896, of $30,655.70, which is owing to the reducing of the large lines carried by the company on a number of risks, as well as to the cancelling of certain risks which in their opinion were not desirable, and this course has been fully justified by the fact that of the risks so cancelled and declined, $8,500 has since been burned. The losses in number for the year were 100, amounting to $31,486.68, which have all been adjusted, and as will be seen from the inspector's report, 30 of these were from adjoining buildings.

The financial statement, inspectors' and auditors' reports are attached hereto.

The retiring directors are Charles Davidson, W. H. Storey and Thomas Gowdy. The two latter are eligible for re-election.

A by-law, authorizing the creation of a reserve will be submitted.

All of which is respectfully submitted.

(Signed.) JAMES GOLDIE,
President.

AUDITORS' REPORT.

The auditors of the Wellington Mutual Fire Insurance Company beg to report that they have examined the books, accounts and vouchers of the company for the year ending 31st of December, 1897, and they have found the same correct and in order.

The balance of cash in the hands of the secretary-treasurer at that time was $863.28, and the balance in the Traders' Bank at the credit of the company at that date was $1,775.64.

All of which is respectfully submitted.

(Signed.) THOS. W. SAUNDERS,
ALEX. MACKENZIE,
Auditors.

The president stated that they regretted that the last three months had been so plentiful both in number and amount of fires. He also referred to the continued illness and failing powers of Mr. Charles Davidson, who had been secretary-treasurer and managing director of the company for so many years and for whom he could hold out no hopes of his ever being able to meet with them at the board meetings again, and at the request of the family his name would not be put forward for re-election.

As stated in the report, a by-law to create a reserve would be presented, which he hoped would meet with their approval. He would move the adoption of the report. John I. Hobson seconded the motion, which was carried.

Moved by J. I. Hobson, seconded by J. R. Wissler, that the by-law authorizing the directors to take the necessary steps to form a reserve fund be read. Carried.

The by-law was accordingly passed.

Moved by J. R. Wissler, seconded by J. I. Hobson, that J. Melross and J. A. Ross act as scrutineers, and that a ballot be taken for the election of directors to fill the places of those retiring. Carried.

A ballot having been taken, Messrs. W. H. Storey, Thos. Gowdy and Harry Murton were declared elected.

Moved by J. R. Wissler, seconded by G. A. Clare, that T. W. Saunders and A. Mackenzie be auditors. Carried.

Moved by H. Murton, seconded by J. Melross, that a vote of thanks be given the directors, officers and agents of the company for the way in which they have conducted the affairs of the company. Carried.

The meeting then adjourned.

At a meeting of the directors, held after the annual meeting, Geo. Sleeman was elected president, and John I. Hobson, vice-president. John Davidson was appointed secretary.

FEDERAL LIFE ASSURANCE CO.

The sixteenth annual meeting of the shareholders of this company was held at the head office in Hamilton at two o'clock on Tuesday, the 1st inst. Mr. James H. Beatty, the president, was appointed chairman, and Mr. David Dexter, managing director, secretary. The following report was submitted:

REPORT.

The directors have pleasure in submitting for the information and approval of the shareholders the following report of the business of the company, together with a statement of receipts and disbursements for the year which closed on 31st December last, and of the assets and liabilities on that date.

New business consisted of sixteen hundred and fifty applications for insurance, aggregating $2,212,000, of which fifteen hundred and seventy-one applications for $2,104,000 were accepted. Applications for $108,000 having been rejected or held for further information.

Annuity premiums to the amount of $8,400 were also received.

During the past five years $7,000,000 of renewable term assurances have been replaced by higher premium policies—principally on limited payment life plans—through which means the premium income and reserve funds of the company have been largely increased, though but little addition has been made to the amount of assurances at risk. These assurances are distributed over a greater number of lives in smaller amounts than heretofore. The number of lives assured increased from 5,784 at the beginning of the year to 6,255 at the close, an addition of 471.

The income, exclusive of capital stock, shows an increase of $46,156.50 over the previous year, and the assets an increase of $114,735.46, the income proper being $381,798.41 for the year, and the assets $722,448.27, exclusive of uncalled guarantee capital.

The security for policyholders, including guarantee capital, was at the close of the year, $1,331,448.27, and the liabilities for reserves and all outstanding claims, $618,481.33—showing a surplus of $712,966.94. Exclusive of uncalled guarantee capital, the surplus for policyholders was $103,966.94.

Assurances for $122,826, on forty-four lives became claims through death, of which amount the company was re-insured for $23,000. Including cash dividends and dividends applied to the reduction of premiums ($41,246.47), with a matured endowment of $2,000, the total payments to policyholders amounted to $164,072.47.

In pursuance of the authority granted at the last annual meeting of the shareholders, your directors have made application to the Parliament of Canada for a special Act of incorporation, with a view to facilitating the business and investments of the company. Up to the present time we have been doing business in all the provinces under a Provincial charter and Dominion license.

During the past few months there have been indications of a general improvement in business most encouraging in their character; should this improvement continue, life insurance interests will share in the benefits arising therefrom.

The office and agency staff of the company have given excellent service, and are worthy of your commendation.

The accompanying certificate from the auditors vouches for the correctness of the statements submitted herewith. All accounts, securities and vouchers having been examined by them.

JAMES H. BEATTY,
President.
DAVID DEXTER,
Managing Director.

AUDITORS' REPORT.

To the President and Directors of the Federal Life Assurance Company:

Gentlemen,—We have made a careful audit of the books of your company for the year ending 31st December, 1897, and have certified to their correctness.

The securities have been inspected and compared with the ledger accounts, and found to agree therewith.

The financial position of your company as on 31st December is indicated by the accompanying statement.

Respectfully submitted,
H. S. STEPHENS,
SHERMAN E. TOWNSEND,
Auditors.

Hamilton, 1st March, 1898.

FINANCIAL STATEMENT.

Income.

Insurance and annuity premiums	$360,713 94
Interest and rent	32,209 79
Capital stock	9,703 00
	$402,626 73

Disbursements.

Death claims and annuities	$112,485 80
Endowments and surrendered policies	5,934 47
Dividends to policyholders	39,246 47
Re-insurance premiums	11,125 32
Commissions, salaries and other expenses	114,678 77
Dividends to shareholders	4,773 60
	$288,244 77
Balance	$114,381 96
	$402,626 73

Assets.

Mortgages and debentures	$ 290,545 14
Loans on policies	159,487 35
Cash in banks and on hand	133,159 65
Real estate	30,000 00
Premiums deferred, interest accrued and other assets	109,256 13
	$722,448 27
Guarantee capital	609,000 00
	$1,331,448 27

Liabilities.

Reserve funds	$ 609,981 33
Claims unadjusted	8,500 00
	$ 618,481 33
Balance	712,966 94
	$1,331,448 27

On motion of the president, Mr. Beatty, seconded by Dr. Burns, followed by felicitous remarks from the mover and seconder and other shareholders, the directors' report was adopted.

The thanks of the shareholders were tendered to the officers and agents of the company and suitably responded to. The retiring directors were re-elected and the auditors re-appointed.

At a subsequent meeting of the directors the officers of the previous year were re-elected.

TRANSACTIONS ON TORONTO STOCK EXCHANGE.

The Toronto stock market has been generally dull and weaker. The principal stocks dealt in have been C.P.R., Commercial Cable, and Toronto Railway. The first-named has declined from 85½ to 81. Commercial Cable is also lower, selling at 177⅜, a loss of $4⅛ during the week. Toronto Railway is firm at 101¼; Bank shares have been firm, with no change in prices; Loan companies' shares inactive.

Following are the transactions for the week: Ontario Bank, 8 at 104¾; Bank of Commerce, 146 at 141¼-140¾; Dominion Bank, 10 at 255½; Standard Bank, 26 at 175-174; Bank of Hamilton, 26 at 174; British America Assurance Co., 147 at 128½-128; Western Assurance Co., 400 at 168⅝-167½; Montreal Gas Co., 525 at 196; Canada N. W. Land, pref., 50 at 51½-51¾; C.P.R. Stock, 2,321 at 85½-81, Toronto Electric Light Co., 70 at 135½; new, 7 at 117½; Commercial Cable, 1,286 at 181½-177⅜; Reg. bonds, $47,200 at 106⅜-106; Coup. bonds, $1,000 at 106; Bell Telephone, 24 at 176½; Richelieu and Ontario Navigation Co., 25 at 105; Toronto Railway, 462 at 103-101¼; London Street Railway, 309 at 181-182; Canada Landed and National Investment Co., 10 at 100; Central Canada Loan Co., 20 at 124½; Freehold Loan and Savings Co., 20 per cent., 6 at 73; Real Estate Loan Co., 20 at 55.

—Mr. Chauncey M. Depew attributes the decrease in drunkenness among railway employees partly to the work and influence of the railway Y.M.C.A., which has been as a rule generously aided by the corporations. The companies themselves have at the same time adopted and enforced more stringent rules on this subject than formerly. Twenty years ago, when the New York Central had 15,000 employees, the average proportion of men discharged for drunkenness within a certain period was 20 per cent. Now, with 30,000 employees, the discharges are less than one per cent. in the same length of time. Perhaps the change has not been so great as this everywhere: but that there has been an enormous improvement in the morale of railway employees generally cannot be denied. Possibly some of this has been due to better example on the part of superior officers.

WOMEN AS BANK DEPOSITORS.

As the Christmas season approaches certain banks in this city and in Brooklyn begin to look for an increase in their accounts. In recent years there has grown up a custom of starting small bank accounts as holiday gifts. The well-to-do head of a family, for instance, instead of giving his "rose-bud" daughters jewelry or costly knick-knacks at Christmas time, presents each one with a clean bank book with $50 or $75 or $100 placed to her credit. A large number of these "Christmas present accounts" were started last year, and in expectation of a continuance of the custom several bank cashiers have laid aside packages of dainty bank books expressly designed for feminine use.

There are perhaps half a dozen banks within the boundaries of Greater New York which make a specialty of catering to women. All of these banks are rich institutions, and in each instance the women's department has been eminently successful. At the outset this particular feature took on the character of a primary school in banking, the tellers at the women's windows finding it necessary to give minute and rudimentary instructions to their patrons. That was some years ago, however. The average woman depositor is a very independent and self-contained bank patron now. President Thomas L. James, of the Lincoln Bank, says that most women are clever at keeping accounts, and when once they have learned banking methods they are less likely to transgress the rules than are the male depositors.

"The chief trouble with women depositors is that they forget to sign their cheques," said a paying teller in one of the "woman's banks." "They soon master the details of drawing a cheque, but after finishing with the figures their minds seem to leave the cheque and pass on to some other subject. Almost every day I have to hand women's cheques back to be signed. One time I received an unsigned cheque from one of our largest female depositors, and as it was presented by a third party—also a woman—who was in urgent need of the money, I paid it. Inclosing the cheque in an envelope, I wrote a personal note to the depositor, calling her attention to its lack of signature, and informing her that I had paid the cheque on my own responsibility, because I knew her handwriting. Promptly, almost by return mail, I received a polite note from the lady, thanking me for my consideration and trouble, and promising to be more careful in the future. She 'begged to reinclose the cheque,' etc. I looked at the cheque and it was still unsigned.—N.Y. *Times*.

THE LETTERS OF THE WORLD.

An interesting return, just published, shows that there are in all countries of the world a total of 200,000 proper post-offices. With regard to the letters delivered, and the revenue received in these places, in points of number and amount, the United States comes first, Germany second, Great Britain third, and Austria fourth. Over 2,600,000,000 letters are distributed in America. The post-card system in Germany is in much more general use than in England. This reason explains how it is that Germany keeps ahead of our country in respect to correspondence. The number of post-offices in Great Britain is 20,000, at which 150,000 persons are employed. The number of letters distributed in a year is $2,000,000,000. The number of post-office employees in Germany, where telegraphic communication is a part of the post-office system, is 12,500, and the number of letters is 2,010,000,000. In Italy 350,000,000 passed through the post in a year; 120,000,000 in Spain; Holland, 100,000,000; Belgium, 125,000,000; Russia, 200,000,000. A considerable proportion of letters in Russia is carried in what are called "the mail-coach rails," a service upon which the Imperial Government maintains 53,000 horses. In France the number of letters handled in the post-office is about 700,000,000 a year, the receipts of the department being about $35,000,000.

BUSINESS IN THE STATES.

Failures in February have been smaller than in any other month, except three of the previous fifty-two months, with remarkable decrease in the failures for $100,000 and over, though in number and amount the smaller failures show less change than might have been expected, indicating that in good times or bad a large proportion is due to causes apart from the general condition of business. The ratio of defaulted liabilities to payments through clearing-houses is but $1.71 per $1,000, a lower rate than has appeared in the first quarter of any year, except 1880 and 1881, of the past twenty-three years. The evidence of general safety and solvency is gratifying, while in most branches of manufacture and trade defaults are smaller than in February for four years past.

The best evidence of general improvement is the fact that payments through clearing-houses for the past week have been 28.0 per cent. larger than in 1892, and outside New York, with its speculative interests, 17.6 per cent. Compared with last year, the gain has been 56.2 per cent. for the week, and 49.8 per cent. for February. This startling expansion in the volume of actual business is not due to advance in prices. Wheat is not now higher than in 1892, while cotton has been lower and iron and all manufactured products. In spite of much reduction in rates, railroad earnings in February are 3.8 per cent. larger than in 1892, nearly all important sections showing a gain, while eastbound tonnage from Chicago for four weeks has been 400,955 tons, 15½ per cent. larger than last year, and 3.4 per cent. larger than 1892.—*Dun's Review.*

PAINT MADE OF SEAWEED.

A ship bottom paint consisting of seaweed, which, while green and moist, is ground in oil and mixed with litharge, lead acetate, turpentine and linseed oil, has been patented in England, says the *Farben Zeitung*. The coating is said to be not only a good protection against the adhering of shells, but also prevents worms from entering wooden ship bottoms or any wooden sub-marine constructions. The mode of manufacture is as follows:

Into a certain quantity of linseed oil, say 48 liters, put one-half pound of litharge and one-half pound of sugar of lead and boil five hours at 600 deg. F. Now bring this mixture to the right painting consistency with turpentine and add one-half liter of seaweed, which has been ground in oil, in the green and wet condition, as gathered on the shore. For coloring, various substances, such as ochre, etc., may be added, whereupon the paint is ready for use.

AN ELECTRIC ICE BOAT.

A rather interesting and novel test was recently made on Chevy Chase Lake, near Washington, of an electric ice boat. This vehicle-sledge, as it might be termed, is the invention of Charles Steffgen, who entertains hopes of its proving of great commercial value in northern regions as a means of transportation. The model which was tried at Washington was but thirty-six inches in length and fitted with a one-tenth horse power fan motor. Notwithstanding this fact, it is said to have successfully drawn a load of 940 pounds against a strong breeze. The floor of the car is mounted on two pairs of movable runners, which allows of the machine being guided in any desired direction. On the rear of this platform the motor is located. The propelling apparatus consists of a metal wheel, much resembling a circular saw in appearance, which passes down through the floor as does the centreboard in a sailboat. By means of a set of bevel gears the speed of the motor is reduced and transmitted to a small sprocket wheel. The motion is again transferred by a link chain to a larger sprocket attached to the propelling wheel. In this way the machine may be geared to any desired speed. The teeth on the propelling wheel are pressed into the ice by the weight which they support, and it is thought that owing to this circumstance three or four feet of snow may easily be run over with a full-size machine.

With 1½ amperes of current at 110 volts a weight of 940 pounds was easily hauled by this little sledge at a moderate speed. It is proposed to equip the full-size machine with a 15-horse power motor to be operated by means of storage batteries. The propelling wheel will be ten feet in diameter and three-quarters of an inch thick, made of some non-corrosive metal. From the results obtained with the working model the inventor confidently expects that with a full-size machine he will be able to attain a high speed, probably 60 or 70 miles an hour. Over an evenly frozen surface such as a lake, with just sufficient weight to give the teeth a good hold on the ice, it is by no means improbable that a high rate of speed could be attained at times, but it is scarcely to be expected that such speed could be constantly maintained under working conditions. It is thought that some such device as this could be used to advantage on the Yukon River in Alaska during the winter season, but it is Mr. Steffgen's intention to apply his invention more particularly to lumbering and similar commercial pursuits in northern countries where no facilities for transportation exist.—Boston Journal of Commerce.

SCOTCH INDUSTRIAL NOTES.

The Glasgow correspondent of a London journal writes as follows on February 25th. Although not productive of many new features, the past week has shown no indications of any slackening in production or demand in Scotch industrial quarters.

Full work has continued at the various iron and steel works, although prices have not been raised. Specifications are plentiful, and production is at the highest in the history of the trade. This fact has caused the men's representatives to call together the Conciliation Board to discuss the wages position. Engineers are once more working smoothly, and more than one firm have had plans prepared for duplicating works.

There is a boom in locomotive building, and builders are not merely booking orders for engines by the half-dozen, but by the score. Messrs. Neilson, Reid & Co., Hyde Park Works, Glasgow. have booked 25 engines, with tenders, for the Bengal-Nagpur railway, and 10 for the Egyptian State railways. The Midland Railway Company is asking tenders for 20 passenger and 20 goods engines, and these also are almost sure to come to Glasgow. The Swedish railways ask for 20 locomotives.

Shipbuilding yards are busy, all available berths are occupied, and enquiries for new work do not fall off. Good rates are being sought, and should nothing untoward occur a couple of years' full employment is assured. The Admiralty have extended their favors to another Clyde yard, that of Messrs. Scott & Co., Greenock, and that firm, together with those of the Fairfield, Clydebank, London and Glasgow, and Napier and Sons, are all tendering for four first-class cruisers. Other orders in the market are two liners for the Allan Company's New York service, a boat for the Castle Line, and a cargo steamer for the Cunard Company. But these are only a few. The tramp class of steamer is also well represented in the new tonnage.

—The *Daily Mail*, London, Eng., March 7th, announces that the Elder, Dempster Company, the Liverpool ship-owners, will build twenty-five new steamers to develop the service to Montreal and the United States.

—The big tank which has been in course of erection all winter by the Manitoba Gas Co. at their works, Point Douglas, has been completed so far that it is now ready for testing. It will be tested with water as soon as the weather permits, and if the test is satisfactory it will be taken off the hands of the contractors. The tank will hold 400,000 cubic feet of gas, and is one of the few big ones in Canada. Its capacity is sufficient for the gas wants of the city for many years to come.—*Winnipeg Free Press.*

TORONTO MARKETS.

Toronto, March 10th, 1898.

DAIRY PRODUCE.—There has been little or no increase in the receipts of dairy butter. Scarcely enough is in the market to supply the demand. From the number of enquiries that are coming to hand this week asking for offers on stocks held in country points, it is more than probable that demand and supply will be better regulated soon. We quote: Dairy rolls, 17 to 18c., prints, 18 to 19c., and bakers', 15 to 16c. per lb. The creameries are now devoting themselves more to the home trade, and the withdrawing of supplies from the foreign market has had the effect of easing off the local situation. Last export shipments did not net more than 19c. per lb., and dealers are of the opinion shippers who are now forwarding supplies can scarcely expect so much as this. At the lower prices quoted for cheese there is fairly active movement. Deliveries of eggs for the season of the year have been very heavy. Some of the receivers have been very timid about holding stocks, and sales are reported as low as 13c. It must be remembered, however, that the supply of held stocks is entirely exhausted, and all the consumption is centred on the fresh eggs coming forward. Prophecy as to the future of the market would be idle, but some of the trade authorities expect eggs to linger around a 15c. quotation until after Easter.

GRAIN.—A dull market, in which wheat has declined 1 to 2c. per bushel, and at the lower price remains slow of movement, is, we believe, an accurate description of the condition of affairs. In the foreign centres everyone is waiting developments. The interesting question is, of course, that of supply and demand, which had been regarded as settled in favor of the holders of products, until the increased arrivals on the other side of the last two weeks and the larger world's shipments of the same period. These have excited doubts that the world's supplies are really as short as had been declared by all statistical authorities, based upon crop reports and accepted by the trade on both sides of the water. Added to these have been the heavy shipments of Leiter wheat out of Chicago, for which Europe is also waiting, as she had done in December, to find that his holdings were not coming forward as expected. Now that they are, and other exporting countries also contributing more liberally to her future wants, namely, Argentina and the Black Sea, owing to an open winter and open navigation, together with better crop prospects in India than for years, both the United Kingdom and Continent have become easy in their minds about the remoter as well as the nearer future, and have been holding off to see if a reaction in prices would not follow the longest period of export inactivity on this crop. From a local point of view trading has been inactive. The snow has gone in many districts, and the roads breaking up, offerings are curtailed within narrow limits. Barley is dull and without change. Oats are steady and in fair demand, both for local and export requirements. Peas at 55 to 56c., are in good demand. For rye there is active enquiry at 50 to 51c. per bushel. Corn is in good demand for feeding purposes. Buckwheat is wanted for export, and is quoted at 35 to 36c. per bushel outside.

GREEN FRUITS.—A shipment of Valencia oranges came to hand this week, and went off very quickly. The flavor on the whole was excellent, but some of the fruit was "wasty." Trade in Californias continues active. Prices are about unchanged, and may be quoted as follows: Washington Navels, 96s, 112s, $3.25; 150s, $3.50; 176s, $3.50 per box; Washington Navels, 126s, $3.40; 200s, 216s, $3.25 per box; California Seedlings, 126s, 150s, 176s, 200s, 216s, 226s, 250s, $2.50 to $2.75 per box; Valencia oranges, 420s, $5.75 to $6 per box; do., large, 420s, $6.25 to $6.50 per box; do., extra large, 420s, $6.75 to $7 per box. The weather has been favorable to the consumption of lemons, and values are higher and the feeling is firm. We quote: New Messina, fancy, 300s, 360s, $3 to $3.25 per box; do., choice, 300s, 360s, $2.75 to $3 per box. This fruit is guaranteed free from frost. Supplies of bananas are rather scarce, and as there is improved demand, the feeling may be described as distinctly better. Apples are in small compass, and only now and then small lots are coming forward. At the sales of the Toronto Fruit Auction Company on Wednesday, six cars of oranges and two of lemons were sold at prices satisfactory to the trade.

GROCERIES.—Trade is in seasonable proportion. Values remain very steady. Sugars are unchanged from last week's quotations. Japan rice is firmer at 5½c. The London market in currants is reported as dull but firmly held, and last cables from Greece note that market also as being firm. Mail advices from London dated Feb. 25th, state that sales of dates at the low prices prevailing there of late have been enormous, and the writer looks for an immediate advance. Canned goods remain in good request, values holding unchanged. Lenten supplies continue to move, although in a wholesale way the trade is falling off, as was to be expected.

HARDWARE AND METALS.—The market from the standpoint of values remains very steady, although there is a firm undertone which might reasonably result in some advances. The spring movement is now in full swing, and forward orders are now in hand for execution. Of garden tools, can trimmings, fence wire and similar commodities, there is a brisk, active movement.

HIDES AND SKINS.—The cured hide market remains without change, merchants quoting supplies at 9c. per lb. For green hides the merchants have lowered prices ½c. per lb., now quoting them at 8½c. per lb., or $1 per cwt. less than the quotation two weeks ago. The offerings show the usual March deterioration, and it is the opinion of some in the trade that another decline in the price of green may be expected soon. Advices from Chicago dated March 8th, give a rumor that a moderate line of native steers had been sold at 11c. The general demand for hides was limited and prices were only barely maintained, closing at 11c. for native steers; 9¾c. for light Texas; 9¾ to 10c. for heavy do.; 9¾ to 10c. for butt brands; 9¼ to 9½c. for branded cows; 9c. for Colorados, and 10½c. for heavy native cows and 11c. for light do.

PROVISIONS.—Few Western hogs have been received this week, but local offerings as well as those from northern points have been large. Packers are paying $6.15 for weights ranging from 90 to 150 lbs., and all under and over these weights are quoted at $6 per cwt. For provisions there is active request and a brisk movement at last week's quotations.

WOOL.—The demand from the mills is active, and supplies, especially for heavy knit goods, are going forward freely. We are advised from London, Eng., March 7, to the following effect: "The list for the next series of wool sales closed on March 5, with the following receipts: From New South Wales, 84,936 bales; from Queensland, 29,943; from Victoria, 71,617; from South Australia, 8,159; from West Australia, 2,906; from Tasmania, 274; from New Zealand, 54,773, and from the Cape of Good Hope and Natal, 49,536. Adding to this quantity 19,000 bales which were held over from the last series of sales, and deducting from the aggregate 99,000 bales, which were forwarded direct, there are available 222,144 bales. According to the present arrangement the sales will close on April 4th.

MONTREAL MARKETS.

MONTREAL, 9th March, 1898.

ASHES.—Business continues quiet and receipts light, at the rate of about 25 brls. a week. Some few lots of No. 1 pots are said to have realized $3.55 for good tares, seconds $3.20. Pearls continue nominal at about $4.75 per cental.

CEMENTS, FIREBRICKS, ETC.—The fine spring-like weather has led to some moderate trading in cements in small lots, but the booking of import orders is yet limited. For delivery from store values are firm at $2.10 to 2.20 for British, Belgian $1.95 to 2.05. Bricks $17 to $22 per thousand.

DAIRY PRODUCTS.—There was an advance in the cable quotation of cheese on Monday to 40s., which has given the local market a little firmer tinge, but trading is yet very limited in extent, and the ideas of dealers vary a good deal. From 7½ to 8c. is quoted for finest makes. There is good demand for first-class grades of butter, and new made creamery quotes at 20 to 21c., held stock at 18 to 19c., rolls 17 to 17½c. Receipts of eggs are increasing, and prices are consequently much easier. New laid eggs are now quoted at 15 to 16c. per doz., and limed and pickled are hard to move.

WALLS

MADE OVER

Hayes Metallic Lathing

ARE FIRE, WATER AND VERMIN PROOF

It is made of sheets of steel with apertures at frequent intervals, the flanges of which are curled back forming lips or hooks which clinch and hold the mortar firmly.

Plaster applied over this lathing cannot crack or drop off. It is perfect and up-to-date, and should be used in every building.

Far the most economical in the end, being more readily applied and requiring less mortar.

Think of its advantages and write us for full particulars.

ALBANY, January 6th, 1898.

Certificate of Superintendent, State of New York Insurance Department.

I, LOUIS F. PAYN, Superintendent of Insurance of the State of New York, do hereby certify that the **New York Life Insurance Company,** of the City of New York, in the State of New York, is duly authorized to transact the business of Life Insurance in this State.

I FURTHER CERTIFY that in accordance with the provisions of Section Eighty-four of the Insurance Law of the State of New York, I have caused the policy obligations of the said company, outstanding on the 31st day of December, 1897, to be valued as per the Combined Experience Table of Mortality, at **four per cent. interest,** and I certify the result to be as follows:

Total Net Reserve Value—**$164,956,079.**

I FURTHER CERTIFY that the admitted Assets are—**$200,694,440.**

The general Liabilities **$2,366,330.** The Net Policy Reserve as calculated by this Department—**$164,956,079.** The Surplus Reserve Fund voluntarily set aside by this Company, which, added to the Department Policy Valuation, provides a liability equivalent to a **three per cent. reserve on all policies, $16,195,926.** The net Surplus, excluding Surplus Reserved Fund, is shown to be **$17,176,105.**

IN WITNESS WHEREOF, I have hereunto subscribed my name, and caused my official seal to be affixed at the City of Albany, the day and year first above written.

LOUIS F. PAYN, Superintendent of Insurance.

Valuation on the same basis as last year would show surplus of $33,372,031.40, an increase for year 1897 of $6,690,034.42.

The Company is prepared to treat with gentlemen of influence for appointments as District Representatives. Some valuable positions now vacant will be conferred on suitable applicants. For particulars apply to any of the following Branch Offices: **Western Canada Branch, 496 Main St., Winnipeg, Man. Toronto Branch, 20 King St. East, Toronto, Ont. New Brunswick Branch, 120 Prince William St, St. John, New Brunswick. Halifax Branch, cor. Prince & Barrington Sts., Halifax, N.S.**

R. HOPE ATKINSON, F S.S.,

Agency Director, Company's Building, MONTREAL

Dry Goods.—The fourth of March passed off this year without any failures as the result of default in payments on that day, and customers' paper was, on the whole, pretty well met, some houses reporting as much as 63 per cent. of paper provided for. The fine spring-like weather has induced much activity in the shipment of spring goods, which are being called for from all quarters, and good business continues to be reported. The so-called cut in cottons has been given undue prominence in the daily prints. As a matter of fact, as regards sheetings and pillow cottons, the Dominion Cotton Company has merely brought down its prices to the level established by the Merchants Cotton Co., in September last. In Canton flannels there has been some revision of quotations, but in the lower prices it is just a question if the quality has not been taken off in proportion to the reduction in quotation. European advices contain nothing specially interesting as regards values. For silk manufactures, all houses report an active demand, these goods apparently being in much favor, but no change is reported in quotations.

Fish.—The market rules quiet considering the season, and the bulk of the Lenten demand may be said to be now over. We quote:—Green cod, No. 1, $3.25 to 3 50; No. 1, large, $3.75 to 4.00; dry cod, $3.25 to 3.75; No. 1 herrings, $4 to 4.50; N. S. salmon, $12 to 13.00; B. C. ditto, $11.00 to 11.50; sea trout, $6.50 to 7.50; haddies, 6 to 6½c.; bloaters, $1 to 1.25 per box; boneless cod, 4½ to 5c. per lb.; whitefish, $4.75 to 5.00 per barrel.

Furs.—There is nothing fresh to be noted in this line. Receipts are showing some little increase, but the total for the season will be considerably below an average, it is anticipated. We quote:—Mink, large dark, $1.50; small, do., $1.00 to 1.25; marten, $1.75 to 2.25; fisher, $4.50 to 7.00; lynx, $1.00 to 2.00; otter, $1.00 to 12.00 for dark; pale, $5.00 to 7.00; red fox, large, $1.30 to 1.50; small, $1.00; cross fox, $3.00 to 6.00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large, $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7c. to 10c. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

Groceries.—A fairly good jobbing distribution may be reported in this line, though the country roads are beginning to suffer from the continued bright warm weather, causing some interference with heavy teaming in the interior. Values show little alteration since this day week. In sugars prices remain steady at last week's shading on the late advance, with fairly liberal deliveries from the refineries. We quote factory prices at 3½c. to 3⅞c. per lb. for yellows; Austrian refined, 4 to 4⅛c., and standard granulated, 4⅜c. The Lenten demand for molasses is well sustained, and supplies on spot are not calculated as more than sufficient to last until new arrivals. It is said there are no new goods yet available on the island, and though quotations have been given out at 7c., first cost, it is said it has not been possible to put through offers, made from here, on that basis. Tea importers still report a quiet demand from local jobbers, but some enquiry has been experienced from American sources for panfired teas of medium grade.

Hides.—The week has developed nothing new. The Chicago market is reported a little easier, but receipts here of beef hides and calfskins are light, and quotations are unaltered. We quote dealers paying 9½c. for No. 1 hides; 10 and 8c. for calfskins, and $1 for lambskins.

Hops.—Values are very steadily held at 16 to 18c. per lb. for good to choice Canadian sorts, and yearlings show rather better value, 10 to 11c. being asked in some cases for good lots.

Leather.—The noted firmness in sole has developed into an advance, dealers now asking 22½ to 23c. per lb. for manufacturers' sole in quantity, and 27 to 28c. for No. 1 slaughter. One large house reports orders last week for 40,000 sides, and have orders ahead for 140,000 sides. Black leathers of all kinds are firm. We quote:—Spanish sole B.A. No. 1, 25 to 26c.; do. No. 2, 22½ to 23½c.; No. 1 ordinary Spanish, 23 to 24c.; No. 2, 20 to 21c.; No. 1 slaughter, 27 to 28c.; No. 2 do., 22 to 24c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 20 to 21c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; bufted cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 13 to 13½c.: polished buff, 11 to 13c.; glove grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

Metals and Hardware.—The situation is practically unchanged, both as regards business doing and values. Some few car lots of Hamilton pig iron have been sold at $16, which may now be quoted as the regular figure for such small lots, the price being eased off with the approaching spring. We hear also of a small sale of Summerlee at $19.50, but the buyer cannot have studied the market very closely, as he could have bought a dollar cheaper. Tin and copper are cabled a shade easier on the late advance, but not sufficient to warrant a change in local quotations. We quote:—Summerlee pig iron $18.00 to 18.50; Carron, No. 1, $18; No. 3, $17.25; Ayrsome, No. 1, $17.00; No. 3, $16.50; Shotts, $17.25 to 17.50; Carnbroe, $17.00, ex-store; Siemens pig No. 1, none; No. 2 Siemens, none; Ferrona, No. 1, $15 to $16; Hamilton No. 1, $16; No. 2, ditto, $15.50; machinery scrap, $14.00 to 15.00; common ditto, $12.00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do, I.X., $3.90 to 4.00; P. D. Crown, I. C., $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2.90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2.70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, etc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1.50; three-sixteenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.50 to 3.55; sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 16 to 16½c. for L. & F.; Straits, 15½ to 16c.; bar tin, 16½ to 17c.; ingot copper, 12¼ to 12½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.50 to 4.75; American spelter, $4.50; antimony, 8 to 9c.

Oils, Paints and Glass.—Our recent forecast of a strong advance in turpentine has been more than sustained by an upward jump of 4c. a gallon in that commodity since last writing. In linseed oil there has also been a further advance of one cent. Other lines as they were. We quote:—Turpentine one to four barrels, 56c.; five to nine barrels., 55c., net thirty days. Linseed oil, raw, one to four barrels., 47c.; five to nine barrels, 46c.; boiled, one to four barrels, 50c.; five to nine brls., 49c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c. genuine red do., 4¼c.; No. 1 red lead, 4c.; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00. Paris green, 50 and 100 lb. drums, 15c.; 25 lb. drums, 15½c.; 1 lb. cartons, 16c.; pound tins, 16½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

Wool.—About half the cargo of Cape wool, arrived last week at New York, has been distributed, the balance has gone into warehouse here. The English market is reported to show an advance of about 5 per cent. since the close of the last London sales, and prices here are firmly held. We quote: Cape, 14½ to 16½c., with some extra fine blue wools held at 17½c.; B.A. scoured, 26 to 34c.; domestic, 20 to 23c.

This Company was organized in 1865, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $182,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,

CANADIAN PACIFIC COMPETITION.

No recent event in traffic circles has attracted so much attention as the contention between the Canadian Pacific railroad and the American, or rather United States, lines over Alaska passenger rates, the volume of business incident to the Klondyke excitement being of such importance as to make the strife exceedingly bitter. Lack of good faith and other similar charges are bandied back and forth between the parties in interest, each claiming that the other is wholly at fault. It may therefore be interesting and possibly instructive, to briefly review the situation so far as it has been developed up to the present time.

The origin of the difficulty may be traced to the time when the Canadian Pacific demanded the right (?) of making a differential on lower Pacific coast terminals because of the alleged disabilities of a longer line and inadequate facilities. After some contention this was granted by the Transcontinental Association, to whom the application was made. Technically this privilege terminated with the dissolution of the association, which occurred early in 1897, but the basis was continued without protest. With the growth of the Alaska business incident to the gold excitement, the Canadian Pacific claimed the right to, and without conference did, apply the rule on that traffic, notwithsranding that, considered from any point of view, it possessed a line having equal, if not superior, advantages as compared with any of its competitors. This action was met by the American lines by a corresponding reduction, whereupon the Canadian Pacific not only vigorously protested, but declined even to confer with the American lines with a view of adjusting the difference until they had withdrawn what the Canadian Pacific was pleased to denominate their violation of agreement. Just why the American lines should be charged with such violation is not clear, as the only differential that was ever sanctioned by them was on territory south of Puget Sound.

The Canadian Pacific having no local business to speak of, besides being not subject to the act to regulate commerce, was in a position to make such rates on Alaska business as would, if met by the American lines, utterly demoralize their business; hence these latter appealed to the Interstate Commerce Commission for relief from the operation of section 4, known as the long and short haul clause, with the result that the subjoined order has been issued, and under which the roads propose to meet any rate made by the Canadian Pacific:

It is ordered, pending further investigation, that upon publishing and filing tariffs as required by the Act, and until July 1, 1898, unless this order be in the meantime revoked or modified by the commission, the above-named petitioners, and their connections in the United States forming through lines with the petitioners, be and they are hereby authorized to charge for the transportation of passengers both east-bound and west-bound less for longer distances than for shorter distances by such lines, between all points on the petitioners' lines or lines of their said connections, at which the petitioners or their said connections are in competition for passenger traffic with the Canadian Pacific railway and its connections; provided, however, that such lower rates for longer distances shall not at any time be less than those previously established or charged by the Canadian Pacific railway, separately or with its connections, for the transportation of such passenger traffic; and provided further, that this order may be revoked or modified at any time in the discretion of the commission, and with or without notice to said petitioners.

The whole trouble arises from what is believed to be a misapprehension of the legitimate scope of competition among railways. For years it has been the ruling principle among the majority of traffic men to "reach out for all that was in sight." That is to say, it has by them been considered good railroading to take any business that could by any possibility be reached over any combination of lines regardless of distance. Thus the Canadian Pacific at one time claimed the right to take business from Nashville and Chattanooga, Tenn., via St. Paul and Winnipeg, to Southern California points at the short line rates: and other equally roundabout routes have been established, and in many cases worked, with more or less success.

It is admitted that it would be difficult to draw the line and say just how far this practice can be legitimately extended. Probably no general rule could be applied that would be adequate to do exact justice, but an approximate result could be reached that would be fairly just, and if subject to exceptions upon application could be made operative. If the disability of 25 per cent. over short line mileage should be taken as a basis of disqualification at equal rates and extra rates required over that mileage, it is probable that some of the evils now attaching to the situation would disappear. It is doubtful, to say the least, if the roads will of their own motion inaugurate such a practice, but it is possible that the time will come when, as is now the case with a uniform classification, they will be glad to have a national authority relieve them of the necessity and difficulty at one and the same time.—*Railway and Engineering Review.*

WEST COAST RAILROADS.

Qouth the Toronto Monetary Times: "The Klondyke road may bring something in the form of royalty, but if we keep the figure at 10 per cent. for Government lands, while it is only 1 per cent. on the railway company's lands, we shall get much less than would have come under a uniform figure of reasonable amount." The 10 per cent. royalty is, as the Monetary Times infers, unreasonable. It is as unreasonable indeed by way of excess, as on the other hand, the 1 per cent. royalty to be levied on the lucky railroad people is unjustifiably small, having regard to the enormous rights and privileges granted in return for an expenditure, not large in itself, were even the line to be made of the best new material and certain to be considerably reduced by the use of light and second-hand rails, and the adoption of many other thrifty, not to say "penny pinching" methods.

The Stikine railway men may not after all enjoy—even if their provisional contract passes both Houses as it stands—the expected monopoly of Yukon railroading. It is stated that the British Yukon Company, which possesses a prior Yukon charter, recently for the time almost forgotten by most, may under it build a 45-mile railroad over the White Pass on a narrow-gauge of three feet six inches. The grades will, however, be steep, but their difficulty may be in part obviated by the use of cog-wheeled locomotives. It is on the other hand of course possible that the Mann-Mackenzie people may, if their project secures parliamentary endorsement, buy out the British Yukon charter in order to prevent competition. There would certainly be enough money realizable by Canada's improvident deal to make a tempting offer to the British Yukon Company, of which the Duke of Teck is president.—*B.C. Mining Critic.*

ENDOWING A DAUGHTER.

If Sir Walter Besant has his way, one of the most painful features of a complex civilization would be swept out of existence, i.e., the poverty-stricken widow and the gently-bred girl pushed out into the world to be a bread-winner. He says: "At last the voice of one crying in a wilderness seems to have been heard. It is twelve years since I advocated the endowment of the daughter by means of the deferred annuity. From time to time I heard of one or two cases where my advice had been followed. At last the idea seems to have "caught on." Ever since I mentioned that a certain insurance company—note that I have no shares in it—was organizing a method of securing deferred sums of money or deferred annuities, I have received sheaves of letters asking for the address of that office. Send me, dear reader, as many as you please; get all the papers of the scheme; take them, study them, find out what it will cost per annum or by a single payment, or half a dozen payments, to endow your daughter. Then do it—as liberally as you can afford. If you cannot make her wholly independent, go as far as you can. Nothing seems to me more important than this endowment of the daughter. I see every day instances in which the bread-winner dies early, and the girls, probably not trained to anything, have to go out into the world and do the best they can. Poor girls! It is a cruelly hard world for those who have neither knowledge nor money. Endow them! Save them!

PROFITS OF NICKEL MINING.

The production of nickel from the mines of this district last year was about 3,900,000 pounds, an increase over that of 1896 of nearly 250,000 pounds, and the copper in the ore was about 3,750,000. The price of nickel in the United States during the year kept steadily at 33 to 38 cents, and in England at 26 to 32 cents a pound. A little more than half of the nickel was consumed in the United States, and the rest was sent to Europe, where the market for nickel has expanded very considerably of late. But, putting the nickel all round at 30 cents, and the copper at 10 cents a pound, the total output of the mines was worth after being refined, $1,545,000. From these estimates a mining man in town figures out the profits of the business of the year approximately as follows: Labor, including management, office expenses and roasting the ore, $220,000; fuel (coke, wood and blacksmith's coal), $130,000; powder, steel and supplies of all kinds, $35,000; transportation of matte to refinery and running ore train, $30,000; repairs of plant and railway tracks, $15,000; incidentals, $10,000—all of which comes to $440,000. Then for refining the nickel at ten cents a pound, $390,000, and for refining the copper at one and a half cents a pound, $56,250, making the whole cost of the finished products ready for market, $886,250, and which leaves, after allowing $50,000 for agents' commissions, storage and ocean freights, the handsome profit of $608,750. The rentals from village lots, tenement houses, stores and other buildings should more than offset the insurance and taxes. It is said that nickel is now being refined for seven to eight cents a pound, but in the above calculation the old charge of ten cents a pound is taken for this large item in order to be on the safe side. The cobalt, gold and platinum in the ore are also of considerable value.—Sudbury *Journal.*

—A Boston man wrote to another and asked why Jones did not get a certain situation with a large company, adding that "Jones knew everybody." To this the "Monitor" appends a moral, as follows: "Yes; he knew everybody in town. He knew how to play billiards a little too well. He knew rather more about horses, football, and theatres than was really needed for a wide-awake agent. What he didn't know was that everybody rated him on these lines. And he didn't seem to know that business men would give the go-by to the man with a cigarette, old-pipe, whiskey breath.

—The Hudson's Bay Company have opened a hardware store in the old post-office building at Macleod, Assa.

SOME business men want to sell out; others want to buy; some desire a business partner and others seek additional capital for the extension of their trade. One way to attain the desired end is to advertise in some paper that reaches the persons sought after. Such a paper is

The Monetary Times

This Journal has a larger constituency than any other Canadian publication. The rate, for this class of advertising, is ten cents per line each insertion. A space like this is worth $5.60 for one insertion, but ordinarily this is too large for a "Want" Notice. Fifteen lines is the regular size, which costs $1.50. Address,

THE MONETARY TIMES,
Toronto.

The Metropolitan Life

Insurance Co. of New York

"THE LEADING INDUSTRIAL COMPANY OF AMERICA,"

IS REPRESENTED IN
ALL THE PRINCIPAL CITIES OF THE UNITED STATES AND IN CANADA.

THE METROPOLITAN is one of the oldest Life Insurance Companies in the United States. Has been doing business for over thirty years.

THE METROPOLITAN has Assets of over Thirty-Five Millions of Dollsrs, and a Surplus of over Five Millions.

THE METROPOLITAN pays Two Hundred Death Claims daily, and has Four Million Policy-holders.

THE METROPOLITAN offers remunerative employment to any honest, capable, industrious man, who is willing to begin at the bottom and acquire a knowledge of the details of the business. He can by diligent study and practical experience demonstrate his capacity and establish his claim to the highest position in the field in the gift of the Company. It is within his certain reach. The opportunities for merited advancement are unlimited. All needed explanations will be furnished upon application to the Company's Superintendents in any of the principal cities.

Not 1 Business Man in 33

leaves his family anywhere near money enough to continue the comforts he has educated them to need and expect. This suggests immediate action on their part, in the direction of Life Insurance.

The Commercial Policy
OF THE
North American Life Assurance Co.

furnishes safe and legitimate insurance at a low cost, thereby enabling business men to build up an estate for their dependents, which otherwise might be left undone.

DECISIONS IN COMMERCIAL LAW.

BEAULIEU v. COCHRANE.—A member of a trade union was fined by the union for the offence of causing an extra apprentice to be brought into the yard in which the men were employed at work. The defendants were told by their employer that he had nothing to do with the alleged offence, and they then caused a statement to be published in a trade union journal that the strike which resulted would not have occurred except through the treachery of the plaintiff, who richly deserved the fine. The punishment meted out to the plaintiff was a fine, expulsion from the union, deprivation from its benefits and in addition, it was alleged, a libel. There was no evidence to warrant a finding that the defendants had entered into a conspiracy to inflict a fine and thus cause the plaintiff's expulsion. The plaintiff had a monetary interest in the death benefit and sinking funds of the union. Held by McMahon, J., that notwithstanding this and the fact that the imposition of the fine was wholly illegal and not warranted by the rules of the union, the plaintiff had no remedy by action. This decision was based on R.S.C., c. 131, which is to the effect that the court is not to entertain any legal proceeding instituted with the object of directly enforcing or recovering damages for a breach of any agreement for the application of the funds of a trade union to provide benefits to members. In regard to the alleged libel it was held that there was malice and therefore the publication was not privileged.

HOEFNER v. CANADIAN ORDER OF CHOSEN FRIENDS.—Action on a relief fund certificate issued by the defendants. Hoefner, deceased, had been elected a member of the Order by a subordinate council of the defendants, and died before being fully initiated. An irregular initiation had, however, taken place, and the subordinate council falsely recorded in their minutes that the deceased had been duly initiated. Held that the defendants were not bound by the irregular acts of the subordinate council, which could not waive the requirements of the society in respect to the relief fund, and consequently the plaintiff could not recover.

WOODBURN v. THE QUEEN.—If a contract entered into by an officer of the Crown empowered to make a contract in a prescribed way be defective in respect to the statutory requirements, it may be ratified by the Crown.

ASSESSMENT OF POLE WIRES.

The Court of Appeal gave judgment at Toronto on Tuesday last in the appeal by the Toronto Street Railway Company against the assessment by the city of the poles, wires and rails of the company for the purposes of taxation. The court decided against the company, confirming the assessment which had been already confirmed by the county judge. The assessment is for $537,000, which, at the rate of 17 mills, will net the city about $90,000 annually.

WE have already noticed the quantity of Canadian maple blocks being sent across the Atlantic. One vessel, the "Numidian," took 3,951 maple blocks, besides a number of maple boards and 33 cases woodenware, on a recent trip. Another, the "Carthaginian," also bound for Liverpool, took 4,534 maple blocks, a number of boxes boards, some sacks of broom-handles, a lot of brooms, besides grain, flour, cheese, provisions and apples.

THE MONETARY TIMES
TORONTO

Mercantile Summary.

OLD timers in Grand Forks recall the fact that on March 17th, 1878, one of the Red River steamers left Grand Forks for Winnipeg, and made the trip without trouble, the river being quite clear at that early date.

A GENERAL storekeeper at Baldur, Manitoba, named S. Graham, who overstocked himself with supplies last fall, has failed; and Alex. McBryan, of Shuswap, B.C., who engaged in general storekeeping and ranching has also been unsuccessful. Both have made assignments.

A LETTER from Barrie this week says: "We are to have the Canadian Pacific Railway up here, it seems. The line from Kleinburg to Sudbury is surveyed to run right through Barrie; then it is to go to Waubashene and Bala, and I presume, along the west shore of Lake Joseph to Parry Sound, and thence to French River, and—James' Bay? We are in hopes that the next war of passenger fares the two big railways indulge in this projected road may be finished, so that Barrie folk may participate in cheap traveling."

ST. JOHN has steamers leaving for Britain on the undermentioned dates: Beaver line steamer "Lake Superior," March 16th; "Gallia," March 23rd; "Lake Ontario," March 30th; "Lake Winnipeg," April 6th, all for Liverpool. Allan line, "Martinea," March 25th, and "Platea," April 2nd, for London. Donaldson and Thomson lines, "Keemun," for Glasgow, March 24th; "Concordia," April 15th. The Allan steamers leave Portland for Liverpool, March 26th and 30th and April 9th; for Glasgow, March 29th. The Dominion line steamers meanwhile go to Bristol.

TWENTY years, or even ten years ago, it used to be considered a good day's business at the river St. Clair crossing of the Grand Trunk Railway when the ferries carried 500 railway cars from Michigan to Canada or vice versa in 24 hours. But since the Sarnia tunnel was opened double this number has been taken across. On one day in early March, 1,150 cars were sent through the tunnel, and on Sunday, 6th March, 1,356 cars, making 54 trains, were sent through the great subway. Tuesday, 8th March, 1,560 cars came into the yards and were sent through the tunnel, 62 trips of the big mogul engines being required to handle them.

A CONCERN which sells two million dollars worth of lumber and manufactured cotton in the course of a year, and which disburses in twelve months $700,000 in loading sixty lumber vessels at St. John and paying labor bills of the Canada Eastern Railway, is an important concern. Mr. Alexander Gibson's is the business referred to above. A special despatch of Saturday last from St. John to the Montreal *Gazette* says that a bill to incorporate the Alex. Gibson Railway and Manufacturing Company came before the New Brunswick Legislature on the previous day. "Col. McLean while in England arranged a loan of two millions at five per cent. for Gibson, and the act is to give authority to issue debentures for that amount, secured on the entire property of Mr. Gibson. This property embraces the timber limits of 200,000 acres on the Nashwaak, town of Marysville, cotton and lumber mills and the Canada Eastern Railway. These properties are valued at seven millions and capital stock to that amount will be issued to Mr. Gibson. The loan will be a mortgage on the property of Mr. Gibson, and will enable him to discharge his liabilities and leave a working capital of half a million, exclusive of the railway."

Mercantile Summary.

THE city council of Winnipeg has been considering the erection of a garbage crematory.

ON Monday last, thirty men from the Polson Iron Works left Toronto for the Pacific coast to put together the boat which the Polsons have built and despatched (in sections) for the Stikine River.

SOME time before Christmas last year, J. H. Cavanagh left Victoria, B.C., and opened a general store in Slocan City in the Kootenay country. Owing to want of capital he has had to make an assignment. Some years ago he made a failure in Calgary.

LAST week we noted the failure of Belcher & Co., private bankers at Southampton. Since then they have compromised liabilities of $7,500 at 50 per cent. Their nominal assets are about $5,000. ——The difficulties of J. Braiser, hat and cap dealer, Belleville, have already been noted. Now they, too, compromise liabilities of $6,000 at 40 per cent.

THE biggest sale of cash wheat that has yet been made by Leiter, of Chicago, took place Saturday, Counselman & Day purchasing an even 2,000,000 bushels. What the price for this enormous lot was could not be learned, Mr. Leiter merely stating that it was made at "market price." This makes a total of 6,000,000 bushels of the Leiter contract grade wheat disposed of.

THE scene at the Union Station, in Toronto, on Tuesday last, was a busy one. At noon a train of fifteen colonist cars was being filled by the Canadian Pacific Railway with settlers bound principally for Manitoba, and obtained in the Georgian Bay District of Ontario. There were also passengers on the train destined for Revelstoke, Kamloops and Nelson, as well as points in the Territories.

A MEETING of the directors of the Montreal Trust and Deposit Company was held on Monday last in that city; Lord Strathcona was re-elected president, and, on motion of Mr. George Hague, Senator L. J. Forget was elected vice-president of the company. The following were elected the executive committee of the directors: Hon. L. J. Forget, Messrs. Edwin Hanson and R. Wilson-Smith.

SINCE the receipt of our Australian letter, which appears in to-day's issue, we have seen the statement of Mr. Hastings, of the Lake of the Woods Milling Company, that his company made a shipment of Manitoba flour from Vancouver to Sydney on March 10th and another is to go on April 7th. The mills are running night and day, he says, and he claims that the Keewatin mill is the largest in Canada, and equal to any American mill, in Minneapolis or elsewhere, in equipment.

TEN new locomotives, the largest the road has ever had, have just been furnished to the Grand Trunk Railway by the Baldwin works. They are capable of handling fifty loaded cars, and are to be put on the Western line service. Other ten engines of the same nature are in course of construction at the Schnectady works. In addition the Grand Trunk are just starting to build no less than three hundred coal cars at the company's Canadian shops.

THE town of Clinton has, by a vote of the ratepayers numbering 457 yeas and 10 nays, out of a total vote in the town of 500, decided to grant a municipal loan of $25,000 for twenty years to Doherty & Co., the organ builders of that place, who were burned out some weeks ago. Mr. Doherty assured the mayor and those citizens who visited his office after the result was made known that the rebuilding of the works would be gone on with at once.

A REGRETTABLE affair took place at Morrisburg, on Saturday night last. A light being discovered in the hardware store of Bradfield Brothers, Mr. Harry Bradfield, with a couple of constables, surrounded the store. When a human figure was seen in the office, one of the three watchers, stationed at the front door with a Winchester rifle, fired. The man dropped to the floor. It was found that the suspected burglar was none other than the firm's clerk and grandson of the senior partner, and that a terrible mistake had been made; the lad died next morning.

As an illustration of the carrying capacity of modern ocean vessels, the following particulars of the cargo of the "Cymric" may serve. : On her first trip out of New York, this month, that White Star line freighter took among principal cargo items 700 head of cattle, 1,002 sheep, 199 horses, 42,856 bushels of corn, 59,883 bushels of wheat, 13,413 bales of cotton, 8,093 pigs of lead, 3,231 sheets of steel, 5,164 barrels of oil, wax, syrup, glucose and grease, not to mention a large quantity of other miscellaneous freight.

A PARAGRAPH appeared in our issue of March 4th, containing a story that the municipal accounts of New Glasgow, N.S., were not all right, and that Mr. A. M. Fraser was under suspicion of irregularity thereanent. We very much regret having, by copying from an exchange, done injustice to a worthy man. The Halifax *Herald* of March 5th has the following explanation which did not reach us in time for publication in last issue: "In our issue of Feb. 22nd, under the heading 'Halifax Expert Found Discrepancies,' we published a report about Mr. A. M. Fraser, the respected town clerk of New Glasgow. The item was condensed by our reporter from an article appearing in the Moncton *Times* and St. John *Globe*. It is hardly possible to conceive a more ludicrously false statement about any man than that contained in the paragraph referred to. Mr. Fraser, it transpires, had not been suspended; there had been no examination of town books by a Halifax expert, or by any other person beyond the usual audit; there have been no discrepancies found in his accounts; and Mr. Fraser is still fulfilling the duties of his office with that exemplary faithfulness and attention that has characterized his work during the 19 odd years he has held the position, and it is safe to say, that never at any time has he stood higher in the regard and esteem of the citizens of New Glasgow than at present. We had no desire to injure Mr. Fraser, and we deeply regret that our columns became one of the mediums through which some irresponsible party, as indicated above, sought to vent his petty spite against him."

Mercantile Summary.

THE town of Greenwood, B.C., has appointed an engineer, who is instructed to submit a report on the cost of water works and street improvements. Sensible people.

IN the fall of 1895 G. E. Lawrence began a general store business at Upper Haynesville, N.B., on small capital. He has not shown good management, and during the course of last year was sued quite frequently. His assignment to the sheriff is now reported.

IN the matter of Tasse, Wood & Co., cigar manufacturers, the ordinary liabilities figure at $40,800, privileged $2,800, and indirect $30,000, or thereabout. The Merchants' Bank of Halifax is a creditor for some $15,000 of an overdraft, believed to be secured, and the balance of the direct liabilities is mainly due to New York leaf tobacco houses. The assets will, it is feared, pan out rather poorly.

WE note the following failures in Montreal city: Solomon Fox, a clothier of some years' standing, has made a voluntary assignment, and is reported to owe about $4,000. About ten years ago he was in a similar box and then compromised liabilities of $5,000 at 50 cents.——A compromise, at the rate of 50 cents on the dollar, is being sought by David Ruel, grocer, who owes $1,500.——M. Henrichon, of St. Henri suburbs, a dealer in coal and wood, has become insolvent, and is said to owe some $6,000.——A job printing firm, by the name of D. Taylor & Sons, have found it necessary to assign, owing $4,000. They appear to have been complicated in some way in the failure of W. T. Costigan & Co., commission merchants, last summer.

IT is stated by the Fort Steele *Prospector* that important changes have been made on the line of the Crow's Nest Pass railway. At a point where the line crosses the main range of the Rocky Mountains, two tunnels, one 700 and the other 200 feet in length, have been under construction for some months, and are now in for a distance of nearly 100 feet. It was thought when the tunnels were first started that hard, solid formation would be found, but after running in 100 feet there is no change, the formation being a loose, soft, fragile, argillaceous rock of an uneven, slaty structure called shale, which is constantly falling, rendering the tunnels unsafe for workmen. It has been decided to abandon work on the tunnels and run a loop around that portion of the mountain, which will lengthen the line nearly five miles.

THERE have been several recent failures reported among St. John's Newfoundland, traders. W. H. Davidson, grocer, is reported insolvent. He suffered by the financial crisis of 1895, from the effects of which he never apparently recovered. Liabilities are stated at $13,000, with apparent assets of $9,000.—G. R. Brown, dry goods dealer, who compromised liabilities of $10,900 in the fall of 1896 at 60 cents, has been unable to complete the arrangement, and insolvency proceedings are in order.——James Galway, grocer, who suspended two or three years ago, is trying to arrange liabilities of $12,120, for 30 per cent. cash.——A. G. Gibbs, who started in the dry goods line several years ago, has had unfavorable times to contend against, and has had to assign.

BOX 459, Monetary Times,
Toronto, Ont.

Mercantile Summary.

Mr. J. D. Saunby has sold his North Branch mills, London, to Mr. Begg, of St. George. Mr. Saunby will continue to operate the Blackfriars' mills.

The bankrupt millinery stock of Elizabeth A. Sweet, of Alvinston, amounting to $1,025, was sold by auction to Clark, Bernock & Co., of the same place, for 25 cents on the dollar.

Fifteen cars of hams and bacon left Toronto on Saturday by the G.T.R. for the Old Country, valued at $37,833. There was about $2,900 worth of wheat, over $3,315 worth of flour for Scotland, and a large shipment of agricultural implements for Holland.

The first block of the Farmers' Loan Company's mortgages, amounting with interest to $104,000, has been sold to the Central Canada Loan and Savings Company for $96,000. These mortgages are all on farm property, and are the best of the defunct company's assets.

The advisory committee of shareholders in the Farmers' Loan have not, as reported, arrived at a decision with regard to the acceptance or rejection of the offer of Mr. William Mulock, M.P., but have decided to take the opinion of the liquidators' solicitors as to the liability of the directors before presenting any recommendation to the liquidator.

Quite a number of years ago Chas. Hendry, sr., carried on a general store and flax mill at Stirton, on the Conestogo River, Ontario, and prospered. A little more than a year ago he died, and left the property and business with the son, who to some extent had managed it previous to his father's death. This son's failure now is something of a surprise to people, as he was supposed to have a large surplus.——C. S. Scott opened a drug store in Southampton last year, and mortgaged his stock to Belcher & Co., bankers, who have just failed. This mortgage is now foreclosed.

On last Friday five bankrupt stocks were offered for sale by auction at London, and all but one were disposed of. A large number of merchants attended the sale, and excellent prices were obtained. The total value of the stock offered was $35,136.84. That of R. Spittal, of London, valued at $9,140.07, was withdrawn, at 56 cents. The others were sold, as follows: That of H. Smellie, of Hepworth, valued at $4,343.75, went to E. Smellie, at 61½ cents. Mayhew Bros.' $11,000 stock, at Thamesville, was sold to F. J. Mayhew, at 62½ cents. The stock of J. W. Burris, of Chatham, valued at $8,000, was disposed of to Dr. H. A. Kingsmill, of London, for 56 cents. Rettenmier Bros.' $1,541.79 stock, Duart, sold to J. H. E. Jones of the same place, at 45 cents.

Having been three years in business as tailors in Hamilton, Phillips & Krug, have assigned. They have managed to get a living, it seems, but there will not be much of anything in their estate to pay general creditors.——Quite a number of the residents of Walkerton, anxious to see the furniture business of the Anderson Company continued in that town, took stock in a new concern, styled the Walkerton Chair Company. This was incorporated with $6,000 subscribed capital. About a year ago it commenced operation. In addition to the capital contributed, the town loaned the company $6,000, and secured itself by mortgage on the factory. The company now assigns, with liabilities of $15,000.——There are two small failures to note in Kincardine. They are those of H. Plante, painter, and D. E. Potter, blacksmith.

The stock of Doering Bros., Waterloo, who assigned to Henry Barber, was sold to Mrs. A. N. Doering at 65 cents on the dollar. The value of the stock was $9,537, the liabilities were $18,275.——A meeting of the creditors of John Arthur, of Magnetawan, was held on Tuesday in Assignee Clarkson's office. They offered to sell the stock to Mr. Arthur for a sum which would realize to each 35 cents on the dollar. He is considering the offer. The liabilities are $7,100, assets $3,800.

It appears that several important banks are not satisfied with the explanations given by the Minister of Finance respecting the arrangement between the Government and the Canadian Bank of Commerce concerning the business to be done by that bank in the Yukon district. It is stated that the British Bank, the Bank of Montreal, and the Merchants Bank will all have representatives in Ottawa to-day or tomorrow for the purpose of interviewing the Government on the matter. They will demand to be placed on an equal footing with the Commerce, which they are not sure is at present the case.

A private member of Parliament, Mr. Fortin, brought forward in the House yesterday, at the request of the Montreal Board of Trade, an insolvency measure for Canada, which bears a close resemblance to the Bowell bill of 1894. It provides for compulsory assignments, and does not apply to non-traders. An express provision will be made, the mover says, that nothing in the act will do away with the privileges which the banks at present enjoy with respect to security. The Premier said that if the matter could be approached by the House in a purely commercial spirit and not made a political question, as was done during the Mackenzie regime, the Government would assist in carrying the measure.

Not only are sleeping bags, blankets, comforters, and such like essentials for Klondyke miners, winter prospectors, and northern travelers generally, made by the Alaska Feather and Down Company, of Montreal, but that enterprising concern has embarked in the manufacture of novel beds, having a peculiar combination of springs and mattress, with which the rooms of the new and splendid Waldorf-Astoria hotel in New York are fitted. Here is a description of it: "A strong frame, provided with a rabbit edge, is made to fit the projecting inside of the brass bedsteads; a network of oil-tempered spiral springs covers the bottom of this, and the outside springs are held together by a rattan frame which ensures permanent strength and elasticity. The whole is then upholstered with curled hair, and covered with the regulation ticking. On top of this comes the mattress which is especially made and devised with a view to cleanliness and durability." It is claimed that this combination provides the most luxurious and at the same time sanitarily perfect bed. These are being put, we are told, into the new wing now being added to the Frontenac hotel at Quebec, which is to be ready for tourists by May or June next.

A STRONG deputation of Canadian lumbermen appeared before the Government at Ottawa yesterday to ask that a duty of $2 per thousand feet should be imposed, against lumber coming into the Dominion from the United States. The Government will consider.

JOSEPH GUIMONT, a general dealer in a limited way at Petit Matane, Que., has called a meeting of creditors. The liabilities are under $1,000.——J. S. Page, the leading merchant of St. Isidore, Que., whose unlooked for failure we noticed a fortnight ago, is canvassing his creditors for a settlement at 60 cents on the dollar.

LARGE shipments of Mediterranean oranges and lemons will again be among the first arrivals from sea at Montreal this season. In all, four steamers, with full cargoes, are expected after first open water. Three of these vessels belong to the Reford lines, while the fourth is chartered by an Italian fruit firm.

BENNING & BARSALOU, auctioneers, sold this week, at their salesrooms, for John McD. Hains, curator, Montreal, the stock of Robert Miller & Co., Limited, as follows: Lot No. 1, stock of stationery, etc., amounting to, as per inventory, $11,330, to Howden, Starke & Co., at 42c.: lot No. 2, wall paper, $2,780, to Em. H. Richer & Fils, at 25c.; lot No. 3, goods in bond, $946, to J. H. Timmis, at 80c. in the dollar.

A WHOLESALE house writes us to the following effect: "As we believe you are interested in hearing of the freaks who are in business. we beg to give you the facts in a transaction we have just had: The customer owed us $4.73, sold on a basis of thirty days less 5 per cent. In sending the statement when the thirty days were up we requested a settlement by money order, at our expense. In reply we received an express order for $4.35. We enquired the reason for deducting the 15 cents in addition to cash discount, and the reply reads as follows: 'The charge of 15 cents includes 4 cents for order, 3 cents postage, stationery 2 cents, and time 6 cents.' If you think your readers would be interested in hearing this yarn you are at liberty to print it."

ABOUT five o'clock on Monday morning last fire was discovered in the storage warehouse of Robert Carrie & Co., at 27 Front street east Toronto. It burned till noon in spite of the efforts of the firemen, and indeed burst out again next morning, having smouldered all night among a great store of tea. Damage was done to the premises of P. C. Larkin, next door, and in Carrie's upper flats, principally by water and smoke. A great variety of merchandise was contained in the four stories of the Carrie building, and the owners of it are legion. While most of the tea (many hundreds of chests, we are told) is a total loss, it being either soaked with water or spoiled with smoke, there is considerable salvage on oil and other barrelled goods in the cellar. There was insurance on goods in Carrie's store in twenty companies, four Canadian for $18,000, fourteen British for about $80,000, and two American for $7,000; the total reaching $106,550. It is impossible to say what the total loss will be, but the Western's loss on Carrie's stock has been adjusted at $4,900, and that of the North British and Mercantile at about $6,000.

ON "Change" the other day, in this city, a great deal of sympathy was expressed for Mr. J. D. Laidlaw, long a grain merchant in Toronto, and principal member of the general storekeeping firm of Laidlaw & Nichol, at Stayner, who have assigned. The senior member of the firm has a branch store at Coldwater and a storage warehouse at Shelburne. No accurate statement of affairs has been prepared yet, and it is impossible to say how Mr. L. stands, with his diversified interest at this early date. Unfortunately for Mr. Laidlaw, he became the custodian of considerable sums of money from farmers and others who had long enjoyed his confidence. The amount received upon deposit and for which the firm of course is liable, is between $19,000 and $20,000. His trade liabilities are understood to be between $7,000 and $8,000, and this would bring the total liability to between $26,000 and $28,000. Last July a statement of Mr. Laidlaw's financial position was made, showing liabilities consisting of open accounts, bills payable and deposits at Stayner, amounting to $25,000. Against this was placed the following assets:

Stock at Stayner	$ 12,000
Accounts, bills, mortgages	24,000
Stock at Coldwater	4,500
Accounts at Coldwater	500
Equity on real estate	60,000
Total	$101,000
Nominal surplus	76,000

Of this surplus $60,000 was composed of equities in real estate. About a year ago Mr. Laidlaw succeeded Mr. Mulock as president of the Farmers' Loan & Savings Company, which is now in liquidation, and in this connection a writ for damages was issued against him. A knowledge of this fact alarmed those who had deposited money with the Stayner firm, and in order to protect trade creditors they were obliged to assign. The firm of Laidlaw, Nichol & Co. is among the oldest doing business in the Georgian Bay district, and its members have always been much respected as business men. In 1880 Mr. J. H. McKeggie retired from the firm. Since then the business at Stayner has been managed by Mr. Nichol. They always did a nice trade. Their principal trade creditors in this city are W. B. Hamilton & Co., and W. R. Brock & Co.

TORONTO STOCK TRANSACTIONS.

Business on the Toronto Stock Exchange has been less active since our last. Stocks were generally weaker during the early part of the week, but they have firmed up latterly and closed strong. Imperial Bank is lower at 193. Commerce has also declined from 140 to 138¾. Western Assurance shows an advance of 1¾. C P.R. stock opened at 81 and sold as low as 79⅛, closing at 82⅝. Commercial Cable is quoted at 177¼, a gain of $6¼ on the opening price. Toronto Railway is firm at 98¼. Richelieu and Ontario advanced from 96 to 99⅜. Sales of General Electric were made at 110 and 111. Loan companies were not dealt in to any extent.

Following are the transactions for the week: Ontario Bank, 36 at 104½-104; Bank of Toronto, 30 at 228; Canadian Bank of Commerce, 174 at 140-138¾; Imperial Bank, 301 at 194-193; Standard Bank, 38 at 174; Bank of Hamilton, 40 at 174; British America Assurance Co., 272 at 127½-128; Western Assurance Co., 715 at 165¾-166½; Consumers' Gas Co., 2 at 215¾; Canada N. W. Land, pref., 200 at 51; C.P.R. Stock, 3,780 at 79⅛-82⅝; Toronto Electric Light Co., 10 at 134⅝; new, 4 at 117½; Can. Gen. Electric Co., 72 at 110-111; Com. Cable, 1,150 at 170½-177¼; Commercial Cable reg. bonds, $6,500 at 105¼; Bell Telephone Co., 147 at 176-174¼; Richelieu & Ontario Navigation Co., 325 at 96-99⅜; Toronto Railway, 300 at 97⅛-98¼; London Street Railway, 100 at 182⅛-182; Canada Landed and National Investment Co., 10 at 99; Canada Permanent Loan Co., 45 at 109½-110; Central Canada Loan Co., 12 at 124; Western Canada Loan Co., 2 at 120½.

Debentures.

Municipal Debentures **bought and sold**, also Government and Railway Bonds. Securities suitable for Investment by Trustees and Insurance Companies and for Deposit with the Government, always on hand.

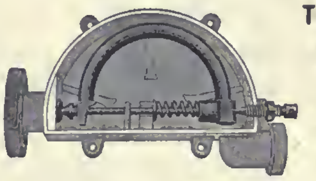
LABOR OR
STEAM
WASTED
IN
YOUR PLANT?

Suppose you had a hundred men on your pay roll and fifteen to thirty doing nothing—"air punchers"—how long before you would weed them out? Yet, that's your proportion of loss in power when you run your plant without the "HEINTZ" Steam Trap.

Automatic, silent, economical, lasts a lifetime. Only six parts beside the case—can't wear out. No levers, floats, air valves or theories—just plain mechanics. Sent on thirty days' trial on request. Booklet will finish the story. Want it?



THE JAMES MORRISON BRASS MFG. CO., Limited
89-97 Adelaide St. West,

THE SITUATION.

Whether Mr. Hamilton Smith would press his offer to build a couple of Klondyke railways on the Government, in such a way that the Senate could make special use of it, so long as the doubt existed, added to the uncertainty of the fate of the provisional contract in that Chamber. But since Mr. Smith has, under his own signature, advised the public that his "proposition is a thing of the past," neither he nor his offer can be appealed to except as a matter of history: as a rival bid it has lost its vitality. This deprives the Senate of one weapon with which to attack the agreement, but it does not, of course, settle the matter. The Senate will not be able to say, pointing to Mr. Smith's offer: "Here is a rival proposal open to acceptance, and it is so much the more advantageous that, whatever the Government may do, we dare not in the public interest refuse to endorse the more advantageous of the two plans." Mr. Smith's statement is worth some Senatorial votes for ratification, whether or not there be enough to ratify.

Mr. Hamilton Smith indulges in some criticism of the Stikine-Teslin route, which are certainly formidable, and from one point of view, unanswerable. He contrasts the route chosen with that of the Lynn Canal; saying the latter is open the whole year round, which is true, while the Stikine River is closed by ice seven months out of the twelve, which is equally true, and that when a miner gets to the northern end of the road now under provisional contract, he will be no nearer the mines than he would be before he stepped on the shore of the Lynn Canal. This last statement is evidently exaggerated; but making due allowance for the rhetoric, there is enough truth left to make the contrast a thing not pleasant to dwell upon. The explanation is that we shall, in the end, have to reach the present starting point of the railway otherwise than by water liable to be frozen up a part of the year, and that the road will have to be extended at both ends. This is the price we pay for the enjoyment of a purely national road. We trust Mr. Smith had nothing to do with engineering the bill of extraneous conditions for our enjoyment of the right of navigating the Stikine through the U. S. Senate; but whoever is responsible for that action did much to stiffen the backbone of Canadians in their resolution to have a purely Canadian route to the Klondyke. We may buy such a route too dearly; but that an all-Canadian route is necessary is the general, if not unanimous opinion of Canadians, but upon what its location ought to be differences of view are met.

The Yukon railway bill having passed the ordeal of the House is now before the Senate where, it was from the first foreseen, whatever danger it was in would be encountered. A party opposition seems to be out of the question; the test division may, however, be partly local and partly on the merits, as viewed by the senators from the larger provinces. Any greatly preponderating vote of the senators from the Maritime Provinces against the bill would be a symptom of action from local motives. Alarmist stories about a possible attempt to bribe senators to vote for the bill have been told, and resented. Attempts to coax and attempts to bulldoze the Senate have been made. Neither of these is likely to produce any sensible effect. The Senate is a co-ordinate branch of the legislature, with the right to take its own course on any measure brought before it; and, using the word in its best and non-political sense, it may generally be relied on to take a conservative view. If it has a bias, as no doubt it has, it is in favor of established institutions of all kinds and of established corporations. On the Klondyke railway bill, it cannot have any prepossessions and may be relied on to take whatever course it deems best in the public interest.

If the Senate threw out the Yukon railway bill a crisis in the affairs of State would ensue. The Government would have to decide upon its course in the emergency. It might resign, which is improbable; it might appeal to the country, which it would probably not deem a necessary step; or it might, with perfect safety to its position in the House, withdraw the bill. But then some other means of getting to the Klondyke would have to be found.

The statement that a treaty delimiting the Alaska-Canada boundary had been signed, has received authoritative denial. The truth is that the statement was made before the negotiations were completed. This is not the first time that hints of the nature of the differences between the negotiations have been thrown out. One is said to have been as to the location of the Portland Channel, which forms part of the international boundary; another, whether at points where the depth of the American frontal strip was to be a measured distance of ten marine leagues from the shore, the sinuosities of the shore were to be followed into coves, or the line drawn from headlands where the width was not more than thirty-three miles. Where the mountain summits of the treaty are recognized as existing, as at Chilcoot and the White Pass, one account says, there it has been agreed the boundary shall be; but where the summits do not appear, and do not exist, the distance alternative of the treaty will come in. It is always difficult to get exact information of the course of a negotiation when a treaty is in process of formation, but it is probable that the main facts as to the contentions and a partial agreement are not far different from those stated.

Before leaving office the late Provincial Government of Quebec agreed to guarantee eight millions of bonds of the Atlantic and Lake Superior Railway Co.; and the present Government of that province, unwilling to carry out the arrangement will, report says, seek a judicial release from the Supreme Court. The ground of attack is more than technical. The local Act authorizing the granting of a guarantee makes conditions which, it is contended, were not present in this case: the roads to get the benefit of a guaranteee must have a legal right to it, and must make cash deposit with the Provincial Treasurer. In the case of the Atlantic, it is said, that of these two conditions one did not exist and the other was not met.

The Court of Appeal has decided that the Toronto Railway is assessable on its trolley poles, wires and rails, which will make an addition to its taxes of $7,000 to $8,000 a year, should the judgment stand. All such cases, as a rule, go to the Privy Council before they end.

In the recent elections of the London County Council, into which, contrary to the usual English practice, the representatives of the great political parties openly entered, a set attempt was made to defeat the Works Committee, which eliminates the middleman, and gets work done at the cost price to the ratepayer. This system has, necessarily, done away with jobbing among contractors, whose services are dispensed with. The result of the election was a protest against gas, water and tramway companies making unnecessary profits out of consumers. The argument is that there can be no reason why a municipal corporation should not do its own work and have the profit which a contractor would make. This is the trend of municipal movement, at the present time, and the example of the London County Council may count for much.

Government ownership of railway is on the increase. By the largest majority ever given in the history of the Swiss Referendum, it has been decided that the Government shall purchase and run the principal railways of the country, 384,272 voted for the purchase, against 176,002. Eighteen cantons voted for the bill and only seven against it. The cost of the roads may reach $240,000,000. Part of the amount to be raised by a direct loan, another part may take the form of the assumption by the State of the railway debts. If there be a choice of the methods, that which will raise the necessary capital at the least cost will be followed. It remains to be seen what saving the Government credit will effect, in this particular, as compared with that of the railway companies. To a large extent the credit will have for its support the railway property acquired.

The railway rate war appears to be practically at an end. The agreement come to is not (Thursday evening) yet at hand. But as the C.P.R. was fighting for a differential in its favor in the West, and as the other roads are reported to have decided to stop the war and come to an agreement, the C.P.R. would seem to have the best of it.

THE NEWFOUNDLAND DEAL.

If Newfoundland is pursuing exactly an opposite course to that taken by Switzerland, with its railway, the fact may be due to a difference of conditions. It may be taken for granted that the railways of Switzerland are profitable, while Newfoundland acts as if it were necessary to pay an individual 2,500 acres of land per mile for operating its road for 43 years, besides giving him the right to purchase the road at the end of that time for a fixed sum; to sell to him the telegraph lines of the colony for $125,000 on a six years' credit; to sell to him the St. John Dry Dock for $325,000. Besides this, the contractor gets the right to mine coal on paying a royalty of 10 cents per ton; the Government undertaking to protect his coal monopoly by a duty of $1 per ton. These appear to be hard conditions; but the Government, in making the bargain, found itself handicapped by the original contract with an individual to build the road and operate it for a period of seven years. This contract was improvident in giving Mr. Reed, the contractor, all the valuable lands along the line, with their mineral contents, so that practically the sources of industry on the road were under his control. "In any event," says a local writer, "the colony stood to lose, because no mineral, pulp or farming operations could be started." The building of 600 miles of road, at a cost of $10,000,000 was too much for the resources of the colony; and like a man overburdened with debt, the Government had to submit to hard conditions in the second contract. The case is one in which the contractor refused to continue to run the road unless he got 2,500,000 acres of land as a subsidy. The precedent is one full of warning to Governments inclined to be lavish with land grants in the form of railway subsidies. The contractor may, notwithstanding, have a heavy job on his hands. His sources of revenue have to be created out of raw, but surely ample materials. If the Government found it necessary to pay a premium for operating its road, for so long a period as 43 years, that was one thing; but this necessity did not involve the getting rid of other resources of various kinds, in a manner which can scarcely be regarded other than reckless.

One curious arrangement for the sale of the Newfoundland railway is that while it is to be nominally sold forty-three years hence, it is to be paid for now, the purchase money being about one-tenth of the cost. It is a sale now to all intents and purposes; but present cash for deferred sale, forty-three years hence, is the form given to the transaction. Mr. Reid will get the road from the start under the form of a lease of property, which he is to pay for nominally forty-three years before it will be his. Why these curious sinuosities in the bargain? We are told in eply that $1,000,000 paid now is capable of yielding $7,000,000 in forty-three years, if put at compound interest. That would depend on the nature of the investment; but speculation in compound interest has really nothing to do with the case. For all practical purposes the Government sells the road now and takes its pay at a figure which represents about one-tenth of the cost; the purchaser gets in addition to the road 2,500 acres per mile of its length for his money. The lease for forty-three years is a fancy transaction, which may serve to amuse and to cloak the real nature of the business. At first, the road may not pay working expenses and repairs; but forty-three years—one whole generation and nearly a third of another—what may not happen in that time? The business is highly speculative on both sides; but if Mr. Reid can carry the transaction through with the requisite vigor, which may well be called enormous, he stands to win in the long run, and part of what he wins the Government will lose. But the Government was well nigh helpless, and apparently believed that there was nothing for it but to submit to its fate.

FIRE INSURANCE COMMISSIONS.

Some modification of the expense of carrying on fire insurance business on this continent is a matter which has long engaged the attention of the most observant and thoughtful men in the profession. Efforts have been made to stay the tendency of commissions to increase, induced doubtless by competition, and over a large part of the United States a fixed rate of commission has at last been reached. But from reports that reach us it appears that the maintenance of that rate is a matter of difficulty, while its extension is still more troublesome.

The semi-annual meeting of that important fire insurance association known as the Western Union was held last week in St. Louis, Mr. Eugene Harbeck, of the Phenix Company, of Brooklyn, president, in the chair. It is evident that unanimity in either rates or commissions is hard to preserve, for in the president's address the lack of good faith among the companies belonging to the union was referred to as "deplorable." Mr. Harbeck pleaded for a more strict observance of the rules, while pointing out the dangers which their neglect entailed. If we are correctly informed, the rate of commission in the Western Union's territory has been brought down to 15 per cent. with the exception of the large cities. But it is precisely in these cities that most trouble and discord is experienced, mainly as to commissions. In a report reviewing the situation in Louisville, Chicago, Cleveland, Cincinnati and St. Louis, it was said that in the two cities first mentioned matters require no change, but in Cincinnati and Cleveland it is proposed to again attempt to re-establish a commission of 15 and 25 per cent. This information we procure from the *Chronicle*, which adds that a report came from the large cities committee that its small size hampered its work and additions to it were asked, preferably from the newer members. This was agreed to and M. O. Brown, J. J. Kenny, William Trembor, C. E. Sheldon and John C. French were appointed.

There is always more or less difficulty, in the case of such alliances as the one in question, in securing unanimity even upon matters where experience has clearly indicated the course proper to be pursued. Individual companies have their entanglements, local boards their views, local agents their demands. Custom and prejudice have their preferences; customers *have to be* conciliated, some people think, even if it breaks a rule. The framing of laws which shall govern smoothly the insurance of half a continent is not to be done in a day, or, we should think, in a year. And it is better not to pass any legislation than to make hard and fast laws which subordinate bodies will continually break or disregard. Therefore the large cities committee was perhaps wise in not recommending the immediate adoption of a definite course, in the presence of much divergence of view, but in asking for further time. It was decided by the meeting to grant the committee further time to thresh out knotty points of procedure, and to formulate a plan for reducing the expenses of fire insurance companies in the larger American cities.

CANADIAN FISHERIES.

The Canadian fisheries are the most extensive in the world. From the Straits of Belle Isle to the Bay of Fundy on the Atlantic coast they cover a distance of 5,600 miles; on the Pacific the fisheries of British Columbia extend 7,180 miles, or more than double the extent of the coast line of Great Britain and Ireland. The salt water inshore area exceeds 1,500 miles, while the fresh water area of the Great Lakes, which belongs to Canada, is placed by the authorities at 72,700 square miles. This latter estimate does not include the numerous smaller fresh water lakes, which exist in nearly all the provinces, especially in Ontario, Manitoba and the Territories. The contribution of the fisheries to the national wealth might reasonably be expected to be very considerable, and it is by no means insignificant. In 1857 the value of the fish catch was placed at under one million dollars, it has grown to, in different years, ten millions and fifteen dollars, and in the year 1896, the last year for which complete returns are at hand, it amounted to $20,400,000 in value. Each of the provincial divisions of the Dominion makes a contribution to this industry. The value of the product for 1896 was distributed among the provinces as follows:—

Nova Scotia	$6,070,895
New Brunswick	4,799,433
British Columbia	4,183,999
Quebec	2,025,754
Ontario	1,605,674
Prince Edward Island	976,126
Manitoba and N.W.T.	745,543

In the Province of New Brunswick the fishermen were most successful, as compared with the operations of the previous year, the catch increasing in value $396,275; Quebec made the handsome gain of $157,834, and Ontario's fish output increased $21,201. The other provinces failed to hold their own, showing indeed an aggregate decrease of $367,224. This leaves a net surplus of $208,086 on the output of all the provinces, as compared with last year. These statistics, it must be remembered, are necessarily incomplete, as the officials have in many cases no means of estimating the amount of fish taken from the water.

The principal kinds of commercial fish caught were: Salmon, cod, herring and lobsters, here arranged in the order of their importance. Between these varieties, each of which ranges in value from two million dollars upwards, and other descriptions, none of which amounts to one million dollars in value, there is a wide margin. The output of whitefish, a fresh water fish, mackerel, trout, smelts and haddock, salt water fish, is, however, considerable. The conditions of 1896 were not encouraging to fishermen. The markets for some leading articles of fish product were depressed and prices low. The mackerel catch was a partial failure, and that of herring was disappointing, too. There were more lobster factories operating in the Maritime Provinces in 1896 than in any previous year. The multiplication of these factories has disastrously affected the industry. The department appears to be fully alive to the needs of the situation, but reports indicate that Government regulations are subject to frequent violation by those in whose interests they have been made. We have already commented upon the statistics of the British Columbia salmon industry. The catch, it will be remembered, in spite of the fact that 1896 was set down by canners and fishermen as an "off" year, was the largest in the history of the industry, the total pack amounting to 621,938 cases, or 29,858,056 cases of one pound each. The halibut and sturgeon fisheries of British Columbia are expanding and those interested in them are encouraged with the outlook.

THE TARIFF ON CLOTHING.

Last week, at Ottawa, Mr. Bertram, M.P., introduced to the Government a deputation representing the leading manufacturers of ready-made clothing in Canada. The subject of the conference was the same to which we referred in May last, inequalities in the tariff that it is claimed place manufacturers of clothing and mantles at a disadvantage with competitors abroad. The members of the deputation were Senator Sanford, Hamilton; Messrs. R. Green, London; W. R. Johnston, T. O. Anderson, S. F. McKinnon, and J. Watson, Toronto; S. O. Shorey, E. A. Small, W. H. Doull, and H. Horsfall, Montreal.

Under a tariff previous to that of 1896 a differential rate of five per cent. between the duty on raw material and finished goods existed, and this the manufacturers contend should be restored. At present the tariff provides for the same rate of duty on raw materials of the clothing manufacturer, that is to say, cloths, trimmings, etc., as is imposed on made-up clothing coming into the country. At the meeting with the Finance Minister, the deputation asked, we are told, to be exempted from the preferential clause in the tariff which makes in favor of England ; that is to say, the tariff now being 35 per cent. on cloth and also 35 per cent. on clothing, which on the 1st of July next will be brought down to 26¼ per cent. by the reduction of 25 per cent. on English goods ; they asked to be exempted from the discount for ready-made clothing, citing precedents from other trades to show that they were in a worse position than iron workers, etc.

Mr. Fielding stated that the Government recognized that the clothing trade was not as favorably treated as some other branches of manufacture, such as boots and shoes which were protected 7½ per cent., shirts, collars and cuffs, 10 per cent., and various other lines, and almost every other line of manufactured goods which has a higher duty on the manufactured article than on the raw material, and he promised to give their plea favorable consideration. The deputation, it seems, asked that the duty on clothing should be raised to 40 per cent. if the Government could not see their way to the other proposal ; but this they could not expect to be done if the Government remember its tariff platform. It is much more likely that the protection asked will be given in the way first proposed, if given at all, than by raising the duty to 40 per cent. But the clothing men seem to have made out a very fair case for consideration.

SOME FEATURES OF THE DRY GOODS TRADE.

The bright spring weather of the past few days has reminded the retailer that the summer season of 1898 is almost at hand, and has stirred the wholesale merchant, who is always a season in advance, with thoughts of autumn business. The representatives of the different wholesale firms are departing for the textile centres of the United Kingdom to make purchases for the coming season, and at the same time secure selections for a sorting business. Domestic manufacturers' agents are also seen in the warehouses. Some weeks ago we made a review of the patterns of cotton dress goods for Fall. On Monday of this week the samples were first displayed, and initial orders are said to have been very satisfactory, giving good grounds to look for a large turn-over in dry goods when the autumn comes.

The Canadian cotton manufacturers are at present more than holding their own in the home market as against competitors in the United States. From the Republic our importations of woven goods are declining, but of printed goods such as lawns, picques, dimities and satin finished cloths there are still large imports made. The trade of American manufacturers of cotton blankets in Canada is said to have disappeared. The Merritton mill of the Canadian Colored Cotton Mills Company is now making 200,000 pairs a year of these goods, which is a very pleasing record for a trade established only two years ago.

Values in the textile trades remain very steady. There have been few changes in manufactured goods since the decline of 10 to 15 per cent. in the price of gray cottons some days ago. What the future will bring, we cannot say. From the demand side of the market there is every appearance of strength. The interesting element in supply is, of course, that of raw material. In cotton, the markets of the Southern States are ruling rather easy. The market is, to a large extent, dependent upon the conditions of the growing crop. Latest advices report that dry weather has prevailed in most districts of the South for some days, and that the temperature has, as a rule, been favorable. As a result, farm operations have made good progress in many localities. Reports on the Russian cotton crop indicate that area was considerably extended in Turkestan, Khiva and Buchara in 1896, and that while the yield per acre was not so great as in the previous season, the aggregate production increased.

The second series of colonial wool sales for the year opens in London this week, and its course will be watched with considerable interest.

Irish linen markets are disturbed by rumors of trade "combinations," but the tone of the market is not strong, and prices have had an easy tendency.

THE ALLEGED SHOVEL COMBINATION.

In spite of the vigorous efforts made within recent years, in both Canada and the United States, to stamp out trade combinations and trusts, these institutions are growing in strength and importance. A combination of producers to limit or regulate business within the country in which the principals reside may come within the jurisdiction of the Government of that country ; but when the operations of monopolists are extended to a foreign country the matter becomes extremely complicated. If the combination is the result of an agreement between associations in different countries additional complications are introduced. We have previously pointed out that there are indications of an understanding or arrangement by which the shovel manufacturers of the United States do not compete with those of Canada. Mr. Richardson, member for Lisgar, in the Dominion House of Commons, this week made the charge that a combination of this kind existed, and called upon the Government to put in force the tariff resolution adopted last year, which provides for the removal of the duty upon any article the price of which is found to be enhanced by the existence of a combination. In support of his charge, Mr. Richardson said he had in his possession four letters written by prominent United States manufacturers in reply to enquiries from mercantile firms in Canada. One of these letters was from a Pennsylvania house, and contained this statement : "According to an arrangement with Canadian shovel manufacturers, we are not in a position to quote you prices at present." Mr. Fielding, the Finance Minister, promised to give the usual consideration to the matter, and replied that if the hon. gentleman was able to convince the Government that a combination existed among the Canadian shovel manufacturers, it would be their duty to call the attention of the courts to the matter so that a judicial enquiry might be instituted. The question naturally arises, what amount of evidence is it necessary to submit to the House before judicial enquiry is instituted ? If conclusive proof be required, the judicial enquiry would be a useless proceeding.

OUR AUSTRALIAN LETTER.

SOME ENCOURAGEMENTS AND SOME WARNINGS.

The North American Bent Chair Company, of Owen Sound, is another Canadian concern that has shown pluck that is likely to get its reward. It opened a branch in Sydney, on the advice of the Canadian Commissioner, has sent out a capable manager and a big stock of goods. The branch has now been about two months in operation, and the outlook is that it will in the first year do three times the amount of business that it had fixed upon as the limit. The house has a contract from one firm for about the amount it expected to do altogether. Prices are good, I am told, and the business will be done at a reasonable profit. The market has to be studied. Some of the goods sent out sell at sight, others the market won't take to. When they get into the swing I look for a big trade in furniture from Canada, as a result of the venture.

For three years the company in question had done a picayune trade with this country in the old way, through old houses, and their efforts to extend trade were nearly in vain.

One Australian firm said the goods were too dear; another could do some trade in one line, and one or two others thought they might do a little by-and-by, but that was all. The company have done a bold but a wise thing. The effort has cost something, but it will pay.

Canada, a wooded country, with a great variety of woods, ought to be a large exporter of furniture, as you have more than once editorially shown; and it can be, but the manufacturers must specialize their production and push for a market boldly. Bulky lines will have to be done in the "knock-down" state and finished in Australia.

This is the way to do it, and now for how not to do it :

An effort has been made to get a sale of seed wheat from Manitoba. A price was obtained, and the agent was delighted to find it took. He was promised orders if the sample was all right. A sample came later, and expected buyers would not touch the grain, saying that it was seed wheat they wanted, not oats and smut, and weeds. "We have plenty of that sort of stuff in Australia without importing it." Why in the world did not that dealer clean his wheat ?

Second instance: This country raises very good bacon and hams, but it was thought that for Canadian hams, packed in a particular way and sent to Sydney, fancy prices could be got. An order was sent to Canada with special instructions as to how to cure and pack. The hams came in due time, but they were not cured nor packed as instructed. They molded on the way out here. The meat was good, but its appearance spoiled the sale. The consequence was that the hams brought seven cents per lb. instead of eighteen cents, at wholesale—a loss instead of a profit. However, the attempt is likely to be renewed, with better results next time. Perhaps it might pay packers who ship to England or elsewhere to look into this matter and see whether some attention to the form of packing would not help their ventures in other markets.

Some iron goods from Gananoque are on this market, the freight of which from Ontario to Sydney was thirty dollars per ton. This was not a high rate for the route by which they came, but when one reflects that they are competing with goods from the United States, on which the freight was ten dollars per ton, and with some from Europe that paid a good bit less than ten, it is very high. It says something for the Canadian manufacturer, that he can sell at such a disadvantage. It must, however, greatly restrict his trade, for it means at least an advance of from ten to fifteen per cent. on the goods. Those who would do a trade here must study freights as keenly as any other branch of the business. A shipment of these same goods was laid down here via England some time ago at a little over ten dollars per ton, so there is room for investigation in this matter. If $10 is a reasonable freight, why pay $30?

The old year closed in Australia with a short wool crop and a small grain harvest. The first was expected from the previous drought, but up to three months ago it looked as if the Australians might have twenty-five million bushels of wheat to export. However, the hot winds came and this continent will barely have enough for its own bread. For the third year in succession some farmers in South Australia won't get enough harvest from the fields to equal their seed. If freights are right this means that flour and wheat will come from Manitoba to mix with the inferior grade here. Already there are enquiries, but not much movement, as there are some stocks on hand, and prices here are too low.

Notwithstanding this untoward state of things, the Australian is cheerful and hopeful. Twenty to thirty thousand people will turn out to see a five-days' cricket match between England and Australia, particularly if the latter is winning. Good rains have now fallen, and they say there will be lots of lambs and wool, and wheat this year. In the meantime the people are buying as many goods as ever, and paying for them, too and credit is remarkably well sustained. In New South Wales the failures and assignments were last year the lowest for many years.

F. W.

Sydney, New South Wales, 3rd Feb., 1898.

AN ENGLISH LETTER.

There has been so much to see and to learn since I came over that I have not felt quite like keeping my promise to write you. The other day, however, I met a Toronto man, who represents here Jim Hill's big railway, and found him full of ideas, as well as full of information, and he sort of enthused me. He represents an American road, but he is a Canadian. Mr. McMicken said that neither he nor the principal officials of his road thought they could capture any business for some time after he arrived, but he had not been off the ship at Liverpool two hours before he was asked to quote rates on some hundreds of reindeer and a hundred Laplanders bound to Alaska, and captured the lot. A week afterwards, he said, he had secured consignments of 600 tons freight. If he could do all this inside of ten days, it seems to me that other agents, either of railways or the Dominion, could, by energetic work, do something too. And the C.P.R. is not asleep, I assure you.

It struck me, after some observation and some listening to complaints, that the British Government must make a neat sum every year out of insufficiently paid letters from Canada and the United States. I have had some such letters myself from Canada, and I have heard of some from the States. Every letter that arrives is minutely weighed, and if it tips the scale in the least, even "in the estimation of a hair," you are charged double the regular postage rate.

There is a mighty lot of talk here about the Klondyke—the Klondyke—the Klondyke, and sure enough there is curiosity about it. The C.P.R. offices here are besieged with enquirers. Still, I doubt the extent of the emigration to that fabulous region. In my judgment not nearly the number of people that the newspapers talk about will go out there. I mean, of course, from the British Islands. Western American newspapers and Canadian newspapers, as well, have exaggerated the exodus greatly, so I cannot but think. You may be aware that the Canada Pacific railroad authorities sent out two ships from here for their Alaskan trade. Well, these ships sailed a few days ago, and only a few passengers went by them. And in these last two weeks I have not heard of more than 25 passengers leaving London for the Yukon. I am told, though, that there will be some movement in that direction next month, and from what a Liverpool letter tells me, there will be quite a lot of passages taken in April.

There will likely, I think, be more people go by the Edmonton (or all-Canadian route, as you call it) than you have any idea of. People over here are beginning to find out that there is a possibility of bother—they don't quite know what, but it worries them—if they go by the Pacific coast route. They have heard in a vague way about the American Eagle, and what he won't let them do; but that doesn't worry them nearly so much as the idea that they may have to pay duty, not only once, but twice, up in the Dyea or Dawson country. The bonding system they do not know anything about, and cannot understand. But as I said, when they learn (what there does not appear, however, to be anybody here in particular to teach them) that they can go overland all the way through British territory, quite a number will go that way. Of course there are American railway agents coaxing people to go their way; and then there is the Canada Pacific, wanting the long-haul to Vancouver, of course, on every passenger and every pound. None of them, I fancy, stick any closer to the truth than they ought to do in what they tell the anxious enquirer. If they can "stuff" him to their own advantage, of course they'll stuff him. But it seems to me there ought to be somebody or something, half a dozen somebodies if you like, besides the civil and uncivil dummies of the Canadian Commissioner's office, to tell people a little of the truth about Canada. There is curiosity enough about us here, much of it lasting since Queen's Jubilee time. And there is much ignorance, that requires patient enlightening.

The folks here seem to have a sort of dread of Canada. They are mostly scared of the distance, the trip, the cold, the different kind of money, the high cost of things, the hot cars, the dangerous boats on inland lakes and rivers that they have heard queer stories about. Scared of they don't know what ! That is, all but a few adventurous folk—Englishmen, of course—who are ready to go anywhere without proper knowledge or proper information. And they are the very fellows who would suffer for their cock-sure ignorance, and begin cursing the country, when they saw it, for what was their own precious fault. Such fellows as these *won't be warned*. They "know it all."

But desirable immigrants to Canada ought to be helped, and I don't see who is to do it, if the Canadian Government does not. Is it any part of the business of the Immigration Association, formed in Winnipeg or Calgary last year, to have a man or men here and at Liverpool and Glasgow to tell the people what to do and take, and warn them what not to do, and take? Canada suffers over here from prejudice. The climate is a dreadful bugbear; the long winter is dreaded, and the "terrible heat" is almost as much dreaded. Then, of course, our Yankee friends (?) make the most of stories about both the heat and the cold, and keep coaxing people to go to "God's country," as they call the States, where, they say, one can get any sort of climate he wants. But it is not climate that the Britisher is after. He is after material prosperity in the British fashion; and he is going to seek it in truly British ways, grumbling as he goes, very likely. Still, it is our part to capture him if we can. If we do not, somebody else will—Africa, Australia, or the Great United States, with a big, big G.

WENTWORTH.

Norfolk Street, London, 28th Feb., 1898.

A SPECIMEN FAILURE.

There are failures and failures; that is to say, there are various kinds of them: regrettable failures and deserved failures; honest failures and swindling failures; failures which command sympathy and failures which make the observer of them almost glad; failures which were foreseen by everybody except the poor devil who failed, and failures which no one but the insolvent for a moment suspected. In which category the recent case of George D. Cloy, of Thorold, should be placed, our readers may be able to decide after they have read the particulars, which are summarized by the assignee, F. W. Casey, and certified by the inspectors, G. B. Burson and E. D. Voisard. Here is the circular, bearing date March 8th last:

In the matter of George D. Cloy, of the town of Thorold, an insolvent—Assignee's statement—available assets: Stock in trade, $750.39; shop furniture, $215.45; chattels, consisting of two horses, wagons, sleighs, harness, etc., $200; total, $1,165.84. Book accounts, good, $63.09; doubtful, $305.72; total, $368,81. Assets not presently available: Equity in lot 37, Wellington street, Thorold (mortgaged for $650), worth little more. Equity in lot 51 Mill street, of no present value, being mortgaged for full value. Equity in 23½ acres in township of Thorold (title to this cannot be made for some time; when it is it will likely sell for $650). Claim for insurance, $1,079 (hypothecated to Quebec Bank to secure discounts and accommodation paper). None of these can be realized on in their present position. Liabilities—General liabilities, $5,634.86; accommodation paper, $2,265. Add preferred claims—rent, $144; taxes, $10; wages, $83.77, making $237.77, makes the total liabilities $8,137.63.

By direction of the inspectors the stock in trade, shop furniture, chattels and book accounts were sold at public auction on 4th March, 1898, and realized the sum of $374.75. This sum has been disposed of as follows: Rent, $144; taxes, $10; wages, $83.77; assignee's disbursement, $51.98; assignee's allowance, $50; inspectors' fees, $35. Total, $374.75. *Leaving nothing for distribution.*

Dated at Thorold, the 8th day of March, 1898.

Here is a case in which the trader—he was a grocer—runs up liabilities of $5,634 and accommodation paper of $2,265, making a total of over $8,000, and yet, when his estate comes to be liquidated, the only assets good for anything to pay debts with, amounted on the face of them to 14 per cent. of the obligations, and upon being put up at auction realized less than one-third of their face value. That is to say, all that the assets brought was 4½ per cent. of the liabilities, and this only sufficed to pay rent, wages, and the allowances for assignee and inspectors. These last-named charges are low, by the way. Very likely they would have been higher, but for the very cogent reason that there was nothing more to be got, since the assets of $1,228 sold at auction for $374, and it took $237 of that to pay preferred claims. Creditors got nothing. The second paragraph of this assignee's statement deserves re-reading. Among the assets "not presently available" is a lot, of land, mortgaged for about its worth; equity in another town lot, of no present value because mortgaged up to the hilt; equity in some farm land, title imperfect or at least *in futuro*; an insurance claim hypothecated to the bank to secure discounts and accommodation paper. Not a copper cent has been realized for creditors out of all this array of nominal assets. Yet we venture to think the real estate in question has been paraded (to people from whom goods were bought) as tending to show that Mr. Cloy was worth money, whereas the mortgages appear to eat it up. Assuredly he could not have told the whole truth about his affairs to creditors—did they ever ask him?—else he would not have been allowed to incur $5,634 of general liabilities on the strength of assets which no ingenuity can now make out to be even nominally worth more than $2,500. The house which sends us the memorandum about this failure asks us to classify it. We cannot. Perhaps Dun & Co. or Bradstreet might.

SPRING FLOODS.

The rapid melting of the snow, of which there was a good deal in both Ontario and Quebec, caused a heavy flood on the several rivers, notably the Ottawa, the Rideau, the Thames, and the Grand Rivers, and it did serious damage. Not since 1883 has the water in the Thames been so high. In that year, it will be remembered, West London suffered badly. Scores of cottages along the river were swept away, and twenty lives were lost. After this the breakwater, a wooden structure embanked with earth, was rebuilt. This year it has again given way, and as most of the houses are only one story high, the inmates were obliged to seek other places of shelter from the inundation. More than a dozen rowboats were employed on Sunday last, and removed the occupants to the Dundas street bridge. Soon afterward many of them found temporary refuge in the city hall and court house. The onward course of the Thames flood damaged property more or less until it reached the city of Chatham, when the water was found to be fifteen feet above the ordinary level. It drowned out the gas works, and left the northern part of the city in darkness, as the gas mains crossing the river were flooded. The city electric light plant was partly submerged, and the dynamos could not be operated. Nearly all the stores on King street, Chatham, were flooded, having from two to four feet of muddy water in their cellars. Thousands of dollars' worth of damage has been done to dry goods, grocery and other stocks. The pumping station is flooded with water, and the boiler room is also inundated. Luckily, a massive stand pipe will keep a sufficient supply for domestic purposes for some little time, and before the supply is exhausted the flood will doubtless have subsided.

The Grand River, too, caused a great deal of destruction on its mad career through Galt, Paris, and Brantford. In the first-named place the water was forced back through the sewers, causing damages to stores and dwellings. Cherry Brothers' storehouse adjoining their mill, and containing 200 barrels of flour, was swept away at night, carrying with it another span of the upper bridge. The loss to Cherry Brothers will amount to about $2,000. The other smaller individual losses will aggregate about $8,000, making a total of $10,000, besides the loss to the municipality, which will be in the neighborhood of $7,000.

The Galt, Preston and Hespeler Street Railway was rendered unable to run between Preston and Hespeler, owing to the washed-out track on that section of the road. The G.T.R. had on Monday and Tuesday 100 men at work on their line, between Galt and Doon, repairing the roadbed and replacing rails.

In West Brantford the streets were covered by water and communication had to be made by boats. We have not seen an estimate of the damages, which seem to be general in that part of the city. Preston and Hespeler also suffered slightly.

At Ottawa the flood was the worst experienced for years, in much of the eastern part of the city. The Rideau River runs between Janesville and Ottawa, and runs through New Edinburgh, as the Rideau ward of the city used to be called. Many of the inhabitants were driven to the roofs of their houses by the high water, and spent most of the night there. Porter's island was four feet under water on Monday morning, and another jam occurred at the railway bridge, flooding the city on both sides. On the eastern or Edinburgh side, nearly the whole ward was flooded several feet deep, and hundreds of residents driven to the upper floors of their houses. Piles of lumber, representing not less than five or six million feet on the islands or shore, are in water from two to six feet deep. Every effort is being made to clear the channel of the river. The mills top-logs at the top of the Rideau Falls have been blown out, says a despatch of Tuesday, the ice jams above are being blasted away, and a channel cut through the surface ice from the lower jam to the falls. All the railways are having more or less trouble by reason of the flood. The Canada Atlantic train due in Ottawa, Monday, at 8.35 in the evening, got in at 5.30 Tuesday morning, a washout of a hundred feet of the track occurring six miles out of town.

BANK OF BRITISH NORTH AMERICA.

Under the heading of "Colonial Banking Enterprise," a recent issue of the London *Citizen* contains a brief sketch of the rise and progress of the "British Bank," as we in Canada are familiarly in the habit of calling the institution which for sixty years has been intimately connected with the business and the financial progress of Canada. In the same issue is a portrait of the bank's secretary, Mr. A. G. Wallis, and a picture of the substantial stone building erected in Vancouver some years ago for the uses of the bank. Mr. Wallis gave to the journal in question in the course of an interview, some particulars respecting the origin and growth of the bank, with its original three branches in Canada, and one in St. John's, Newfoundland, and contrasted the scope of the business, in say 1840 and 1850, with its wide extent as signified by the twenty branches it possesses in six provinces of Canada to-day. Six of these branches, besides a sub-agency at Trail, are in the Province of British Columbia. Its deposits were only £229,000 in 1848, but had reached £2,119,000 in 1897, and the assets and liabilities stand at £4,884,917 (say $24,420,000 in round figures) at the close of June last.

At the sixty-second yearly general meeting of proprietors of the Bank of British North America, held in London on 1st inst., Mr. Richard H. Glyn presided. Some of the features of the year's business pointed out by the chairman were: the growth of the circulation from £211,466 at the close of December, 1896, to £253,101 in twelve months thereafter; the increase of deposits and current accounts from £2,119,039 in June, 1897, to £2,310,148 in December last; and the bills receivable, secured loans, and other accounts, from £3,875,446 to £3,924,415.

These figures, of course, indicate the more active condition of the bank's business, which in turn, it may be said, is a reflex of the more active state of business generally in the country. Profits, it must have been agreeable to the chairman to announce, had grown from £21,000 in the half year ended December, 1896, to £28,000 in the next six months, and £31,000 in the last half year. It was appropriately stated at the meeting by one of the proprietors, Mr. John Paton, well known in Canada, that the management of the Bank of British North America is very cautious and very conservative. Doubtless this has done much to produce its well-earned reputation for strength and safety. While, however, the bank may have at some recent periods deserved the criticism that it was ultra cautious—in fact, slow-going—the evidences of enterprise and progress shown of late have redeemed it from that reproach. There is no fault to be found in this respect with its more recent policy, in British Columbia, in particular.

BANK OF BRITISH COLUMBIA.

At the half-yearly meeting of the Bank of British Columbia, held in London last month, Sir Robert Gillespie presided. The chairman referred to the business of the six months ending with December as showing a return to the prosperity which had in former years attended the business of the bank. The preparations making in British Columbia, he said, "in all branches of trade for the reception and equipment of explorers and miners are unprecedented in extent, and must lead to very great, and, I doubt not, lucrative extension of the trade of the country; and I am sanguine that this improvement will permeate throughout the whole country." And he referred to the improvement evident in value of real estate and other securities. The net profits of the bank for the six months showed a profit of £18,351, as compared with £14,382 and £14,921 respectively for the previous two half years. And there had been a reduction in expenses of management as compared with 1896. The recommendation of the directors that dividend at the rate of 5 per cent. per annum be declared, and £3,351 carried forward, was adopted. Mr. H. J. Gardiner proposed, and Mr. W. C. Ward seconded the re-election of Sir Robert Gillespie as a director, which was unanimously agreed to. Mr. C. W. Benson was also re-elected a member of the board.

MUTUAL FIRE UNDERWRITERS' ASSOCIATION OF ONTARIO.

On Thursday and Friday of last week, this body met at the Walker House, in Toronto. The president, Mr. J. I. Hobson, of Wellington County, was in the chair. A good representation was present of mutual fire underwriters from Western Ontario, among them Mr. D. C. Macdonald, of the London Mutual; Mr. Jones, of Hamilton; Messrs. R. S. Strong and J. N. McKendrick, of the Gore Mutual, of Galt. From Waterloo there were Messrs. C. M. Taylor and J. Killer; from the Canadian Millers', Messrs. Wm. Snyder and S. Jones; Eramosa, D. Rea and Mr. H. Black; Nichol, Messrs. Wm. Taylor and James Beattie; Halton Union, Messrs. John Ramsay and Geo. Fisher; Puslinch, Wm. Rae; Howick, Messrs. E. Bryans and Wm. S. McKertcher; Guelph, Mr. G. B. Hood; Dufferin, Mr. Wm. Dynes; Dumfries and Waterloo, Messrs. Wm. Deans and James L. Robertson.

The president's annual address made reference to the benefits to be expected from the amendment of the Insurance Act in such wise as to do away with the holding of local investigations into the causes o fires. Local prejudice or local friendships, under the present system, prevented satisfactory results being reached. In his opinion better issues could be reached by adopting some such system as the fire marshal system of the State of Massachusetts. A number of the members discussed the matter, among whom were Mr. R. S. Strong, Mr. C. M. Taylor, Mr. D. C. Macdonald and Mr. Ramsay.

A special committee was appointed to draft messages of condolence to the relatives of deceased members of the association. Mr. Charles Davidson, of the Wellington Mutual; Mr. W. H. Storey, of Acton; Mr. John Beattie, of Fergus, valued members all. A feeling tribu was paid to these by Mr. D. C. Macdonald.

Discussion arose upon several suggestions made at the last annual meeting. One of these was that, in marine, fire, and life insurance, primarily from the uncontrolled power given to juries to finally dispose of the question of materiality and misrepresentation in such cases, the association petition the Ontario Legislature to so amend the Insurance Act as to require the trial judge finally to dispose of all questions of materiality arising under any contract of insurance, notwithstanding that all questions of fact were being tried primarily in such actions by a jury. Another matter was the submission to Government of the Massachusetts fire marshal system, to which reference has been made in THE MONETARY TIMES more than once. It was determined to ask the Ontario Government to make an enquiry into the system of "fire marshal investigations" in operation in the State of Massachusetts, and if it were found to reduce largely the losses from incendiarism, that it be introduced into the Province of Ontario as a public measure.

It was resolved by the meeting that the secretary of the association communicate with the fire marshal at Boston, Mass., with a view to obtaining information about the cost of maintenance, and to prepare a report on the subject. Mr. Jones, of the Canadian Millers' Company, of Hamilton, was appointed an honorary delegate to visit the fire marshal's office in Boston, Mass., and report on the workings of the system.

The election of officers took place on Friday, 11th March. A number of the former were re-elected, several by acclamation. The result of the election was as under:—

President—John I. Hobson, Guelph, re-elected.

First Vice-President—William Turnbull, Paris.

Second Vice-President—R. Gibson.

Secretary-Treasurer—Hugh Black, Rockwood.

Executive Committee—Henry Buller, R. S. Strong, James McEwing, E. J. Pearson and W. S. Russell.

Auditors—P. S. Armstrong and William Deans.

The Inspector of Insurance for Ontario, Dr. J. Howard Hunter, was asked to address the meeting, and did so. He also answered several legal questions put to him by members of the association. The reports of the auditors and the secretary-treasurer were accepted.

CONFEDERATION LIFE ASSOCIATION.

The business of this company for 1897, the report shows us, while exhibiting an increase over 1896, both in number and amount of new policies written and in the aggregate of insurance in force, was not as large as it might have been made had not the management deemed it wise to continue the policy of doing a moderate and safe business, and not paying too much to get it, as some more eager companies do. We observe that nothing is said in this year's report about going to the United States to do business, a matter which was broached with approval at the annual meeting a year ago. But the Confederation does business in Newfoundland, with the Government of which island it has $25,000 deposited. A feature to be commended is that the business of 1897 was actually done at a less cost than that of the previous year. It is well for life companies to keep a check on expenses, which it seems always tend to increase.

We had occasion to remark twelve months ago that the association had determined to use a rate of 3½ instead of 4½ per cent. in valuing policy and annuity obligations. This prudent course has been adopted with respect to all business taken since the beginning of 1896 and being continued. The reason for it, of course, was the permanent lowering of the rate of interest on good investments. It is agreeable to learn that the experience of this company coincides with that of other concerns lending on realty, in showing improvement in interest payments and a better return from, and more sales of property taken over in Toronto. The amount of death claims 243,000, which is larger than the preceding year, is in part explained by several lives falling in on which large insurances were carried. Out of total payments to policy-holders, of more than half a million during the year, $93,000 was in the shape of endowments, and the large sum of $89,000 was distributed to policy-holders in cash profits—always a welcome feature to the recipients. The amount of cash profits so paid by the Confederation in a quarter century has exceeded a million dollars.

NOT MINING CLAIMS, BUT OTHER CLAIMS.

A recent circular issued by the South Kootenay Board of Trade gives some facts and figures which show in an interesting way the quick growth of mining towns. It instances Nelson, one of the chief towns of Kootenay West district. It was made a port in August, 1895. Previous to that time it was an outport of New Westminster. The collections at the port have steadily grown—grown so steadily that their total was more in 1897 than the seaport of Vancouver; the receipts at Nelson being $431,038, as against $407,762 at Vancouver. Figures are given of the customs returns at Nelson, thus:—

	Value Imports.	Value Exports.	Duty Collected.
1895............	$ 397,393	$ 736,839	$ 84,738
1896............	1,147,173	2,790,628	254,851
1897............	1,539,993	7,724,522	431,038
Totals......	$3,084,559	$11,251,989	$770,627

As showing the relative commercial importance of the several outports of the district, the following returns are the amounts collected at each for the seven months ending January 31st, 1898: Nelson, $70,777.53; Kaslo, $43,077.02; Rossland, $41,441.70; Trail, $15,556.41; Nakusp, $9,052.51; Waneta, $6,794 50; Rykert's, $946.61.

As to the inland revenue, the amount collected at Nelson during the six months ended June, 1897, was $14,032; and for the last six months of that year, $19,162, making in all $33,194. Then the activity of business at the post-office is shown in the $11,163 worth of stamps sold there in twelve months. The aggregate of money orders issued was $70,661, and of money orders paid, $14,873, while the registered packages handled averaged 1,350 per month last year. All these statistics are advanced as a reason that the Dominion Government should provide in Nelson a building fit for the transaction of such extensive and growing business. The present building is distinctly unfit, so the board declares, and the claim seems reasonable. Some other features showing the importance of the place are cited by the circular. Among them the Hall Mines smelter, the presence of agencies of three banks, the possession of wholesale houses. It is besides the single point that has both competitive rail and water transportation. "On the completion of the Crow's Nest Pass Railway it will be the western terminus of that road, as it is now the terminus of the Columbia and Kootenay Railway, the Slocan River Railway, and the Nelson and Fort Sheppard Railway. It is the point at which are located the general offices of the Canadian Pacific Railway for the entire Kootenay district."

WITH THE DRY GOODS TRADE.

For flannelettes there is an active demand. Saxony flannels are in demand in all the shades, pinks, light blue, white and scarlet.

The designs in cottonades, shirtings and similar goods are practically unchanged for the autumn. Prices, too, remain unaltered at the basis of values quoted at the beginning of the spring trade.

Reports from Chemnitz are to the effect that looms are engaged to their utmost on fancy hosiery. Not only is the American market taking large quantities of fancy hosiery, but also those of England and the continent. This has increased the cost of manufacture, due to the demands of operatives for higher wages, which had to be acceded to, and this has had some effect upon prices here.

The crocuses are in bloom in Toronto this week, robins are heard in various parts of Ontario, and the crows are in evidence—all signs of spring. There are spring floods, too, lest anybody should doubt the warmth of the sun. Spring trade is moving, probably as a result of the mild weather, helped, too, by the cheap fares that the Grand Trunk and C.P R. are giving us in Quebec and Ontario. These cheap fares have sent hundreds of buyers to the cities.

Germany is one of the homes of Protection, says the *Draper's Record*, and at the present time an interesting dispute is going on there between the spinners and consumers of cotton yarn. The former are doing all they know to induce the German Government to increase the import duty on yarn, so as to decrease the shipments from the United Kingdom, and bring more business to German mills. It is not surprising to learn that the very important body of German yarn consumers are entirely opposed to such a step, and have banded themselves together into an association, in order to prevent its accomplishment.

On Thursday, March 10th, Messrs. R. Green (London), S. O. Shorey, E. A. Small, W. H. Doull, H. Horsfall (Montreal), S. F. McKinnon, J. Watson, W. R. Johnson and T. O. Anderson (Toronto), had an interview with the Minister of Finance on a subject we dwelt upon last year. The delegation represented the ready-made clothing business. They wanted the old differential rate of five per cent. in favor of the trade restored. There is at present thirty-five per cent. duty on the raw material and thirty-five per cent. on the manufactured article. They want to import the raw material at thirty per cent., so as to be able to manufacture. Mr. Fielding promised to consider the matter.

At a meeting of the Board of Supervisors in Buffalo on Monday last, a bill was adopted, prepared by the Single Line Dealers' Association, which proposes to govern and restrict the departmental stores. The bill, which is to be introduced in the State Senate this week, classifies business in groups and grades, numbering eighty classes and thirty-six groups, including from one to several classes of business. The license fees are fixed as follows: For first group, $1; for the second group, $100; for the third group, $5,000; for the fourth group, $10,000; for the fifth group, $20,000; for the sixth group, $40,000; for the seventh group, $80,000; for the eighth group and every group thereafter, $100,000 per annum. Thus, a firm dealing in one class or group of merchandise would pay a license of $1. Adding other classes of merchandise, or departments, would require the payment of fees from $100 for one additional group or department to $100,000 for eight additional groups or departments. The bill especially provides that $100,000 shall be the limit collected as license for conducting business under any number of groups.

FOR GROCERS AND PROVISION DEALERS.

A man from Maine is said to have secured an option on all the sardine factories in the State for a syndicate of English capitalists. There are 53 factories in Maine, and Mr. Stevens has an option on them for ninety days, at a figure representing nearly $1,500,000.

Our Montreal letter this week says that the tea market there, which has been quiet thus far in the month, is taking a more firm and active tone from an expected demand by reason of the large destruction of teas at the R. Carrie & Co. storage warehouse fire the other day. New season Japans are expected to open higher than last year, while Ceylons are easier.

Dan. Talmage & Sons, Charleston, wire on 15th inst., Carolina rice crop movement to date: Receipts, cleaned, 56,490 barrels; sales, 55,050 barrels; steady though limited demand; market firm. Louisiana crop movement to date; Receipts, rough, inclusive of amount carried over, 500,275 bags, last year, 561,370 bags; sales, cleaned (estimated), 101,957 barrels; last year, 98,950 barrels; market quiet but strong; prices firm, and with limited stock an early advance is anticipated.

American dairymen have pronounced very decidedly against fodder cheese. At a recent meeting of the Utica Dairymen's Board of Trade, it was decided that the factories in its association shall not begin the manufacture of cheese before May 9th. Heretofore they have opened the latter part of April or the first of May. Dairymen's boards around Utica section of the country have deprecated in strong resolutions the overproduction of last year. Dairymen claim that the price of cheese is lower at this season than it has been in twenty years, and figures seem to prove that there is a sufficient quantity on hand to supply the trade to June 15th of this year. Resolutions were unanimously passed by the Utica Dairymen's Board condemning fodder cheese as uneconomical.

The New York coffee market, of Monday and Tuesday, showed few transactions. Sales were made on Monday at 5⅞c. for invoice lots of No. 7 Rio. The market for spot mild coffees was very steady, but only moderately active. The Maracaibo and Central American styles monopolized the greater part of attention, as heretofore, says the *Commercial Advertiser*. Brazil coffee, ashore and afloat, is thus given by the *Bulletin* of 16th:

Stock in New York	663,967	bags.
" Baltimore	65,141	"
" New Orleans......................	54,443	"
" other ports......................	.....	"
Total	783,551	"
Afloat from—		
Rio per steam to March 14th	204,000	"
Rio per sail to March 14th	57,000	"
Santos per sail to March 14th	102,000	"
Victoria to March 14th	17,000	"
Bahia to March 14th	17,000	"
Total	1,180,551	"
Same time last year........................	754,178	"

INSURANCE MATTERS.

Mr. Geo. W. Wood, a well-known insurance agent, passed away on Tuesday last. He was agent of the Atlas Assurance Company, and a real estate broker. He was a member of the firm of Wood & Macdonald until the latter's death, when his son became partner. The cause of his death was pneumonia, and he had been ill but ten days.

An analysis of 2,000 accident policies on which benefits have been paid shows 531 persons injured by falls on pavements, 243 by carriages or wagons, 73 by horse kicks or bites, and 47 by horseback riding; 117 were cut with edge tools or glass, 96 were hurt by having weights fall on them, and 76 were hurt in bicycle accidents; while 72 were hurt by falling downstairs.

The report of the Montreal Fire Department for 1897 has been issued. During last year there were 794 alarms, sixteen more than the preceding year. Of the total number 635 were for actual fires and 159 for chimney fires, false alarms, etc., 189 were still alarms. There were sixty-two false alarms. Two deaths of persons occurred through fires. Fifteen horses were burned to death.

According to Dr. Schwartz, of Berlin, marriage is the most important factor in longevity. Of every 200 persons who reach the age of 40 years, 125 are married and 75 unmarried. At 60 years the proportions are 48 to 22; at 70 years, 27 to 11, and at 90 years, 9 to 3. Fifty centenarians had all been married. The doctor asserts that the rate of mortality for husbands and wives between the ages of 30 and 45 is 18 per cent., while that for unmarried persons is 28 per cent.

The Provincial Mutual Hail Insurance Company of Manitoba held its seventh annual meeting in Winnipeg recently. Directors were elected as follows: John Renton, Deloraine; T. L. Morton, Gladstone; C. J. Thompson, Virden; F. Shultz, Baldur; Jas. Molland, Glendale; H. B. Brown, Morden; Robert Strang, Winnipeg. The directors meet in March for reorganization. The report contains the following: "The acreage insured was 43,105 acres and number of policies issued was 597. The notes received amounted to $10,776.25, and the number of claims made was sixty, which were adjusted at $6,664.45. As in former years a great many farmers who were not insured suffered loss by hail, thus again showing that farmers should insure their crops against this source of loss. Your directors, during the year, have been able to pay up the balance on the losses of 1893, and also the balance on 1895 losses, and have paid 50 per cent. on the losses of 1897. The balance of 1897 losses your directors expect to pay at an early date. When this is paid the company will be clear of all liabilities."

AMERICAN BANK CLEARINGS.

A very large export of grain, an increased output of iron ore, great railway traffic and much industrial activity are features in the States to account for the remarkably large clearings at United States cities last week. According to *Dun's Review* the clearings for last week at fourteen leading cities were $1,176,887,000 as compared with $846,691,000 in the same March week of 1897, and $1,165,304,000 in the corresponding week of 1892. The figures are as under:

	Week, March 17, 1898.	Week, March 11, 1897.	Per Cent.
Boston	$105,326,674	$87,269,576	+20.7
Philadelphia...... ..	68,386,798	51,907,140	+31.7
Baltimore	15,977,936	13,176,827	+21.3
Pittsburg	17,967,962	12,701,053	+41.5
Cincinnati..........	11,902,200	11,185,500	+ 6.4
Cleveland	7,163,524	5,394,648	+32.8
Chicago............	97,681,999	75,423,094	+29 5
Minneapolis	6,725,869	5,773,269	+16 5
St. Louis	28,091,053	24,016,505	+17.0
Kansas City........	11,883,785	9,902,921	+20.0
Louisville	7,393,843	5,111,494	+44.7
New Orleans	10,497,974	9.577,047	+ 9.6
San Francisco......	15,683,056	10,742,152	+46.0
Total	$404,682,673	$322,181,226	+25.6
New York..........	772,205,256	525,510,182	+47.2
Total all	$1,176,887,929	$846,691,408	+39 0$

Bank exchanges for the week at thirteen leading cities in the United States outside New York are $404,682,673, being 25.6 per cent. over last year, and 11.6 per cent. over 1892. Nearly all cities continue to show large gains over last year. New York, Philadelphia, Cincinnati and Minneapolis report a small loss compared with 1892; at other cities reporting, exchanges are larger.

THE JOHN EATON FIRE.

Judgment has been given in what is known as the John Eaton fire case, wherein suit was brought by the Bank of Toronto, assignee of a number of fire policies, against the Quebec Fire Assurance Company, as representing a group of fire insurance companies whose policies amounted in the aggregate to nearly $100,000, and who had refused to pay, alleging grave irregularities on the part of the department store firm of John Eaton & Co., Toronto, and suggesting arson by some employee. The trial lasted for many weeks (January 10th to February 19th), and an enormous amount of expert evidence was given by accountants as to the condition of the books, merchants as to the character of the stock, fire adjusters as to circumstances alleged to justify suspicion of fraud. The decision now given is adverse to the insurance companies. Out of the total insurance carried by the firm, amounting to $219,000, something over $100,000 was, we believe, in "underground" companies in the United States.

The judgment finds: That there was no claim established in respect of arson, nor was fraud made out in the declaration of claim for insurance, and the evidence both from books and witnesses showed that the total loss by the fire amounted to $277,000. No effect is given to the claim that something should be allowed for depreciation of stock, the evidence not being regarded as sufficiently clear. It is held by the court that if any depreciation were allowed it would not affect the case, because no amount of depreciation such as could be allowed by the court could bring down the total amount of the insurance, which was $219,000, according to the claim of the bank. The bank is given judgment for $5,000, the amount of the policy in the Quebec company, which, as we have said, will govern the other underwriting companies. Unusual interest in the case arose from the fact that an effort was to be made by the defence to show fraud, and, if possible, arson; while the plaintiffs sought to defend the characters of several members of the John Eaton firm, which it was said had been impugned. The expected evidence as to arson was not forthcoming, hence the defence made a strong fight over the stock sheets, which were said to be an inventory of the goods in the store in October, 1896. These stock sheets, they claimed, were padded to the extent of $97,000, and this was admitted by Richard Baker, who prepared them, when he was put in the box. His explanation, however, was that he had lost a parcel of the sheets, and, to save his employer, had repeated batches of invoice sheets here and there to make up the totals in each department. The proofs of loss estimated the stock destroyed at the fire at $277,000, but the defence contended that this was about $100,000 too much. The case will, we understand, be appealed.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, March 17th, 1898, compared with those of the previous week:

CLEARINGS.	Mar. 17th, 1898.	Mar. 10th, 1898
Montreal	$14,252,209	$14,693,894
Toronto	8,006,615	9,401,158
Winnipeg	1,344,126	1,426,793
Halifax	1,053,929	1,226,837
Hamilton	653,040	705,320
St. John	496,344	537,961
	$25,806,263	$27,991,963

Aggregate balances this week, $3,754,034; last week, $4,130,216.

—Another edition has just been published of the original and valuable pamphlet, "A Few Facts," authorized by the Dominion Government and prepared by the Western Canada Immigration Board. The present edition differs from the first only in the addition of maps and views of the Klondyke gold district, and an extract from the speech of Mr. Wm. Ogilvie, F.R.G.S., on the value and importance of the Yukon country. The *fac-similes* of letters from actual settlers in Manitoba and the Territories form, as before, the bulk of the book. Canadians who have friends in the United Kingdom or Northwestern Europe should procure from Ottawa or Winnipeg a supply of this excellent immigration literature, which is as satisfying and convincing as anything can well be.

—Kaslo, British Columbia, is an up-to-date Western town. It formed a board of trade the other day and applied to the Dominion Government for a charter. This has been received. The requirements of the town are to be placed before the local authorities at Victoria by a committee of three members of the board and one from the city council. The delegates are Alderman J. D. Moore, for the city, and President G. O. Buchanan, Mr. Alexander Lucas and ex-Mayor Robert F. Green, for the board of trade.

—According to the report for 1897 of the United States Commissioner of Patents, out of some 1,800 patents granted in that country to foreigners during the twelve months, 286 were granted to Canadians. The number of patents issued to residents of England was 706; of Germany, 551, and of France 222. It appears that the most noteworthy of these patents are those connected with the development of electrical inventions.

—A Halifax despatch of Monday last states that Hon. W. J. Stairs, who has been a director of the Union Bank of Halifax since 1867, has resigned owing to advanced years. Mr. Wm. Robertson has been elected to the presidency and Mr. Wm. Roche vice-president of the board.

—The result of the year's business to the Peoples Bank of New Brunswick has been to enable the payment of eight per cent. dividend, add $10,000 to Rest, making that fund $130,000, and carry $12,000 forward to profit and loss account.

Meetings.

CONFEDERATION LIFE ASSOCIATION.

The twenty-sixth annual meeting of the Confederation Life Association was held at the head office of the company, Yonge, Richmond and Victoria streets, Toronto, on Tuesday, March 15, 1898, at 3 p.m.

There was a fair attendance of shareholders and policy-holders.

Mr. W. H. Beatty, vice-president, was appointed to act as chairman, and Mr. J. K. Macdonald, managing director, as secretary.

After the usual formalities the following report and statements of the affairs of the association for the year 1897 were presented:

REPORT.

The year 1897, like some of those which preceded it, was one that called for the exercise of much care and prudence, both in regard to obtaining new insurance and in the investment of the funds. It would have been quite within the ability of your directors to have largely increased the volume of new business, but it was deemed the wiser course to continue the conservative policy of the past, and do a safe, though moderate business, at a reasonable cost.

The policy-holders and shareholders will note with satisfaction that while an amount of new insurance was secured slightly in excess of that of 1896, it was obtained, and the entire business of the association conducted, at a cost actually less than for that year.

The total applications received during the year were 2,164 for $3,332,485 of insurance; 2,072 for $3,143,285 were approved and policies written; 85 for $182,200 were declined, and 7 for $7,000, being incomplete, were deferred. Including bonus additions, the new business for the year was $3,168,172. The total business in force at the close of the year was $28,332,005.00, under 18,915 policies on 16,427 lives.

In the matter of the valuation of the policy and annuity obligations, for all business taken since December 31, 1895, a rate of 3½ per cent. only has been assumed.

Your directors are pleased to be able to report a very fair increase in the returns from property taken over in the City of Toronto, and with the improvement which seems to be very generally anticipated, a still higher return is looked for during the present year. They are also very glad to report that the payment of interest on mortgage account has been very much better than for some years past. The actual collections were about 16 per cent. in advance of those for 1896, while the amount due and outstanding at the 31st December last was almost 25 per cent. less than at the corresponding date of 1896. It may also be stated that several house properties have been sold during the year to realize all the company had against them.

The death claims arising in the year aggregated the sum of $243,824. These occurred under 140 policies, on 119 lives. While well within the tabular rate, it is larger than the usual experience of this company, and arises largely from the fact that several lives fell in on which there were large insurances carried, which considerably increased the average. The above, considering the lives at risk and the age of the company, will strongly attest the care exercised by the directors in the admission of only healthy lives.

Attention may be called to the very large amount paid by the association during the past year to its policy-holders and annuitants, and especially to the sum of almost $90,000 cash profits to policy-holders. The total payments including $8,031, the amount received from re-insurances, and which is deducted from the death claims in the financial statement, were $511,752.62.

It may also be mentioned that this association since its organization has paid a total of $1,034,214.74 cash profits up to the close of last year to its policy-holders, an amount equal to 43 per cent. of the total death claims during the same time.

The financial statements herewith submitted exhibit the transactions of the association and its condition on the 31st December last.

The auditors have given strict attention to their duties, making their investigations from month to month, and their report will be found appended to the financial statements.

The directors are also pleased to report that the field and office staffs continue to discharge their duties with efficiency and diligence.

All the directors retire, but are eligible for re-election.

W. P. Howland, President.
J. K. Macdonald,
Managing Director.

FINANCIAL STATEMENT.

J. K. Macdonald,
Managing Director.

AUDITORS' REPORT.

We beg to report that we have completed the audit of the books of the association for the year ending December 31st, 1897, and have examined the vouchers connected therewith, and certify that the financial statements agree with the books and are correct.

The securities represented in the assets (with the exception of those lodged with the Dominion Government, amounting to $84,500, and those deposited with the Government of Newfoundland, amounting to $25,000) have been examined and compared with the books of the association, and are correct, and correspond with the schedules and ledgers.

The bank balances and the cash are certified as correct.

W. R. Harris,
R. F. Spence,
Auditors.

Toronto, Feb. 22nd, 1898.

The chairman, Mr. W. H. Beatty, in moving the adoption of the report, commented on the very satisfactory state of the affairs of the association, and stated that the new business for the year 1898 showed a satisfactory increase over that for 1897 at the same date.

Several of the policy-holders and stockholders present referred in complimentary terms to the success which has attended the operations of the association, and the report was unanimously adopted.

Resolutions of thanks, which were suitably responded to, were also passed to the directors, officers, auditors, medical examiners, field and office staffs, for their faithful services during the year.

All the retiring directors were re-elected, viz.: Hon. Sir W. P. Howland, Messrs. Edward Hooper, W. H. Beatty, Hon. Jas. Young, S. Nordheimer, W. H. Gibbs, A. McLean Howard, Walter S. Lee, A. L. Gooderham, W. D. Matthews, George Mitchell, Frederick Wyld, J. K. Macdonald.

At a meeting of the new board, held immediately after the annual meeting, Hon. Sir W. P. Howland, K.C.M.G., C.B., was re-elected president, and Messrs. Edward Hooper and W. H. Beatty, vice-presidents.

JOHN WANAMAKER'S REASONS.

John Wanamaker's reasons for insuring his life for $1,500,000 are stated as under. This great merchant is also a large patron of life assurance:

As the resultant of my own thinking, without any moving cause, except my own judgment, I deliberately worked out these five conclusions:

One—I was insurable, and accident or ill-health might come at any moment, when I would not be insurable.

Two—That life insurance was one of the best forms of investment because it gave, after one deposit, an instant guarantee that might repay principal and interest and more.

Three—That life insurance in the long run was a saving fund, that not only saved but took average care of my deposits, and took me into partnership in possible profits, that not infrequently returned principal and interest and profit.

Four—That life insurance regarded from the standpoint of quick termination was more profitable than any other investment I could make.

Five—That it enabled a man to give away all he wished during his lifetime by providing an estate for those left behind.

One of my first acts upon coming of age was to take out a policy, and I have been taking out others ever since.

—"What is investment, Grandpa?" "Well, it is giving a man a five-dollar dinner, and then selling him a two-hundred-dollar bill of goods."—Detroit *Free Press.*

—The Bulletin of the American Iron and Steel Association, just issued, states that the production of ingots in 1897 was the largest in the history of the United States, the total output being 5,475,318 gross tons, against 3,919,906 tons in 1896, an increase of over 39 per cent. The production of Bessemer steel rails by the producers of Bessemer steel ingots in 1897 was 1,614,399 gross tons, against a production of 1,102,892 tons in 1896.

SILENT SALESMEN.

A paper with this title was read before the Ohio Hardware Association in February, by Fred. Haberman, of Marion, O. We condense it as under:

Silent Salesmen! Those inanimate aids to business which yet speak louder than the men who make use of them, and make or mar the merchant's prosperity, according as they are controlled; that work night and day, week days, Sundays and holidays, rain or shine; that don't go to funerals in the baseball season, don't throw business to the winds every time a brass band comes up the street, nor try to flirt with lady customers.

The name of the first is the store front. It stands to an establishment as the face to a man, and the wayfarer is attracted or repelled by the first sight of a person's countenance. One does not associate thrift with an unpainted building any more than with an unwashed face, nor does he expect courteous, intelligent, satisfactory service when he enters a store the very outside of which proclaims a man indifferent to appearance. A dingy, weather-beaten sign, second story windows rendered light-proof with dirt, a broken step or badly arranged entrance, old worthless samples displayed outside, ashes dumped into the road before the door—each and all betoken a laxity that will in all probability find further expression within, and cause a prospective purchaser to seek further.

Next in order, and equal in importance, come the show windows, the eyes in the store's face, through which the business looks forth at the buyer, ogling and cajoling him, captivating his errant fancy and creating hot desire, or repulsing by indifference to his opinion, even as is the way of a maid with a man. There is a general recognition of the importance of having the show windows well and frequently dressed, and yet one does see lamentable cases of neglect and ill-judgment in this regard—where the goods from a dozen different lines are arranged in a jumble that fails to make any impression whatever upon the casual observer, or where the same articles are displayed week after week without change. All must observe a very few—two or three—plain rules that form about all there is to three-fourths of the articles that are written concerning window display:

Cleanliness, neatness and light.
But one line of goods at a time.
Frequent changes.

The third silent salesman is the advertisement.

The work lies outside the store, going to the homes and business places of the purchasing public and soliciting favors for the merchant, with accounts of bargain sales, dear to the heart of the good housewife, tools of the artisan, implements for the farmer, hammocks and bicycles for the summer girl, sporting goods for the swaggering youth and all sorts of things for the head of the family.

This is the age of printer's ink. Great are the "ad.," the "write-up," the "free puff," the "reading notice" and the "fake scheme," and thrice blessed is that ironmonger who knows how to employ them to get the maximum of results with the minimum of expense. The advertising manager of one of the great monthlies says in a burst of confidence, that only about 10 per cent. of his patrons make it pay to advertise, but of the purely local advertisers it is probable that less than 10 per cent. find that it does not pay. A merchant must advertise, or spiders will spread their nets across his doorway. The public expects it of him and goes to buy at stores the proprietors of which pronounce them as the best and largest, with finest stocks and lowest prices—and if the proprietor doesn't know who does?

Fourth comes good stationery.

It is surprising how little value is often placed upon this valuable assistant to a good impression. It is recognized that the largest firms in the country all use good stationery, and the appearance of the letter alone will generally determine the commercial importance of the writer. It costs very little if any more for good, well arranged letter-heads, bill-heads, statement blanks and envelopes than for poor ones.

Fifth is punctuality, promptness in delivering goods, sending bills and collecting accounts. The customer who gets his goods quickly is pleased. He wants his bill at once to see that all is right regarding the price, and if payment is exacted when due he is apt to remain the merchant's friend.

And still the force of silent salesmen increases. The dodger, labor-savers, full stocks, convenient stores, all deserve due credit for the good work they do in aiding the merchant to increase his sales. His "silent salesmen" form a longer list than that which is found upon his payroll, and the wise hardwaremen will see that they are all employed and doing their best to help him in his race for supremacy in his field of endeavor.

GLASGOW MUNICIPALITY AND INSURANCE.

Municipal or State fire insurance is an old story. Just about three hundred years ago "an ingenious person" propounded to Count Anthony Gunther von Oldenburg a scheme of State insurance, but embracing only a portion of the houses in one combination, so as to avoid the consequences of a large fire. The principles of insurance were at that moment in their infancy, and the Count must have regarded the proposition as a conundrum. He replied, after much thought, that the scheme was suited for a company independent of the State, and declined to adopt the proposal. A petition of a different kind was presented to Charles I., offering "to insure all your Majesty's subjects for soe much of their estate combustible as they themselves shall conceive, in case of Fire, not taking above 12d. per centum yearly for soe much soe insured." This petition was followed by others, and patents were granted, but owing to the political difficulties of the time, or the king's pitiful end, the patents were not turned to account. In Charles II. s time an opposite view was taken, for, when the subject was brought before the Common Council of the City of London, they thought it quite unreasonable "for private persons to manage such an undertaking, or that any one but the city should reap the profit of the enterprise."

The idea of fire insurance was hovering about in this way when suddenly, on 2nd September, 1666, the great fire of London occurred, the results of which brought to the minds of the citizens, in a very practical form, the necessity for something more than mere quibbling about fire insurance. Various independent schemes were started, which the Common Council, following up their earlier deliverance, endeavored to thwart, and a fierce effort was made by the Council to secure the business of insuring the houses of the citizens, pledging the security of the city for the fulfilment of the contracts. The struggle went on for thirteen months "with much turmoil and only small results," when it was said to have been found that the city was acting beyond its powers. Either for that reason, or because the combinations carrying on fire insurance business had never ceased to make loud complaint, the city retired from the contest, and since that time the business has been left in the hands of companies. Municipal insurance has been tried in other countries, but with no results to encourage imitation.

It is improbable that any municipality in Britain will seek to enter on the path of general municipal insurance, but it is not unlikely that some branch of the subject will come up occasionally for consideration. It seems quite natural that it should do so in a municipal council which manages well for the citizens the supplying of gas, and water, and a tramway system, in addition to building houses and doing the multifarious work required in a large city; and it is not to be wondered at, therefore, that the Glasgow Council should feel inclined to undertake the insurance, at the risk of the community, of the properties belonging to or under the administration of the corporation. Their success in the schemes and work for the benefit of the citizens is urging them ever forward to new enterprises, and we may yet see extensions embracing municipal shopkeeping, and possibly municipal workshops. We may have a difficulty, in fact, some day, in keeping the Town Council out of our chimneys.

* * * * *

But if it is granted that all the work carried on, and kindred work which may be added, is justifiable, it is still true that the fire insurance proposal may be unwise. Ordinary municipal schemes are a matter of expediency and management, but the management which almost compels success in these ordinary schemes is powerless in dealing with such a scheme as fire insurance founded on a wrong principle. The best management, for example, could not avert loss in life assurance if the established basis of that system were departed from; and in the same way, it may be said, the principle of fire insurance cannot be violated without exposure to disaster. Many years of experience have proved that the essential principle of fire insurance is distribution of loss. The danger of disastrous loss to each insurer is minimized or avoided by variety in the character of risks, and by spreading them over wide areas and large numbers of persons, so that the loss shall be shared in moderate and easy proportions by the entire body of insurers. The proposal of the corporation is at variance with these requirements. The safety from distribution of loss, variety in the character and location of risk, and the copartnery of a large number of persons to share the burden, are all essentially absent. Everything is put to the touch, and if there is any principle discernible, it is the pseudo one of running the risk. Such a system as is proposed is not insurance in its true sense, but is rather of the nature of a speculation. It proceeds really upon a hope or expectation that a fire in municipal offices or dwelling houses is unlikely to occur: but the same may be said of many classes of property. What name would be applied to the owners of the latter if they failed to cover their risk from fire by insurance?

The truth is that the course proposed in the Glasgow Town Council is founded entirely upon the relief which can be got from rating the citizens should a large fire take place. It is a municipal fire insurance system to be supported out of the rates; and the owners of property, who will have to pay one-half of the loss, had better look to their interests. There may be no fire, or little loss, but there may be a great fire, with great loss, and to make provision, as is proposed, for the former result mainly, is something akin to gambling.—*Scottish Critic.*

AN HONEST MAN.

"Now look here, Thompson," remarked Brown: "it has been six months since you borrowed that five dollars from me."

"Seven," corrected Thompson, gravely.

"Well, then, seven months," snorted Brown, "and you promised to give it back to me in a week. Promised faithfully, you did, to return me it in seven days, instead of months."

"I know it," answered Thompson, sadly, drawing a memorandum-book from his pocket. "That bill was 'Series F., No. 672,929, issue of 1887.' I made the note, and then I spent the money. Since then I've been trying to recover it."

"But," howled Brown, "any other would do as well."

"No," responded Thompson, shaking his head: "I'm a man of my word. When you gave me the bill I said 'I will return this to you,' and I meant it. Brown, old man, just as soon as I come across No. 672,929, Series F., issue of 1887, I'll see that you get it, for I am not the one to go back on my promise."—"Editor's Drawer," *Harper's Magazine.*

SOME PECULIARITIES OF LAKE SHIPPING.

The February number of the *Nautical Magazine* (London) contains a short article on "Shipping of the Great Lakes," written by Wm. P. Anderson, general superintendent of Canadian light-houses.

"The type of vessel originally used for freighting throughout this lake system," says Mr. Anderson, in one paragraph, "was a three-masted schooner, carrying fore-and aft sails—rarely a foretop sail and top-gallant sail—limited in draft to the depth in the old canals, 9 feet, but borrowing improved beating power by the use of a centre-board. Next, propellers were introduced, of a hideously ugly type, literally built to fit the canal locks, and having their draught limited first to 9, and after the enlargement of the Welland canal, to 14 feet, and their length to 270 feet, or 200 feet for the River St. Lawrence canals. Keenness of competition soon taught the lesson that the larger vessel was the cheaper carrier; and from that conclusion an abandonment of the Welland canal route, and the selection of ports on Lake Erie which would permit the use of vessels larger than the docks would accommodate as eastern termini of the great lake freight traffic, was a logical step. Gradually the type has changed, the wants of shipping have forced the Government to spend more and more on the improvement of connecting channels and harbors, and to-day it is literally true that with every inch of additional draft gained, so larger steamers and barges are built to take advantage of the improvement. Owners and agents are kept thoroughly posted on every little fluctuation in level, and load down to the last inch that can be wriggled over the shoalest spots to be navigated, while they are ever demanding still deeper channels that they may build still bigger boats."

Then Mr. Anderson writes of the most recently-built freight steamers, which he describes as fine vessels, comparing with ocean freighters in size, but modified in many details to suit the peculiar conditions of lake traffic. "A point of special interest," he says, "is the difference in methods of navigating these large and valuable lake vessels from those practiced at sea. Lake captains, as a class, are pilots rather than navigators; their routes are land-locked, courses are comparatively short, and landmarks are frequent. Aids to navigation are liberally supplied by both Canadian and American Governments, and thick weather is fortunately infrequent, compared with that encountered at sea. Consequently masters depend on time runs for picking up landmarks, and I have never heard of a lake captain taking a sextant observation for position. It is a question if a dozen of them have sextants on their ships. Lead lines, too, are very seldom used, though all the American waters have been admirably surveyed and charted, but vessels are pushed along at full speed, and sight is the main guide depended upon for safety. It is wonderful how well vessels are managed in this way, how small the percentage of accidents is, and how skillful in manoeuvring constant practice makes the officers. To see two big freighters passing each other in a rock cut, less wide than the length of either of them, with an indraught of water displaced by their bulk that bares the shoals on each side of the cut, or to see one of them going to her berth in the Sault canal or in a crowded harbor without any loss of time or assistance from tugs or capstans, is a liberal education in the possibilities of handling heavy vessels."

FOR DENUDED LAND IMPROVEMENT.

The Milwaukee *Sentinel*, of March 2, stated that the first steps in a colossal colonization scheme had been taken at the Hotel Pfister, that city, on that date. The aim is to settle up the lands in Clark, Jackson, Marathon and Wood counties, Wisconsin, in all of which the greater portion of the pine and much of the hardwood has been cut off. These counties are rich in agricultural possibilities, and are in the belt of Wisconsin adapted to the culture of the sugar beet. One of the principal advocates of the project is ex-Governor W. H. Upham, and other lumbermen are interested in the scheme. These operators own vast tracts of land from which the pine has been cut, and now seek to convert the stripped tracts and the intervening hardwood lands into improved agricultural areas.

The owners represented at the meeting referred to included the Necedah Lumber Company, Necedah; the George Hiles Land & Lumber Company, Dexterville; the Central Trading Company; Rielbrock & Halsey, Athens; Benson & Anderson, and the Clark County Land Companies, of Milwaukee; the Northwestern Beet Sugar Company; the Central Farm Land Company, La Crosse; the Upham Manufacturing Company, Marshfield, and the John Arpin Lumber Company, Grand Rapids.

Commercial.

TORONTO MARKETS.

Toronto, March 17th, 1898.

BREADSTUFFS.—A change in quotations for patent winter wheat flour and straight roller is to be noted. The market here is flat and the eastern trade has dropped out. A telegram to one of our firms from Quebes reads: "Are not buyers of anything now, not even peas." The impression prevails that the arrival of some sprouted wheat in Liverpool from Canada is a reason for the present condition of the market, and until the matter is probed and threshed out, a hasty revival of that trade on these markets cannot be expected.

DAIRY PRODUCTS.—The supply of dairy butter is not large, and prices are firm, dealers quoting large rolls 18 to 20c. per lb. There is no tub offering in the market. Creamery is becoming more plentiful, as the supply of milk becomes larger. Values are as follows: tubs, 20 to 21c., and prints 21 to 22c. per lb. Cheese is featureless. Local trade is fairly good, but prices are low and the market depressed and unsatisfactory. There are reported fair stocks of cheese in the country. Fresh eggs are coming forward freely. The Easter trade is now the all-important element. Dealers quote 12c. per dozen, with possibilities of a decline.

DRIED FRUITS.—The stock of evaporated apples on the market is better in quality than usually at this time of the year. At 9½c. per lb. the apples are dear, compared with California dried fruit. The consumptive demand is large. There is not a large stock of dried apples in the market, dealers quoting 5½c. per lb. California evaporated fruits remain unchanged in price. We quote: Apricots, 50 lb. boxes, 9c. per lb.; prunes, 90 to 100, 5¼c. per lb.; do., 80 to 90, 5¾c. per lb.; do., 70 to 80, 6¼c. per lb.; do., 60 to 70, 6½c. per lb.; do., 50 to 60, 7¼c. per lb.; do., 40 to 50, 8c. per lb. New stock peaches arrived this week and are selling at 9½c. per lb.

GRAIN.—Prices are generally lower, and business is dull at the decline. Wheat shows a still greater decline from last week. Barley also shows a falling off in value.

VISIBLE SUPPLY.

Visible supply in the United States and Canada:

	March 12, '98. Bush.	March 13, 97. Bush.
Wheat	32,415,000	41,449,000
Corn	42,652,000	26,795,000
Oats	12,866,000	13,528,000
Rye	3,409,000	3,616,000
Barley	1,650,000	3,135,000

GREEN FRUITS.—Demand for oranges as a consequence of the spring weather is stronger, and a larger trade is doing. The season for marmalade oranges is about over, and not more than one consignment is expected here in addition to present stocks. The trade has been fairly good. Jamaica oranges are selling well, but are in small supply. Consumption is principally supplied by California Navels and Seedlings. Valencias are practically out of the market. We quote: Washington Navels, 96s, 112s, 126s, $3.25 per box; do., 150s, 176s, 200s, 216s, $3.50 per box; California Seedlings, 150s, 176s, 200s, 216s, $2.50 per box; do., 126s, 250s, $2.25 per box; Valencia oranges, 420s, $5.50 to $5.75 per box; do., large, 420s, $6 to $6.25 per box; do., extra large, 420s, $6.75 to $7 per box. Lemons are in good demand; the supply is fair, but stocks at importing points are reported rather limited. The quality of the stock is excellent, and prices are advancing. We quote: New Messina, fancy, 300s, 360s, $2.75 to $3; do., choice, 300s, 360s, $2.25 to $2.50. There is an increasing turnover in bananas, but, of course, it has not yet assumed important dimensions, being now about three cars a week.

HIDES AND SKINS.—The tendency of the market is downwards. Values have, it is thought, been too high for some time, and the usual reaction is setting in. Dealers are paying 8½c. for green and quoting cured at 9c. per lb. The prospects, at the time of writing, point to a decline of ½c. per lb. in the price of green. It remains to be seen what effect, if any, this will have upon the market for cured. The supply of calfskins is increasing as the season opens up. The prospects also point for a decline of 1c. per lb. in price. The following from Chicago, March 15: "Uninteresting market. Volume of business transacted was small, as demand was limited to peddling orders; packers, however, were not anxious sellers, being sold up fairly close, and prices held steady at 11c. for native steers, 9¾c. for light Texas, 9¾ to 10c for heavy do., 9¾c. for butt brands, 9¼ to 9½c. for branded cows, 8¾c. for Colorados, 10¼c. for heavy native cows and 10¾c. for light do.

PROVISIONS.—A fairly good Easter trade doing. All lines of smoked meats are in request. Long clear bacon is in better request. Barrel pork is moving more freely. There are fair offerings of dressed hogs from local hands. The movement from West Ontario is practically over for the season. The reduction in live hogs has had the effect of increasing deliveries of dressed hogs.

WOOL.—The local market is without features of special note. The demand from the domestic mills is good. At the new series of London wool sales there has been a full attendance of buyers. High prices have ruled, especially for scoured merinos; the French buyers were eager to secure faulty merinos. The firmness of Yorkshire operators kept prices up. Good cross-breds were in poor request, and sold in buyers' favor. America purchased Port Phillip greasy merinos at 11½d. South Australian sold well, the home trade taking lambs at high rates. Cape of Good Hope was generally poor and heavy, with a slow demand: mostly all were withdrawn.

MONTREAL MARKETS.

Montreal, 16th March, 1898.

Ashes.—The market is without a new feature: the English demand is very quiet, and local dealing of the lightest. Values rule at about $3.55 to 3.60 for first quality pots; seconds. $3.15 to 3.20; pearls, nominally about $4.75 per cental.

Cements and Firebricks.—The calling for tenders by the Government for 120,000 brls. of cement to be used on the Soulanges Canal, has created considerable interest in the trade, and will lead to a large amount of figuring among contractors. It is expected there will be a further call shortly for 80,000 brls. for the Trent Canal. Since last writing advices are to hand advising a further advance of sixpence a brl. by English makers, who it is reported, find difficulty in keeping deliveries up to present contracts. Local prices are as yet unaltered for either cements or firebricks.

Dairy Products.—The cheese market remains without any feature of interest, and the business doing is of the most limited character. Some dealers are said to be holding out for 8¼c. per lb. for finest, but find it impossible to put through any transactions at this figure, and from 7 to 8c. about represents the level of the market. Butter is moving more freely, and new made creamery sells at 20 to 21c. in this market, held makes 18 to 19c., fine new Townships dairy 18 to 20c., Western 16 to 17c. New laid eggs are down to 14 to 14½c. per doz., with plentiful supplies and a good demand.

Dry Goods.—The very mild weather of the past ten days has given a decided fillip to the retail trade, and wholesale houses report continued steady despatch of orders. The continuance of cheap railway fares has favored the visits of buyers from local, as well as Western points, and several buyers from the distant provinces have also been making fair selections. Collections are very fairly maintained, although the break-up of the snow roads in the interior has had some effect in this direction.

Fish.—For salt fish there is now but slow sale, and in fresh fish there is an easier feeling, owing to the continued mild spell. We quote:—Green cod, No. 1, $3.25 to 3 50; No. 1, large, $3.75 to 4.00; dry cod, $3.25 to 3.75; No. 1 herrings, $4 to 4.50; N. S. salmon, $12 to 13.00; B. C. ditto, $10.50 to 11.00; sea trout, $6.50 to 7.50; haddies, 6 to 6½c.; bloaters, $1 to 1.25 per box; boneless cod, 4½ to 5c. per lb.; whitefish, $4.75 to 5.00 per barrel.

Furs.—Only partial cable advices are as yet available regarding the London fur sales now in progress, and complete information will not be to hand for several days. As far as indicated, some decline is shown in otter and fisher, and a little advance in marten. We quote:—Mink, large dark $1.50; small, do., $1.00 to 1.25; marten, $1.75 to 2.25; fisher, $4.50 to 7.00; lynx, $1.00 to 2.00; otter, $1.00 to 12.00 for dark; pale, $5.00 to 7.00; red fox, large, $1.30 to 1.50; small, $1.00; cross fox, $3.00 to 6.00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large, $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7c. to 10c. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

Groceries.—The breaking up of the snow roads, owing to the heavy thaw of the past week, is felt to some extent in this line, and the movement is not as brisk as it was. Sugar refiners report quite a slack demand, but values are fairly steady, and we quote factory prices as follows: Standard granulated, 4⅜c.; Austrian refined, 4 to 4⅛c.; yellows, from 3½ to 3⅞c. per lb. Molasses is reported rather firmer on the island, and one of the local refineries is reported to have placed a first order for 1,000 puncheons, for refining purposes, at a figure equal to about 22⅛c. laid down here. On spot about 28c. is the figure for single puncheons, and 25½ to 26½c. for fair lots. Rice is still being sold on the old schedule, but the new price list for the ensuing year is expected to show quotations a shade lower. Teas continue somewhat dull, but importers are calculating on some improved demand from the West, as the result of the very considerable destruction of stocks warehoused with R. Carrie & Co., Toronto, whose premises were destroyed by fire a few days ago. In Japans values rule firm, and the impression seems to prevail that the market for new season's teas will open rather higher than last year. London advices indicate that Ceylons are a shade easier. The high price of canned goods is affecting the demand to some extent, but values are held pretty steady, and it is held that in some lines there will be a shortage before new supplies will be available. In most lines of California dried fruits there is some scarcity, with firmer values prevailing.

Hides.—The quality of the hides now coming in is very poor indeed, and it is said to be a difficult matter to get 10c. from tanners for No. 1 hides. The Chicago market is reported off a quarter of a cent for the week, and Eastern tanners are said to have bought some moderate lots in Toronto at low figures. Dealers are buying on the basis of 9 to 9½c. for No. 1. Receipts of calfskins are becoming more liberal, and they continue to be bought at 10c. for No. 1; and 8c. for No. 2 Spring lambskins are also beginning to come in, and realize 10c.; sheepskins average about $1, and clips 10 cents.

Leather.—Matters are rather quieter in this line. Shoe manufacturers are pretty well through with the cutting on spring stock, and the easier tendency in the hide market may have some withholding effect on buyers, though this weakening, which is really slight in character, is mainly due to the falling off in quality usual at the season, and it is held that leather prices are really low as compared with hide values. We quote:—Spanish sole B.A. No. 1, 25 to 26c.; do. No. 2, 22½ to 23½c.; No. 1 ordinary Spanish, 23 to 24c.; No. 2, 20 to 21c.; No. 1 slaughter, 27 to 28c.; No. 2 do., 22 to 24c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 20 to 21c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; bufted cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 13 to 13½c.: polished buff, 11 to 13c.; glove grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

Metals and Hardware.—No important transactions are reported in heavy metals since last writing. Pig iron values remain unchanged, and warrants are cabled at 46s. 3d. Domestic bars sell at $1.40 to 1.50 as to quality, and bands at $1.65 to 1.75. Plates unchanged: Ternes might be bought in fair quantity at $5.75, but in jobbing lots $5.90 to 6.00 is the prevailing figure. Lead continues to ease off, and the market in the United States is reported particularly dull. We quote: — Summerlee pig iron $18.00 to 18.50; Carron, No. 1, $18; No. 3, $17.25; Ayrsome, No. 1, $17.00; No 3, $16.50; Shotts, $17.25 to 17.50; Carnbroe, $17.00, ex-store; Ferrona, No. 1, $15 to $16; Hamilton No. 1, $16; No. 2, ditto, $15.50; machinery scrap, $14.00 to 15.00; common ditto, $12.00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates —Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do, I.X., $3.90 to 4.00; P. D. Crown, I. C., $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2 90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, etc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.65 to 1.75; English hoops $2.00 to 2.15. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1.50; three-sixteenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.50 to 3.55; sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 16 to 16½c. for L. & F.; Straits, 15½ to 16c.; bar tin, 16½ to 17c.; ingot copper, 12¼ to 12½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.60 to 4.75; Veille Montagne spelter, $4.60 to 4.75; American spelter, $4.50; antimony, 8 to 9c.

Oils, Paints and Glass.—Most of the houses in this line report good business, and some shipping of spring orders is already being done, though spring freight rates do not come into force till the 1st prox. The strong advance of last week in turpentine is fully maintained, and some further stiffening is deemed not improbable; values in other lines are steadily held. We quote:—Turpentine one to four barrels, 56c.; five to nine barrels., 55c., net thirty days. Linseed oil, raw, one to four barrels., 47c.; five to nine barrels, 46c.; boiled, one to four barrels, 50c.; five to nine brls., 49c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c. genuine red do., 4¼c.; No. 1 red lead, 4c.; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00. Paris green, 50 and 100 lb. drums, 15c.; 25 lb. drums, 15½c.; 1 lb. cartons, 16c.; pound tins, 16½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

THE LIVERPOOL WOOD MARKET.

The monthly circular of Messrs. Farnworth & Jardine, dated Liverpool, 1st March, 1898, has the following:

The arrivals from British North America during the past month have been 710 tons register, against 2,415 tons register during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1896, 1897 and 1898 has been 25,691, 27,069 and 33,704 tons respectively.

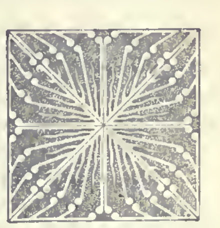
The business during the past month has been without animation: stocks generally are too heavy, and more than ample for the probable requirements of the trade until the new import comes forward; there is little change in values to report, but prices are maintained with difficulty. Contracting for the coming season is very restricted, and few sales have so far been arranged.

Canadian Woods.—*Pine Timber.*—Of both waney and square the deliveries have been on a small scale: values are unchanged, but stocks are too heavy. Red pine moves off slowly, and

Look up at your Ceiling!

If it looks dingy, better decide to cover both ceiling and walls with our

EMBOSSED METAL PLATES



150 Designs to choose from.

They make the most handsome interior finish you can find, and are also fire-proof and durable. Easily cleaned without harming the decoration.

They can be applied over plaster if necessary, and will add permanent beauty to your store or office.

Prices are moderate—write us for full information.

values rule low. *Oak.*—The consumption has been limited, values unchanged, and the stock is much too heavy. Elm has been in fair request; prices are steady, and the stock moderate. *Pine Deals, Boards, etc.*—The deliveries have been disappointing, and the stock is most excessive; values are unchanged, although difficult to maintain.

NEW BRUNSWICK AND NOVA SCOTIA SPRUCE AND PINE DEALS.—The import has consisted of a few small consignments by steamers, which have chiefly gone direct from the quay into consumption; there has been about an average consumption, but the stock is still much too heavy; values continue unsatisfactory, and contracts for the coming season can only be effected at low rates. Pine deals are in dull demand and difficult of sale.

BIRCH.—There has been no import of either logs or planks; the deliveries have been on a larger scale than for some months past; but the stock is still ample. Values continue unsatisfactory.

UNITED STATES OAK.—The import consists of a few small parcels of waney wood; with only a quiet demand, prices continue low, and the stocks, although not heavy, are sufficient. Oak planks have been imported freely and the deliveries have been fairly satisfactory, but the demand continues quiet and prices difficult to maintain. Stocks are sufficient. The total stock is about 312,000.

PITCH PINE.—The arrivals during the past month have been 4 vessels, 4,301 tons, as against 2 vessels, 2,599 tons, during a like period last year. Of hewn there has been no import and a good consumption has considerably reduced stocks. Of sawn, owing to the arrival during the last few days of two large sailing vessels, the import for the month is large, and the two cargoes now landing are included in the stock. Deals and boards have again come forward freely; a considerable quantity was disposed of by auction during the month, but stocks are still much too large.

OREGON AND BRITISH COLUMBIAN PINE.—There have been no arrivals. The deliveries show a little improvement, but prices are low and stocks excessive.

OF SEQUOIA (CALIFORNIAN REDWOOD)—Some large sales have been made and holders are demanding higher prices; the stock, however is quite sufficient.

UNITED STATES STAVES.—The arrivals have again been moderate, but quite sufficient; the demand generally is quiet, and prices difficult to maintain.

BALTIC AND EUROPEAN WOODS.—The arrivals during the past month have been 13 vessels, 6,954 tons, against 11 vessels, 5,960 tons during the like period last year. *Fir Timber.*—Has not been imported; the demand is very quiet, but stocks are moderate, and values steady. A few contracts have been made for next season's shipment. *Red and White Deals.*—There have been no arrivals, and the deliveries have been moderate; stocks are light and values unchanged. *Flooring Boards.*—The arrivals are earlier than last season and the deliveries have been fairly satisfactory; recent sales, however, have been at lower prices; stocks are adequate.

A BIG CANNERY.

British Columbia has its big salmon canneries, but Fairhaven, Wash., is about to have the largest cannery in the world, according to the statement of Mayor J. Wayland Clark. Heretofore the largest cannery in existence has been that of the Alaskan Packers' Association at Semiahmoo, which last year packed 106,000 cases of fish. The new cannery to be located at Fairhaven is to be constructed by B. A. Seaborg, vice-president of the Columbia River Packers' Association. A water-front location has been secured upon which will be erected a wharf 250x350 feet. The cannery building will be on this wharf. Construction will be begun by March 1st. In addition to the big cannery, Fairhaven will soon have a branch tin-can factory, put up by the Pacific Metal Works of San Francisco. Work on the factory will be begun within a month, and the capacity is said to be 15,000,000 cans during the season. Practically the whole output of the first run has already been contracted for.—*Victoria Times.*

—An "M.D." writing to the Springfield *Republican*, in regard to three well-advertised patent medicines, says one contains 17.2 per cent. of alcohol, one 18.8 per cent., and one 26.2 per cent. Wines average about 14 per cent. of alcohol, the strongest only going up to 17 or 18 per cent., and rye whiskey about 45 per cent.

—It is a common impression in New York State that the savings banks there hold millions of dollars in abandoned accounts. As a matter of fact, says the State Superintendent of Banks in his annual report, the total number of accounts which have been neglected for 22 years is only about 5,000, out of 1,800,000, and the aggregate sum involved is about $1,500,000 in a total due depositors of $766,684,900. Some 50 banks hold no such accounts, and half of the whole sum is held by a single bank in New York city.

—A story, which, if not true, is not told, runs to the effect that while the barque 'Cape City' was at Hong Kong a Chinaman was engaged to paint the necessary name on each bow. He produced on one bow the legend "Capecity," without a space between the two words. Then he noted that the "y" was nearest to the ship's stern, and, remembering the fact, he afforded an excellent example of how severely logical his race can be, for in a little while he had painted on the other bow the striking permutation, "Yticepac," to his own delight and the crew's amazement.—*Chamber's Journal.*

Millers' & Manuf'rs Ins. Co
Established 1885.

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.

DIRECTORS:
AS. GOLDIE, Pres. J. L. SPINK, Vice-Pres
Thos. Walmsley, Treas. Hugh Scott, Mgr. and Sec
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

THE CARE OF STEAM BOILERS.

Reports of government enquiries are sometimes tedious reading, and require an amount of patience and resolution on the part of those who wade through them that is often worthier of a better cause. This, however, can rarely be said of the reports on the Board of Trade enquiries with regard to boiler explosions: for these are often full of matter from which much useful information may be gathered, though they are not infrequently sad records of ignorance on the part of owners and attendants, which if it did not lead to terrible results, would be very amusing. The delightful simplicity of the engine tender, who, in a certain Yorkshire town, advised his master on no account to have his boiler insured, because every time the insurance company inspected it they would be sure to want some alterations made, and who recommended in place of periodical inspection by a qualified man, that the boiler should be charged from time to time with pigeon dung to prevent corrosion, is only surpassed by the culpability of a certain owner who worked a boiler for over 20 years without ever having it examined by a competent person.

These are only two cases taken at random out of a host of others, says *Engineering*, which all point to a lamentable lack of ordinary common sense with regard to the management of boilers We know from experience that there is a certain class of men in charge of driving plants who seem to regard the steam boiler as a thing almost beneath their notice, which ought to go on working with little or no repairs for years, and these men are quite aggrieved if their attention is called to the fact that the hard-working boiler may sometimes require a little attention. As a case in point, we can call to mind a man who had charge of a certain plant, consisting of two 70 indicated horse-power non-condensing engines and two boilers. This man was a first-rate fitter, but had little or no knowledge of boilers, and he sadly neglected the latter in his preference for the engine portion of his charge. We fear it is often men of this stamp who are responsible for the Board of Trade enquiries into the cause of boiler explosions. They do not necessarily mean to neglect their duties, but they seem to have got the idea that it is rather beneath them to pay any attention to boilers. How mistaken such policy is we need hardly point out: to anyone who will give the matter a moment's consideration the thing must be self-evident. There is no part of a factory that repays better a little considerate attention, as there is no part of it that exacts a more terrible penalty for continual neglect.

The best remedies for corrosion are generally the simplest and least expensive; but after all, there can be no hard-and-fast rule laid down as to what should and what should not be used, as so much depends on the water, the kind of boiler, the conditions of work, and many other things. Perhaps two of the simplest remedies ever used as a safeguard against incrustation are petroleum and common soda; but even these must be used with care, and in the proper proportions, else the evils that they cure may be less than those they bring about, and it all comes back to what we said before, that steam users should have some competent man to advise them, be he the engineer to a boiler inspection company or anyone else capable of giving sound advice on the subject.

There is a tendency with some people to regard boiler explosions as very mysterious, and as a necessary evil, while others have some pet theory which to their mind accounts for all mishaps. One of the hardest of these theories to kill is that known as "the spheroidal state of water," so dearly loved in certain quarters. Many and severe charges have been laid at its door, and we fear it is only time, and no stint of that, which will finally dispose of this long-cherished bogey. There is nothing mysterious about boiler explosions, and their cause can generally be traced to a very simple origin. The more steam users are brought to recognize this the better will it be, and Board of Trade enquiries are powerful means to that end.

In that excellent book, "A Treatise on Steam Boilers," written about twenty-five years ago by Robert Wilson, are these words:

"The practice of ascribing steam boiler explosions to obscure causes has been productive of much mischief, as it engenders a carelessness on the part of owners and attendants, who have been led to believe that no amount of care will avail against the mysterious agents at work within a boiler. Considering the too frequent want of care and knowledge on the part of those having the charge of boilers, and the great number of dangerous defects that are almost daily discovered by trained inspectors, the mystery to be solved is: How so many boilers escape explosion at the ordinary working pressure, and not what has been the cause of the disaster when an explosion does occur."—Boston *Journal.*

MERCERIZED COTTON.

A good deal is said in this issue of the *Reporter* about mercerized cotton. In our Leeds letter the subject is discussed from the point of view of the effects obtained, and in our Yorkshire letter the process of mercerizing is treated at great length. American manufacturers would do well to pay more than passing attention to this new departure in textiles, otherwise they may find their business suffering. Mercerizing, according to all accounts, has passed beyond the experimental stage, and is now considered a process from which the most important results may be obtained.

The process in its general features is not a new one, as it dates back to 1850, but it is only recently that it has been given wide application. Stated briefly, mercerized cotton is the closest imitation of silk that has been put upon the market for many years. It combines the lustre of silk with the strength of the best cotton. Long staple cotton (Egyptian and American) is treated with caustic potash and acid, which brings it to a gelatine condition, the fibres and cells shrinking up. It is then carbonized in a vacuum, and the fibres and cells expand and fit themselves into each other, so that the rays of light, as they fall on the fibres, are reflected instead of absorbed. The result is a great lustre, which is said to be permanent.

In our issue of February 3 was printed an editorial entitled, "Cotton Masquerading as Wool," in which reference was made to some very sightly samples which had recently been received by us from Bradford. We called attention to the very extensive use by Bradford manufacturers of cotton in the fabrication of dress goods, a sample of which goods may be seen at our offices. We neglected to state at the time that all the samples referred to in our editorial were made of cotton that had been subjected to the mercerizing process.

We are now informed by our Leeds correspondent that next season most of the English dress goods manufacturers "will be showing most exquisite designs and effects in all colors, with this mercerized cotton used for the figure and spot effects, where previously silk only has been employed, and it will require an expert to detect the difference." But it can be used for men's wear also, being excellently adapted to the requirements of the vesting trade, and to socalled worsted pantings.

Enough has been said to show the importance of the mercerizing process to American manufacturers. The attempt will undoubtedly be made by English manufacturers to use this process as a means to maintain their foothold in our markets. We have previously referred to the fact that "silk" linings made entirely of cotton (mercerized) have been shipped to the United States, and that light-weight worsteds fabricated from the same material have been exported to us in small amounts, with the hope that a large business would develop. And as for dress goods, the only people who were at all busy in Bradford were those engaged on this line in connection with cotton. The moral for the American manufacturer is obvious.—*American Wool and Cotton Reporter.*

CURRENCY VIEWS.

At the meeting of the Boston Shoe and Leather Club the other day, Mr. Edward Atkinson was one of the speakers. He said: "I will add only a word to one subject to which Mr. Fairchild called your attention, the inherent vice of legal tender. I did not get my own mind clear of obscurity until I went back to the original history of legal tender. It is now easily read up in recent books. Ten years ago it was a very difficult matter. Money was in use before coinage existed, before any act of legal tender, and the first act of legal tender was a decree born in fraud to scale down the debts of Greece, by the decree of the ruler forcing creditors to take the silver coin at 27 per cent. less than the quantity named, and called for by the name. From that date down to the present time there has not been any act of legal tender except those that have been made in 1817, to keep subsidiary coin in the country by act of legal tender, coupled with the conditions making that subsidiary currency redeemable in the superior currency, that has not been either a fraud upon the people or enacted for the purpose of collecting a forced loan. Every case through all history in all nations down to our own continental currency, greenbacks and all, have been either to cheat the people by forcing them under an act of legal tender to take either less than the weight of metal promised or else for the purpose of collecting forced loans under the stress of war. I will remind you of one other thing. The standard of foreign commerce is the pound sterling. There is no legal act establishing the pound sterling as the standard. In fact, there is no pound sterling coined of gold, and yet the whole commerce of the world, with scarcely an exception, is to-day conducted in terms of money under the name of pound sterling without an act of legal tender and without existing coins of that name. The equivalent is the sovereign, but if the sovereign is less than 113,000 grains of gold it cannot be forced upon you in place of a draft for a pound sterling. You can break up every silver man by proposing to him: 'Yes, we will accept free coinage; we will open the mints to free coinage of gold, silver and copper to any extent, that any man may bring metal to the mint to be verified, certified and stamped, provided you will not ask or demand in connection with their coinage the right to force one in the place of the other. Leave every man free to make his contract in either coin, and you may have free coinage to any extent.' That breaks them all up. There is no possible reply. It develops the fact that their object is to cheat the people with what they call cheap money under an act of force which is an act of legal tender."

—At the annual meeting of the shareholders of the Commercial Cable Company, held on the 7th inst., the following directors were elected: John W. Mackay, James Gordon Bennett, Gardiner G. Howland, Col. William Jay, George G. Ward, Sir William C. VanHorne, Edward C. Platt, Right Hon. Lord Strathcona and Mount Royal, G.C.M.G.; Charles R. Hosmer, Thomas Skinner, Clarence H. Mackay, Albert B. Chandler, Dumont Clarke, In reply to a question from a shareholder, Mr. Ward stated that the Cable Company's gross earnings for the months of January and February, 1898, were the largest for those two months in the history of the company.

AMONG the many trade journals published in Canada The Monetary Times holds a very high position. Since 1866, when it was first issued, it has been recognized as an authority on all matters relating to the commercial life of the country. It has always had a large circulation amongst all classes of the business community in every part of the Dominion, and no matter what other papers crop up there are very few merchants who will drop The Monetary Times in their favor.

These are well-known facts. Are you an advertiser? If not we solicit respectfully your consideration of the advisability of advertising in these columns. Rates on application.

Money in Insurance
WHEN SECURED

ON THE COMPOUND INVESTMENT
PLAN OF THE
NORTH AMERICAN LIFE
ASSURANCE COMPANY

The special provisions of this advantageous plan of Insurance are:

(1) The return as a mortuary dividend of all premiums paid beyond the 10th year, together with the face of the policy should death occur within the investment period selected.

(2) The loan to the insured if desired of all premiums beyond the 10th year, and should death occur after that and within the investment period selected, the full face value of the policy is payable, premium loans, if any, being cancelled.

The North American has a larger ratio of assets to liabilities and net surplus to liabilities than any other Canadian Company.

Pamphlets explanatory of the Compound Investment and other attractive plans of insurance furnished on application to

WM. McCABE,
Managing Director
Head Office, TORONTO.
